CONTROL

OK- 9-11-78

Pending receipt of updated photos, all are eligible except #13. #13 has suffered loss of integrity of setting - it is removed from a road system, and while somewhat functional, is primarily landscaping for a golf course. #27 has also suffered loss of integrity of setting but is a more Queen post, while #13 is a Burr truss which is common in this county. See phone check in this state 12-17-78 for change in significance level.

35 bridges / all but #13 are significant (13 has loss of setting, presently being on golf course). These covered bridges are 1 of largest concentrations of covered bridges in 1 location. Nomination explains well why this occurred. Well done thematic resource. ebovich to (Kedw) Bantz & contact sheets are being sent.
