

Management's Discussion and Analysis

As management of the NAME OF GOVERNMENT, we offer readers of the NAME OF GOVERNMENT'S financial statements this narrative overview and analysis of the financial activities of the NAME OF GOVERNMENT for the fiscal year ended June 30, 2022. We encourage readers to consider the information presented here in conjunction with additional information that we have furnished in our letter of transmittal, which can be found on pages 3-7 of this report.

Financial Highlights

- The assets and deferred outflows of resources of the NAME OF GOVERNMENT exceeded its liabilities at the close of the most recent fiscal year by \$257,381,778 (*net position*). Of this amount, \$15,861,380 represents unrestricted net position, which may be used to meet the government's ongoing obligations to citizens and creditors.
- The NAME OF GOVERNMENT'S total net position decreased \$16,822,869 because of a requirement to make contributions to an other postemployment benefits (OPEB) plan established during the current period.
- At the close of the current fiscal year, the NAME OF GOVERNMENT'S governmental funds reported combined fund balances of \$26,319,196, a decrease of \$15,418,066 in comparison with the prior year. Approximately 42% of this amount (\$11,175,698) is available for spending at the government's discretion (*unassigned fund balance*).
- At the end of the current fiscal year, unrestricted fund balance (the total of the *committed*, *assigned*, and *unassigned* components of *fund balance*) for the general fund was \$18,657,783, or approximately 14.6% of total general fund expenditures.
- The NAME OF GOVERNMENT'S total outstanding long-term debt decreased by \$1,360,166 during the current fiscal year because short-term financing was used to provide resources for certain projects in anticipation of the future issuance of long-term bonds.

Overview of the Financial Statements

The discussion and analysis provided here are intended to serve as an introduction to the NAME OF GOVERNMENT'S basic financial statements. The NAME OF GOVERNMENT'S basic financial statements consist of three components: 1) government-wide financial statements, 2) fund financial statements, and 3) the notes to financial statements. This report also includes supplementary information intended to furnish additional detail to support the basic financial statements themselves.

Government-wide Financial Statements. The *government-wide financial statements* are designed to provide readers with a broad overview of the NAME OF GOVERNMENT'S finances, in a manner similar to a private-sector business.

The *statement of net position* presents financial information on all of the NAME OF GOVERNMENT'S assets, liabilities, and deferred inflows/outflows of resources, with the difference reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the NAME OF GOVERNMENT is improving or deteriorating.

The *statement of activities* presents information showing how the NAME OF GOVERNMENT'S net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, *regardless of the timing of related cash flows*. Thus, revenues and expenses are reported for some items that will only result in cash flows in future fiscal periods (e.g., uncollected taxes and earned but unused vacation leave).

Both of the government-wide financial statements distinguish functions of the NAME OF GOVERNMENT that are principally supported by taxes and intergovernmental revenues (*governmental activities*) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (*business-type activities*). The governmental activities of the NAME OF GOVERNMENT include general government, public safety, highways and streets, sanitation, and culture and recreation. The business-type activities of the NAME OF GOVERNMENT include a Water Authority and a transit operation.

The government-wide financial statements include not only the NAME OF GOVERNMENT itself (known as the *primary government*), but also a legally separate urban renewal agency and a legally separate cable television operation for which the NAME OF GOVERNMENT is financially accountable. Financial information for these component units is reported separately from the financial information presented for the primary government itself. The Water Authority, although also legally separate, functions for all practical purposes as a department of the NAME OF GOVERNMENT, and therefore has been included as an integral part of the primary government.

The government-wide financial statements can be found on pages 30-31 of this report.

Fund Financial Statements. A *fund* is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The NAME OF GOVERNMENT, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the NAME OF GOVERNMENT can be divided into three categories: governmental funds, proprietary funds, and fiduciary funds.

Governmental Funds. *Governmental funds* are used to account for essentially the same functions reported as *governmental activities* in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on *near-term inflows and outflows of spendable resources*, as well as on *balances of spendable resources* available at the end of the fiscal year. Such information may be useful in assessing a government's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for *governmental funds* with similar information presented for *governmental activities* in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between *governmental funds* and *governmental activities*.

The NAME OF GOVERNMENT maintains ten individual governmental funds. Information is presented separately in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures, and changes in fund balances for the general fund, the capital

projects fund, and the debt service fund, which are considered to be major funds. Data from the other seven governmental funds are combined into a single aggregated presentation. Individual fund data for each of these nonmajor governmental funds is provided in the form of combining statements in the combining and individual fund statements and schedules section of this report.

The NAME OF GOVERNMENT adopts an annual appropriated budget for its general fund. A budgetary comparison statement has been provided for the general fund to demonstrate compliance with this budget.

The basic governmental fund financial statements can be found on pages 32-36 of this report.

Proprietary Funds. The NAME OF GOVERNMENT maintains two different types of proprietary funds. *Enterprise funds* are used to report the same functions presented as *business-type activities* in the government-wide financial statements. The NAME OF GOVERNMENT uses enterprise funds to account for its Water Authority and for its transit operation. *Internal service funds* are an accounting device used to accumulate and allocate costs internally among the NAME OF GOVERNMENT'S various functions. The NAME OF GOVERNMENT uses internal service funds to account for the management of its retained risks and for its fleet of vehicles. Because both of these services predominantly benefit governmental rather than business-type functions, they have been included within *governmental activities* in the government-wide financial statements.

Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail. The proprietary fund financial statements provide separate information for the Water Authority and for the transit operation, both of which are considered to be major funds of the NAME OF GOVERNMENT. Conversely, both internal service funds are combined into a single, aggregated presentation in the proprietary fund financial statements. Individual fund data for the internal service funds are provided in the form of combining statements in the combining and individual fund statements and schedules section of this report.

The basic proprietary fund financial statements can be found on pages 37-39 of this report.

Fiduciary Funds. Fiduciary funds are used to account for resources held for the benefit of parties outside of the government. Fiduciary funds are *not* reported in the government-wide financial statements because the resources of those funds *are* not available to support the NAME OF GOVERNMENT'S own programs. The accounting used for fiduciary funds is much like that used for proprietary funds.

The NAME OF GOVERNMENT maintains three different types of fiduciary funds. The *Pension trust fund* is used to report resources held in trust for retirees and beneficiaries covered by the *Public Safety Employees' Pension Plan*. The *Private-purpose trust fund* is used to report resources held in trust for prisoners to use to make purchases at the prison canteen. The *Agency fund* reports resources held by the NAME OF GOVERNMENT in a custodial capacity for individuals, private organizations and other governments.

The fiduciary fund financial statements can be found on pages 40-41 of this report.

Notes to the Financial Statements. The notes provide additional information that is necessary to acquire a full understanding of the data provided in the government-wide and fund financial statements. The notes to the financial statements can be found on pages 43-76 of this report.

Other Information. In addition to the basic financial statements and accompanying notes, this report also presents *required supplementary information* concerning the NAME OF GOVERNMENT'S progress in funding its obligation to provide pension and OPEB benefits to its employees. Required supplementary information can be found on page 77 of this report.

The combining statements referred to earlier in connection with nonmajor governmental funds and internal service funds are presented immediately following the required supplementary information on pensions and OPEB. Combining and individual fund statements and schedules can be found on pages 79-89 of this report.

Government-wide Overall Financial Analysis

As noted earlier, net position over time, may serve as a useful indicator of a government's financial position. In the case of the NAME OF GOVERNMENT, assets and deferred outflows of resources exceeded liabilities by \$257,381,778, at the close of the most recent fiscal year.

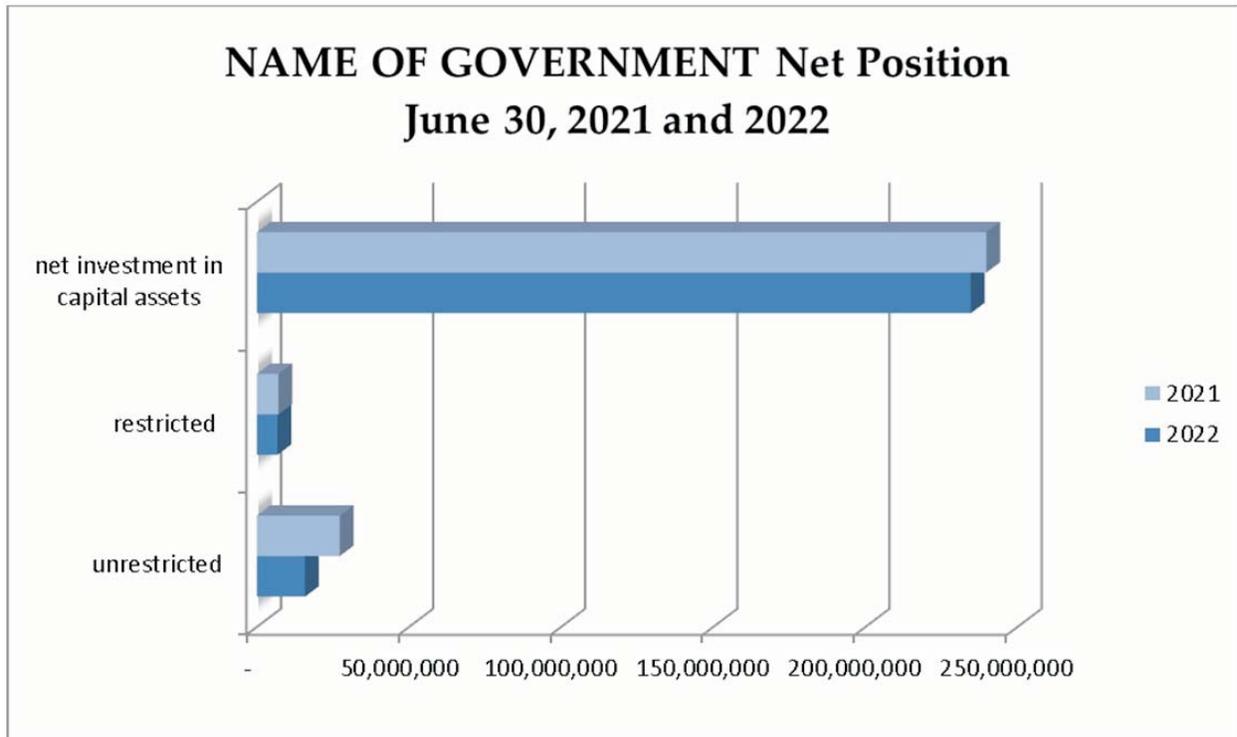

NAME OF GOVERNMENT'S Net Position

	Governmental activities		Business-type activities		Total	
	2022	2021	2022	2021	2022	2021
Current and other assets	\$ 56,683,011	\$ 85,453,483	\$11,375,197	\$ 9,759,615	\$ 68,058,208	\$ 95,213,098
Capital assets	287,386,484	283,764,694	39,986,158	39,818,579	327,372,642	323,583,273
Total assets	344,069,495	369,218,177	51,361,355	49,578,194	395,430,850	418,796,371
Total deferred outflows of resources	726,762	611,528		1,353	726,762	612,881
Long-term liabilities outstanding	102,557,945	92,165,863	10,361,034	11,138,206	112,918,979	103,304,069
Other liabilities	20,175,107	37,243,344	5,681,748	4,657,192	25,856,855	41,900,536
Total liabilities	122,733,052	129,409,207	16,042,782	15,795,398	138,775,834	145,204,605
Net position:						
Net investment in capital assets	205,692,289	211,236,392	29,056,307	28,563,887	234,748,596	239,800,279
Restricted	6,771,802	7,147,294	-	-	6,771,802	7,147,294
Unrestricted	9,599,114	22,036,812	6,262,266	5,220,262	15,861,380	27,257,074
Total net position	\$222,063,205	\$240,420,498	\$35,318,573	\$33,784,149	\$257,381,778	\$274,204,647

By far, the largest portion of the NAME OF GOVERNMENT'S net position (91.3%) reflects its investment in capital assets (e.g., land, buildings, machinery, equipment, vehicles, and infrastructure), less any related outstanding debt that was used to acquire those assets. The NAME OF GOVERNMENT uses these capital assets to provide a variety of services to its citizens. Accordingly, these assets are not available for future spending. Although the NAME OF GOVERNMENT'S investment in capital assets is reported net of related debt, it should be noted that the resources used to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

An additional portion of the NAME OF GOVERNMENT'S net position (2.6%) represents resources that are subject to external restrictions on how they may be used. The remaining balance of \$15,861,380 is unrestricted and may be used to meet the government's ongoing obligations to its citizens and creditors.

At the end of the current fiscal year, the NAME OF GOVERNMENT is able to report positive balances in all reported categories of net position, both for the government as a whole, as well as for its separate governmental and business-type activities. The same situation held true for the prior fiscal year.

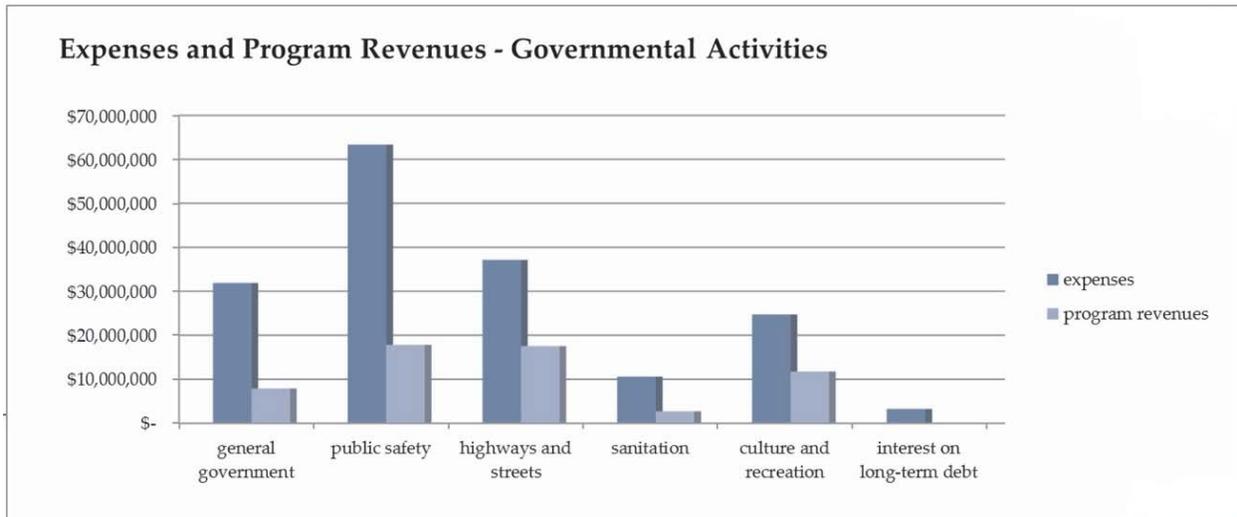

However, the NAME OF GOVERNMENT'S overall net position decreased \$16,822,869 from the prior fiscal year. The reasons for this overall decrease are discussed in the following sections for governmental activities and business-type activities.

Governmental Activities. During the current fiscal year, net position for governmental activities decreased \$18,357,293 from the prior fiscal year for an ending balance of \$222,063,205. While the current recession certainly had an impact on the NAME OF GOVERNMENT, management was able to take various actions (e.g., increasing rates for certain revenue sources, delaying certain nonrecurring expenses, reducing expenses related to non-essential ongoing programs in the culture and recreation function) that neutralized its effect on governmental activities. The decrease in the overall net position of governmental activities is the result of a recently negotiated OPEB plan that will provide health care benefits to current and future retirees and their spouses and dependents during the life of the retiree. This plan became effective during the current year and the initial annual required contribution (ARC) for the plan, which normally is the measure of expense for the period, was \$18,721,000. See pages 62-63 of the notes to the financial statements for more details about this OPEB plan.

NAME OF GOVERNMENT'S Changes in Net Position

Total expenses	170,821,634	157,049,657	14,422,382	14,118,571	185,244,016	171,168,228
Increase (decrease) in net position before transfers	(14,629,084)	(4,117,565)	(2,193,785)	(2,751,741)	(16,822,869)	(6,869,306)
Transfers	(3,728,209)	(3,604,638)	3,728,209	3,604,638	-	-
Increase (decrease) in net position	(18,357,293)	(7,722,204)	1,534,424	852,897	(16,822,869)	(6,869,307)
Net position – beginning	240,420,498	248,142,701	33,784,149	32,931,252	274,204,647	281,073,953
Net position – ending	\$222,063,205	\$240,420,498	\$35,318,573	33,784,149	\$257,381,778	\$274,204,647

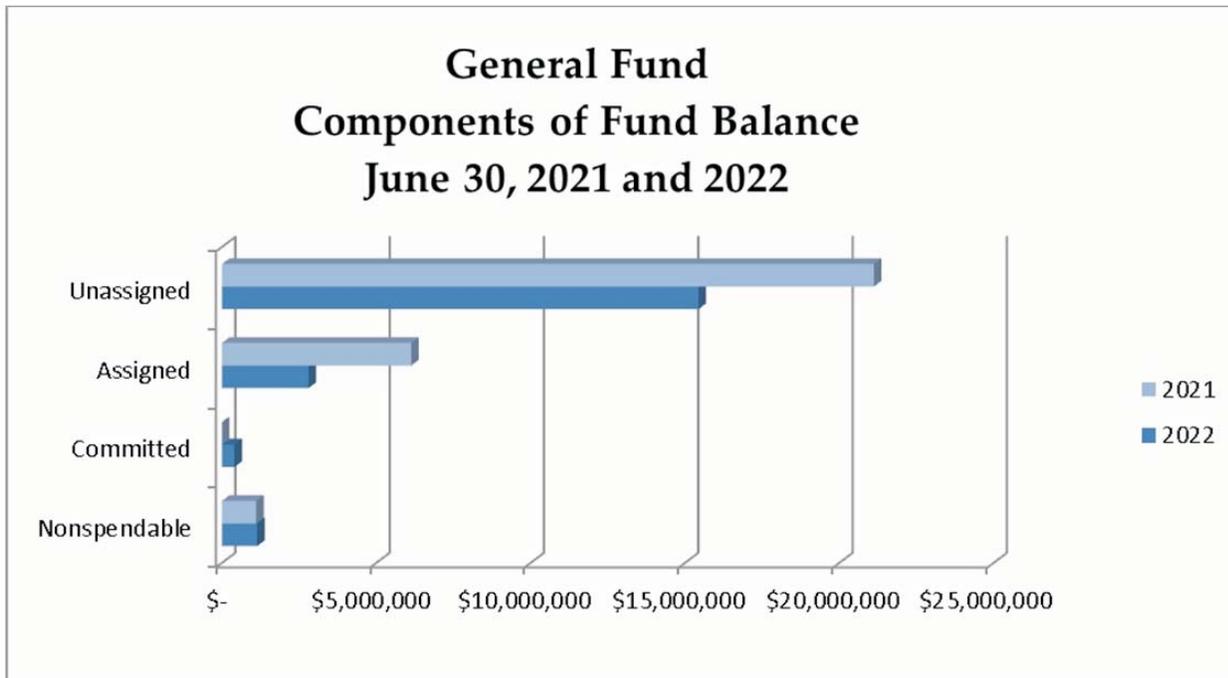

Business-type Activities. For the NAME OF GOVERNMENT’S business-type activities, the results for the current fiscal year were positive in that overall net position increased to reach an ending balance of \$35,318,573. The total increase in net position for business-type activities (water and transit funds) was \$1,534,424 or 4.5% from the prior fiscal year. The growth, in large part, is attributable to a 5% water rate increase enacted for the fiscal year 2021-22 budget. As a result, revenues from water activity charges for services increased \$922,179, over the previous year’s amount. An additional cause for the overall increase was the receipt of an unexpected capital grant of \$250,000 restricted for use in purchasing upgraded vehicles for the transit operation.

Financial Analysis of Governmental Funds

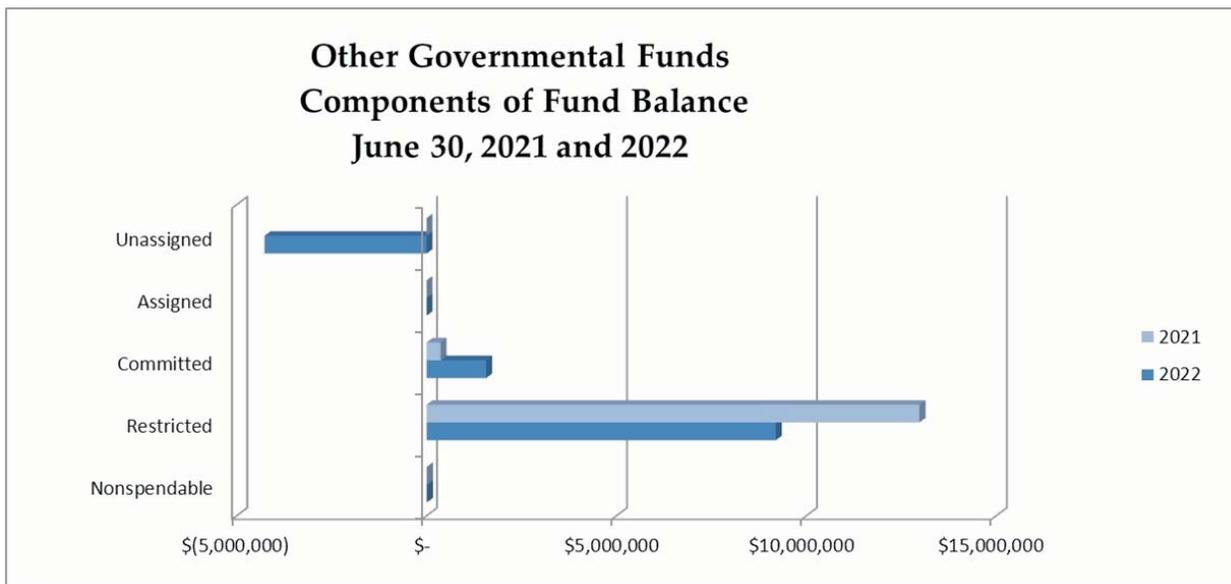

As noted earlier, the NAME OF GOVERNMENT uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental Funds. The focus of the NAME OF GOVERNMENT’S *governmental funds* is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the NAME OF GOVERNMENT’S financing requirements. In particular, unassigned fund balance may serve as a useful measure of a government’s net resources available for discretionary use as they represent the portion of fund balance which has not yet been limited to use for a particular purpose by either an external party, the NAME OF GOVERNMENT itself, or a group or individual that has been delegated authority to assign resources for use for particular purposes by the NAME OF GOVERNMENT’S Council.

At June 30, 2022, the NAME OF GOVERNMENT’S governmental funds reported combined fund balances of \$26,319,196, a decrease of \$15,418,066 in comparison with the prior year. Approximately 42.5% of this amount (\$11,175,698) constitutes *unassigned fund balance*, which is available for spending at the government’s discretion. The remainder of the fund balance is either *nonspendable*, *restricted*, *committed*, or *assigned* to indicate that it is 1) not in spendable form (\$1,145,499), 2) legally required to be maintained intact (\$10,000), 3) restricted for particular purposes (\$9,199,459), 4) committed for particular purposes (\$1,980,153), or 5) assigned for particular purposes (\$2,808,387).

The general fund is the chief operating fund of the NAME OF GOVERNMENT. At the end of the current fiscal year, unassigned fund balance of the general fund was \$15,442,019, while total fund balance decreased to \$19,802,668. As a measure of the general fund’s liquidity, it may be useful to compare both unassigned fund balance and total fund balance to total general fund expenditures. Unassigned fund balance represents approximately 12.1 percent of total general fund expenditures, while total fund balance represents approximately 15.5 percent of that same amount.

The fund balance of the NAME OF GOVERNMENT’S general fund decreased by \$8,569,758 during the current fiscal year. As discussed earlier in connection with governmental activities, the decrease was due to a requirement for the NAME OF GOVERNMENT to contribute to a newly

established OPEB plan. The actual total contributions made during the year from the general fund were \$7,853,000.

The capital projects fund, a major fund, had a \$8,258,317 decrease in fund balance during the current fiscal year which put the overall fund balance in a deficit position for the amount of -\$2,191,321. The fund reports an even larger deficit of unassigned fund balance -\$4,266,321 because of amounts restricted (\$875,000) and committed (\$1,200,000) for a special assessment project that began during the current fiscal year.

The large decrease in fund balance was caused mainly by the spending of resources obtained through the issuance of long-term debt in the prior period on capital acquisition and construction in the current period. That is, the fund balance that resulted from the previous long-term debt issuance was spent down during the current period as the related capital projects progressed.

Another reason for the decrease in fund balance for the current year was the use of short-term debt. In the case of the capital projects fund, bond anticipation notes (BANS) were issued to finance expenditures of certain capital projects. When issued, short-term BANS are reported as a liability on the balance sheet, with no effect on fund balance (i.e., proceeds = liability for debt). However, as the proceeds are spent, the related expenditures cause a decrease in fund balance. The overall deficit results when the short-term debt is outstanding but the proceeds from its issuance have been spent (i.e., there are no assets available to net against the fund liability for the BANS).

BANS in the amount of \$6,905,200 remained outstanding and were reported as a liability in the capital projects fund at year end, while only \$2,638,879 of the proceeds remained unspent. The difference between these two amounts (\$4,266,321) is the amount reported as the deficit in unassigned fund balance in the capital projects fund at the end of the year. It is our intent to issue long-term bonds to replace the BANS. The issuance of the bonds will eliminate both the unassigned and the overall fund balance deficit in the capital projects fund.

The debt service fund, the remaining major governmental fund, had an increase in fund balance during the current year of \$1,297,555 to bring the year end fund balance to \$2,415,560. The increase essentially results from a special assessment project that began during the current year. First, a debt service reserve of \$846,000 was established in the debt service fund through a transfer from the capital projects fund. Second, the first installment of the special assessment receivable, \$470,000, was collected, along with related interest of \$188,000. The total increase in fund balance from these three amounts is \$1,504,000. The overall increase for the year did not reach this amount because a portion of the fund balance at the beginning of the year was used for debt service payments during the year.

Proprietary Funds. The NAME OF GOVERNMENT'S proprietary funds provide the same type of information found in the government-wide financial statements, but in more detail.

Unrestricted net position of the Water Authority at the end of the year was \$5,376,158 and for the transit operation was \$588,590. The total growth in net position for both funds was \$1,258,270 and \$259,190, respectively. As noted earlier in the discussion of business-type activities, the increase for the Water Authority results from a 5 percent water rate increase in the current year and an unexpected capital grant of \$250,000 resulted in the growth reported by the transit operation.

General Fund Budgetary Highlights

Original budget compared to final budget. During the year there was no need for any significant amendments to increase either the original estimated revenues or original budgeted appropriations. However, there was a need to make an amendment to reallocate appropriations among departments when it became clearer which departments would actually be charged for certain employee benefits such as pensions and other postemployment benefits. Generally, the movement of the appropriations between departments was *not* significant. The exception was the appropriation for the Council department in the general government function which was increased by \$2,033,040.

Final budget compared to actual results. The most significant differences between estimated revenues and actual revenues were as follows:

Revenue source	Estimated revenues	Actual revenues	Difference
Licenses and permits	\$ 4,166,256	\$ 2,649,889	\$(1,516,367)
Intergovernmental	11,414,391	9,705,931	(1,708,460)
Charges for services	17,738,732	19,091,893	1,353,161
Investment earnings	1,258,200	3,349,530	2,091,330

The shortfalls in the above revenue sources were caused by the recession experienced during the current year. Licenses and permits were less than estimated because there were less of these items purchased, particularly in the case of business licenses and building permits. Intergovernmental is the classification used to report grant revenues. The recession impacted the state and most other general and special-purpose governments. Accordingly, the grants that these other governments were able to provide were less than expected. Actual grants from the state were approximately \$1,250,000 less than estimated while grants from other governments were approximately \$500,000 less.

Over the last decade the NAME OF GOVERNMENT has worked to identify and implement more charges for various programs and activities. This has included certain housing programs, but has been especially true in the case of various cultural activities (e.g., performing arts) and recreational activities (e.g., use of recreational facilities such as swimming pools, indoor basketball courts, charges for night time lighting of outdoor facilities). The goal of this effort was to increase the percentage of total revenues that are provided by this classification. As discussed in the letter of transmittal this effort has been moderately successful in increasing the proportion of total revenues of governmental funds that results from these charges.

Ironically, the *increase* in investment earnings is also attributable to the current recession. As noted earlier in the discussion about governmental activities, actions were taken during the year to help mitigate the negative impact of the economic downturn. The result of these actions (e.g., delaying the payment of nonrecurring expenditures/expenses) was a significantly larger than anticipated balance available for investment. Moreover, in some cases it was possible to invest these amounts for longer periods, which also enhanced total investment earnings for the year.

A review of actual expenditures compared to the appropriations in the final budget yields no significant variances with one exception. Actual expenditures for the prospective inspection department within the public safety function (\$1,685,839) exceeded the related appropriation of \$1,664,092, by \$21,747. While the overspending of this appropriation (by up to \$100,000) is autho-

alized by law in cases involving imminent public endangerment (e.g., the need to inspect properties with damage from collision, natural disaster, fire, or water to determine their inherent stability), such overspending is still considered a budgetary violation. Furthermore, the overspending affects the subsequent year's budget. That is, the amount of the overspending caused by situations involving imminent public endangerment automatically decreases the portion of the protective inspective appropriation for the subsequent year that relates to routinely scheduled inspections.

This year's overspending was, in fact, caused by imminent public endangerment cases. Accordingly, the violation is displayed on the face of the *General Fund Statement of Revenues, Expenditures, and Changes in Fund Balance – Budget and Actual* and is disclosed in the notes to the financial statements. The necessary adjustment was made to the appropriation that was legally adopted for the subsequent year's budget.

Capital Assets and Debt Administration

Capital assets. The NAME OF GOVERNMENT'S investment in capital assets for its governmental and business-type activities as of June 30, 2022, amounts to \$327,372,462 (net of accumulated depreciation). This investment in capital assets includes land, buildings, machinery, equipment, vehicles, park facilities, roads, highways, bridges, and the water treatment plant. The total increase in capital assets for the current fiscal year was approximately 1.2%.

NAME OF GOVERNMENT'S Capital Assets

(net of depreciation)

	Governmental activities		Business-type activities		Total	
	2022	2021	2022	2021	2022	2021

Major capital asset events during the current fiscal year included the following:

- Various projects related to streets, sidewalks and storm water drains at a cost of \$4,847,666.
- A new parking garage with construction costs of \$4,483,790 was completed and placed in service during the current year.
- Other parking structure and parking lot rehabilitation at a total cost of \$2,047,220.
- Completion of renovations to various fire protection facilities at a cost of \$7,222,315.
- Public Safety dispatch upgrades and renovations to police and fire facilities (construction in progress as of the close of the fiscal year had reached \$2,517,168).

- Completion of an expanded maintenance facility for the transit operation during the current year at a cost of \$2,150,249.
- The purchase of various vehicles and equipment at a total cost of \$4,741,410.

Additional information on the NAME OF GOVERNMENT'S capital assets can be found in Note IV.D on pages 57-59 of this report.

Long-term Debt. At the end of the current fiscal year, the NAME OF GOVERNMENT had total bonded debt outstanding of \$88,256,015. Of this amount, \$83,556,015 is debt backed by the full faith and credit of the government and \$4,700,000 is special assessment debt for which the government is liable in the event of default by the property owners subject to the assessment. The remainder of the NAME OF GOVERNMENT'S long-term obligations comprises pension-related debt and capital leases.

NAME OF GOVERNMENT'S Outstanding Debt (net of depreciation)

	Governmental activities		Business-type activities		Total	
	2022	2021	2022	2021	2022	2021
General obligation bonds	\$73,522,878	\$77,994,507	\$10,042,137	\$11,069,820	\$ 83,565,015	\$89,064,327
Special assessment bonds with governmental commitment	4,691,000	-	-	-	4,691,000	323,583,273
Pension related debt	4,739,557	5,437,453	-	-	4,739,557	5,437,453
Capital leases	146,042	-	-	-	146,042	-
Total	\$83,099,477	\$83,431,960	\$10,042,137	\$11,069,820	\$ 93,141,614	\$94,501,780

The NAME OF GOVERNMENT'S total debt decreased by \$1,360,166, (1.4 percent) during the current fiscal year. The reason for the decrease was that the only new debt issuance during the year was for an amount that was less than the regularly scheduled principal reductions on the existing outstanding debt. The new issuance was special assessment debt with governmental commitment with a face value of \$4,700,000.

In addition to the one new debt issuance, the NAME OF GOVERNMENT issued general obligation bonds to refinance previously outstanding general obligation bonds reported in governmental activities. This refinancing was done to take advantage of favorable interest rates. The result is expected to be a decrease in future debt service payments of \$327,142.

The NAME OF GOVERNMENT and its Water Authority both maintain a "AA" rating from Standard & Poor's and Fitch Ratings and a "Aa" rating from Moody's Investors Service for general obligation debt.

State statutes limit the amount of general obligation debt a governmental entity may issue to 7 percent of the average full valuation. The current debt limitation for the NAME OF GOVERNMENT is \$654,486,768, which is significantly in excess of the NAME OF GOVERNMENT'S outstanding general obligation debt.

Additional information on the NAME OF GOVERNMENT'S long-term debt can be found in Note IV.L on pages 67-72 of this report.

Economic Factors and Next Year's Budgets and Rates

The following economic factors currently affect the NAME OF GOVERNMENT and were considered in developing the 2022-2023 fiscal year budget.

- The unemployment rate for the NAME OF GOVERNMENT is currently 7.1 percent, which is a significant increase from a rate of 4.6 percent a year ago because of the current recession. While the unemployment rate is likely to decrease, it is not expected to reach the pre-recession level for several years
- An 8 percent increase in water rates beginning July 1, 2022 anticipating current and future expenditure increases due to additional state and federal water quality mandates.
- A property tax rate increase of 6.5% to fund increases in recurring expenditure obligations.
- An increase in the rates on the NAME OF GOVERNMENT'S current fee schedule.
- Several new revenue sources were enacted in the 2022-23 budget year, including a fire inspection fee on commercial and multi-family dwellings, a taxi medallion fee, and a room occupancy tax on hotel rooms and similar lodgings.
- Declines in the taxable assessed value as a percentage of estimated actual value and resulting decreases in property assessments will continue to affect the NAME OF GOVERNMENT'S real property tax base.
- Declines in housing prices and sales are expected to continue throughout the fiscal year, further straining mortgage tax revenues and assessed values.
- Interest rates are expected to remain at record low levels throughout fiscal year 2022-23.
- On the expenditure side, increases are expected in health insurance premiums, as well as pension and other employee benefit costs.
- The NAME OF GOVERNMENT continues to purchase a catastrophic liability insurance policy to protect itself from unforeseen losses in excess of \$1 million.
- The NAME OF GOVERNMENT'S daytime population exceeds 300,000 persons a day, requiring twenty-four hour services for residents and non-residents alike.
- Departmental budget reductions were implemented in recognition of the decline in revenues as a result of the current recession.
- Contract settlements with all of the NAME OF GOVERNMENT's unions.

During the current fiscal year, the unassigned fund balance in the general fund was \$15,442,019. The NAME OF GOVERNMENT has appropriated \$2,215,728 of this amount for spending in the 2022-2023 fiscal year budget. This action was taken as an additional measure to mitigate the impact of the recession on the 2022-2023 fiscal year budget.

Requests for Information
