American Implement
Garden City, KS***

AMERICAN IMPLEMENT IS A FAMILY-OWNED JOHN DEERE DEALER WITH FIVE LOCATIONS THROUGHOUT SOUTHWEST KANSAS AND ONE IN COLORADO. FOUNDED IN 1970, THEY CURRENTLY HAVE MORE THAN 150 EMPLOYEES DEDICATED TO CUSTOMER SATISFACTION.

Benefits of a Quicklub® Automated Lube System

Reliable, Exact Lubrication

"Early spraying season starts January 15 and lasts for 45 days. The average high temperature is around 40 degrees. Operators don't want to manually lube when it's cold, and they don't want to spray the machine down either. The lack of these two processes can quickly harm a sprayer. Having a Lincoln Quicklub system guarantees all points will be lubed with the required amount of grease and kept free of contaminants."

Reduce Downtime

"It takes a minimum of six hours to replace a pin on a sprayer. A sprayer can cover approximately 100 acres per hour. That's at least 600 acres that are lost if a machine breaks down."

Increase Resale Value

"A buyer always wants to know if the machine has sprayed fertilizer. Once I tell them the machine originally left here with a Quicklub system, and they see there is not a piece of rust and the pins have always been greased, they know the machine has been properly maintained which provides peace of mind. Reselling a sprayer with a Quicklub system easily adds at least \$3,000 to the selling price."

Will an Auto Lube System Reduce Service/Repair Sales?

"We only have so many service guys here to work on machines. If they are always out replacing pins, then they are neglecting other aspects of service. A Lincoln Auto Lube System allows our shop not to get backlogged and provide prompt, quick service to our customers."
