Well, it's time to dominate YouTube Marketing, fellows. I know you will love this training.

Video #2

Video #2: What YouTube is all about

■ Definition

YouTube is the most favored video sharing social media platform. It was created in 2005 by Steve Chen, Chad Hurley and Jawed Karim. In 2006 YouTube was acquired by Google. It has transformed the overall outlook of television advertisement and other video networks with an overwhelming influence.

YouTube is crucial for businesses and marketers, because it has a huge database of users. Hence, you get the chance to broaden your brand message extensively. According to Alexa Rank, it is the most visited website, after Google and Facebook.

More than 1 billion unique viewers visit YouTube every month. YouTube is a zero cost video hosting site which permits its registered users to watch, upload, share and store video, as well as subscribe to channels.

Mostly, videos are uploaded by individual users, but businesses, marketers and professional movie makers are also taking advantage of it. They create videos to share their work, showcase products and services, testimonials, behind the scenes, etc.

Users subscribe to the channels they like. These channels can be a brand, an online marketer, companies, etc. According to YouTube, millions of subscriptions take place on a daily basis.

YouTube also runs an advertising program to promote businesses and engage users with video ads and TrueView ads.

■ The revolution of video

Three decades ago, television was among the prime methods of marketing. However, due to changes in digital marketing, businesses and marketers need to choose on which platform they should advertise, either via TV or online or both.

TV commercials still works for big brands and businesses. However, if you are a beginner, TV video ads will cost a huge amount of money without giving you the desired output. Video advertising has changed completely in recent years, viewers mostly like to watch videos online instead of TV.

Video ads are more targeted, alluring and engaging than TV commercials. You don't need to show your product and services to those who are not interested. Video directly impacts buyers.

Most businesses are utilizing video ads to market themselves on each and every platform, such as desktops, mobile devices, tablets and laptops. Online video advertising is impossible to avoid, because it is overtaking offline television ads.

Social Media is a great way to engage and communicate with your audience. Videos are all about products or services as a way to motivate viewers into making a purchasing decision.

Video ads are used by businesses and online marketers to increase sales of their products and build brand awareness via videos explaining their products or services.

Online marketers use video to improve their sales funnel and boost revenue. Business video ads are all about increasing a user's interest in their products and are less focused on sales.

These video ads can be video email, testimonial, webinar, launch series ads and product demonstrations.

■ **Online Video vs Offline Video Commercials**

When people think about a video commercial, the first two things that come to mind are TV commercials and online video commercials. As technology continues to transform advertising techniques, businesses are also trying to go with the latest technologies to promote their brands. Online video commercials are steadily expanding their reach.

With offline TV video commercials, you have a standard 15 or 30 second advertisement spot to promote your products. While in an online video commercial, there is an extensive range of ad formats available. Advertisers can also opt for different playing options, like whether the video ads are displayed before the video, during the video or at the end of the video.

TV ads cost a huge amount of money and the cost of a spot depends on the ratings of the station without any assurance that people are going to watch your commercial or not. Online video commercials cost you for every 1000 impressions, which means you are paying for real viewers.

Offline video ads are limited to your living room. You can't watch them outside of your home. The availability of the internet is everywhere, so viewers can watch it anywhere in the world. With online video commercials, you can easily track your ROI.

Offline video commercials are used to target mass media. With online video commercials, you have the option to focus on your potential customers with unlimited reach. Online promotional videos are shareable within your social networks, but you can't share TV advertisements.

■ **How video can impact your brand**

Video advertising is growing daily as it boosts engagement, brand credibility and improves search engine rankings. It is one of the prime aspects on which businesses and marketers need to focus.

Engagement analysis demonstrates how people take actions with online videos, but brand metrics determine where they need to focus such as impression, awareness, and interest.

Video is an impressive technique to build a relationship with your customers and associate them with your brand. YouTube is an online video platform, where you can understand how the audience reacts to promotional videos.

By using YouTube videos on a website for promotional video ads, you will notice an increase in ad recall. To gain more benefits from YouTube video, you need to test your video campaign, creativity, and metrics. A/B testing can be used to analyze the outcome.

Video advertising is really effective and works great to showcase your products or services, educate your customers, show customer video testimonials, share milestones, etc.

The content of promotional video needs to be attractive and informative in order to grab the attention of customers and to connect with them. Give a human face and voice to your brand to help make your marketing message more significant.

Video #3

Video #3: Why you should definitely use YouTube for your Business today

Every business and marketer needs to advertise their brand to attain goals and increase the purchasing potential of their customers.

YouTube also plays an important role to help you stand out within the competitive environment.

Integration of YouTube in your online marketing campaign will assist you in driving more potential customers towards your brand.

Here are some reasons why YouTube is really important for your business.

■ Amazing Benefits

1. YouTube is free

Most advertising campaigns cost lots of money, as well as time. But having YouTube in your online marketing strategy is completely free. It only takes time to create a video, but you can upload as many videos as you'd like without spending any money.

To advertise with YouTube, you don't need to invest too much money in professional items such as a camera or other things to create a video, you can use a handy cam and video editing tools, which are accessible through YouTube.

2. Add 24/7 exposure

Other advertising methods can't defeat an innovative YouTube video to attract and hold a potential audience. With YouTube, you get remarkable exposure for your business, because videos play the role of a virtual sales person. All you need to do is create videos and upload them to YouTube.

Now, it is available on the internet 24/7. Your audience can access you at anytime, so there are more chances to get sales, reviews and comments, which can increase your brand's visibility on YouTube.

If you make a smart and proficient video, and upload it into the appropriate category, there are more chances to get views with little effort. You don't need to pay attention to it after uploading it.

3. Grow your audience around the globe

YouTube is a global perception that attracts customers from around the globe. You can access it anywhere on numerous devices such as a desktop, laptop, or smartphone.

YouTube advertising has the potential to be viewed by worldwide users, but you still need to ensure that your video is watched by your potential audience. If you don't focus on a prospective audience, you can't get the right users.

Regularly creating and uploading videos unlocks the door to getting new viewers for your business. Adding closed captioning, a call-to-action, offers and targeting users according to their needs, can also boost the views of unique visitors.

4. Boost SEO rankings

A YouTube video generally contains a link to the brand's website in the description. If viewers look for information about your business and like to watch more of your videos, they will go through the link to view your website.

These actions assist your website to be higher ranked in search engine result pages:

- ✓ Writing long video descriptions that have at least 200 words
- ✓ Motivating
- ✓ Subscribing and linking at the end of the video
- ✓ Sharing YouTube videos in other online social media communities, forums and blogs
- ✓ Organizing videos by category
- ✓ And using video keywords to optimize your ranking, improves your rankings in search engine.

5. Demonstrating your product

Demonstration is a great way to showcase products or services that your brand is selling. A YouTube video can be a great way to educate your customers by showing them your products with installation, FAQ's, tips and tricks videos.

All these things make your customers aware of you in order to boost your brand reputation, sales and revenue. Because after watching, audiences are more likely to buy.

With YouTube videos, you can show the expertise that makes you unique from your competitors. For that, you can upload tutorials and expert videos related to your business. A video can give your audience a reason to buy from you.

6. Save bandwidth

YouTube allows you to link and embed your video on your website without maximizing your website's bandwidth, because YouTube videos are hosted on the YouTube video hosting servers, so viewers' download speeds will not be affected due to the video.

YouTube also saves you website storage. If you only want to listen to audio or watch video, use YouTube and save your bandwidth. Because it provides adaptive streaming (DASH), where individual streams are available for audio and video.

Streaming videos also consumes more bandwidth, which can diminish the use of these types of video. Using VLC media player to watch, stream and record, can also save bandwidth for your website.

7. Enhance viral potential

YouTube video has viral potential. To take advantage of that, you can embed video on your website, blogs, forums and other social media communities. People like to share what they like among their network. If viewers find your video interesting and grabs their attention, the chances of getting it shared are increased.

To go viral and enhance exposure, you need to be creative with your video content. You can create buzz, share your achievements, be funny or upload something valuable to get shared again and again.

You also need to focus on your prospective audience to get the right audience to your business. This way, your business can get attention and high brand recognition.

8. Get high volumes of traffic

YouTube gives you a better chance to connect with millions of viewers and spread your business message among the prospective audience. Videos reach is more than other advertising methods. Four billion videos are viewed daily, and still growing rapidly.

To get a high volume of traffic, you need to:

- ✓ Focus on the video title and description
- ✓ Add channel tags
- ✓ Have a look at comments
- ✓ Build different playlists for different types of videos
- ✓ And mark your best videos as "featured."

Recent activities can also be a win-win situation for viewers and your business. Include a call to action to motivate viewers to share the video to increase traffic toward your YouTube video.

9. Increase effectiveness of social activities

Users are more likely to buy after watching a video, so YouTube is crucial to enhance the effectiveness of your business.

Choose a regular uploading of video content and stick with it, segment important videos and create playlists. Also, make sure you have a consistent look and tone for your videos to boost the effectiveness of your YouTube channel.

Including transcripts of videos can assist in being found easily by search engines and users. You can also add a call to action and annotations at the end of the video to take your audience to the next level. High quality thumbnails force users to watch your video content.

10. Stay relevant in prospects' minds

When it comes to video advertising, the first name which comes to mind is YouTube. Be informative and precise with your advertising videos. Don't try to sell with your videos. Keep your targeted audience in mind before creating video content.

Communicate with your potential customers through video content regularly to build trust and awareness of your brand among users.

It also boost yours creditability when you are on the top of your prospect's mind. Most users like to buy from users in whom they believe. Being on top can increase sales and revenue for your business.

- ✓ The number of hours people spend watching videos on mobile is up 100% year over year. ([Source](#))

Video #4

Video #4: How your business can get the most out of YouTube.

YouTube has an awesome set of marketing tools that almost no other platform may offer to you. Those tools are:

- ✓ YouTube Channel
- ✓ YouTube Creator Studio
- ✓ YouTube Upload
- ✓ YouTube Analytics
- ✓ YouTube Editor
- ✓ YouTube SEO
- ✓ YouTube Ads

YouTube Channel

A YouTube Channel is simply the home page for a YouTube account. It shows the account name, the account type, the public videos you've uploaded, and any user information you've entered.

The process is really simple. First of all, go directly to www.youtube.com/account

When creating a YouTube Channel for the first time, look in the additional features section, find the Create a new Channel tab and click on it.

Your user features will be displayed however you have them set at the moment. You'll see your name and picture (from your Google profile), and also the words “Create a new YouTube Channel” for your public videos and playlists.

By clicking the “ok” button, you'll be sent to your own brand-new channel.

For creating a second channel, you will find it just as easy as creating your first channel.

Select a name for your channel. As with the previous channel, choose a name characteristic to the subject you are dealing with. A name which people will relate with your product or your company.

You must select a category for the video, whether it is a Product or Brand; Company, Institution, Organization, Arts Entertainment or Sports, or other.

It's necessary to select the “I agree to the Pages Terms” tab in order to move on. When you're all set, click on the “Done” tab, and the new Channel will be created.

Once you create a new channel, you may upload Videos to your channel, whether public or private; and comment on videos using your channel name. Moreover, your new channel comes with a Google+ page.

When you have a Google+ account and want to create a channel or reactivate an inactive channel linked to your account, you need to go to your YouTube account and click in the create channel tab, in the Google+ pages.

The following info will pop-up: Create a Channel for (your Google+ selected page). As you continue to clicking the “OK” button, the new channel will automatically be linked to your Google+ account.

This means, that your page and channel will display the same name and photo on both your YouTube and Google+ accounts.

You may verify this, as you continue setting all the remaining features in your channel.

Even though your channel icon is linked to your Google+ account, edits on Google+ may take a few minutes to show on your channel.

You may also upload a photo to be your representative image. Before posting your new picture, you should add a comment and also set the properties as to whether or not you'd like to disable comments and re-share options.

There's also the choice of adding art as a backdrop. Just select the “Add channel art” tab, choose among uploading a photo, use a picture you had previously uploaded or picking one from the gallery.

After choosing from among any of the options just mentioned, the page shows different looks according to the device your audience is using. It will look a bit different across devices.

Besides your channel name and pics, your channel's main page will display a tab with tips. I strongly recommend to check them out. They might be really helpful, especially in continuing setting up your page.

From your main page, you will be able to see your videos, playlists, discussions, and more. You may also share your thoughts to your audience and spot recent activities.

Subscriptions will be shown on the left side of your main page, in the “Add channels” tab. To get started, you only need to browse some channels there.

By clicking here, you will see the Best of YouTube, with the ability to search.

Here you may see the most popular videos in YouTube at the moment. Options may include music, sports, gaming, news, and 360Video. Each will display a subscribe tab next to it.

This page will display several recommended channels related to music, comedy, film and entertainment, gaming, beauty and fashion, automotive, animation, sports, tech, cooking and health, news & politics, and more.

At the bottom of the page, you will have the option of selecting a language and also a country for your YouTube page. English is the regularly chosen language. It is acknowledged as universal, but you may use another instead for your campaign.

You may also set other features starting from the main page of your channel. You should go to the Edit links tab, in the upper right corner of your art tab. Here you may write a channel description.

Also, you should set other settings, such as writing an email for business inquiries and choosing a country for your channel.

Links can be added to your channel in this section. It's optional to choose whether these links overlay a certain number of custom links on channel art.

For adding the link, you must write a title, up to 30 characters maximum and the URL. Always remember using words closely related to your product when writing titles and descriptions.

Video #5

Video #5: YouTube Creator Studio.

YouTube Creator Studio is a tool meant for managing YouTube video channels. It has the features designed for it and provides an excellent way to reach the demographic wanted.

There are several sections that will help you control your YouTube Channel, such as: Dashboard, Video Manager, Live Streaming, Community, Channel, Analytics and Create.

For direct access to the YouTube Creator Studio, go to www.youtube.com/dashboard and you will see all the features to the right side of the page.

Dashboard

It will display the name of your YouTube channel and next to it you will also see a snapshot of views and subscribers to your channel.

Each of your videos will be shown in a vertical list, in which the last video you posted will be at the top. In this, you may set the quantity of videos shown. Keep in mind that the Dashboard can be edited, so you're allowed to add or retire components of it.

There's a quick view of your **Analytics** for the latest 28 days with the following features: Views, Estimated minutes watched and Subscribers.

You will also see a section of Tips posted by YouTube to help you improve the reach of your channel's videos. For example, it might give you a tip to specify your channel's country. You should add your info in order to stay informed about updates for your location. Another tool that

YouTube has the Creator Academy. You can go there to find tips for branding your content. Simply click on the **Branding your content** segment and then on the **Watch and learn** link.

There's also a **Comments** section which enables you to receive feedback from your audience.

Video Manager

Here you can control how your videos will be displayed, as single videos or playlists. You may also choose between a List Display and a Panel Display.

You will also see your **Demographics** on the right side of each video. Once you select a video, you may use the **Action** tab to perform specific actions to the selected video.

When Uploading videos to your YouTube channel, pay serious attention to the copyright. It will be flagged in the **Copyright Notices**, as well to let you know if something is restricted.

Each video will show the title, duration, the date and time you uploaded it. In all videos, you will have an **Edit button**, where you may edit these features: Info and setting, Enhancement, Audio, Annotations, Cards, Subtitles, Promote, Download and Delete

Live Streaming

With this option, you will be able to broadcast on the web in real time. It could be music, sports, news or anything.

There are two steps to follow in order to stream: First Things First and Then Start Streaming. First Things First is a measure YouTube does to verify your standing and identity. In Then Start Streaming, YouTube will provide you with a specific link, so you will host your streaming, and your fans have the chance to find you.

YouTube also makes it possible for you to stream an entire live event right to your audience. You just need to click on the **Enable Live Streaming** button, and start the process.

Community

In Community, you will see comments and messages. Also, you may set your community settings which include: administering filters, see your approved users, hidden users, and blacklist. You may also set up Highlights and Default Settings.

In this section, you can see comments of all kinds, although they are separated by: Published Comments, Held for Review and Likely Spam. Likewise, you can search for specific comments using the Search Comments tab. There is also the option to choose which video you want to see.

You will also find the Default Settings, which are: Comments on your new videos, Comments on your channel and Creator credits on your channel.

Channel

In this section you will find features that have to do with the entire channel such as: Status, Upload Defaults, Feature Content and Branding.

To enable these features, your account may have to be in good standing. You will need to click on the Verify button to start the process. YouTube will ask you a few questions related to your account.

In the **Advanced** segment you may edit your account information, such as your channel name, country and channel keywords.

You may also allow advertisements to be displayed alongside your videos. Also, you may Link an AdWords account to your video account. Linking your YouTube channel to an AdWords for video account allows you to promote your video and access reporting.

Analytics

In this section you will see the performance of your channel.

You will see the views, demographics, traffic sources, audience retention, engagements reports, and even your likes and dislikes.

You can search for information depending on the **Content** or **Location**. You can make comparisons, see groups and download reports.

This section shows the Top 10 videos, the amount of views, estimated minutes watched and the quantity of Likes for each video. There is also **Demographics** by country and gender, and the Top Traffic Sources.

The **Playback locations** will display a graph of the performance during the time that the channel has been active.

Create

This section is formed by the Audio Library and Video Editor.

The Audio Library enables you to browse and download music for your project. The Audio Library gives you the option of choosing from three audio files tabs: Free Music, Ad-supported Music and Sound Effects.

By clicking on the Video Editor tab, you'll have the option of entering video and audio files. Now you're all set to start creating a new video.

Video #6

Video #6: YouTube Upload.

Uploading videos to your YouTube Channel is quite easy. To do so, go to www.youtube.com/upload and follow the instructions I will share with you.

On the right side of the screen, you will find several useful tools. The **Import Videos** section can be really handy. You can import your videos from Google Photos, just click on the **Import** tab.

It will show the **All Videos** tab, with each video previously uploaded. There will also be an **Audio Backup** tab, which has a Video Audio Backup app, as a part of Google+ for mobile devices, as well as Mac OS & Windows.

If you want to broadcast **Live Streaming**, you may set up your channel and broadcast on the web in real time right to your fans. Just click on the **Get Started** button.

The first step will be your account verification, which YouTube will do by contacting you by phone, whether with a call using an automated voice message or send you a verification code through an SMS.

You need to select your country, then choose a means to contact you, whether by a call or by an SMS. Something worth noting is that when verifying your account by phone, it lets you unlock additional features on YouTube.

There are several options to **Create Videos**:

Webcam Capture

If you have a webcam available in your computer, you can record a webcam video and upload it.

Photo Slideshow

You are allowed to select photos from your previously uploaded photos, your photo albums or photos from your computer.

When uploading photos, you will be asked to name the album you are creating, or you might just add them to an existing album. You can also drag your photos to the screen, or use the tab **Select them from your computer**.

YouTube offers you a **Video Editor** tool. As you upload the audio and video files, they will be displayed next to each other in the timeline. Additionally you'll have your uploaded videos available, as well.

You can also add photos to your videos, selecting them from your Google account or upload new photos.

There are also many audio tracks available to use. You may choose from a list provided, and choose the genre you would like to use.

There are various options to add a title to your project. You will see the following: Centered title, Banner; Centered fade, Slide and Zoom. You may see them displayed in your screen. To add one, just drag it to the timeline.

In the main section of the upload page, a **Select files to upload** tab will be displayed in your screen. You can also drag and drop video files to that same tab.

You must choose between the **Public**, **Unlisted** or **Private** options. It is a very important feature of your video. If you choose the **Private** option, you need to write exactly who you are going to share it with.

Subsequently, when your video is done uploading, you may choose one of three thumbnails, which YouTube automatically creates.

In **Basic info**, be sure to register a name related to your product, so your audience may get an idea of what you're offering. In connection with the description, take enough time to make it detailed and accurate.

You should go also to the **Advanced settings** to improve your features setting.

There are several options to consider and use. They will customize your video features to your specific needs.

Options to customize are: comments, category, language, age restriction, and more.

When it comes to comments, you may select one of two options: All and Approved. It's recommended to allow showing all comments. In case you change your mind, you can modify it.

License and rights ownership gives you two options: Standard YouTube License or a Creative Commons Attribution.

In relation to **Caption certification**, if you are uploading a user's produced video, pick the first option: This content has never aired on television in the US.

You may also select the Distribution options, whether to **Allow embedding** and **Notify Subscribers** or not. The same applies to enable an age restriction.

In the **Category** tab, there are several options, select the field that fits you. You can choose among categories like Education, Entertainment, People & Blogs, and more.

When you choose a Video Location for one of your public videos, you'll decide if the video can be used not only in YouTube, but in other Google products, as well.

In the **Select a Language** tab, there are 172 language options at the moment. English is strongly recommended and the most widely used.

You can opt to make your video's statistics publicly visible on the watch page. If your video contains a paid product placement or endorsement, you should select the **Content Declaration** option.

When you're done, press the **Publish** tab, and your changes will be saved.

In your upload status, you will have several pages displayed through which you could share your video. YouTube will also allow you to share it as an embedded code. One last option will appear. You can send it as an email, accompanied by an option of adding a written message.

Now that your uploading process is all set, just click on the thumbnail of your video to watch it.

Video # 7

Video # 7: YouTube Analytics

YouTube Analytics is the best way to understand the performance of your YouTube channels figures.

It shows the number of people subscribed, not subscribed and both of them together.

You will be able to search information based on Content or Location. It provides several options of viewing periods, you might see a span of 28 days, its entire lifetime, and more.

Here you can choose the length of time to be observed; the past 28 days, this week, last week, and even more options. You can also choose from a calendar.

Comparisons can be made with two timelines chosen. Content, Location, and period of time are the characteristics to choose from.

It will display several charts, including **Performance**, measured in: Views, Estimated minutes watched, and Average view duration. The other chart will be **Engagement**, with these features: Likes, Dislikes, Comments, Shares, Videos in Playlists and Subscribers.

You will find the Top 10 videos listed with the first having the largest number of Views. Each will have next to it the **estimated minutes watched** and a number of Likes.

The **Demographics** also shows the places where the videos have been watched in greater numbers. There is a pie chart with percentage based on Male and Female viewers.

At the end of Demographics, there's **Discovery**, showing you the **Top Location** where it was watched: Embedded external websites and apps, YouTube watch page, YouTube channel page. Also, you will see the **Top Traffic Sources**, whether it's External, Suggested Videos, YouTube Search, and others.

In **Real Time**, you'll see bar graphs of the last 48 hours and of the last 60 minutes with Estimated Views of each video.

By checking out the **Views** section, you will see how metrics are compared in a line chart, during a certain period of time.

When the **Demographics** section is opened, bar charts and pie charts will show you the percentage of views by gender in the last 28 days.

Top Location by Views gives a fairly complete picture by showing what countries are watching, and **Views** in relation to the age of the audience and gender. Here, you may evaluate the range of age of most viewers on your channel.

When opening the **Playback Location** tab, you will see the number of Views and Estimated minutes watched, and several graphics to choose from.

There's also a table that relates to views embedded in external websites and apps, YouTube page and YouTube Watch Channel Page, with Views, Average Watched minutes and Estimated duration of views.

Traffic Sources

Here you'll see a table of different sources of traffic: External, Suggested Videos, YouTube Search, Direct or Unknown, Other YouTube features, YouTube channels, Browse features, Notifications, Playlists; each one related to Views, Average Watched minutes and Estimated duration of views. All this will be listed in descending order according to the percentage of Views.

Devices

You can see what type of devices are getting watched the most, such as Computer, Mobile Phone, Tablet, Unknown, Game Console and TV.

Each is related to Views and Estimated minutes Watched.

The Audience Retention displays a chart with Average View Duration and Average Percentage Viewed.

The Subscribers tab will show you: Subscribers, Subscribers Gained and Subscribers Lost, all compared in a chart.

There is also a chart with Source, Geography, Date and Subscribers Status. In this table, they're compared with Subscribers; Subscribers Gained; Subscribers Lost, related to Video, Channel, Recommended Channel and Closed accounts.

There is also a chart with **Likes** and **Dislikes**, as related to time.

When watching **Videos in Playlists**, you will observe metrics and growth, and you may set the period of time you want to watch in the chart.

There is a list of your Videos, and for each one are the following characteristics: Videos in playlists, Videos added to playlists and Videos removed from playlists. You also may set the Video list by Geography, Date or Subscription status.

In the **Comments** section, you will find a graphic that measures comments in the last 28 days. Below that, you will also see the number of comments by video.

Something important to measure is the act of **Sharing** your videos, which gives you an idea as to the impact on your audience. You will see that in a line chart.

In this same section, there will be a list of each shared video, showing the number of shares.

Annotations are clickable, customizable text or images that only appear on the desktop. You can use them to send viewers to more of your videos or playlists, your website, to cross-promote, or take viewers back to your channel page.

You can think of **Cards** like an evolution of annotations. They can inform your viewers about other videos, merchandise, playlists, websites and more. They look as beautiful as your videos, are available anytime during the video and yes, they finally work on mobile devices.

Video #8

Video #8: YouTube Editor

Something awesome about YouTube is the ability you have to create videos inside of your account. To go straight to the YouTube editor, go to www.youtube.com/editor

Here you'll see listed all the videos you have uploaded to YouTube over time. As well as several editing tools you'll learn how to use right now.

The first thing you must do is name your project. I will just name it “Testing Video”.

Then, you'll be able to drag one or several videos from your list of previously uploaded videos, right here, to the timeline.

The video editor will be displayed automatically. Here you'll be able to do all sorts of things like quick fixes, filters, add text and edit the audio, as well.

Under the Quick Fixes tab, you are able to edit the brightness and contrast, change the speed of the video, rotate the video, pan & zoom or stabilize the video. Under the Filters video, you'll be able to change the look of the video. This is a really awesome feature that can impress your viewers, depending on what kind of video you are trying to create here.

You can also enable the text feature to insert text in your video. You'll be able to pick a font of your choice, as well as add some of the most basic text effects, such as bold and italic.

Of course you have the option of changing the size, color and alignment of the text. You can also decide the position of the text, as well as edit the background area of the text with the banner options. Finally, in this area you can put your text. Here you can preview effects side by side with the original video.

You can then close the video editor, and we'll take a closer look at this function here.

Right below this option, you'll be able to search for creative common videos and add them to your video project. Under this option you can add pictures to your project. You just need to click on the “add photos to project” button, and then you'll be able to add them from your photos, from your albums or upload them from your computer.

Right here, you can do something really awesome to YouTube videos, and that is add audio to it. This is useful if your video doesn't have background music already. The audio editor has Volume, Pan, Bass and Treble sound editing options.

You can then close the audio editor and add some really awesome transition effects to the timeline. That function is useful for multiple videos or when photos are inserted in the timeline. Here, you can also add a title to the timeline.

With this little tool right here, you can expand the video for easy viewing and for working on the video. This is really useful to synchronize all videos and photos perfectly.

And there you have the video with the effects already inserted on it. Once you are done playing around with the Video Editor, click on “Create Video” and you just need to wait for it to be live.

Video # 9

Video # 9: YouTube SEO

Step 1: Researching

When researching videos, you should go to the Google Keyword tool and look for words that have a minimum of 500 searches per month. You can look for variations of target keywords, so that you can get traffic. It is advisable to always go for a video that has a decent search volume in Google.

When you pick out your keywords, do a google search to see if there are any videos ranked on the first page. Then, check the second page, and finally the third page. If there are no videos ranking on the first, second or third pages, just forget about that keyword.

If you are new to video marketing, do not go for extremely competitive keywords. You can build your confidence first by targeting less competitive keywords. Then, you can go for tougher keywords, after you build up confidence. If the video is on the first page, look at the number of views. If it has more than 50,000 views and more than 100 backlinks, then forget about that keyword, as well.

Another important thing that you should consider is to FOCUS. Some individuals may put up many videos on their first page, and they may never get reviews. Their problem is that they do not take the time to rank their videos in the right way before publishing the other ones. Make sure that you focus your time on ranking one video before moving on to the next one. After knowing how to rank videos, you can rank several videos at the same time.

When you start making money through YouTube videos, you can then start investing in different software and services that make your life automated and easier.

Step 2: Uploading

This is the most important step that involves publishing a video on to YouTube. Before uploading the video on YouTube, save it to your hard drive and ensure that you use your target keywords. For instance, if your target keywords are “Cake Decorating Made Easy Review”, the name of your video should be “Cake Decorating Made Easy Review.mp4”.

Once you save your video, you can upload it. Uploading a video does not take a lot of time and is an easy process. You just click the “Upload” button that is found at the top of YouTube, when you

are logged into your account. Once you click the button, the video will start uploading. When uploading you can still work on your SEO page.

For a proper SEO, make sure that you have the keywords at least once in the title. If it reads well, you have the keywords twice in the title. It is not a must, but if you put the keywords in the title twice and it does not read right, just put it once.

In the description, you can put the keywords several times. However, it is advisable to put the keywords at the beginning of the description, in the middle and at the end. Also, ensure that you include the link to your video in the description, so that if any person scrapes the video, you can get a free backlink. Copy the description and save it to a text file for later use.

Put your keywords in tags. You just need to type your keyword phrase, place a comma after it and it will be converted into a tag.

The text file that you used for your description is needed at this stage. Once you finish uploading the video, you can go to the video manager and edit it from there. You will pick Subtitles and CC option. Also, you will add a new one. Pick the Transcript option, and upload the text file. You will then click on exit.

Step 3: Backlinking

After you finish uploading the video, there is an important task that you should do in YouTube SEO.

- You can send 3,000 scrape box trackback links
- Run your video through SB Bomber for 1,000 social bookmarks. You can also run it through social monkee for an additional 200 social bookmarks.
- Add the video to your social ads account
- Syndicate the three articles into the blog network for syndication
- Embed your videos onto 5-10 web 2.0 sites
- And Finally, add the URL to a blog network blogroll

If you are going after less competitive keywords, you'll need to use electronic releases such as trackbacks and bookmarking in the SEO page. Then submit your links to major sites such as:

- Blogger.com
- Wordpress.com
- Multiply.com
- And LiveJournal.com

When you have all your links, you can run it through Pingfarm.com to ensure that it is pinged and indexed.

Final Remarks

If you have completed the above back linking strategies, and your video is not in the first page, you can send it to additional blog network links, and continue until it hits page 1.

You have to note that once you upload your video, real people are going to view it. So, do not think that if you release just any video it is going to make you a boat load of money. You have to take your time and put something together that is informative. Make sure that you give the viewers a quality video that you would also love to watch.

Know that people will only view a video that will be beneficial to them. When people are researching, they are looking for information that is going to teach them how to perform a task.

Video #10

Video #10: YouTube Ads

Yes that's right, YouTube has an amazing advertising platform looking to skyrocket your business success with just a few clicks.

For direct access to the YouTube Advertising platform you can go to www.youtube.com/ads

What are video ads on YouTube?

These are any video uploaded to YouTube that play before the selected video begins to play. The automatic play of the video ads on YouTube helps your business grow by attracting more clients to your services and products.

The video ads usually have costs, but you have control over the overall budget. The most important thing is that you only pay for the ad once it is viewed. If the viewer skips the ad after 30 seconds, you do not pay.

YouTube helps you monitor daily costs and allows you to adjust the budget in relation to what you are comfortable with. Therefore, you needn't worry about the cost, because you are able to control the expense using the daily cost control. Move the mouse to whatever amount you wish to spend in a day and set it for the ad.

Who is the target of your ads?

The good thing is that YouTube has a variety of targeting options that will help you reach the correct customers and audience. You have the option of targeting people according to gender, location, and age, at the very least.

Therefore, you will need to choose the age bracket, gender, location and interests of the group of people you are targeting.

How do you measure the results?

It is obvious that everyone would like tangible results from something in which they have invested. Therefore, YouTube provides for the measuring of results. The tool that helps measure is the built in analytics tool.

This tool also allows you to see where the ad is being viewed and by how many people. You can also make adjustments to your ad at any time, and run multiple ads to see which one is effective.

You have the chance of getting a \$100 free credit when you spend \$25 on YouTube. Fill in the dialogue box that appears on the screen to take part in it. This is a good platform to encourage business owners to participate in online marketing to expand their business.

Case Studies

In this section you will be able to see video ads case studies. If you wish to be featured here, you can click the “want to be featured here? Tell us your story”. Then you will see a form that you fill out and submit.

Make a video

Before making your own video, you can view what others have done. You'll see several example videos that will help you considerably. You can have access to a really cool app that can help you do so.

Afterwards, you can start editing your own video. You are able to choose your favorite theme. After choosing a suitable theme, you can now launch your ad on YouTube.

Launch an Ad

There are 3 basic steps for setting up your video ad. Step 1: Select your Video, Step 2: customize your ads settings, and Step 3: Launch your ad.

Now, its time to create your Video Ad, so Click on get started.

Here you will enter the title or URL of the YouTube Video you want to advertise.

You will then create your video ad by filling in the required details, as well as selecting your thumbnail and clicking on continue.

You will have to decide where you want to send customers when they click on your Video ad. You can send them to your website or to your YouTube Channel.

Then, you will be able to decide how much to spend. You have to pick your country currency, daily Budget and Maximum Cost per View.

You will be asked if you have advertised before, so click where appropriate.

Sign in if you have advertised before using your google mail. Select your time zone and currency of your current location and Click continue.

Enter your billing information appropriately. Some of the billing information needed is the account type, name and address, how you pay, and what you pay with. Then, accept the terms and conditions, and finally click save.

Video #12

Video #12: The 10 do's you have to apply for Successful YouTube Marketing campaigns.

YouTube video marketing can boost your advertising campaigns results. Presently, it is the best way to promote your products and services.

Most businesses and marketers are taking advantage of YouTube advertising to reach their marketing objectives.

To achieve your business goals, here are some do's that will surely help you to succeed.

1. **Monitor and analyze your channel**

Monitoring your channel on a regular basis can give you a clear view about what is working in your YouTube advertising campaign. Analyze your videos' view counts to determine which kind of video attracts more viewers.

Get a clear demographic overview of your viewers to target similar audiences. Find out the source of traffic and focus specifically on playback to know how your viewers reach you.

2. **Visually attractive video**

To get more views, your videos need to be creative and attractive. Choose something that is instantly noticeable. Take advantage of thumbnails that are a little bit risqué or banners to hook viewers.

Be uniform with your style across your YouTube channel. Title cards are also a tremendous method to grab the attention of your viewers.

3. **Focus on video content (share quality content)**

Users spend more time on a website that includes a video, so including a video can increase the chances of getting more sales. Video content needs to be new and unique from the other marketers to get more viewers.

Break your video content into multiple segments. Cross promote your quality video content across other channels to get more shares.

4. **Advertise your videos**

To advertise your brand, you can utilize the tools available directly from YouTube. Include a call to action to motivate viewers to comment, like and share among their network.

Add a video on your website and a blog. Share YouTube video links with your current customers. Use SEO strategies to get listed in Google, Yahoo, and Bing. Advertising assists you in increasing the sales of your business.

5. Tag videos with relevant keywords

A tag is a keyword to label and identify your video content. Proper tagging is crucial to increase views. Ensure that your tags define and relate to the content of the video.

You can opt for tags according to your YouTube campaigns goal; whether you're specific tagging, compound tagging or generic tagging. Be creative and smart with tags and phrases to broaden your audience reach.

6. Play to your strengths

To increase traffic and expand your business, you need to work to your strengths. You need to look for the uniqueness of your business to show through in the video.

Discover the individual thing you have and advertise that on your YouTube channel. To create a great video, you need to focus on your goals by keeping your potential audience in mind to get the most from your promotional video.

7. Share webinars, interviews, and video responses

In order to increase traffic towards your YouTube channel, you can share videos in other communities such as blogs, forums, social media platforms, and websites.

Take advantage of webinars, milestones, interviews, testimonies, and reviews to make your customers aware of your products or services. These things assist you in connecting with viewers virtually.

8. Create playlists

Optimize your YouTube channel by initiating and creating a video playlist to control video cataloguing. A playlist can boost your organization and make your viewers more aware of your products or services.

Creating a playlist also improves your discoverability, because videos are indexed individually more than other videos. Playlists mean those videos are related to each other, so related videos are displayed in the sidebar.

9. Write a detailed description

A good description is all about what your video has inside which will help your viewers make them understand what they are going to watch. It also boosts SEO rankings in search engine results pages.

You need to be informative, navigate with a clear URL and transactional with calls to action. Try to include important things at the start of the description to gather a huge audience.

10. Optimize your channel

Optimizing your YouTube channel can increase your engagement, awareness, brand credibility, sales and revenue. You need to set up your channels with a relevant name, and a description as it will appear in search results.

Tagging and tiles, annotations, thumbnails and playlist URLs also assist you in optimizing your YouTube advertising campaign to achieve your business goals.

Video #13

Video #13: The 10 don'ts you have to avoid for Successful YouTube Marketing campaigns.

Don't publish all of your videos on the same day

Creating so many videos and uploading all of them on the same day can destroy your brand reputation completely. One after another notifications can annoy your audience and most likely they'll unsubscribe from your YouTube channel to avoid the notifications from you.

To fix this, schedule your YouTube videos, so your viewers will not get too many notifications from you. Scheduled video also boosts audience's curiosity to watch your YouTube videos.

Don't avoid feedback

Audience feedback is really important in order to optimize your brand and keep a good reputation in your niche market. Ignoring user's feedback can degrade your brand's trust. If viewers don't get a proper response from you, they will unsubscribe and neglect your videos.

Answer every question that is asked by your audience to improve your brand's integrity, and give users a reason to talk about you.

Don't overuse annotations

Annotations can be a great way to increase traffic and subscribers to your YouTube channel. YouTube provides the opportunity to add comments to be shown overtop of the video. Don't use this type of annotation because it looks unethical and distracts your viewers.

Overusing annotations can also lessen the impact on your audience. Invasive annotations and all capital letters need to be avoided when writing text annotations. So, don't annoy your videos with too many annotations.

Don't ignore video quality

Using poor quality videos for your YouTube advertising campaign leads to less viewers and subscribers. Most users avoid watching low quality video. The visual content of your video needs to be of the best quality to engage more customers. The audio quality also needs to be good.

Creating a quality video doesn't require expensive tools or apparatus, you can create it with your mobile device by focusing on angles.

Don't try to sell all of the time

Selling all of the time with your YouTube videos can irritate your viewers. They'll ignore updates from you, and that can decrease your subscribing rate. Uploading advertising videos all the time can be the cause of losing important leads.

It can also poorly impact your products sales and return on investment. Try to post regularly with different kinds of videos to connect, engage and demonstrate your products instead of advertising.

Don't buy fake subscribers

Businesses and marketers always look to gain more traffic for their YouTube channel and websites, because it increases your brand visibility. But, buying subscribers can really hurt your business.

This leads to losing potential viewers, brand reputation, traffic and user engagement. Try to avoid the fake likes and try to reach your audience via advertising and organic results. Real viewers boost your sales and credibility.

Don't SPAM

Spamming your potential viewers can reduce views. It can also decrease your brand credibility. There is a greater probability that viewers will unsubscribe from your channel.

Google is continuously working to stop spamming. Scamming content, deceptive thumbnails and artificial subscribers can be a prime cause to be banned by the Google Display Network.

Don't repeat your video content

No one likes to watch repetitive content. Repetition of your video can harm you. If your viewers can find it somewhere else, then why would they come to you? A repeated video can decrease your potential viewers. It also affects your sales funnels and revenue.

If the Google Display Network finds your video is repetitive content, it will mark your videos as spam. Be unique with your video content to diminish repetitiveness and to engage your viewers with your brand.

Don't avoid thumbnails

Without video thumbnails, viewers will be unable to view a snapshot of your products or services. Absence of thumbnails prompts your audience to move from your YouTube channel.

Neglecting thumbnails can be a cause of losing prospective customers. To get more from your YouTube advertising campaign, you can use a thumbnail that is suggested by YouTube after uploading a video.

Don't avoid the call to action

Ignoring a call to action in your video can harm your YouTube channel. With a call-to-action, you can convert prospective viewers into paying customers.

Don't hesitate to utilize a call-to-action in your videos. CTAs are directly proportional to viewers. Don't use too many CTAs, though. That can also be a reason for losing audiences. Try to motivate your customers and make them click on your video to explore more about you.

Video #14

Video #14: Shocking YouTube Case Studies.

Zagg

Zagg is an innovator of scratch-protection and accessories for portable devices including shields, skins, keyboards, cases and many more. Zagg engages and educates its customers using the power of demonstration and flexibility of video.

The objective of Zagg was to boost the traffic to their YouTube channel to get new customers and educate them as to how their products work.

They uploaded 2 videos per week to foster audience interest and curiosity. YouTube ads, constant listening and answering questions from their audience regarding their product demonstration also boosted their brand awareness.

They got 13 million views on their branded YouTube channel for a specific product, and targeted video increased their conversion rate by 75%.

LSTN Headphones

LSTN Headphones is a manufacturer of headphones, earbuds, speakers and apparel. The aim of LSTN is to provide standard products to generate funds for hearing restoration, and make people aware of hearing loss.

With all these, the company was also looking to grow their business. LSTN Headphones took advantage of YouTube video ads to gain new customers.

They paid special attention to inform their audience of their objective with genuine emotions, so users could feel good about advocating for a positive cause.

YouTube advertising assisted them to present the gift of hearing to more than 20,000 people globally.

The BBQ Guys (ShoppersChoice)

ShoppersChoice is the proprietor of 'The BBQ Guys' channel. It is the epitome for online stores that offer home, outdoor kitchen, patio furniture and entertaining products and services.

The goal of the company was to inform their prospective audience and drive more sales and subscribers towards their YouTube Channel - “The BBQ Guys”.

They took advantage of YouTube and increased their visibility by creating a channel and uploading fresh video content every few days. They also utilized YouTube ads to promote their brand. Their special focus was on customers who were curious about grilling.

With this advertising method, they got high quality leads. Conversion rates for their Channel improved from the past rate. They started to get 800-5000 likes per day.

Rokenbok

Rokenbok is a high end robotic toy and construction systems company.

When the economy shifted, they needed new ways to reach their customers and demonstrate how to operate Rokenbok toys.

Rokenbok only works when it is seen in action, so the company started advertising with YouTube TrueView ads, search ads and display ads. They designed fun and educational videos to target audiences who searched for trains and construction.

The results were pretty great. YouTube became the number one source of traffic for Rokenbok. 50% of their customers came from YouTube.

RevZilla

RevZilla was established in 2007. They are a premium in-store and online shopping experience for motorcycle lovers who are looking for helmets, gear, motorcycle jackets and other accessories.

The objective of RevZilla was to demonstrate its products, increase YouTube channel subscriptions and gain repetitive customers.

The company utilized YouTube videos to create product guides, safety tips and knowledge driven videos. They also used YouTube TrueView ads and YouTube analytics to get traffic and monitor the quality and quantity of online video traffic to optimize their next video.

They got 7 million views on their branded YouTube channel. With YouTube promotion videos, RevZilla tripled their subscriber base in just a few months. And they achieved 50% growth in their revenue.

Marriott Hotels

Marriott International Inc., is a worldwide known lodging company in 79 countries and territories.

It was looking to build a content marketing strategy to engage people who love to travel with the 3C strategy – content, community, and commerce.

The company partnered with key digital platform influencers. They made a deal with Jackson Harriers to create 3 YouTube videos that had a special focus on destinations. They also worked with Snapshot and musicians.

At the end, they designed two original videos to show that traveling can be delightful. The first movie “Two bellman” got 5 million views and the second movie “French Kiss” got 6 million views. Overall, Marriott Hotel received over 11 million views on YouTube.

GEICO

GEICO (Government Employees Insurance Company) is the second largest auto insurance company located in the US.

YouTube pre-roll ads don't allow viewers to skip ads until after 5 seconds, so GEICO didn't want to get skipped by the audience, but still wanted to increase awareness for the company and boost its revenue.

GEICO hired the The Martin Agency. The agency created the first ad called ‘Family’, which began at a dinner table with an off screen narrator saying, ‘You can't skip this GEICO ad because it is already over’. After seeing the great impact of video on their brand, The Martin Agency created 3 more videos for them: High Five, Cleaning Crew, and Elevator.

The company achieved 725,000 unique views in a day with the ‘Family’ YouTube video ad.

Gillette

Gillette deals in razors, skin care, shave gels and shaving foam products. It provides men's grooming products across the globe.

The company wanted to take advantage of micro moments which are basic shave, trimming, and shaving specific facial hairstyles to increase sales and engagement with their audience.

More than 50 YouTube video tutorials were created with unique video content. They also took advantage of YouTube's demographic targeting.

Gillette uploaded 895 videos onto its YouTube channel, which gained more than 24 million views and gathered 22,000 subscribers. How to shave- shaving tips for men got more than 1.5 million views, 1000 likes and 500 comments.

Adidas

Adidas is a German based multinational company that manufactures sports shoes, apparel, and accessories.

Adidas wanted to generate a buzz about the FIFA World Cup in 2014 to connect and engage viewers.

The company got together with KICKTV to initiate a live trickling series which was named ‘The Dugout’ which tells you everything about Football; from famed football players, Q&As and post match recaps.

KICKTV mainly focused on their video content to resonate with viewers. A total of six episodes were uploaded to make Adidas the fastest growing brand.

Adidas' YouTube channel gained 15 million visits on its website. KICKTV content received 1.5 billion views, with one of them tripling the subscription rate of the Adidas YouTube channel.

American Home Shield

American Home Shield Corporation is a leading company which deals in home-warranty services. It offers incomparable services and coverage based on customer needs.

The company was looking to optimize its YouTube video content metadata and includes customized thumbnails and annotations. It also wanted to enhance viewer retention rate.

American Home Shield services worked with Pixability. Pixability used its YouTube services and software to lift their non-paid video visibility and views by 100%.

They got great results. YouTube search traffic increased by 140%, and views were enhanced from Google search by 150% in less than six months. At the end of the campaign, organic videos views were boosted by 106% and Google search views grew by 155% with a click through rate of 6.12%.

Video #15

Video #15: How to make tons of money with YouTube as an Affiliate

YouTube & CPA

YouTube is one of the platforms that you can use to earn cash. You can drive traffic to your CPA offers from YouTube.

The number of views you have in YouTube determines the traffic that you can get. You have to ensure that the video you are using has enough traffic to ensure that you get more money. There are different ways you can use to promote your CPA offers.

Step 1: Identify the CPA offer that you want to promote

You must ensure that you have a specific offer that you want to promote. The video you want to create must be related to the CPA offer.

Step 2: Create your Video

Create the video and upload it to YouTube. Make sure you optimize it so that the video can get more views to create traffic. When your video gains more views, post your CPA offers to ensure that people click on them.

Step 3: Sponsor a related video

If you find a video related to your CPA offer, you can sponsor it. You must ensure that the video you are sponsoring has a lot views and likes. Contact the publisher of the video and offer them an incentive, so that you can promote your CPA offer on their video.

The most important thing is to make sure that the YouTube video is related to the CPA offers.

YouTube & List Building

If you want to succeed in the YouTube sector through list building, you must ensure that you have a setup. You must have an attractive video that you post on YouTube that results in list building.

Step 1: Develop a theme

This is the first and most important step. It can make or break your YouTube success. Anyone can come up with a video and post it on YouTube. So, if you want to be unique, you must sit down and come up with a theme. Before you begin doing anything on YouTube, find your theme and stick to it.

Step 2: Be consistent

Even if you have zero views and subscribers, ensure that you are consistent. When you are consistently releasing a video every week, you may hit 1,000 daily views within a month.

Step 3: Add annotations to everything

YouTube has a unique feature that allows you to add annotation popups while the viewer is watching. This is a fantastic way of building your subscribers by letting people know about any upcoming tours, free offers, and product releases.

You can also encourage people to register and become members of your organizations. This will increase your membership register very fast.

Step 4: Host guests

If you are aiming at generating maximum exposure, you need to host industry leaders as guests in your videos. When you bring in guests, your daily view count is greatly increased. You also become more credible, and you can get massive sponsorship.

Step 5: Blast your release days

This is the last step and one of the most important steps. Let everyone know your release date so they can watch your videos.

YouTube & ClickBank

ClickBank is a platform for the marketplace of product creators and affiliates allowing them to make money easily without cumbersome agreements and paperwork.

Most affiliates have earned cash through creating a unique link for thousands of products and ensuring that they generate traffic. ClickBank takes care of all the checkouts and e-commerce, and at the same time offers an affiliate program.

Step 1: Look into YouTube videos that have already been optimized.

To build a sales funnel, you need to look for a YouTube video that has already generated enough traffic. Choose the right product to promote on ClickBank. Make sure you find a product that is not too competitive and promote it.

Step 2: Search the product name

Before you google search, make sure that you have a YouTube video on the first page and ensure that it has less than 20,000 views. You can then easily outrank them with a basic SEO. You can then email the publisher and ask him or her for a review copy.

Step 3: Create a screen capture video

A call to action is an important aspect in affiliate marketing. You can review your product in a video and do an in depth look at the product.

When you save the video, use the product name for naming the video, because it is an important aspect of ranking. Make sure that the first line of your description is the product name.

When you use ClickBank correctly, you will generate more reviews.

YouTube & SEO

Optimizing your video using an SEO strategy makes it rank higher in the YouTube search engine. Here are five main tips that will help you rank higher on YouTube:

Keywords

It is important that you learn how to use the phrases and words in your niche and use them in every tagline and headline. Thus, you need to know the product very well that you are promoting.

For instance, if you need to promote a mobile app, you can use the word "mobile advertising." Additionally, do not forget to use long tail keywords. These are longer sentences that contain your main keyword.

Descriptions

Descriptions can explain to your viewers what your marketing video is all about. Make sure the descriptions are short and accurate. In a short description, do not forget to include the link to your website or your landing page.

Thumbnails

These are still images that act as a preview for your video. They are a powerful marketing SEO element, so you need to choose and customize them wisely. Make sure that the thumbnails stand out from the rest. People are not attracted to dull pictures or thumbnails of low quality.

Link building

Link building is another SEO strategy that you can use to boost your video in YouTube. YouTube works just like other platforms. Any content that is shared often is ranked higher in the search engines.

All you need to do is ensure that you place the link to your YouTube video in as many online spots as you can.
