4. On the first day of the circuit riders can nominate a height, they can then downgrade at second circuit day, but they must remain at that height or higher for the remainder of the circuit.
5. At the end of five wins, the rider has the option of staying at the original height and not accumulating points or advancing to the next height and continuing for another five wins with points. Then after ten wins they may choose to advance to the next height and continue with points or remain at second height collecting points and take minus 20 points at last circuit day. If the combination is riding at the maximum height the combination continues to get the points even after 5 wins at the maximum height.
6. If there is only one rider in a class the handicap system will take place, whereby the rider's score and time will be compared with the class one height lower to ascertain their placing for points allocation.
7. Each circuit day entered you must state a nominated height.
8. You can ride below or above your nominated height, but no points will be awarded.
9. A rider/mount combination can only ride at 2 heights throughout the day.
