# Make a Rain Stick

## WHAT YOU NEED:

- clear, empty water bottle
- wooden toothpicks
- long wooden skewers
- colorful seed beads
- funnel
- hot glue and glue gun or colorful duct tape

## INSTRUCTIONS:

1. Remove label from the empty water bottle.
2. Drop toothpicks into the bottle. Use the skewers to break up the toothpicks and keep them from stacking vertically at the bottom. Fill the bottle three-fourths full.
3. Use a funnel to fill one-third of the bottle with colorful seed beads. Gently shake the beads so they collect at the bottom of the bottle.
4. Seal the lid to the bottle with hot glue or duct tape. If you use hot glue, make sure it cools before toddlers handle the bottle.
