

Mission Trip Vaccinations

The Centers for Disease Control (www.cdc.gov) divides vaccines for travel into three categories: All Travelers, Most Travelers, and Some Travelers. You should consult your doctor for information regarding which vaccines you should receive. To participate in a Family Church Mission Trip you must have the vaccines that “All Travelers” are listed as needing. We strongly suggest you also have the vaccines for “Most Travelers”.

Immunizations and vaccination consultations can be made through your family physician or are available through the Palm Beach County Department of Health. The Palm Beach County Department of Health charges fees for this service. Some immunizations require multiple injections. You are encouraged to schedule any required immunizations at least 45 days in advance of departure.
