KITCHEN FEATURES
This line gives you options to create a space centered around your routine. Whether it’s a modern retreat or an energizing start to your morning, The Masterpiece® Collection gives you the versatility to create your ideal bath.
VANITY OPTIONS.
The style of cabinetry you choose plays a significant role in the ultimate feel of the room. From understated to rich in detail, The Masterpiece® Collection offers door styles that complement—and complete—any look.

In addition, new foil options, suede finishes, and wood types like Rustic Alder mean you have even more freedom to create a fitting combination for your home. And with dozens of styles, this collection achieves both modern and classic spaces beautifully.
SELECT YOUR STYLE.

Choosing the right door for your design starts with six basic styles, each achieving a distinct look. Different styles hold finishes uniquely and make the difference between classic and modern designs.

**RECESSED**
A recessed panel door has a flat panel set back inside the frame of a door.

**RAISED**
A raised panel door has a panel that rises in the center and is somewhat decorative.

**SLAB**
A slab-style door has the look of a single piece of wood with no panel or decoration. Drawer fronts are also available as slab on many styles.
Shaker is a style term given to specific door styles that provide a clean, orderly, and simple look.

**SHAKER**

**FULL-OVERLAY**
A full-overlay door style has very little cabinet frame showing around each door and drawer front, creating a seamless look.

**HALF-OVERLAY**
A half-overlay door style shows some cabinet frame around each door and drawer front.
WOOD TYPES.

Hickory (H)
The hardest wood with the widest color variation. Random burls, knots, and mineral streaks give each hickory kitchen a unique sensibility.

Hickory-Rustic (RH)
Includes a combination of open knots, wormholes, dramatic color contrast and mineral streaks. These characteristics occur naturally.

Alder-Rustic (RA)
Commonly used for a rugged look with knotholes, burls, and mineral streaks. Can create a modern industrial look with a darker finish.

Cherry (C)
Brings a rich, elegant feel. Common in fine furniture. Darkens or “mellows” with age. May contain small knots for added character.

Maple (M)
Another popular, versatile wood with rich textures and grain patterns that lends itself to practically any application.

Oak (O)
A go-to wood species—very uniform and predictable. Therefore takes lighter stain and paint colors well.
QUARTERSAWN (Q)

This technique of cutting a tree at a nearly 90° angle creates a parallel and orderly feel to the grain—as opposed to the natural variances in the grain you’ll find with traditional woods.

EVERCORE® (E)

Want an especially smooth painted finish, with no cracks or shifts in the center panel? Extra-solid EverCore® doors and drawer fronts—made by super-compressing wood fibers—have no grain, and react less to temperature and humidity compared to regular wood.

CRAFTED HARDWOOD VENEER (CR)

This new veneer is designed for a more consistent color and grain pattern on every door. It’s engineered to give the look of Quartersawn Maple, Oak, or Cherry and is less susceptible to the expanding and contracting that comes with solid wood.

Wood-grain foils achieve a contemporary look with the texture of abstract wood-grain.
If you’re considering a contemporary look, high-gloss foil can bring that modern, high-design feel to your kitchen.
THERMOFOIL

A uniform, consistent, durable, and easy-to-clean finish. Great for laundry rooms, mudrooms, bathrooms, or other working spaces.

FINISHES.

We believe the way cabinetry is finished is just as important as the material from which it’s made. That’s why every piece of cabinetry is hand-finished by our skilled craftspeople. Whether it’s hand-spraying, rubbing, detailing, or distressing, the artistry put into each piece ensures that your cabinetry will be a Masterpiece—and completely unique to your home.

MASTERCOAT™ FINISHING SYSTEM.

To ensure a lifetime of quality, our proprietary MasterCoat™ Finishing System runs through every aspect of our manufacturing process. Beginning with wood selection, to carefully applied paints and stains, through our proprietary topcoat, this process means your cabinetry is crafted to last.
PAINTS.

For a smooth, even look, paints give you control over the exact color of your cabinetry and achieve a uniform feel.

PAINTS WITH HIGHLIGHT

The highlight process adds visual depth and interest in the corners, crevices, and ridges of the cabinetry, bringing out unique qualities of each design. Since it’s applied by hand, no two doors are exactly the same.

VINTAGE PAINT

A finish that gives a painted door a sense of history and the feeling of being well-loved. The door’s distressed and sanded corners allow a little of the original wood to show through.

PAINTS WITH SUEDE TOPCOAT

A suede topcoat softens the tone of the paint with a matte finish. Like our standard topcoat, a suede topcoat provides durability and resistance to scuffs, stains, UV fade, and cleaning chemicals.

All paints and stains are shown on Maple unless marked otherwise.

* Shown on Cherry
Our aged technique achieves the look of well-loved cabinetry. Each piece is hand sanded before our artisans apply distressing effects, including edge rasping, worm holes, softened corners and edges, and random dent patterns. Next comes the color – paint and glazes add beauty and dimension and a dry-brushing technique creates a subtle linear accent. Burnishing material is then used to accent the softened corners and edges. Prior to the final step, fly speck is applied randomly to add depth and dimension to the finish. We top it off with our suede topcoat for a beautiful matte finish. Because every detail is hand applied, no two pieces will ever look alike.
STAINS.

Stains come in a range of colors to enhance the natural grain, swirls, and texture distinct to each species.

STAINS WITH GLAZE

Glazing adds depth and dimension to a door. It’s done by hand-spraying a flood coat of glaze over the entire base stain, then hand-wiping and detailing the door so the glaze stays in the cracks, crevices, and grain-lines.
All paints and stains are shown on Maple unless marked otherwise.

* Shown on Cherry
** Shown on Oak
Distressing mimics the imperfections of reclaimed wood by adding wormholes, softened corners, rasped edges, and other deliberate methods of loosening the sense of uniformity; all done by hand. A suede topcoat is standard.
A suede topcoat softens the overall color tone of a stain with a matte finish. Like our standard topcoat, a suede topcoat provides durability and resistance to scuffs, stains, UV fade, and cleaning chemicals.

All paints and stains are shown on Maple unless marked otherwise.
