PERSONAL & GROUP REFLECTION

PART 1

REFLECTION QUESTIONS:

1. Helping people in their first few years of marriage is often overlooked in the church. Why is it difficult to connect and share helpful content with people during their first years of marriage?
2. As you look over the topics Jim discussed, which ones do you believe are most critical to developing a successful marriage?
3. Jim mentioned that when a baby arrives, marital satisfaction is often less than before the baby. Besides the practical suggestions Jim provided, are there other principles you can think of to help couples thrive in their marriage relationship even after the baby's arrival?
4. It seems like relational drift begins to happen in the first few years. What was a key point from the video course that you see as critical to marital success?
5. A healthy sexual relationship is also key to a successful marriage. For many couples this is a complicated subject. What point stuck with you from that session?
