Section 5. Fire-fighting measures

Product AS SOLD

- Suitable fire extinguishing media** : Use dry chemical, CO₂, water spray (fog) or foam.
- Specific hazards arising from the chemical** : Flammable liquid and vapor. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Runoff to sewer may create fire or explosion hazard. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.
- Hazardous thermal decomposition products** : Decomposition products may include the following materials:
carbon dioxide
carbon monoxide
- Specific fire-fighting methods** : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.
- Special protective equipment for fire-fighters** : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

| | | |
|----------------------------------|--|--------------------------------|
| | Product AS SOLD | Product AT USE DILUTION |
| Personal precautions | : Eliminate all ignition sources. Use personal protective equipment as required. Do not touch or walk through spilled material. | Product is sold ready to use. |
| Environmental precautions | : Avoid contact of large amounts of spilled material and runoff with soil and surface waterways. | |
| Methods for cleaning up | : If emergency personnel are not present, contain and collect small spillages with non-combustible absorbent material, e.g. sand, earth or other suitable material and place in a suitable container for disposal. Use a water rinse for final clean-up. | |

Section 7. Handling and storage

| | | |
|-----------------|---|--------------------------------|
| | Product AS SOLD | Product AT USE DILUTION |

If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. | Product is sold ready to use. |
| Personal protection | | |
| Eye protection | : No protective equipment is needed under normal use conditions. | |
| Hand protection | : Due to the form and packaging of the product, no protective equipment is needed under normal use conditions. | |
