They laughed when I told them I could...
Turn \$11 Into \$3825.00 With 10 Minutes
Work... *But when I showed them [this](#)...*

They stopped laughing, picked up their phones and started copying what I was doing...

And you will too.

- Do you own a smartphone, a computer (desktop or laptop) or a tablet?
- Do you have, or can you get access to the internet?

Yes?

Then In this document I'll reveal the same; zero risk 'secret' crypto formula I shared with a room full of sniggering friends, which made them stop laughing, gasp in disbelief, and start doing the same thing I was doing within minutes.

So how is it possible to turn *\$11 Into \$3825.00 with just 10 minutes of work, zero risk, and zero cost, even if you are a complete beginner?

*figure correct at the time of writing. Figure may be lower or higher when you read this.

Well remarkably it's actually pretty easy, even for a tech dunce like me, providing you know where to look, and which steps to take.

This Formula Makes It Possible.

It starts with a process you may already have heard of called 'compounding'

...Because, this simple mathematical formula can

Turn 1 Penny Into \$10,000,000 in 31 Days

No, that's not a misprint... That really is 10 Million Dollars

Formula:

E.G. If I take a penny out of my pocket, and then double that penny each day for just one month, I'd have over \$10 Million dollars by the end of day 31.

Here's the numbers so you can run the calculations for yourself:

1	\$0.01	11	\$10.24	21	\$10,485.76
2	\$0.02	12	\$20.48	22	\$20,971.52
3	\$0.04	13	\$40.96	23	\$41,943.04
4	\$0.08	14	\$81.92	24	\$83,886.08
5	\$0.16	15	\$163.84	25	\$167,772.16
6	\$0.32	16	\$327.68	26	\$335,544.32
7	\$0.64	17	\$655.36	27	\$671,088.64
8	\$1.28	18	\$1,310.72	28	\$1,342,177.28
9	\$2.56	19	\$2,621.44	29	\$2,684,354.56
10	\$5.12	20	\$5,242.88	30	\$5,368,709.12
				31	\$10,737,418.23

As you can see from the screen shot above, for the first 10 days the gains are pretty small. From day 11 through to 17 the compounding effect starts to pick up speed, and from day 18 onwards the numbers become crazier and crazier.

So much so that by day 28 my 1 penny investment is now worth over a million dollars at **\$1,342,177.28**.

And by day 31 that same penny is now worth over **10 Million Dollars!**

That's the power of compounding, and it's why the process is often referred to as... **'The Eighth Wonder Of The World'**

But those are just numbers on a page, what you see above is merely an example of how compounding works, and as much as I'd like to be able to double my penny every single day, and make over 10 Million Dollars by the end of the month, it's never going to happen....

But what I did discover comes pretty close IMO, which is **How I Can Turn \$11 Into \$3825** with as little as 10 minutes work, and without any skill whatsoever.

So what did I discover?

And how can this process be applied in the real world with a few clicks in just minutes...

...All while you & I sit there sipping our morning coffee.
Or in my case; while I hung out with friends, beer in one hand, and phone in the other.

First and foremost this formula only works in the DeFi space.

Now if you're anything like my bunch of friends... the ones that laughed at me, until I showed them what I was doing...

...You'll either be really enthusiastic about crypto, you won't be the slightest bit interested in crypto, or you might be terrified by the up & down, unstable nature of crypto.

But, you'll probably still want to know how I can turn \$11 into over \$3,800, won't you?...

Most of the guys I showed this little crypto trick to didn't have a clue about crypto, most still don't, yet they couldn't pick their phones up fast enough when I showed them how easy this was to do, and told them that...

This isn't really about crypto...

It's simply about using crypto as a vehicle to **turn tiny amounts of money into large amounts of money.**

So, if you're not into crypto, have no interest in crypto, even if you're terrified of crypto, or simply don't know the first thing about it... **don't worry.**

You don't have to be into it, you don't even have to like it, and you certainly don't have to learn anything new.

You just have to follow the same steps I shared with my buddies which you can do from your smartphone, or any other device which has an internet connection.

Ready?

Let's begin here:

Risk vs Reward

When I showed my friends how to turn \$11 Into \$3825 I asked them if they were prepared to risk that initial \$11?

Without a single hesitation they all said YES...

Because the reward massively outweighs the risk, and what's the worst thing that can happen?

Well the worst case scenario is; They might lose part, or all of their \$11.

But, as we sat there discussing worst case scenarios, Sean (one of my friends) arrived back at the table with another round of drinks, which had just cost him over 20 bucks.

So for me, and for my friends, risking a mere 11 bucks to get over \$3800 was a risk worth taking.

...If I asked you the same question...

What would your answer be?

Would you risk \$11?

*figure correct at the time of writing. Figure may be lower or higher when you read this.

Nearly everyone says YES...

But here's the real beauty of this 'little known crypto system' - You don't have to use your own money, unless you want to.

Because we can get our \$11 stake money for FREE!

FREE MONEY?

How? It starts as free crypto which is then converted into USD.

There are lots of ways of acquiring free crypto online which you can instantly turn into USD (Cash) if you know where to look, but my personal favourite, and the one that I shared with my friends is a simple 4 click process (for real)... [View The 4 Click Method Here](#)

I log in, I click between 1 & 4 lines of text, and I get free crypto.

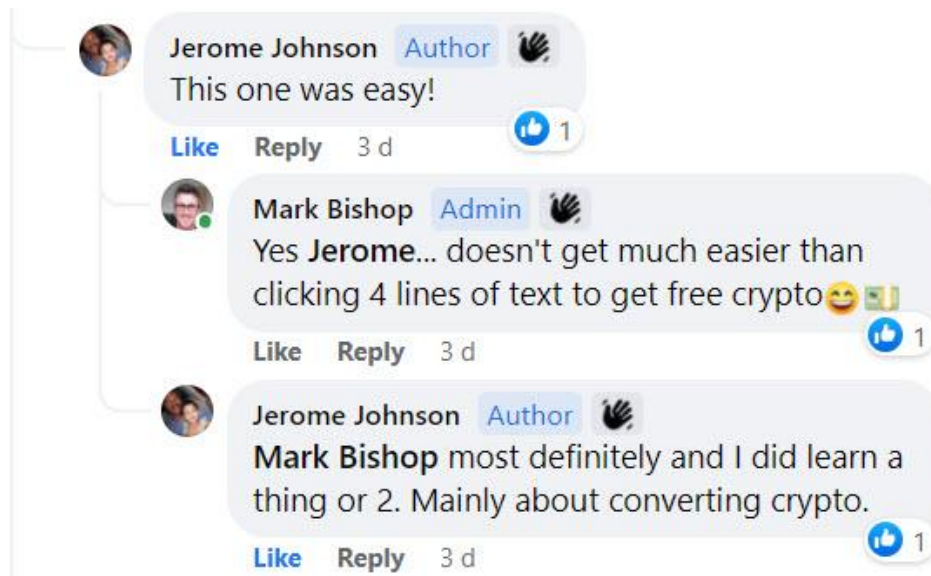

To prove this worked to my friends, I picked up Sean's phone, I logged in, and I got him free crypto in literally seconds while the rest of my friends stared in disbelief.

But seeing is believing, and within minutes they were all at it...

And so are nearly 800 other people I shared this with.

Here's what a few of them said.

I followed the instructions, which were simple and straight forward.

[View My 5 Free Crypto Methods Here](#)

Includes the 4 click method I've shared with around 800 people so far.

Risk vs Reward Cont'd

So, if you were to follow the same steps I shared with my friends, as well as roughly 800 others, which you can do today without needing to know anything at all about crypto.

Then the worst possible outcome is...

...**You lose** some, or all of the FREE Money you acquired in minutes for clicking 4 lines of text.

Which I believe is... **No Risk At All!**

Risk free, cost free, is without doubt the best starting point for anything new you try, wouldn't you say?

That's what nearly everyone I've shown this to agreed, and it's certainly what my friends thought, especially as most of them didn't know the first thing about crypto, and had no interest in it either...

But what really blew them away was the one 'very special' and 'totally unique' crypto website I showed them, which very few people know about (even those that know a thing or two about the crypto industry).

Special & unique because it's configured to multiply crypto by an unbelievable...

383,000% (APY)

Unbelievable, but true... 383,000% could never exist outside of DeFi (Crypto space) it just isn't possible. But inside DeFi & using this system... The sky really is the limit, and dreams can come true.

I.E. **This is how we can turn \$11 Into \$3825.00**

See the calculator below ↓

Calculator

Estimate your returns

Amount	APY (%)
1 Max	383025.8 Current
Price at purchase (\$)	Future market price (\$)
10.72 Current	10.72 Current

————— ○ ○ —————

Your initial investment	\$10.72
Current wealth	\$10.72
Rewards estimation	356.87531
Potential return	\$3825.70342

Yes we're doing this in the crypto space, but like I said... this isn't really about Crypto as such - It's about using Crypto as a vehicle to **Increase small amounts of money into large amounts of money.**

And we can do it without risking a single cent of our own money, and without spending more than about 10 minutes setting it up.

It's what I do, It's what my friends are now doing, and it's something you can do too, even if you still don't have the foggiest idea about crypto.

[**Click Here For Full Step By Step Instructions**](#)

Yes... Even complete beginners can do this

Confused?

Don't worry... my friends were too, even though they were seeing it with their own eyes. What they wanted to know was, how the hell was this even possible, you're probably wondering the same?

The first point to remember is: This can only happen in DeFi (Decentralised Finance, or to you and I, the crypto space) outside of DeFi, a system like this could never exist.

The answer none of my friends understood was...

This works because it uses: **ASAC** (Auto Staking & Auto Compounding Protocol)

I.e. when someone invests (in our case just under *11 bucks) the site protocol starts work compounding that investment. But rather than compounding every year like you'd get outside of DeFi...

*figure correct at the time of writing. Figure may be lower or higher when you read this.

...It compounds **96 times a day, every day, 7 days a week.**

Remember the 1 penny into \$10 Million compounding example I told you about? Well this works in a similar way, obviously not to the penny doubling daily extent, but it's based on a similar equation.

For example;

- Let's say John puts 11 bucks in...
- And then In 15 minutes time John will receive a reward on his eleven dollars (rewards are paid 96 times each day, or every 15 minutes).
- Then because this system uses 'ASAC' (Auto Staking & Auto Compounding Protocol) the reward John received will be added to the initial \$11 he put in (let's call it 'The Pot').
- So the next time John receives a reward (in another 15 minutes) then that reward will be based on the initial 11 bucks as well as

the last reward (The Pot), this happens 96 times each day which means John's Pot (Initial \$11 Plus rewards) continues to increase.

- Each reward increases the pot, and the next reward is based on the increased pot size, and this protocol will continue without John lifting another finger, until he's ready to cash out.

That's how \$11 can turn into \$3825.00 with less than 10 minutes work.

That's what I told my friends, that's what I showed them... They saw it with their own eyes, they stopped laughing, and they were all on it like bees to honey.

And you can join them, in minutes... without needing to know anything about crypto... (genuinely).

Think about this for a moment...

If \$11 can turn into \$3825.00 using this auto staking, auto compounding protocol, how much more would 20 bucks make, or 50? *I'll leave you to do the calculations.*

But if you would like to use this system yourself you can... it's no skin off my nose, it doesn't matter if 10 people start doing this today, or another 10,000...

This isn't a 'saturation is a problem' kind of thing, quite the opposite in fact... The only downside for those who are not already in the system is; as more people get to hear about the site we're using, then that 11 bucks to start off might become 20 bucks, or 50.

Which is why, if you would like to do this too, I'd recommend starting sooner rather than later, and use the free money (free crypto) I mentioned.

[Click Here To Get Started Now](#)

Before everyone else gets wind of this... Which is likely to happen about now.

Remember: we use free money, which starts off as free crypto. We turn that free crypto into USD instantly... And then we put it into the auto staking, auto compounding protocol...

...And the protocol does the rest for us.

No risk, no cost, no work (apart from around 10 minutes to set it up)...

And anyone can do the same... even complete beginners.

[Take a look and see for yourself.](#)
