

## Data Driven Decisions

IQCare—International Quality Care is a freely available electronic health record application system that has many features to meet your clinic or facility’s needs. Deployed in over 100 locations in Nigeria, Uganda, Zimbabwe, and Kenya, IQCare has a proven track record of success for flexible form building tools, capturing quality data and providing decision support information for clinician. In tandem with IQTools, a report query tool, IQCare is the foundation for efficient and effective day-to-day patient management and any monitoring and evaluation program. With the form builder feature, you can easily create any data capture form you need for any department in your facility. You’ll be able to configure queries to run reports required by the Ministry of Health or by clinicians and program managers.

### Key IQCare Features

- Clinical forms—static and dynamic
- Comprehensive drug configuration
- ICD10 disease and symptom configuration
- Patient level clinical support
- Paperless or paper-based set up
- Supply chain management with pharmaceutical dispensing
- Program management with debit note generation
- Integration with query tools and IQTools

## Flexible and Easy-to-Use

### Highly Configurable

- Departments
- Form builder
- Data driven business rules
- Custom lists
- User security
- Facility home page
- Patient home page
- Patient statistics and alerts

IQCare for clinicians (web browser)

- Fill in patient forms
- Run reports
- Set up custom lists
- Set up access control

IQCare for administrators and pharmacists (Windows forms)

- Establish programs
- Build forms
- Track inventory
- Dispense drugs/items
