Lincoln's Global Distribution Network Is The Best In The Industry

Lincoln distributors provide their customers with a wide variety of lubrication equipment as well as consistent delivery and service. From small, service-oriented companies to large, integrated suppliers, Lincoln distributors meet the expectations of every customer with just the right level of service and value. You can depend on Lincoln to continue to provide top quality lubrication solutions through the best distribution network in the United States and around the world.

Continually satisfying our customers with the world’s best lubrication equipment and pumping systems has made Lincoln the largest and most successful company in our field. For almost a century, companies have relied on our technical and quality leadership, our world-class manufacturing and customer service, and our vast network of distributors and support facilities.

Lincoln – The Industry Leader Since 1910

18V POWERLUBER
• High output 18V motor delivers excellent performance in heavy-duty applications
• New 18V motor and battery technologies combine to provide outstanding run-time
• Exceptional performance in high-pressure applications
• 2-speed transmission provides high-volume grease flow option
• Versatility means one tool for all lubrication requirements

120V CORDED GREASE GUN
• 120V motor provides the highest torque values in its class
• Unmatched for power, longevity and performance
• Variable speed trigger combines with the 2-speed transmission for excellent flow control
• Excellent for refilling grease reservoirs
• Excellent alternative to pneumatic lube tools

The Newest Additions to the Popular PowerLuber Family of Grease Guns

** Average dispense may vary due to numerous factors including desired dispensing rate, cycle time, ambient temperature.

NOTE: 1844, 1444 and 1244 include a second battery.

- Lincoln’s PowerLubers are available in a variety of designs to meet a wide range of application and budget requirements.
- Ergonomically designed and balanced to reduce fatigue and increase productivity.
- High-strength composite body with metal gear and pump housing provide outstanding durability without weight penalty.
- Patented pumping mechanism and high tolerance piston to bare steampipes provide unmatched efficiencies.
