NATIONAL REGISTER OF HISTORIC PLACES  
REGISTRATION FORM

OMB NO. 1024-0018, NPS FORM

RECEIVED  
MAR 31 1992  
436

This form is for use in nominating or requesting determinations for individual properties or districts. See instructions in How to Complete the National Register of Historic Places Registration Form (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering information requested. If an item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classifications, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

Bates Cobblestone Farmhouse  
Middlesex, Yates County

Section 7 page 1

---

DESCRIPTION

The Bates Cobblestone Farmhouse is located on the southeast corner of the intersection of Route 364 (Canandaigua Road) and Town Line Road in the rural agrarian town of Middlesex in northwest Yates County. The farmhouse and three related outbuildings are sited on a 50.8-acre parcel which straddles Route 346 and is characterized by gently rolling fields and lightly wooded areas. Surrounding properties along this heavily traveled north-south thoroughfare are predominantly large-scale working farms with extensive, cultivated fields. The house, oriented northward toward the Gorham-Middlesex Town Line Road, is surrounded by a flat, grassy lawn enclosed by a modern post and rail fence. The lawn is dotted with mature trees and shrubbery. A long curved driveway runs from Town Line Road along the east elevation of the house and emerges behind (south of) the house on Route 364. Southwest of the house, along Route 364, are three early twentieth century support structures, including a garage, a large barn (ca. 1932) and a silo. All three enhance the setting of the house and contribute to the significance of the property. The boundary is drawn to coincide with the legal lot lines of the parcel currently associated with the farmhouse and outbuildings and represents the historic rural, agrarian setting during its period of significance.

The Bates House, reputed to have been built as a tenant house in 1836, is a one-story, five-bay, rectangular cobblestone building with a one-story frame rear wing added during the early twentieth century. The gable-roofed superstructure rests on a slightly raised stone foundation. It is extremely restrained in ornamentation and simple in its cobblestone treatment, with relatively rough and irregularly shaped, sized and colored field cobbles laid four stone per quoin on the front facade and three stones per quoin on the side elevations. The limestone quoins, sills and lintels differ from those of most cobblestone buildings in Yates County in that they are not embellished with any kind of decorative tooling.

The gable roof features a narrow, unembellished wooden cornice characteristic of the Federal period. An off-center cobblestone chimney (presumably rebuilt during the twentieth century) pierces the roofline. The unembellished doorway also recalls vernacular Federal period building traditions, particularly among small-scale, rural dwellings of the period.

The building's interior features survive relatively intact, with a variety of extremely modest details reflecting its early nineteenth

Middlesex, Yates County

Section 7 page 2

---

century origin. The original room configuration also survives intact, with parlors located in the front corners of the building and utilitarian spaces (recently remodeled) across the back of the main block and in the rear kitchen wing.

There are three contributing early twentieth century support structures located behind the farmhouse and oriented towards Route 364. They are a gable-roofed frame garage, a large, gambrel-roofed frame barn with vertical board siding, and a wooden silo. The barn was built in 1932; the other two dependencies also probably date from the early twentieth century.

**8. Statement of Significance**

**Applicable National Register Criteria**

(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

- A** Property is associated with events that have made a significant contribution to the broad patterns of our history.
- B** Property is associated with the lives of persons significant in our past.
- C** Property that embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D** Property has yielded, or is likely to yield, information important in pre-history or history.

**Criteria Considerations**

(Mark "X" in all the boxes that apply.)

- A** owned by a religious institution or used for religious purposes.
- B** removed from its original location.
- C** a birthplace or grave.
- D** a cemetery.
- E** a reconstructed building, object or structure.
- F** a commemorative property.
- G** less than 50 years of age or achieved significance within the past 50 years.

**Area of Significance**

(Enter categories from instructions.)

SIGNIFICANCE

The Bates Cobblestone Farmhouse (ca. 1836) is architecturally significant as a largely intact example of the cobblestone method of construction in New York State, and as a representative example of nineteenth century vernacular, rural domestic architecture in the Finger Lakes Region. The former farmhouse embodies the distinctive characteristics of the cobblestone method of construction in the use of medium-sized field cobbles (2 1/2" -4") laid in horizontal rows and bonded with limestone mortar, the use of limestone quoins to decorate and stabilize the corners of the building and the use of limestone lintels to ornament and reinforce the door and window openings. Typical of the Middle Period (ca. 1835 - ca. 1845) of this particular method of construction, the building features irregularly shaped, variously colored stones laid four cobbles per 12" quoin on the front and side elevations. The horizontal mortar is tooled with an exaggerated V-shape typical of the Middle Phase of cobblestone construction, while the vertical joints are struck without the typical pyramid shape. Although most stones are randomly laid in horizontal rows, the mason experimented in several rows with the herringbone pattern, directly above the two front windows in the western half of the house. The herringbone pattern was not widely used until the Middle and Late Periods of cobblestone construction.

The Bates house is one of nine extant cobblestone buildings in Yates County, eight of which survive intact and are included in the present Multiple Property Submission. The other seven are the Barden Farmhouse (ca. 1843), the William Nichols Farmhouse (ca. 1844), the Jephtha Earl Farmhouse (ca. 1850s/1860s), the Angus Farmhouse (ca. 1831-34), the Young-Leach Farmhouse (ca. 1836), the Dr. Henry Spence Farmhouse (ca. 1848), and the Daniel Supplee Farmhouse (ca. 1844-45). (The ninth extant cobblestone building, the Olney-Royal Farmhouse [ca. 1835], is in the process of being remodeled; the present alterations have severely compromised the physical integrity of the former vernacular, Early Period farmhouse.)

Both the Robert Roudabush Inventory and Carl Schmidt's Cobblestone Masonry (1966) identified eleven extant cobblestone buildings in Yates County, two of which no longer survive: the Noble-Preston House (Schmidt, page 207) on the east shore of Canandaigua Lake in Benton and District #5 Schoolhouse (Schmidt, page 208) in Potter.

The eight surviving, intact farmhouses can be categorized into groups according to the levels of sophistication displayed in their

United States Department of the Interior  
National Park ServiceNATIONAL REGISTER OF HISTORIC PLACES  
CONTINUATION SHEETBates Cobblestone Farmhouse  
Middlesex, Yates County

Section 8 page 2

---

cobblestone masonry; these groups generally parallel the Early, Middle and Late Periods as outlined by renowned cobblestone scholar Carl F. Schmidt in his Cobblestone Architecture (1944) and Cobblestone Masonry (1966). As Schmidt notes, these periods tend to be fluid and overlapping; an "unsophisticated" later building can look just like an earlier building and a "sophisticated" earlier building can easily be mistaken for a later building. Other features of the building and the history of the area are often better indicators of the exact period of the building. Nonetheless, for purposes of comparison, the buildings can be grouped as follows. Early, relatively roughly executed, vernacular cobblestone dwellings include the Bates, Barden and Supplee houses; they feature irregularly shaped, sized and colored stones laid three or four cobbles per quoin. The Angus and Young-Leach houses also feature relatively irregular field cobbles, but they are particularly distinguished in their herringbone masonry pattern. Built during the 1830s, neither the Angus nor the Young-Leach house features the highly sophisticated, finely crafted herringbone articulation characteristic of later cobblestones. Nonetheless, they are notable for their early embodiment of the technique in the statewide context; furthermore, they are the only examples of the technique in the local context. (There is only one other example of the herringbone technique in Yates County: It is the small cobblestone smokehouse associated with the William Nichols Farmhouse.) The Nichols and the Earl houses represent more highly sophisticated masonry techniques associated with the later Middle and Late Periods: both feature small, nearly perfectly matched reddish, oval, lake-washed cobbles set at an angle and laid six cobbles per quoin. Joint work in the mortar is meticulously articulated. The anomalous Spence house features relatively small, even stones, but they are laid without the careful attention displayed in the Nichols and Earl houses and are set within an excess of unarticulated mortar, giving the otherwise large and grand house a rather vernacular character overall.

The Bates House is also architecturally significant as a representative example of early nineteenth century, rural vernacular domestic architecture in Yates County. It embodies the distinctive features of the type, period and style in its rectangular, gable-roofed form, its five-bay, center-hall facade, its six-over-six, double-hung windows with simple wooden trim and wide stone lintels, and its simply molded wood cornice. Intact interior features, including extremely restrained woodwork and original room configurations, enhance the significance of the building.

Three intact historic dependencies enhance the former farmhouse's integrity of feeling and setting and, therefore, are contributing elements of the nominated property. The barn dates from 1932, while the garage and silo are also believed to have been built in the early twentieth century.

March 3, 1992

Orin Lehman, Commissioner  
State Historic Preservation Officer  
NYS Office of Parks, Recreation and Historic Preservation  
The Governor Nelson A. Rockefeller Empire State Plaza  
Agency Building 1  
Albany NY 12238-0001

Dear Mr. Lehman:

The Yates County Planning Board recommends State and National Registration of the historic sites listed on the enclosed sheet. The Planning Board finds that the distinctive construction method of these cobblestone farmhouses makes them unique in both New York and the nation.

Not only are these cobblestone structures important to the state and the nation, but they are an important component of Yates Counties unique rural character. It is the Planning Boards policy to give historical sites special consideration in the planning process.

Listing on the State and National Historic Registries will give these cobblestone structures the recognition they very much deserve.

Sincerely,

*Amy R. Dlugos*
