# ABSTRACT

United States General Accounting Office.

Study of the Well-Being of Older People in Cleveland, Ohio, 1975-1976 [Machine-readable data file]. Created for the General Accounting Office, Office of Human Resources Division. --Washington, DC: General Accounting Office (producer) 1975; Washington, DC: National Archives and Records Service (distributor)

PROVENANCE: Created by the Duke University Center in collaboration with the Administration on Aging, the Social and Rehabilitation Service, and the Health Resources Administration of the Department of Health and Human Services for Human Resources Division, General Accounting Office.

TYPE OF FILE: Microdata; unit of observation is the individual respondent.

UNIVERSE DESCRIPTION: The universe consists of a sample of 1,834 noninstitutionalized persons 65 years old and older residing in or near Cleveland, Ohio.

SUBJECT-MATTER DESCRIPTION: This file contains data relating to each respondent's age, sex, race, marital status, education, household structure, employment status and history, type of home care received (personal care, checking, homemaker, administrative and legal, meal preparation, etc.), financial status (housing, groceries and food stamps), social/recreational services, medical care received (medical, psychotropic drugs, supportive devices, nursing care, physical therapy, mental health), assessment and referrals services available (coordination, information, and referrals, overall evaluation, and outreach), type of transportation services (bus, car, etc.), educational background of respondent, and employment status.

GEOGRAPHICAL COVERAGE: The basic geographic location is the Cleveland, Ohio area.

TECHNICAL DESCRIPTION:

FILE STRUCTURE: Fixed length, non-hierarchical.  
FILE SIZE: One data file; 1,834 logical records.  
FILE SEQUENCE: By case number.

REFERENCE MATERIALS:

Documentation Relating to a Study Concerning the Well-Being of  
Elderly Persons in the Cleveland, Ohio area.

Available from the Machine-Readable Archives Division,  
(address below)

This is a guide to the machine-readable data file. It contains  
record layouts, codes, the questionnaire, GAO reports, a portion  
of the computer printout, and two-volumes of reference manuals.

RELATED PRINTED REPORTS: See the Introduction to Documentation.

RELATED MACHINE-READABLE DATA FILES:

The Longitudinal Retirement History Study (3-47-76-1)  
Demographic and Economic Characteristics of the Aged (3-47-78-3)  
The 1976 Survey of Income and Education (3-381-76-1)  
The 1970 Housing Evaluation Form Survey (3-207-79-2)  
Characteristics of Households Receiving Food Stamps (3-462-79-1a)

## INTRODUCTION

Approximately 20 million people--one out of every nine Americans--are 65 years old or older. They receive billions of dollars in retirement funds and are assisted by over 134 Federal programs. Each time Congress considers relevant legislation it confronts the question of how these programs affect the elderly. Prior to 1975, the Federal government had neither evaluated the combined effect of the many programs for the elderly, nor determined the total amount of Federal funds supporting these programs.

Congress concluded that an overview of the effect of Federal, State, local, and private programs on the elderly was needed. To assist the Congress in this regard GAO developed a two-phase study to: 1) assess and measure the overall well-being of a sample of elderly persons; and 2) update information about these individuals in order to identify changes in well-being and attribute such changes to services and other factors.

To collect data, a multidisciplinary team at the Duke University center developed survey questionnaires in collaboration with the Administration on Aging, the Social and Rehabilitation Service, and the Health Resources Administration of Health and Human Services (formerly HEW). The team administered these questionnaires to randomly selected elderly persons residing in or near Cleveland, Ohio. The elderly persons selected were 65 years old and older and were not in institutions, such as nursing homes.

The sample, made demographically representative by adjusting it to characteristics of national statistics on the aging, was based on two separate lists of 2,500 names of elderly persons residing in or near the Cleveland area. Each respondent had an equal chance of selection, thus making the sample stratified-weighted. Students from Case Western Reserve University interviewed nearly 2,000 persons, then reinterviewed them the following year in order to identify changes in their assessed well-being. Some 500 extra persons served as substitutes for interviews not completed

due to refusals, removals, or respondent not at home. Thus, this study for GAO became the first government study to ascertain the effectiveness of Federal programs on the elderly.

The Cleveland Elderly Study enables researchers to cross-tabulate age, race, and sex with information relating to living arrangements such as the type of home care received, health, employment, social/recreational services, types of assessment and referral services, transportation, and educational background. Researchers should find the study a valuable source for analysis of topics such as the interrelationship between demography, socio-economics, education, ethnicity, and health in the study of poverty and employment trends among the aged; housing problems; community services, family problems, including the changing status of the elderly in the labor force; the dynamics of government support of Federal programs such as public welfare; and questions dealing with various ethnic and income groups 65 years old and older, which would be useful to educators, as well as a wide range of other specialized potential users.

The study relates to other machine-readable series in the National Archives. The Longitudinal Retirement History (RHS), 1969-1979, (3-47-76-1) selected a cohort to provide information on early retirement. Researchers can also study the Demographic and Economic Characteristics of the Aged (DECA) (3-47-78-3), which contains an overview of persons aged 65 and over who were eligible for Medicare benefits. The 1976 Survey of Income and Education (SIE) (3-381-76-1) concerns poverty households with school-age children and could be compared to poverty-level households of the elderly. The 1970 Housing Evaluation Form Survey (3-207-79-2), which provides evidence of how housing markets and low income households respond to housing allowances, and Characteristics of Households Receiving Food Stamps (3-462-79-1a), also concern poor and near-poor households. A study in the Center for Machine-Readable Records--"Social Indicators of Equality for Minorities and Women" (C 1-453-79-1)--can provide comparisons on employment, income, and education with elderly women and minorities.

Other related studies include the 1963 Survey of the Aged, which preceded the study of Demographic and Economic Characteristics of Aged (DECA) and was used to develop Medicare. Follow-up surveys to DECA, such as the 1973

Durham Study at the Duke Center for the Study of Aging and Human Development provided similar information on the status of the elderly, and through the linkage site and identification number these surveys can be used in conjunction with the Cleveland study as an overview of the entire American Aged population.

Related textual records include motion pictures, filmstrips, and newsreels concerning "Federal Old-Age and Survivors Benefits", and a forty-five minute videotape describing the methodology and how to use the data from the Cleveland Elderly Study. Textual records also exist from earlier studies on the Aging in Record Group 47, Records of the Social Security Administration; Record Group 220, Records of the Presidential Committees, Commissions and Boards; Record Group 363, Records of the Social and Rehabilitation Service; and Record Group 381, Records of the Office of Economic Opportunity.

Documentation for this study consists of this introduction; a two-volume manual containing a record layout, codes, and the questionnaire; special GAO study, The Well-Being of Older People in Cleveland, Ohio (1977), and a portion of the computer printout.

The documentation package, including this introduction, was prepared by Sandra L. Moon, Archivist, Machine-Readable Archives Division, June 1980.

## INTRODUCTION

This codebook describes the computer file generated from the 1975 and 1976 U.S. General Accounting Office (GAO) study of the Well-Being of Older People in Cleveland, Ohio. This study combined information from a direct interview questionnaire with service data from agencies that served the area, and Medicare and Medicaid records.

We took a sample from over 80,000 people in Cleveland, Ohio, who were 65 years old and older and were not in institutions, such as nursing homes. We insured that our sample was demographically representative by comparing the characteristic of our sample to statistics for the city of Cleveland.

In our study, 1,834 older people were interviewed by Case Western Reserve University personnel from June through November 1975. A year later, 1,519 of these older people were reinterviewed. This overall sample is composed of two subsamples. The first is a scientific random sample of the older population (1,609 and 1,325 people respectively in phase 1 and phase 2). The second is a sample of Supplemental Security Income (SSI) recipients (225 and 194 people respectively in phase 1 and phase 2). The file contains no names, addresses, social security numbers or other information that could identify the people who were interviewed. This was done to protect the privacy of the participants and keep their individual responses confidential.

In interviewing, we used a questionnaire containing 101 questions developed by a multidisciplinary team at the Duke University Center for the Study of Aging and Human Development, in collaboration with HEW's Administration on Aging, former Social and Rehabilitation Service, and Health Resources Administration. The questionnaire contains questions about an older person's well-being status in five areas of functioning--social, economic, mental, physical, and activities of daily living. For detailed information about the questionnaire see appendix I.

In defining and quantifying the services, we used a format developed by the Duke University Center to define 28 different services. These services are defined in appendix II. Services are defined according to four elements: purpose, activity, relevant personnel, and unit of measure. For example, meal preparation was defined as follows:

Purpose: To regularly prepare meals for an individual.  
Activity: Meal planning, food preparation, and cooking.  
Relevant personnel: Cook, homemaker, family member.  
Unit of measure: Meals  
Examples: Meals provided under 42 U.S.C. 3045 (supp. V, 1975), the Older Americans Act, and meals-on-wheels programs.

To quantify the service we used the unit of measure along with the duration, or number of months, during which the service was received.

The material in the codebook is organized into the following five sections

- an overview of the file documentation,
- a description of the sampling plan,
- a tape layout of the file,
- detailed item definitions, and
- item frequencies.

The codebook also contains three appendices. Appendix I contains detailed information about the Multidimensional Functional Assessment Questionnaire used in the study. Appendix II contains definitions of the 28 services identified in the study. Appendix III provides detailed demographic data for the 28 social planning areas from which the sample of older people was taken.

The U.S. General Accounting Office has published three prior reports using this data base "The Well-Being Of Older People In Cleveland, Ohio, HRD-77-70, April 19, 1977"; "Home-Health--The Need For A National Policy To Better Provide For The Elderly, HRD-78-19, December 30, 1977"; and "Conditions Of Older People: National Information System Needed, HRD-79-95, September 20, 1979". Single copies of these reports may be obtained free of charge by writing to U.S. General Accounting Office, Distribution Section, Room 1518, 441 G Street, N.W., Washington, D. C. 20548.

## OVERVIEW OF FILE DOCUMENTATION

This documentation attempts to describe the items in the file in sufficient detail to make them usable by all researchers. Since nearly three-fourths of the items in the file are questionnaire responses, those researchers familiar with the Duke OARS <sup>1/</sup> Multidimensional Functional Assessment Questionnaire will find the file easier to use. For those unfamiliar with this data collection instrument, it is reprinted in the item definitions section (item numbers 1.001 through 1.337 and 2.001 through 2.337). Additional information about the questionnaire is in appendix I.

At the request of the Administration on Aging (AOA) GAO has transferred the Study of the Well-Being of Older People in Cleveland, Ohio Survey File to the National Clearinghouse on Aging. Mr. Donald Smith, Director, National Clearinghouse on Aging (300 Independence Avenue, Washington, D.C. 20201) was responsible for distributing this file and codebook to the AOA archives. Copies of this computer file and codebook can be purchased by writing to either

#### Citation

When publishing information derived from this file the source citation should show that the data came from the:

Study of the Well-Being of Older  
People in Cleveland, Ohio. United  
States General Accounting Office

#### Editing and testing

As previously described the information in this file is derived from a direct interview questionnaire administered in two phases to a sample of older people and service data provided by agencies. The questionnaires and agency provided data were edited for completeness and consistency prior to keypunching. After data entry the following data checks were performed and any errors identified were corrected.

<u>Data base</u>	<u>Data check performed</u>	<u>Error rate</u>
Phase 1 questionnaire data	Two percent random sample of keypunch cards verified to questionnaires	Less than .5 percent
Phase 1 questionnaire data	100 percent check of age, preliminary questionnaire (mental alertness) and the psychiatric evaluation	Age: 1 percent Mental alertness: 2 percent Psychiatric evaluation: .5 percent
Phase 1 service and medical data	100 percent checked for missing data	2 percent

<u>Data base</u>	<u>Data check performed</u>	<u>Error rate</u>
Phase 2 questionnaire data	Two percent random sample of keypunch cards verified to questionnaires	0 percent
Phase 2 questionnaire data	100 percent check of minimum and maximum values for all items	2 percent
Phase 2 service data	100 percent check for errors verified to agency provided data	2.8 percent
Phase 1 and Phase 2 questionnaire data	Compared Phase 1 and Phase 2 responses on age, race and sex	Age: 2.6 percent Race: 1.5 percent Sex: 1.2 percent

In addition to corrections made for errors identified in the above editing and testing, any errors found during the course of using the file were corrected.

#### Physical structure of file

The 1975 and 1976 GAO Well-Being of Older People Survey file is recorded on one reel of 9-track tape in EBCDIC at a density of 1600 BPI. The tape was created unlabeled.

The data records on the file are fixed block containing 1830 characters with 1 record per block. In total, there are 1834 logical records and 1834 physical records.

The file has been sorted to be in sequence by case number (items 1.001 or 2.001). By sorting for cases numbered from 1 to 3999, the random sample of the older people in Cleveland, Ohio can be selected. By sorting for cases numbered from

6000 to 6999 the random sample of Supplemental Security Income (SSI) recipients can be selected. To sort for cases in either sample for which interview data is available for both phase 1 and phase 2 item 5.001 may be used (see definition of item 5.001 on page 152 ).

#### Input format

The records on the file are in fixed-column format. The input format for a record is as follows:

(F4.0, F2.0, F4.0, F2.0, 14F1.0, F2.0, 3F1.0, F2.0, F3.0, 30F1.0, F2.0, F1.0, F2.0, 2F1.0, 15F2.0, 15F1.0, F2.0, 29F1.0, F2.0, 2F1.0, F2.0, F1.0, 2F2.0, 183F1.0, F3.0, 28F1.0, 2F2.0, F1.0, 28F3.0, 2F1.0, F4.0, F2.0, F4.0, F2.0, 14F1.0, F2.0, 3F1.0, F3.0, 30F1.0, F2.0, F1.0, F2.0, F1.0, 15F2.0, 15F1.0, F3.0, 29F1.0, F2.0, 2F1.0, F2.0, F1.0, 2F3.0, 181F1.0, F3.0, 28F1.0, 2F2.0, F1.0, 28F3.0, 2F1.0, 134F6.0, F3.0, F1.0, F7.2, 2F1.0, F6.2, 2F1.0, 10F2.0, F6.2, 10F1.0, 10F2.0, .6.2, F1.0, F6.2, F7.2, F1.0)

#### Item-by-item information

The item-by-item information is provided in the tape layout, definition and frequency sections of the codebook. Each section provides data on a different aspect of the items in the file and all are cross referenced.

The tape layout section provides a listing of the item number, name and tape location of every variable in the file.

It also contains a reference to the page numbers where each item's definition and frequency can be found.

The item definition section contains a detailed explanation of each variable in the file. The item definitions for the questionnaire variables are identified by item number only. However, the item name for these variables is actually a shortened form of the question and easily identified. The remaining items in the definition section are identified by item number and name. Many of these remaining items are created variables and their item definitions include an explanation of how they were created.

In the frequency section each item is identified by number, name, and the acronym used in the GAO study. Since the items in the file vary considerably in value range, the frequency tables have been printed in three different formats to limit the tables to one page for each item. The frequencies for most items have been printed in the standard SPSS frequency table format which includes

1. Value labels except where the meaning of the values is obvious from the item name such as item 1.125 Days hospitalized in past 6 months Phase 1;
2. Raw or absolute frequencies associated with each value;

3. Relative frequencies with missing values included in the percentages;
4. Adjusted relative frequencies with missing values excluded from the percentage base; and
5. The cumulative adjusted frequency based on the nonmissing values.

If printed in the standard format, the frequency for some items would exceed one page. Therefore, these items were printed in the condensed format. Using the condensed format eliminates value labels and relative frequency percentages and rounds the adjusted and cumulative frequency percentages to the nearest whole number.

Still other items, even if printed in the condensed format, the frequency would exceed one page. For these items the frequency tables have been shown in the codebook by ranges which identify the lower and upper limits of each range. To illustrate, for item 3.015 Total medical costs the value labels and codes shown are:

<u>Value label</u>	<u>Code</u>
0	0
1 to 500	1
501 to 1000	2
1001 to 2500	3
2501 to 5000	4
5001 to 10000	5
10001 to 25000	6

If a record had an actual medical cost value of \$337 on the tape, it would be shown as a code 1, 1 to 500 range in the frequency table for this item. Please note that while values have been grouped in this codebook, for efficiency, the actual discrete value, not the code range, is what appears in the records on the tape.

### DESCRIPTION OF SAMPLING PLAN

This section describes the procedures used to select the sample to be interviewed in the first phase of our study of older people (65 years old and older) in Cleveland, Ohio. All the people interviewed in the study's first phase were reinterviewed during the second phase if they could be located and were willing to participate. In the first phase of the study we completed 1,834 interviews and in the second phase 1,519 of these people were reinterviewed. Item number 5.001 describes what happened to the 315 people who were not reinterviewed.

#### Objective:

To obtain a sample of 2,500 persons for possible interview (hereinafter referred to as eligibles) from two separate lists of names of elderly persons residing in Cleveland, Ohio. The sampling was done in such a way that each eligible had an approximately equal probability of selection, thus making the sample self-weighting.

From this sample, we planned to interview 2,000 eligibles. The 500 extra eligibles were substituted as needed for attempted interviews that could not be obtained due to refusals, removals, not at home, etc. We ultimately interviewed 1,834 people out of this initial sample.

Universe:

The universe consisted of two lists of elderly persons:

- 1) A ~~state-wide list~~ of persons eligible to receive benefits under Medicare (Medicare List). This list was sequenced in alphabetical order of names. It consisted of six reels of microfilm. Each reel was divided into blocks of 75 names each. Husbands and wives, if both were eligible for Medicare, were listed on separate lines and in alphabetical order. The list included people who did not live in Cleveland.
- 2) A county-wide Supplemental Security Income Listing (Medicaid List). This list consisted of 1966 pages of computer print-out. This list also included names of people who did not live in Cleveland.

The sampling unit:

- 1) Medicare List

The names were not numbered, and it would have been impractical to attempt to count the names. As noted above, eligibles were mixed with names of people not eligible for inclusion in the study (people who did live in Cleveland). Therefore, the sampling unit was defined as a double block, containing approximately 150 names, of which approximately 7.2 were eligibles. The sampling units were identified by the odd numbered blocks. Each sampling unit included the odd numbered

block and the following even numbered block. For example, sampling Unit No. 555 on Reel No. 2 consisted of block No. 555 and block No. 556 combined, Sampling Unit 557 on Reel No. 2 consisted of block Nos. 557 and 558, etc. The names of all eligibles in each randomly selected double block were included in the study.

2) Medicaid list

The sampling unit was defined as a single page. As noted above lines containing names of eligibles were mixed with lines containing the names of persons not eligible for inclusion in the study (people who did not live in Cleveland). Also, before sampling was begun, we believed that in a significant number of cases, both husband and wife would be listed on the same line.

For each randomly selected page the names of all eligibles were listed and counted. Lines containing a husband and wife, both eligible for inclusion in the study were counted as two separate eligibles. Since the husband and wife would be listed together, to include all eligibles on the randomly selected page in the study would give households in which both persons were interviewed a disproportionate probability of selection. Therefore, random number tables were

prepared in advance, using the ICC Table of 105,000 Random Decimal Digits to select randomly one-half the eligibles on each sample page. To maintain approximately the same probability of selection for an eligible on this list as occur: in sampling from the Medicare List, twice as many pages as necessary were selected.

Sample selection:

The computer was used to select the units to be included in the sample. The program \*SFRORN was used to obtain a random selection of microfilm reel numbers and double blocks. To ensure that there would be sufficient random numbers, an allowance was made for 4,200 blocks (2,100 double blocks) per reel.

The program \*RANUM was used to select a random sample of pages from the Medicaid List. Using the ICC Table of 105,000 Random Decimal Digits, random number tables were developed to select 50 percent of the eligibles of each sample page for interview.

We originally thought that there would be at most 4,200 blocks on a reel of microfilm. However, we found that one reel contained 4,450 blocks. To ensure that the remaining 125 double blocks were eligible to be selected, the program \*RANUM was used to select 5 double blocks from the 250 extra blocks on that reel. This is approximately the same sampling fraction used to select the original sample from the Medicare List.

We also discovered that on the Medicaid List there were only five cases occurring on sample pages in which an eligible husband and eligible spouse were listed on the same line.

The results of the sample follow:

<u>Item</u>	<u>Medicare list</u>	<u>Medicaid list</u>	<u>Both lists</u>
Number of eligibles	89,000	9,800	98,800
Percentage of eligibles	90.1	9.9	100.0
Number of blocks	19,086	-	-
Number of pages	-	1,966	-
Number of sampling units	9,543	1,966	11,509
Eligibles per sampling unit	9.3	4.5	8.6
Sampling units in sample	3,259	235	3,494
Eligibles per sampling unit	11.0	2.0*	8.4

\*The actual number of eligibles per sampling unit was four. However, the eligibles on each sample page were subsampled at a 50 percent rate, yielding 2 eligibles to be interviewed per sampling unit.

Procedures used to reduce the sample size to 2,000 eligibles:

1) Medicare List

We took the first 169 double blocks in order of selection. This yielded about 1,852 eligibles. The remaining 127 double blocks were "extras". For each eligible name obtained from the Medicare List, we recorded that it came from this list.

2) Medicaid List

As noted above, on the sample pages there were only five instances in which an eligible husband and an eligible spouse were listed on the same line. Thus, for all practical purposes, the problem of disproportionate selection from this list of husband and wife in the same household was disregarded. Therefore, the names of all eligibles on each sample page were included in the study. The procedure for subsampling the eligibles was not used.

We took the first 54 pages in order of selection. This yielded about 207 eligibles. The remaining 64 pages were "extras". For each eligible name obtained from the Medicaid List, we recorded that it came from this list.

Directions used to substitute from the "extra" eligibles

- 1) We kept a running count of eligibles obtained from the Medicare List that could not be interviewed and a separate running count of eligibles obtained from the Medicaid List that could not be interviewed.
- 2) For every 10 eligibles from the Medicare List that could not be interviewed, we substituted the next double block from the "extra" double blocks in order of selection.
- 3) For every four eligibles from the Medicaid List that could not be interviewed we substituted the next page from the "extra" pages in order of selection.

Tape Layout for the 1975 and 1976  
GAO Well-Being of Older People Survey File

<u>Item Number</u>	<u>Tape Location</u>	<u>Item Name</u>	<u>Codebook Page Number</u>

Item Definitions for the 1975 and 1976  
GAO Well-Being of Older People Survey File

### Introduction to Item Definitions

Item numbers 1.001 through 1.340 and 2.001 through 2.340 represent the responses to the direct interview questionnaire used in the first and second phases of the study respectively. To define these items, we reprinted the second phase questionnaire with the appropriate item numbers opposite each question. Where differences existed between the first and second phase questionnaires or where the item coding was not obvious from the question itself, we provided detailed explanations following the questionnaire as footnoted. The remaining 1. and 2. items are created variables. Definitions for these items include the derivations used to create them. (See pages 63 to 113 for definitions of 1. and 2. items).

Service costs for phase 2 are contained in item numbers 3.001 through 3.133. These items include total costs as well as costs by source of service broken down as follows:

- 3.001 - 3.028 Total cost each service
- 3.029 - 3.058 Units of service received all sources
- 3.059 - 3.091 Agency cost each service
- 3.092 - 3.106 Family cost each service
- 3.107 - 3.119 Agency and Family cost each service  
(Both cited as source)
- 3.120 - 3.128 Unknown source cost each service
- 3.129 - 3.133 Grand total costs by source of service

(See pages 114 to 140 for definitions of 3. items)

Detailed medical data is contained in item numbers 4.001 through 4.044. These items contain both medicare and medicaid information. (See pages 141 to 149 for definitions of 4. items).

Item number 5.001 is a status variable that identifies what happened to the sample at the time of the phase 2 interviews. It shows, for example, whether the person was reinterviewed, moved, entered a nursing home, etc. This item is defined on page 152.

SYSTEMATIC MULTIDIMENSIONAL EVALUATION

- (20) In the past 12 months has anyone like a doctor or social worker thoroughly reviewed and evaluated your overall condition including your health, your mental health, and your social and financial situation? 1/

1 Yes  
0 No  
9 Not answered

1.288 2.288

- a. Do you think you need to have someone review and evaluate your overall condition in this way?

1 Yes  
0 No  
9 Not answered

1.289 2.289

PHASE 1 PHASE 2

(21)

COORDINATION, INFORMATION AND REFERRAL SERVICES

During the past 12 months did someone see to it that you got the kinds of help you needed? In other words did someone give you information about the kind of help that is available or put you in touch with those who could help you?

- 1 Yes
- 0 No
- 9 Not answered

1.290      2.290

[IF "NO" SKIP TO c.; IF "YES" ASK a., b., AND c.]

a. Who was this person?

- 1 A family member or a friend
- 2 Someone from an agency (name agency: \_\_\_\_\_)
- 3 Both
- 9 Not answered

1.291      2.291

b. Is there still someone who sees to it that you get the kinds of help you need? In other words is there someone who gives you information about the kind of help that is available or puts you in touch with those who can help you?

- 1 Yes
- 0 No
- 9 Not answered

1.292      2.292

c. Do you feel you need to have someone organize or coordinate the kinds of help you need and make arrangements for you to get them?

- 1 Yes
- 0 No
- 9 Not answered

AN INFORMANT IS AVAILABLE.]

SOCIAL RESOURCES

73. How well does \_\_\_\_\_ (Subject) get along with his/her  
family and friends--very well, fairly well, or poorly  
(has considerable trouble or conflict with them)?
- 3 Very well
  - 2 Fairly well (has some conflict or trouble with them)
  - 1 Poorly (has considerable trouble or conflict with  
them)
  - 9 Not answered

1.294

2.294

74. Is there someone who would help \_\_\_\_\_ (Subject) at all  
if he/she were sick or disabled, for example his/her  
husband or wife, a member of the family or a friend?
- 1 Yes
  - 0 No
  - 9 Not answered

1.295

2.295

[IF "YES" ASK a. AND b.]

a. [CIRCLE THE MOST APPROPRIATE.]

Is there someone who would take care of him/her as  
long as needed, or only for a short time, or only  
someone who would help now and then (for example,  
taking him/her to the doctor, fixing lunch, etc.)?

- 1 Someone who would take care of Subject  
indefinitely (as long as needed)
- 2 Someone who would take care of Subject a short  
time (a few weeks to six months)
- 3 Someone who would help him now and then (taking  
him to the doctor or fixing lunch, etc.)
- 9 Not answered

SOCIAL RESOURCES

87. Which of the following best describes the availability of help for the Subject if he/she were sick or disabled?

[CIRCLE THE MOST APPROPRIATE.]

- 4 At least one person could and would take care of the Subject indefinitely (as long as needed).
- 3 At least one person could and would take care of the Subject for a short time (a few weeks to 6 months).
- 2 Help would only be available now and then for such things as taking him/her to the doctor, fixing lunch, etc.
- 1 No help at all (except possible emergency help) would be available.

1.315      2.315

88. Which of the following best describes the Subject's social relationships?

[CIRCLE THE MOST APPROPRIATE.]

- 3 Very satisfactory, extensive
- 2 Fairly satisfactory, adequate
- 1 Unsatisfactory, of poor quality, few

1.316      2.316

ECONOMIC RESOURCES

89. In your opinion which of the following best describes the Subject's income?

- 5 Ample
- 4 Satisfactory
- 3 Somewhat inadequate
- 2 Totally inadequate
- 1 No income at all

1.317      2.317

90. In your opinion does the Subject have any financial reserves?

- 1 Yes, has reserves
- 0 No, has (little or) no reserves

1.318      2.318

91. In your opinion which of the following statements best describes the extent to which the Subject's needs are being met?

- 4 Food, housing, clothing, and medical needs are met; Subject can afford small luxuries.
- 3 Food, housing, clothing, and medical needs are met; Subject cannot afford small luxuries.
- 2 Either food, or clothing, or housing, or medical needs are unmet; Subject cannot afford small luxuries.
- 1 Two or more basic needs (housing, food, clothing, medical care) are unmet; Subject cannot afford small luxuries.

SOCIAL RESOURCES RATING SCALE

PHASE 1 PHASE 2

1.333 2.333

97. [RATE THE CURRENT SOCIAL RESOURCES OF THE PERSON BEING EVALUATED ALONG THE SIX-POINT SCALE PRESENTED BELOW. CIRCLE THE ONE NUMBER WHICH BEST DESCRIBES THE PERSON'S PRESENT CIRCUMSTANCES. SOCIAL RESOURCES QUESTIONS ARE NUMBERS 6-14, 73, 74, 87, and 88.]

1. Excellent social resources.  
Social relationships are very satisfying and extensive; at least one person would take care of him/her indefinitely.
2. Good social resources.  
Social relationships are fairly satisfying and adequate and at least one person would take care of him/her indefinitely.  
OR  
Social relationships are very satisfying and extensive; and only short term help is available.
3. Mildly socially impaired.  
Social relationships are unsatisfactory, of poor quality, few; but at least one person would take care of him/her indefinitely.  
OR  
Social relationships are fairly satisfactory, adequate; and only short term help is available.
4. Moderately socially impaired.  
Social relationships are unsatisfactory, of poor quality, few; and only short term care is available.  
OR  
Social relationships are at least adequate or satisfactory; but help would only be available now and then.
5. Severely socially impaired.  
Social relationships are unsatisfactory, of poor quality, few; and help would only be available now and then.  
OR  
Social relationships are at least satisfactory or adequate; but help is not even available now and then.
6. Totally socially impaired.  
Social relationships are unsatisfactory, of poor quality, few; and help is not even available now and then.

ECONOMIC RESOURCES RATING SCALE

98. [RATE THE CURRENT ECONOMIC RESOURCES OF THE PERSON BEING EVALUATED ALONG THE SIX-POINT SCALE PRESENTED BELOW. CIRCLE THE ONE NUMBER WHICH BEST DESCRIBES THE PERSON'S PRESENT CIRCUMSTANCES. ECONOMIC QUESTIONS ARE NUMBERS 15-30, 75, and 89-91.]

1.334    2.334

1. Economic Resources are Excellent.  
Income is ample; Subject has reserves.
2. Economic Resources are satisfactory.  
Income is ample; Subject has no reserves  
or  
Income is adequate; Subject has reserves.
3. Economic Resources are mildly impaired.  
Income is adequate; Subject has no reserves  
or  
Income is somewhat inadequate; Subject has reserves.
4. Economic Resources are moderately impaired.  
Income is somewhat inadequate; Subject has no reserves.
5. Economic Resources are severely impaired.  
Income is totally inadequate; Subject may or may not have reserves.
6. Economic Resources are completely impaired.  
Subject is destitute, completely without income or reserves.

[Income is considered to be adequate if all the Subject's needs are being met.]

PHASE 1 PHASE 2

MENTAL HEALTH RATING SCALE

99. [RATE THE CURRENT MENTAL FUNCTIONING OF THE PERSON BEING EVALUATED ALONG THE SIX-POINT SCALE PRESENTED BELOW. CIRCLE THE ONE NUMBER WHICH BEST DESCRIBES THE PERSON'S PRESENT FUNCTIONING. MENTAL HEALTH QUESTIONS ARE THE PRELIMINARY QUESTIONNAIRE, AND NUMBERS 31-36, 76-80, And 92-95.]

1 335    2 335

1. Outstanding mental health.  
Intellectually alert and clearly enjoying life.  
Manages routine and major problems in his life with ease and is free from any psychiatric symptoms.
2. Good mental health.  
Handles both routine and major problems in his life satisfactorily and is intellectually intact and free of psychiatric symptoms.
3. Mildly mentally impaired.  
Has mild psychiatric symptoms and/or mild intellectual impairment. Continues to handle routine, though not major, problems in his life satisfactorily.
4. Moderately mentally impaired.  
Has definite psychiatric symptoms, and/or moderate intellectual impairment. Able to make routine, common-sense decisions, but unable to handle major problems in his life.
5. Severely mentally impaired.  
Has severe psychiatric symptoms and/or severe intellectual impairment, which interfere with routine judgments and decisionmaking in every day life.
6. Completely mentally impaired.  
Grossly psychotic or completely impaired intellectually. Requires either intermittent or constant supervision because of clearly abnormal or potentially harmful behavior.

## PHYSICAL HEALTH RATING SCALE

100. [RATE THE CURRENT PHYSICAL FUNCTIONING OF THE PERSON BEING EVALUATED ALONG THE SIX-POINT SCALE PRESENTED BELOW. CIRCLE THE ONE NUMBER WHICH BEST DESCRIBES THE PERSON'S PRESENT FUNCTIONING. PHYSICAL HEALTH QUESTIONS ARE NUMBERS 37-55, 81, 82, AND 96.]

1.336    2.336

1. In excellent physical health.  
Engages in vigorous physical activity, either regularly or at least from time to time.
2. In good physical health.  
No significant illnesses or disabilities. Only routine medical care such as annual check ups required.
3. Mildly physically impaired.  
Has only minor illnesses and/or disabilities which might benefit from medical treatment or corrective measures.
4. Moderately physically impaired.  
Has one or more diseases or disabilities which are either painful or which require substantial medical treatment.
5. Severely physically impaired.  
Has one or more illnesses or disabilities which are either severely painful or life threatening, or which require extensive medical treatment.
6. Totally physically impaired.  
Confined to bed and requiring full time medical assistance or nursing care to maintain vital bodily functions.

PERFORMANCE RATING SCALE FOR  
ACTIVITIES OF DAILY LIVING

PHASE 1    PHASE 2

1.337    2.337

101. [RATE THE CURRENT PERFORMANCE OF THE PERSON BEING EVALUATED ON THE SIX-POINT SCALE PRESENTED BELOW. CIRCLE THE ONE NUMBER WHICH BEST DESCRIBES THE PERSON'S PRESENT PERFORMANCE. ACTIVITIES OF DAILY LIVING QUESTIONS ARE NUMBERS 56-69.]

1. Excellent ADL capacity.  
Can perform all of the Activities of Daily Living without assistance and with ease.
  2. Good ADL capacity.  
Can perform all of the Activities of Daily Living without assistance.
  3. Mildly impaired ADL capacity.  
Can perform all but one to three of the Activities of Daily Living. Some help is required with one to three, but not necessarily every day. Can get through any single day without help. Is able to prepare his own meals.
  4. Moderately impaired ADL capacity.  
Regularly requires assistance with at least four Activities of Daily Living but is able to get through any single day without help. Or regularly requires help with meal preparation.
  5. Severely impaired ADL capacity.  
Needs help each day but not necessarily throughout the day or night with many of the Activities of Daily Living.
  6. Completely impaired ADL capacity.  
Needs help throughout the day and/or night to carry out the Activities of Daily Living.
-

Item Number

Phase 1   Phase 2

1.338   2.338   Number of Refusals - Is a one digit code indicating the number of times the subject refused before consenting to be interviewed. The coding for this variable is:

- 0 - no refusal
- 1 - refused one time
- 9 - not answered

1.339   2.339   Language translations needed - Some of the older people in our sample did not speak English or spoke it poorly. For these people we used interpreters to conduct the interviews. This variable is a two digit code that identifies the language used for the interview. The coding is as follows:

<u>Code</u>	<u>Value label</u>	<u>Code</u>	<u>Value label</u>
00	English	07	Polish
01	Ukrainian	08	Croatian
02	Russian	09	Slovenian
03	Spanish	10	Italian
04	Greek	11	Hungarian
05	German	12	Serbian
06	Slovak		

1.340   2.340   Social planning areas - The Federation for Community Planning a local social service organization in the City of Cleveland divided the City into 28 areas for planning purposes. These social planning areas were established out of combinations of census tracts. The major emphasis was on defining areas of maximum homogeneity of

Item Number

Phase 1   Phase 2

population characteristics and in particular to resident's awareness of membership in an identifiable community. The area designations were useful in our study and therefore are included in the data base. For a complete description of the areas including demographics see appendix 3. The variable is coded as shown below.

<u>Code</u>	<u>Value label</u>	<u>Code</u>	<u>Value label</u>
01	Riverside	16	South Broadway
02	Puritas-Bellaire	17	Kinsman
03	Jefferson	18	Central East
04	Edgewater	19	Hough
05	West Side	20	Norwood
06	Near West Side	21	Glenville
07	Tremont	22	South Collinwood
08	Denison	23	North Collinwood
09	Clark-Fulton	24	University
10	South Brooklyn	25	Woodland Hills
11	Downtown	26	Corlett
12	Central West	27	Mount Pleasant
13	Goodrich	28	Lee-Miles
14	Central	50	Moved outside City of Cleveland in phase 2
15	North Broadway		

Item Number

Phase 1   Phase 2

1 .341   2.341

Major group: Overall rating - This is a created rating variable combining items 1.333 through 1.337 and 2.333 through 2.337 for phase 1 and phase 2 respectively. The result is an overall impairment rating for each phase coded as follows:

<u>Code</u>	<u>Value label</u>	<u>Construct used to create variable from the five human functioning rating scales</u>
1	Unimpaired	Excellent or good in all five areas of human functioning.
2	Slightly impaired	Excellent or good in four areas.
3	Mildly impaired	Mildly or moderately impaired in two areas, or mildly or moderately impaired in one area, and severely or completely impaired in another.
4	Moderately impaired	Mildly or moderately impaired in three areas, or mildly or moderately impaired in two and severely or completely impaired in one.
5	Generally impaired	Mildly or moderately impaired in four areas.
6	Greatly impaired	Mildly or moderately impaired in three areas, and severely and completely impaired in another.
7	Very greatly impaired	Mildly or moderately impaired in all five areas.
8	Extremely impaired	Mildly or moderately impaired in four areas, and severely or completely impaired in the other, or severely or completely impaired in two or more areas.

Item Number

Phase 1   Phase 2

1.342   2.342  
thru   thru  
1.369   2.369

These items identify the 28 services used in our study. They are three digit codes showing whether the individuals received service or not, the source of service, and whether the individual thought they needed the service. The coding for these items is as follows:

- 100   Received service
- 200   Did not receive service
- 900   Receipt of service unknown
- 10   Family/friend only source of service
- 20   Agency only source of service
- 30   Family/friend and agency only source of service
- 40   Other only source of service
- 50   Family/friend and other only source of service
- 60   Agency and other only source of service
- 70   Family/friend, agency and other source of service
- 90   Unknown source or did not receive service
- 1   Person said they needed or wanted service
- 2   Person said they did not need or want service
- 9   Person did not answer on expressed need

The hundreds, tens and units are combined to form a three digit code - for example 121. A code of 121 means the person received the service with an agency as the only source and said they needed or wanted the service. Another example would be 292. A code of 292 means the person did not receive the service and said they did not need or want the service.

Item Number

Phase 1   Phase 2

These variables were only created for the phase 2 sample of 1,519 people. The 315 people who were not interviewed in phase 2 are coded as 999 for both the phase 1 and phase 2 service variables.

1.342	2.342	Transportation service
1.343	2.343	Escort service
1.344	2.344	Social/recreational services
1.345	2.345	Employment service
1.346	2.346	Sheltered employment service

1.357	2.357	Continuous supervision
1.358	2.358	Checking service
1.359	2.359	Relocation and placement service
1.360	2.360	Homemaker-household service
1.361	2.361	Housing repair and renovation service
1.362	2.362	Meal preparation service
1.363	2.363	Food, groceries service

Item Number

Phase 1    Phase 2

1.364	2.364	Administrative, legal and protective services
1.365	2.365	Systematic multidimensional evaluation
1.366	2.366	Financial assistance
1.367	2.367	Living quarters
1.368	2.368	Coordination, information, and referral
1.369	2.369	Outreach service
1.370	2.370	Psychiatric evaluation: This item is a created variable used to identify the degree of psychiatric problems an older person may have. It combines the persons responses to the OARS questionnaire psychiatric evaluation, the persons self rating of their mental health and the interviewers evaluation of the persons behavior. The coding for the variable is

- 0    No psychiatric impairment
- 1    Mild psychiatric impairment
- 3    Severe psychiatric impairment
- 9    No evaluation

This variable was created using the following derivation for phase 1. The derivation for phase 2 is the same as that shown below substituting phase 2 items.

COUNT-A- Count the number of yes (value 1) responses to items 1.325 through 1.331

If COUNT A equals 1 then VARIABLE-A equals 1

If COUNT A greater than or equal to 2 then VARIABLE-A equals 3

If item 1.323 equals 1 and item 1.324 equals 1 then VARIABLE-A equals 0

Recode item 1.120 - 0 through 4 = 0, 5 through 7 = 1,

8 through 15 = 3

Item Number

Phase 1      Phase 2

Recode item 1.121 - 1 = 3, 2 = 1, 3 and 4 = 0

COUNT-B - Count the number of value 3's in items 1.120, 1.121  
and VARIABLE-A

If items 1.120 or 1.121 or VARIABLE-A equal 1 and COUNT-B  
equals 0 then item 1.370 equals 1

If COUNT-B greater than or equal to 1 then item 1.370 equals 3

COUNT-C - Count the missing values items 1.120 and 1.323 through 1.326

If COUNT-C greater than or equal to 1 then item 1.370 equals 9

1.371

2.371

Mental awareness evaluation: This item was created to rate the  
mental awareness of the older person being interviewed. The  
coding for this item is:

- 0 mentally aware
- 1 fairly unaware
- 3 totally unaware
- 9 missing value

This item is a recode of the total errors from the preliminary  
questionnaire item 1.019. It was created using the following  
derivation:

Recode item 1.019 - 0 through 4 = 0, 5 through 7 = 1,  
8 through 10 = 3, 99 = 9.

Item NumberExpanded Definitions of Selected Questionnaire ItemsPhase 1    Phase 2

1.001      2.001

Case Number: A four digit code identifying the cases. In the regular sample the cases were numbered between 1 and 3999. In the over sample (special sample of SSI recipients) the cases were numbered between 6000 and 6999.

1.002      2.002

Zip Code: A two digit code using the last two digits of the zip code of the older person interviewed. Used to identify the area of the city in which the older person lived.

1.003      2.003

Date of interview: A four digit code identifying the month and day the interview was conducted. The first two digits represent the month and the second two digits the day. Phase 1 interviews were conducted in 1975 and phase 2 interviews in 1976.

1.023      -

Date of birth: A two digit code using the last two digits of the year of birth. Phase 1 only.

1.058      -

Do you (and your husband/wife) support anyone besides yourself that is provide for more than half their needs: A one digit code used only in Phase 1. The coding is as follows:

1 - Yes

0 - No

9 - Not answered

In Phase 2 the response to this question was included in item number 2.059. This item was coded 0 if no one or the number of people supported if yes.

3.001 thru  
3.133

In general, the cost of a particular service for a person was the estimated unit cost of that service for some time period, multiplied by the estimated number of units of that service received during a base period. If the base period was less than a year, the base period cost was multiplied by an appropriate factor to estimate yearly costs. Twelve (12) was used as the factor for monthly base periods, 50 as the factor for weekly base periods and 360 as the factor for daily base periods.

The unit costs for each service was estimated based on the experience of 27 Federal, State, local and private agencies in Cleveland, Ohio, between October 1976 and March 1977. In our study we considered the family and friends to be an important source of services. In their absence, any services received would have to be from an agency. Therefore, we assigned the same cost to family and friend services that we found for agencies.

Items 3.001 through 3.028 are the total costs for each of the 28 services. They were computed considering the total units of each service received regardless of source (items 3.029 through 3.058).

To compute agency costs, (items 3.059 through 3.091) we compared the service units individuals reported they received from agencies to the units agencies reported they gave to the individuals and used the greater of the two for the cost computation. The user can determine whether agency service units were used by dividing the agency service cost by the unit cost for the service and comparing the answer to the appropriate questionnaire item. If the units that result from this computation differ from the units the individual reported in the questionnaire then agency reported units were used.

Item  
Number

Family/friend costs (items 3.092 through 3.106) were computed using the units of service individuals reported receiving from family or friends. Since we had no secondary source of information for family/friend provided services, these items are based solely on the questionnaire responses.

When both an agency and family/friend were reported as the source of service a separate set of cost variables (items 3.107 through 3.119) was computed. These costs are not included in the agency only or family/friend only cost variables.

Items 3.120 through 3.128 were created to handle cases where individuals in our sample reported receiving a service and the number of units received but did not identify the source of the service.

In some cases individuals in our sample stated that they received a service and identified a source but did not report the number of units received. For these cases we assigned the mean yearly cost of those who reported service units.

All of the cost items were rounded to the nearest whole dollar. Six spaces were allocated for each of these items and they were right justified.

- 3.001      Transportation in total dollars - This item provides the total estimated cost of transportation service received by people in the sample from all possible sources. The unit of measure for this service was "one way trips" and the unit cost was \$1.13. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status phase 2).
- 3.002      Escort in total dollars - This item provides the total estimated cost of escort service received by people in the sample from all sources. The unit of measure for this service was "one way trips" and the unit

Item  
Number

- cost was \$1.62. A code of 999999 means the person was not interviewed in phase 2.
- 3.003 Social-recreational service in total dollars - This item shows the total estimated cost of social-recreational service received from all sources. The unit of measure for this service was "sessions" and the unit cost was \$4.32. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.004 Employment service in total dollars - This item contains zero (0) for all cases because we had no unit cost to apply. The unit of measure for this service was "number of times assistance was provided". A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.005 Sheltered employment in total dollars - This item contains zero (0) for all cases because we had no unit cost to apply. The unit of measure for this service was "hours of employment". A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.006 Education employment related in total dollars - This item contains zero (0) for all cases because we had no unit cost to apply. The unit of measure for this service was "training session hours". A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.007 Non-employment education in total dollars - This item shows the total estimated cost of non-employment education received by people in the sample from all sources. The unit of measure for this service was "training session hours" and the unit cost was \$7.70. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).

Item  
Number

- 3.008 Remedial training in total dollars - This item shows the total estimated cost of remedial training received from all sources. The unit of measure for this service was "sessions" and the unit cost was \$7.70. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.009 Mental health service in total dollars - This item shows the total estimated cost of mental health services received from all sources. The unit of measure for this service was "sessions" and the unit cost was \$35.00. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.010 Psychotropic drugs in total dollars - This item shows the total estimated cost of psychotropic drugs received by people in the sample. Although the unit of measure was the "quantity and type of drug" taken, we did not have accurate information regarding the specific drugs taken by individuals in the sample. We did, however, have an estimate of the yearly cost of psychotropic drugs for people in the sample area. This cost estimate was \$65.64 and was applied to all the people in the sample who were taking psychotropic drugs. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.011 Personal care in total dollars - This item shows the total estimated cost of personal care received by people in the sample from all sources. The unit of measure was a "visit" and the unit cost was \$19.25. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).

Item  
Number

- 3.012      Nursing care in total dollars - This item shows the total estimated cost of nursing care received from all sources. The unit of measure was a "visit" and the unit cost was \$23.90. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.013      Medical care in total dollars - This item shows the total estimated cost of medical care received. The units of measure were doctor's visits, number of days in a hospital and number of days in a nursing home. The unit costs were \$12, \$128.67 and \$31.13 respectively. These three costs were totaled and compared to item 4.044 overall total medical charges (agency provided). If item 3.013 was greater than or equal to item 4.044 it remained as computed. If item 3.013 was less than item 4.044 it was changed to equal item 4.044. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.014      Supportive devices in total dollars - This item contains zero (0) for all cases. The unit of measure was the dollar cost of each supportive device. Although the data showed that people in the sample received supportive devices, it did not generally show the specific device received. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.015      Physical therapy in total dollars - This item shows the total estimated cost of physical therapy received from all sources. The unit of measure was "sessions" and the unit cost was \$17.35. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).

Item  
Number

- 3.016 Continuous supervision in total dollars - This item shows the total estimated cost of continuous supervision received from all sources. The unit of measure was "days" and the unit cost was \$26.46. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.017 Checking in total dollars - This item shows the total estimated cost of checking service received from all sources. The unit of measure was "contacts" (telephone or personal) and the unit cost was \$.47. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.018 Relocation service in total dollars - This item shows the total estimated cost of relocation service received from all sources. The unit of measure was "moves" and the unit cost was \$6.49. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.019 Homemaker service in total dollars - This item shows the total estimated cost of homemaker - household service received from all sources. The unit of measure was a "6 hour visit" and the unit cost was \$5.31 per/hr. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.020 Repair service in total dollars - This item contains zero (0) for all cases. The unit of measure was "jobs" and no unit cost could be determined for various unrelated housing repair jobs. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).

Item  
Number

- 3.021 Meals service in total dollars - This item shows the total estimated cost of meal preparation service received from all sources. The unit of measure was "meals" and the unit cost was \$1.94. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.022 Food, groceries in total dollars - This item is the sum of the dollars agencies reported providing to people in the sample for food, groceries and food stamps. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.023 Administrative legal service in total dollars - This item shows the total estimated administrative legal service received from all sources. The unit of measure was "incidents" and the unit cost was \$6.49. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.024 Evaluation service in total dollars - This item shows the total estimated costs for systematic multidimensional evaluation received by people in the sample. The unit of measure was the "number of hours spent in evaluation" and the unit cost was \$13.00. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.025 Financial aid in total dollars - This item shows the total estimated dollar of financial aid received from all sources. This cost is the sum of items 2.069 (Regular family assistance phase 2 - mean of range used); 2.072 (Welfare phase 2 - mean of range used); 2.073 (Other income - mean of range used); and the greater of items 2.070 (SSI payments phase 2 - mean of range used) or .090 (Agency dollars of SSI). A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).

Item  
Number

- 3.026 Living quarters in total dollars - This item shows the total estimated cost of living quarters received from all sources. The unit of measure was the "number of nights" and the unit cost was \$2.84. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.027 Information and referral in total dollars - This item shows the total estimated cost of information and referral service received from all sources. The unit of measure was "number of activities performed" and the unit cost was \$6.49. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.028 Outreach service in total dollars - This item shows the total estimated cost of outreach service received from all sources. The unit of measure was "number of times needs identified through outreach service" and the unit cost was \$4.14. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.029 Transportation number of one-way trips per year - This item shows the estimated number of one way trips received from all sources. A coding of 999999 means either the service was received but the number of units is not known or the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.030 Escort number of one way trips per year - This item shows the total estimated number of one way trips on which people in the sample were escorted. A code of 999999 for this variable means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).

Item  
Number

- 3.031 Social-recreational service number of sessions per year - This item identifies the total estimated number of social-recreational sessions people in the sample attended. A code of 999999 means either the service was received but the number of units is not known or the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.032 Employment service number of times provided - This item shows the total estimated number of times people in the sample were aided in finding employment. A code of 999999 means the service was received but the number of units is not known. A code of 999999 for this variable means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.033 Sheltered employment number of hours worked in a year - This item shows the total estimated number of hours worked in a sheltered employment workshop. A code of 999999 means either the service was received but the number of units is not known or the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.034 Education employment related number of hours in a year - This item shows the total estimated number of hours of employment related education received. A code of 999999 for this variable means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.035 Non-employment education number of hours in a year - This item shows the total estimated number of hours of non-employment related education received. A code of 999999 for this valuable means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.036 Remedial training number of sessions received in a year - This item shows the total estimated number of remedial training sessions received. A code of 999999 means either the service was received but the number of units is

Item  
Number

not known or the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).

- 3.037 Mental health service number of sessions in a year - This item shows the total estimated number of mental health evaluation, diagnosis or treatment sessions received. A code of 999999 means either the service was received but number of units is not known or the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.038 Psychotropic drugs number of monthly prescriptions - This item shows the total estimated number of prescriptions for psychotropic drugs received monthly. It is coded 0 and 999999. A code of 999999 means either the service was received but the number of units is not known or the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.039 Personal care number of visits per year - This item the total estimated number of personal care visits received from all sources over a one year period. A code of 999999 means either the service was received but the number of units is not known or the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.040 Nursing care number of visits per year - This item shows the total estimated number of nursing care visits received in a year. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.041 Medical care number of times seen by doctor in a year - This item shows the total estimated number of times doctor's visits were received in a year. A code of 999999 means either information regarding the number of doctors visits was unknown or the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).

Item  
Number

- 3.042 Medical care number of days in hospital in a year - This item shows the total estimated number of days spent in a hospital during a year. A code of 999999 means either information regarding hospitalization was not known or the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.043 Medical care number of days in nursing home in a year - This item shows the total estimated number of days spent in a nursing home during a year. A code of 999999 means either information regarding nursing home stays was unknown or the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.044 Supportive devices in dollars in a year - This item gives the dollar value of supportive devices received in a year. A code of 999999 means either the service was received but the number of units was not known or the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.045 Physical therapy number of sessions in a year - This item shows the total estimated number of physical therapy sessions received. A code of 999999 means either the service was received but the number of units was unknown or the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.046 Continuous supervision number of days in a year - This item shows the total estimated number of days continuous supervision was received. A code of 999999 means either the service was received but the number of units was not known or the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).

Item  
Number

- 3.047      Checking service number of contacts per year - This item shows the total estimated number of personal or telephone checking contacts received in a year. A code of 999999 means either the service was received but the number of units was not known or the person was not interviewed in phase 2.
- 3.048      Relocation service number of moves in a year - This item shows the total estimated number of times people in the sample received help in moving. A code of 999999 means either the service was received but the number of units was not known or the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.049      Homemaker service in number of visits in a year - This item shows the total estimated number of homemaker visits received in a year. A code of 999999 means either the service was received but the number of visits was not known or the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.050      Repair service number of jobs in a year - This item shows the total estimated number housing repair jobs received in a year. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.051      Meals service number received in a year - This item shows the total estimated number of times meals service was received. A code of 999999 means either the service was received but the number of units was not known or the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.052      Food groceries in dollars in a year - Since the units for food, groceries service is dollars, this item is nearly identical to item 3.022 Food groceries in total dollars. The only differences is that in item 3.022 people who received the service but the units were unknown were given a value of 210, the mean dollar amount for people with a known amount of

Item  
Number

food groceries service. Whereas in this item (3.052) they are coded 999999. A code of 999999 for this item means either the service was received but the number of units was not known or the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).

3.053 Administrative legal service number of incidents in a year - This item shows the total estimated number of times administrative legal service was received in a year. A code of 999999 means either the service was received but the number of units was not known or the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).

3.054 Evaluation service number of hours in a year - This item shows the total estimated hours spent in evaluation in a year. A code of 999999 means either the service was received but the number of units was not known or the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).

3.055 Financial aid dollars received in a year - Since the units for financial aid is dollars, this item is nearly identical to item 3.025 Financial aid in total dollars. The only difference is that in item 3.025 people who received the service but the amount was unknown were assigned a value of 1159 the mean dollar amount for people with a known amount of financial aid. Whereas in this item (3.055) they are coded 999999. A code of 999999 for this item means either the service was received but the number of units was not known or the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).

3.056 Living quarters number of nights stayed in a year - This item shows the total estimated number of nights of lodging received. A code of 999999 means either the service was received but the number of units was not

Item  
Number

known or the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).

- 3.057 Information and referral number of incidents in a year - This item shows the total estimated number of times information and referral service was received. A code of 999999 means either the service was received but the number of units was not known or the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.058 Outreach service times needs identified in a year - This item shows the total estimated number of times needs were identified through an outreach service. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.059 Transportation in agency dollars - This item shows the estimated agency cost of transportation service received by people in the sample. The unit of measure for this service was "one way trips" and the unit cost was \$1.13. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.060 Escort in agency dollars - This item equals item number 3.002. Based on our definition, escort service could only be provided by an agency. The unit of measure for this service was "one way trips" and the unit cost was \$1.62. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.061 Social-recreational service in agency dollars. This item equals item number 3.003. Based on our definition, social-recreational service could only be provided by an agency. The unit of measure for the service was "sessions" and the unit cost was \$4.32. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).

Item  
Number

- 3.062 Employment service in agency dollars - This item contains zero (0) for all cases because we had no unit cost to apply. Although we did not have a unit cost, this item was created because it was a valid agency service. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 status in phase 2).
- 3.063 Sheltered employment in agency dollars - This item contains zero (0) for all cases because we had no unit cost to apply. Although we did not have a unit cost, this item was created because it was a valid agency service. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.064 Education employment related in agency dollars. This item contains zero (0) for all cases because we had no unit cost to apply. Although we did not have a unit cost, this item was created because it was a valid agency service. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.065 Non-employment education in agency dollars - This item equals item number 3.007. Based on our definition, non-employment education could only be provided by an agency. The unit of measure for this service was "training session hours" and the unit cost was \$7.70. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.066 Remedial training in agency dollars - This item equals item number 3.008. Based on our definition, remedial training could only be provided by an agency. The unit of measure for this service was "sessions" and the unit cost was \$7.70. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).

Item  
Number

- 3.067 Mental health service in agency dollars - This item equals item number 3.009. Based on our definition, mental health service could only be provided by an agency. The unit of measure for this service was "sessions" and the unit cost was \$35.00. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.068 Psychotropic drugs in agency dollars - This item equals item number 3.010. Based on our definition, psychotropic drugs could only be provided by an agency. The unit of measure was the "quantity and type of drug". The yearly cost for these drugs was estimated to be \$65.64 which was applied to the people in our sample taking drugs. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.069 Personal care in agency dollars - This item shows the estimated agency cost of personal care received by people in the sample. The unit of measure was a "visit" and the unit cost was \$19.25. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.070 Nursing care in agency dollars - This item shows the estimated agency cost of nursing care received by people in the sample. The unit of measure was a "visit" and the unit cost was \$23.90. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.071 Medical care in agency dollars - This item equals item number 3.013. Based on our definition, medical care could only be provided by an agency. The units of measure were doctors' visits, number of days in a hospital and number of days in a nursing home. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).

Item  
Number

- 3.072 Supportive devices in agency dollars - This item contains zero (0) for all cases because we had no unit cost to apply. Although we did not have a unit cost, this item was a valid agency service. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.073 Physical therapy in agency dollars - This item shows the estimated agency cost of physical therapy received by people in the sample. The unit of measure was "sessions" and the unit cost was \$17.35. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.074 Continuous supervision in agency dollars - This item shows the estimated agency cost of continuous supervision received by people in the sample. The unit of measure was "days" and the unit cost was \$26.46. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.075 Checking in agency dollars - This item shows the estimated agency cost of checking service received by people in the sample. The unit of measure was contacts (telephone or personal) and the unit cost was \$.47. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.076 Relocation service in agency dollars - This item shows the estimated agency cost of relocation service received by people in the sample. The unit of measure was "moves" and the unit cost was \$6.49. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.077 Homemaker service in agency dollars - This item shows the estimated agency cost of homemaker service received by people in the sample. The unit of measure was a "6 hour visit" and the unit cost was \$5.31 per/hr. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).

Item  
Number

- 3.078 Repair service in agency dollars - This item contains zero (0) for all cases because we had no unit cost to apply. Although we did not have a unit cost, this item was a valid agency service. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.079 Meals service in agency dollars - This item shows the estimated agency cost of meals service received by people in the sample. The unit of measure was "meals" and the unit cost was \$1.94. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.080 Food-groceries in agency dollars - This item shows the estimated agency costs of food, groceries and food stamps received by people in the sample. The unit of measure was dollars. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.081 Administrative legal service in agency dollars - This item shows the estimated agency cost of administrative legal service received by people in the sample. The unit of measure was "incidents" and the unit cost was \$6.49. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.082 Evaluation service in agency dollars - This item equals item number 3.024. Based on our definition, evaluation service could only be provided by an agency. The unit of measure was the "number of hours spent in evaluation" and the unit cost was \$13.00. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.083 Financial aid in agency dollars - This item shows the estimated agency cost for financial aid received by people in the sample. The unit of measure was dollars. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).

Item  
Number

- 3.084 Living quarters in agency dollars - This item shows the estimated agency cost of living quarters received by people in the sample. The unit of measure was the "number of nights" and the unit of cost was \$2.84. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.085 Information and referral in agency dollars - This item shows the estimated agency cost of information and referral service received by people in the sample. The unit of measure was "number of activities performed" and the unit cost was \$6.49. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.086 Outreach service in agency dollars - This item equals item number 3.028. Based on our definition, outreach service could only be provided by an agency. The unit of measure was "number of times needs identified through outreach service" and the unit cost was \$4.14. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.087 Agency dollars of public housing rent assistance phase 2. This item shows the agency cost of public housing rent assistance received by people in the sample. The cost figure was obtained from the agency providing the service. A code of 9999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.088 Agency dollars of homestead exemption credit phase 2. This item shows the agency cost of homestead exemption credit received by people in the sample. The cost figure was obtained from the agency providing the service. A code of 999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.089 Agency dollars of food stamps phase 2. This item shows the agency cost of food stamps received by people in the sample. The cost figure was obtained

Item  
Number

- from the agency providing the service. A code of 999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.090 Agency dollars of Supplemental Security Income (SSI) phase 2. This item shows the agency cost of SSI received by people in the sample. The cost figure was obtained from the agency providing the service. A code of 9999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.091 Agency dollars of financial aid phase 2. This item shows the agency cost of financial aid received by people in the sample. The cost figures were obtained from agencies providing the services. A code 9999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.092 Transportation in family dollars - This item shows the estimated family cost of transportation service received by people in the sample. The unit of measure for this service was "one way trips" and the unit cost was \$1.13. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.093 Employment service in family dollars - This item contains zero (0) for all cases because we had no unit cost to apply. Although we did not have a unit cost, this item was created because it was a valid family service. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.094 Personal care in family dollars - This item shows the estimated family cost of personal care received by people in the sample. The unit of measure was a "visit" and the unit cost was \$19.25. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).

Item  
Number

- 3.095      Nursing care in family dollars - This item shows the estimated family cost of nursing care received by people in the sample. The unit of measure was a "visit" and the unit cost was \$23.90. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.096      Physical therapy in family dollars - This item shows the estimated family cost of physical therapy received by people in the sample. The unit of measure was "sessions" and the unit cost was \$17.35. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.097      Continuous supervision in family dollars - This item shows the estimated family cost of continuous supervision received by people in the sample. The unit of measure was "days" and the unit cost was \$26.46. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.098      Checking in family dollars - This item shows the estimated family cost of checking service received by people in the sample. The unit of measure was contacts (telephone or personal) and the unit cost was \$.47. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.099      Relocation service in family dollars - This item shows the estimated family cost of relocation service received by people in the sample. The unit of measure was "moves" and the unit cost was \$6.49. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).

Item  
Number

- 3.100 Homemaker service in family dollars - This item shows the estimated family cost of homemaker service received by people in the sample. The unit of measure was a "6 hour visit" and the unit cost was \$5.31 per/hr. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.101 Meals service in family dollars - This item shows the estimated family cost of meals service received by people in the sample. The unit of measure was "meals" and the unit cost was \$1.94. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.102 Food-groceries in family dollars - This item shows the estimated family cost of food, groceries and food stamps received by people in the sample. The unit of measure was dollars. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.103 Administrative legal service in family dollars - This item shows the estimated family cost of administrative legal service received by people in the sample. The unit of measure was "incidents" and the unit cost was \$6.49. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.104 Financial aid in family dollars - This item shows the estimated family cost for financial aid received by people in the sample. The unit of measure was dollars. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.105 Living quarters in family dollars - This item shows the estimated family cost of living quarters received by people in the sample. The unit of measure was the "number of nights" and the unit cost was \$2.84. A code 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).

Item  
Number

- 3.106 Information and referral in family dollars - This item shows the estimated family cost of information and referral service received by people in the sample. The unit of measure was "number of activities performed" and the unit cost was \$6.49. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.107 Transportation in both dollars - This item shows the transportation cost for people who received the service from both family and agency sources. The unit of measure for this service was "one way trips" and the unit cost was \$1.13. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.108 Personal care in both dollars - This item shows the personal care cost for people who received the service from both family and agency sources. The unit of measure was a "visit" and the unit cost was \$19.25. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.109 Nursing care in both dollars - This item shows the nursing care cost for people who received the service from both family and agency sources. The unit of measure was a "visit" and the unit cost was \$23.90. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.110 Physical therapy in both dollars - This item shows the physical therapy cost for people who received the service from both family and agency sources. The unit of measure was "session" and the unit cost was \$17.35. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).

Item  
Number

- 3.111 Continuous supervision in both dollars - This item shows the continuous supervision cost for people who received the service from both family and agency sources. The unit of measure was "days" and the unit cost was \$26.46. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.112 Checking in both dollars - This item shows the estimated checking cost for people who received the service from both family and agency sources. The unit of measure was contacts (telephone or personal) and the unit cost was \$.47. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.113 Relocation service in both dollars - This item shows the estimated relocation cost for people who received the service from both family and agency sources. The unit of measure was "moves" and the unit cost was \$6.49. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.114 Homemaker service in both dollars - This item shows the estimated homemaker cost for people who received the service from both family and agency sources. The unit of measure was a "6 hour visit" and the unit cost was \$5.31 per/hr. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.115 Meals service in both dollars - This item shows the estimated meals cost for people who received the service from both family and agency sources. The unit of measure was "meals" and the unit cost was \$1.94. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).

Item  
Number

- 3.116 Food-groceries in both dollars - This item shows the estimated food and grocery cost for people who received the service from both family and agency sources. The unit of measure was dollars. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.117 Administrative legal service in both dollars - This item shows the estimated administrative legal cost for people who received the service from both family and agency sources. The unit of measure was "incidents" and the unit cost was \$6.49. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.118 Financial aid in both dollars - This item shows the estimated cost for financial aid for people who received the service from both family and agency sources. The unit of measure was dollars. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.119 Information and referral in both dollars - This item shows the estimated information and referral cost for people who received the service from both family and agency sources. The unit of measure was "number of activities performed" and the unit cost was \$6.49. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.120 Transportation in unknown dollars - This item shows the estimated cost of transportation service received from unknown sources. The unit of measure for this service was "one way trips" and the unit cost was \$1.13. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.121 Personal care in unknown dollars - This item shows the estimated cost of personal care service received from unknown sources. The unit of measure for this service was a "visit" and the unit cost was \$19.25. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).

Item  
Number

- 3.122 Physical therapy in unknown dollars - This item shows the estimated cost of physical therapy received from unknown sources. The unit of measure was "sessions" and the unit cost was \$17.35. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.123 Checking in unknown dollars - This item shows the estimated cost of checking service received from unknown sources. The unit of service was contacts (telephone or personal) and the unit cost was \$.47. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.124 Relocation service in unknown dollars - This item shows the estimated cost of relocation service received from unknown sources. The unit of measure was "moves" and the unit cost was \$6.49. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.125 Meals service in unknown dollars - This item shows the estimated cost of meals service received from unknown sources. The unit of measure was "meals" and the unit cost was \$1.94. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.126 Food-groceries in unknown dollars - This item shows the estimated cost of food, groceries and food stamps received from unknown sources. The unit of measure was dollars. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.127 Administrative legal service in unknown dollars - This item shows the estimated cost of administrative legal service received from unknown sources. The unit of measure was "incidents" and the unit cost was \$6.49. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 status in phase 2).

Item  
Number

- 3.128 Information and referral in unknown dollars - This item shows the estimated cost of information and referral service received from unknown sources. The unit of measure was "number of activities performed" and the unit cost was \$6.49. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.129 Total agency dollars - This item shows the total estimated dollar value of all services received from an agency as the only source. It is the sum of items 3.059 through 3.086. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.130 Total family dollars - This item shows the total estimated dollar value of all services received from family/friends as the only source. It is the sum of items 3.092 through 3.106. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.131 Total family and agency dollars - This item shows the total estimated dollar value of all services received from both family/friend and agency sources. It is the sum of items 3.107 through 3.119. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.132 Total unknown dollars - This item shows the total estimated dollar value of all services received from unknown sources. It is the sum of items 3.120 through 3.128. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).
- 3.133 Grand total dollars - This item shows the total estimated dollar value of all services received from all sources. It is the sum of items 3.001 through 3.028. A code of 999999 means the person was not interviewed in phase 2. (See item 5.001 Status in phase 2).

Item  
Number

4.001  
thru  
4.004

These items contain the Medicare and Medicaid data for the older people who responded to our questionnaire. Medicare information was obtained from Blue Cross of Northeast Ohio, Nationwide Mutual Insurance Company and The Traveler's Insurance Companies. Blue Cross was the Medical Plan A (hospitalization) carrier and provided the information contained in items 4.001 through 4.004 and 4.006 through 4.008. Both Nationwide and Traveler's were the Medicare Plan B (doctor's bills) carriers for the area. Traveler's Insurance provided the information in items 4.009 through 4.021. Nationwide Insurance, the primary Plan B carrier, provided the information in items 4.022 through 4.042. Medicaid costs were obtained from the State of Ohio and are contained in item 4.043. Total medical charges are a composite of hospital and doctor charges paid by Medicare or Medicaid and are in item 4.044.

4.001

Blue Cross inpatient surgical date (Medicare) - The dates respondents in our sample had surgery under Blue Cross. A six digit code representing the year, month, and day of surgery. The first two digits represent the year, the second two digits the month and the last two digits the day. Code 999999 means not interviewed in phase 2.

4.002

Blue Cross inpatient days in hospital (Medicare) - The number of days respondents in our sample were in the hospital under Blue Cross. The code representing the number of days ranges from zero through 110. Code 999 means not interviewed in phase 2.

4.003

Blue Cross inpatient times hospitalized (Medicare) - The number of times respondents in our sample were hospitalized under Blue Cross. The code represents the number of times. Code 9 means not interviewed in phase 2.

Item  
Number

- 4.004 Blue Cross inpatient charges (Medicare) - The inpatient charges paid by Blue Cross for respondents in our sample. The code representing the amount paid, ranges from \$385 through \$19,047. Code 0 = Did not have any charges paid by Blue Cross. Code 99999 means not interviewed in phase 2.
- 4.005 Master Medical file - highest level. - This variable shows the highest level of Medical services received by respondents. It is a composite of Medicare, Medicaid and questionnaire data. The coding is as follows:
1. Hospital inpatient with surgery
  2. Hospital inpatient
  3. Outpatient surgery
  4. Outpatient services
  5. Doctor-receive drugs
  6. Doctor only
  7. No medical care
  9. Not interviewed in phase 2
- 4.006 Blue Cross inpatient medical profile (Medicare) - This variable shows the respondents under Blue Cross as inpatients in the hospital with surgery and those in the hospital without surgery. The coding is as follows:
- 0 Not hospitalized
  - 1 Hospital inpatient without surgery
  - 2 Hospital
  - 9 Not interviewed in phase 2

Item  
Number

- 4.007 Blue Cross outpatient charges (Medicare) - The outpatient charges paid by Blue Cross for the respondents in our sample. The code, representing the amount paid, ranges from \$3 through \$1,075. Code 0 = Did not have any charges paid by Blue Cross. Code 9999 means not interviewed in phase 2.
- 4.008 Blue Cross outpatient medical profile (Medicare) - This variable shows the respondents under Blue Cross as outpatients. The coding is as follows:
- 0 Missing value - No information
  - 3 Outpatient surgery
  - 4 Outpatient services
  - 5 Doctor - receive drugs
  - 6 Doctor only
  - 7 No medical care
  - 9 Not interviewed in phase 2
- 4.009 Traveler's Insurance place of medical service (Medicare) - This variable describes the place where respondents received doctor's care. The coding is as follows:
- 0 No reimbursement by Travelers Insurance or not interviewed in Phase 2
  - 1 Office
  - 2 Home
  - 3 In-hospital
  - 5 Outpatient hospital
  - 7 Other location
  - 9 Skilled nursing home
- 4.010 Traveler's Insurance - Type of service: units of blood<sup>1/</sup> (Medicare) - This variable identified the number of units of blood received by respondents

<sup>1/</sup>

See complete definition on page 151

Item  
Number

and reimbursed by Travelers Insurance. The coding is as follows:

0 Did not receive blood (Travelers the carrier)

99 Travelers Insurance not the carrier or not interviewed in phase 2

- 4.011 Traveler's Insurance - Type of service: Medical care visits<sup>1</sup>/<sub>1</sub> (Medicare) - This variable shows the number of units of medical care the respondent received. The code, representing the number of units, ranges from zero through 42. Code 99 = Travelers Insurance not the carrier or not interviewed in phase 2.
- 4.012 Traveler's Insurance - Type of service: surgery<sup>1</sup>/<sub>1</sub> (Medicare) - This variable shows the number of units of service pertaining to surgery received by respondents. The code for this variable ranges from zero through 2. Code 99 = Traveler's Insurance not the carrier or not interviewed in phase 2.
- 4.013 Traveler's Insurance - Type of service: consultations <sup>1</sup>/<sub>1</sub> (Medicare) - This variable shows the number of consultations the respondents had. The code for this variable ranges from zero through 2. Code 99 = Traveler's Insurance not the carrier or not interviewed in phase 2.
- 4.014 Travelers Insurance - Type of service: diagnostic X-rays<sup>1</sup>/<sub>1</sub> (Medicare) - This variable shows the number of diagnostic X-rays and related service the respondent had. The code for this variable ranges from zero through 8. Code 99 = Traveler's Insurance not the carrier or not interviewed in phase 2.
- 4.015 Traveler's Insurance - Type of service: laboratory diagnostics<sup>1</sup>/<sub>1</sub> (Medicare) - This variable shows the number of laboratory services the respondents had. The code for this variable ranges from zero through 5. Code 99 = Traveler's Insurance not the carrier or not interviewed in phase 2.

<sup>1</sup>/<sub>1</sub>

See complete definition on page 150

Item  
Number

- 4.016 Traveler's Insurance - Type of service: radiation therapy<sup>1/</sup> (Medicare) - This variable shows the number of radiation therapy services the respondents had. The code for this variable ranges from zero through 1. Code 99 = Traveler's Insurance not the carrier or not interviewed in phase 2.
- 4.017 Traveler's Insurance - Type of service: anesthesia <sup>1/</sup> (Medicare) - This variable shows the number of services for anesthesia the respondent received. The code for this variable ranges from zero through 2. Code 99 = Traveler's Insurance not the carrier or not interviewed in phase 2.
- 4.018 Traveler's Insurance - Type of service: assistance at surgery<sup>1/</sup> (Medicare) - This variable shows the number of times assistance was required during surgery. The coding is as follows:
- 0 Did not require assistance
  - 99 Traveler's Insurance not the carrier or not interviewed in phase 2.
- 4.019 Traveler's Insurance - Type of service: ambulance service (Medicare) - This variable shows the number of times ambulance service was received by the respondents. The code for this variable ranges from zero through 4. Code 99 = Traveler's Insurance not the carrier or not interviewed in phase 2.
- 4.020 Traveler's Insurance Total charges - This variable shows the total charges paid by Traveler's Insurance for respondents in our sample. The code, representing the amount paid, ranges from \$1. through \$1,208. Code 0 = Traveler's Insurance not the carrier. Code 9999 means not interviewed in phase 2.
- 4.021 Traveler's Insurance Medical Profile - This variable shows the respondents under Travelers Insurance as outpatients. The coding is as follows:
- 0 Traveler's Insurance not the carrier
  - 3 Outpatient surgery
- <sup>1/</sup> See complete definition on pages 150, 151

Item  
Number

- 4 Outpatient services
- 6 Doctor only
- 7 No medical care
- 9 Not interviewed in phase 2

- 4.022 Nationwide Insurance - Place of service: Office - This variable shows the number of units of service received by respondents in a doctor's office. The code for this variable ranges from zero through 9. Code 0 means no service or not interviewed in phase 2.
- 4.023 Nationwide Insurance - Place of service: Home - This variable shows the number of units of service received by respondents in their own homes. The code for this variable ranges from zero through 9. Code 0 means no service or not interviewed in phase 2.
- 4.024 Nationwide Insurance - Place of Service: In Hospital - This variable shows the number of units of service received by respondents in hospitals. The code for this variable ranges from zero through 9. Code 0 means no service or not interviewed in phase 2.
- 4.025 Nationwide Insurance - Place of service: Extended Care Facility - This variable shows the number of units of service received by respondents in extended care facilities. The code for this variable ranges from zero through 9. Code 0 means no service or not interviewed in phase 2.
- 4.026 Nationwide Insurance - Place of service: Outpatient Hospital - This variable shows the number of units of service received by respondents as hospital outpatients. The code for this variable ranges from zero through 9. Code 0 means no service or not interviewed in phase 2.
- 4.027 Nationwide Insurance - Place of service: Independent Laboratory - This variable shows the number of units of service received by respondents in independent laboratories. The code for this variable ranges from zero through

Item  
Number

9. Code 0 means no service or not interviewed in phase 2.
- 4.028 Nationwide Insurance - Place of service: Other Location - This variable shows the number of units of service received by respondents at other locations. The code for this variable ranges from zero through 9. Code 0 means no service or not interviewed in phase 2.
- 4.029 Nationwide Insurance - Place of service: Nursing Home - This variable shows the number of units of service received by respondents in nursing homes. The code for this variable ranges from zero through 9. Code 0 means no service or not interviewed in phase 2.
- 4.030 Nationwide Insurance - Place of service: Skilled Nursing Home - This variable shows the number of units of service received by respondents in skilled nursing homes. The code for this variable ranges from zero through 7. Code 0 means no service or not interviewed in phase 2.
- 4.031 Nationwide Insurance - Type of service: units of blood  $\frac{1}{2}$  (Medicare) - This variable identifies the number of units of blood received by respondents and reimbursed by Nationwide Ins. The coding is as follows:
- 0 Did not receive blood (Nationwide the carrier)
  - 99 Nationwide not the carrier or not interviewed in phase 2.
- 4.032 Nationwide Insurance - Type of service: Medical care  $\frac{1}{2}$  (Medicare) - This variable shows the number of units of medical care the respondents received. The code, representing the number of units, ranges from zero through 53. Code 99 = Nationwide Insurance not the carrier or not interviewed in phase 2.
- 4.033 Nationwide Insurance - Type of service: surgery  $\frac{1}{2}$  (Medicare) - This variable shows the number of units of service pertaining to surgery received by respondents. The code for this variable ranges from zero through 22. Code

$\frac{1}{2}$  See complete definition on pages 150, 151

Item  
Number

99 = Nationwide Insurance not the carrier or not interviewed in phase 2.

- 4.034 Nationwide Insurance - Type of service: Consultation 1/ (Medicare) - This variable shows the number of consultations the respondents had. The code for this variable ranges from zero through 4. Code 99 = Nationwide Insurance not the carrier or not interviewed in phase 2.
- 4.035 Nationwide Insurance -Type of service: diagnostic X-rays 1/ (Medicare) - This variable shows the number diagnostic X-rays and related services the respondent had. The code for this variable ranges from zero through 45. Code 99 = Nationwide Insurance not the carrier or not interviewed in phase 2.
- 4.036 Nationwide Insurance - Type of service: laboratory diagnostics 1/ (Medicare) This variable shows the number of laboratory services the respondents had. The code for this variable ranges from zero through 49. Code 99 = Nationwide Insurance not the carrier or not interviewed in phase 2.
- 4.037 Nationwide Insurance -Type of service: radiation therapy 1/ (Medicare) - This variable shows the number of radiation therapy services the respondents had. The code for this variable ranges from zero through 22. Code 99 = Nationwide Insurance not the carrier or not interviewed in phase 2.
- 4.038 Nationwide Insurance - Type of service: anesthesia 1/ (Medicare) - This variable shows the number of services for anesthesia the respondents received. The code for this variable ranges from zero through 4. Code 99 = Nationwide Insurance not the carrier or not interviewed in phase 2.
- 4.039 Nationwide Insurance - Type of service: assistance at surgery 1/ (Medicare) - This variable shows the number of times assistance was requested by the primary surgeon during surgery. The code is as follows:

0 Did not require assistance

1 Assistance required one time

99 Nationwide Insurance not the carrier or not interviewed in phase 2.

1/ See complete definition on pages 150, 151 :18

Item  
Number

- 4.040 Nationwide Insurance - Type of service: ambulance service (Medicare) - This variable shows the number of times ambulance service was received by the respondents. The code for this variable ranges from zero through 16. Code 99 = Nationwide Insurance not the carrier or not interviewed in phase 2.
- 4.041 Nationwide Insurance Total charges - This variable shows the total charges paid by Nationwide Insurance for respondents in our sample. The code, representing the amount paid, ranges from \$5 through \$4,678. Code 0 = Nationwide Insurance not the carrier or no medical charges paid. Code 9999 means not interviewed in phase 2.
- 4.042 Nationwide Insurance Medical Profile - This variable shows the respondents under Nationwide Insurance as outpatients. The coding is as follows:
- 0 Nationwide Insurance not the carrier or not interviewed in phase 2
  - 3 Outpatient surgery
  - 4 Outpatient services
  - 6 Doctor only
- 4.043 Medicaid Total Charges - This variable shows the total charges paid by Medicaid for respondents in our sample. The code, representing the amount paid, ranges from \$2 through \$9,243. Code 0 = Nationwide Insurance not the carrier or no medical services. Code 9999 means not interviewed in phase 2.
- 4.044 Overall Total Medical Charges. This variable shows the overall total medical charges paid for respondents in our sample including all hospital and doctor's fees. The code, representing the medical charges, ranges from \$3 through \$22,152. Code 0 = Did not have any medical charges. Code 99999 means not interviewed in phase 2.

### Definitions of Medical Services

The following are the definitions of medical services used by the Medicare carriers who provided the Plan B information contained in the 4. items.

Medical Care - Includes all physician services, including podiatrists and surgical chiropodists, chiropractors, independent physical therapist, and covers office visits, nursing home visits, non-surgical hospital visits and injections. Diagnostic services, allergy testing, therapeutic procedures, special dermatological procedures and physical medicine services are also included. (Consultation is excluded).

### Psychiatric Expenses

Surgery - Includes those procedures recognized in the surgical section of Current Procedural Terminology published by the AMA and covers services pertaining to incision, excision, repair, suture, destruction, introduction, fractures, manipulation, dislocations, amputation and endoscopy.

Consultation - Refers to the professional service rendered by a physician whose opinion or advice has been requested by another physician or agency for the evaluation and/or treatment of a patient.

Diagnostic X-Ray - X-Ray and related services undertaken for diagnostic purposes. Includes portable X-Ray services.

Diagnostic Laboratory - Laboratory services, regardless of where rendered, required in the diagnosis of disease or injury. Also, includes certain mechanical or machine tests such as EKG, BMR, etc.

Radiation Therapy - Therapeutic services, such as X-Ray, radon, radium, and isotopes for the treatment of malignancies, tumors of bones, brain, or spinal cord, angiomas, vascular nevi, lymphomas, leukemia and thyroid disease.

### Definitions of Medical Services

Anesthesia - Services for anesthesia including the appropriate pre- and post-operative visits, administration of anesthetic, and transfusion of fluids and/or blood incident to the anesthesia or surgery.

Assistance at Surgery - Surgical assistance rendered upon the request of the primary surgeon and governed by the rules for such services prescribed by the intermediary.

Prosthetic Devices, Appliances and Supplies

Ambulance Service

Charges for whole blood or packed red blood cells - (numeric) includes bills where the charges are for whole blood or packed red blood cells and where reimbursement is made.

Item  
Number

5.001      Status of Interviewee in Phase 2 - This item is a one digit code that identifies the status of the individuals in our sample at the time of the phase 2 interviews. The coding for the item is as follows:

- 1    In community and interviewed in both phases
- 2    Institutionalized after phase 1 interviews  
     reinterviewed in phase 2
- 3    Moved out of metro area not reinterviewed
- 4    Moved unknown not reinterviewed
- 5    Deceased
- 6    Refused to be interviewed in phase 2

THE OARS MULTIDIMENSIONAL  
FUNCTIONAL ASSESSMENT QUESTIONNAIRE

To provide the user with an understanding of the questionnaire used in the GAO study, we have reprinted chapters 3 and 15 from the publication "Multidimensional Functional Assessment: The OARS<sup>1/</sup> Methodology", Duke University Center for the Study of Aging and Human Development. Chapter 3 describes the validity and reliability testing done on the OARS Multidimensional Functional Assessment Questionnaire. Chapter 15 provides instruction for administering the questionnaire including a section on questions that require special consideration.

<sup>1/</sup> OARS is the acronym for Older Americans Resources and Services. An assessment strategy developed by Duke University.

## CHAPTER 3

VALIDITY AND RELIABILITY OF THE MULTIDIMENSIONAL FUNCTIONAL  
ASSESSMENT QUESTIONNAIRE

GERDA G. FILLENBAUM

With adults—and particularly the elderly—in mind we have developed a simple, inexpensive, accurate means of assessing personal level of functioning on five dimensions: social resources, economic resources, mental health, physical health, and activities of daily living (ADL). While such an assessment is basic to the OARS Program evaluation and resource allocation model (see Chapter 1), the Multidimensional Functional Assessment Questionnaire was developed so that it could also be used independently. It is suitable—and presently being used—for clinical intake, population surveys, and longitudinal studies.

Basically, the questionnaire seeks to determine functional status on the major dimensions of functioning and is as concerned with measuring adequacy of functioning as it is with measuring inadequacy. This questionnaire, therefore, covers both a broader area (more dimensions) and a broader range (excellent to totally impaired) of functioning than do most assessment instruments. Further, the final assessments that are made can be uniformly understood across the five dimensions, for a particular rating carries the same implication regardless of which dimension is being rated. Thus, a rating of 1, for example, always indicates excellent functioning, and a rating of 6 always indicates totally impaired functioning.

The questionnaire consists of two parts: Part A, which is concerned with assessment of functional level, and Part B, which is concerned with assessment of service use and the recipient's perceived need for specific services. Studies of validity and reliability, however, refer solely to Part A. Part A is divided into a number of sections—one section for each of the dimensions of personal functioning, one for the informant's and one for the interviewer's view of the focal person, and a basic demographic section.

With the exception of ADL, where only factual information is sought, both factual information and subjective assessments are requested from the focal person; but when the focal person does not seem to understand the questions an informant is asked to supply factual data. The information obtained permits an assessment of level of functioning on a six-point scale ranging from excellent to totally impaired for each of the five dimensions. Total administration time (for both Part A and Part B) averages forty-five minutes.

The current questionnaire, the Multidimensional Functional Assessment Questionnaire (MFAQ), is reproduced in Appendix A and has been empirically derived from an earlier multidimensional assessment instrument, the Community Survey Questionnaire (CSQ), the validity and reliability of which had been established

and will be reported on in detail below. The CSQ had been administered to 997 randomly selected community residents aged sixty-five and over. Using the data so obtained, Woodbury and Clive (1975) developed a program which indicated the extent to which each CSQ item discriminated between excellent and totally impaired functioning on each of five dimensions--social resources, economic resources, mental health, physical health, and ADL. Based on these data, items with maximum discriminatory power were selected, the final item selection being modified where necessary on the basis of clinical experience and subject response. Because of external supporting evidence, and because of the manner in which Part A of the MFAQ has been constructed, we may presume that the validity and reliability of the parent instrument have been retained.

#### Validity

The manner in which both the CSQ and MFAQ were constructed ensured consensual validity since only those items which experts agreed should be present were included. This, however, is a fairly weak form of validity, and since level of functioning ratings made solely on the basis of OARS questionnaire data are intended to be comparable to ratings on level of functioning made by acknowledged professionals after personal examination, results of professional examination were used as the standard against which to validate OARS level of functioning ratings.

#### Comparison with Clinic Interview Data

An early form of the CSQ, identical in relevant aspects to the MFAQ, was administered by a research technician to twenty-two clients with whom there was to be no continued contact. These clients were then seen in clinical interviews and evaluated by seven clinicians (psychiatrists and social workers), four of whom saw four cases each and the rest of whom saw one, two, and three cases each. After identifying information had been removed from the questionnaires, these clients were later rated by the clinicians, who rated not only their own clients, but their clients embedded in a set of sixteen cases to reduce further the possibility of client identification. Each of the five dimensions was examined separately. Ratings based on clinical interview were compared with ratings based on questionnaire data by means of paired t-tests. Statistically significant differences were found for only one dimension--ADL--where ratings based on clinical interview indicated a poorer level of functioning than ratings based on intake form data ( $t = 2.25$ , d.f. = 21,  $p < .05$ ). These data suggest that, with the possible exception of ADL, questionnaires and clinical interviews yield similar ratings.

#### Comparison with Professional Examination

With the use of the CSQ, data had been obtained from nearly 1,000 community residents. (See Chapters 7 and 9.) A year later 120 of these community residents were selected such that all combinations of impairment on each of the five dimensions were represented. Four of the original group had died, and, of the 116 remaining, all answered the CSQ again and were invited to participate in a health examination--i.e., an examination of mental health by a psychiatrist and an

## APPENDIX I

examination of physical health by a physician's assistant. Of the 110 who were available for this aspect of the study, 26 refused completely to participate, and data on only mental health was obtained for one person and only on physical health for another. The remaining 82 completed both examinations. Of the participants, 53 were white, 31 black, 34 male, and 50 female; 34 were married, 41 widowed, and 9 were single (i.e., had never married, divorced, or separated). Those who participated fully did not differ in terms of sex, race, age, marital status, occupational level, or level of impairment from those who refused to participate.

For the examination of mental health, subjects were randomly assigned to one of ten psychiatrists, precautions being taken to ensure that one of these psychiatrists, who had rated some of the questionnaires answered by this group, did not see in examination any person whose CSQ he had rated. Subjects were seen privately and were interviewed for the length of time necessary to come to a decision regarding mental state and to complete the Overall and Gorham Brief Psychiatric Rating Scale and a symptoms check list. Diagnosis was formulated where appropriate, a narrative summary written, and a rating made on the six-point mental health scale.

Physical examinations were performed by four physician's assistants to whom subjects were randomly assigned. Again, all the examiners used a similar procedure—a short medical history, an electrocardiogram, a measure of height, weight, and blood pressure, and further examination as required. In addition, a ten-point performance status scale was completed, on which a rating of 1 = normal, no complaints, no evidence of disease, able to carry out normal activity, and on which 10 = moribund, unable to care for self. Finally, subjects received a rating on the six-point physical health scale. None of these examiners was ever permitted access to information on the questionnaire, and all had received some instruction in the use of the relevant rating scale.

In order to determine whether relative level of functioning derived from these two procedures was in agreement, participants were ranked on the basis of each of these ratings, and the rankings were compared using Spearman rank order correlation. On mental health, the Spearman rank order correlation was .62 ( $p < .001$ ), and on physical health it was .70 ( $p < .001$ ). While these results indicate that there is good agreement between the professional assessment and the questionnaire-based estimate on relative severity of impairment, the correlations are not substantial. In part this may be attributable to: (1) a difference in methods—that is, that questionnaire-based information is being compared with professional examination (Fiske, 1971)—(2) not uncommon intraprofessional differences in interpretation of level of functioning (Haberman, 1967), or (3) differences in the use of the six-point rating scale.

To examine the latter possibilities, Spearman rank order correlations between the professional rating and the CSQ rating were calculated separately for the cases examined by each professional. Although questionnaire-based ratings indicated that the professionals had been allocated similar subjects, wide differences among both psychiatrists ( $r_s = .28$  to  $.92$ ) and among physician's assistants ( $r_s = -.24$  to  $.80$ ) were found, indicating that intraprofessional differences were present. To minimize problems due to rating differences, the psychiatrists were asked to rank the persons they had seen. Since two of the physician's assistants had examined more persons than they could rank, the ten-point performance

status scale was used as the basis for ranking on the physical health dimension. In addition, rating differences among trained staff raters were taken into account.

The original analyses were then repeated for each psychiatrist and physician's assistant, and agreement between professional examination and questionnaire-based assessment was found to be closer than it was previously, although some differences did remain evident: the psychiatrists'  $r_s$  ranged from .49 to 1.00, and the physician's assistants'  $r_s$  ranged from .61 to .81. This suggests that the initial finding of a Spearman rank order correlation of .62 for mental health and of .70 for physical health underestimates the actual amount of agreement present between the professional assessment and the questionnaire-based assessment of level of functioning in these areas.

These studies, one looking at all five dimensions of functioning in a clinical setting and the other concentrating on personal examinations of mental and physical health by psychiatrists and physician's assistants, indicate that the CSQ does measure level of functioning for social resources, economic resources, mental health and physical health. On ADL, however, the questionnaire tends to give too rosy a picture, for clinicians in personal contact with clients notice difficulties which are not so evident from questionnaire data alone. Questionnaire users, therefore, should not underestimate reported ADL difficulties.

#### Discriminability

In order to be useful, a questionnaire must be able to discriminate appropriately among groups which differ in known ways. We have information on three populations living in the same geographical area: (1) a random sample of 997 community residents aged sixty-five and over; (2) 98 consecutive clients aged fifty and over referred to a clinic because of age-related problems (most live in the community); and (3) a random sample of 102 persons aged sixty-five and over living in institutions. While considerable variation in level of functioning may be present in each of these groups, we would expect, on average, that the community sample would be the healthiest, that the institutionalized would be the sickest, and that the clinic clients would fall in between. In addition, since this particular clinic specializes in treatment of the mentally impaired aged, we would expect its clients to have a mental health rating only slightly better than that of those in institutions.

As can be seen in Table 1, the findings are in agreement with expectations. While the range is wide—with rare exceptions all levels of functioning are represented in each of the three groups—those living in the community, on average, have the best level of functioning on each of the five dimensions, the institutionalized are the most impaired, and the clinic group falls in between. And, on the mental health dimension, the clinic group does indeed function only slightly better than the institutional group (mental health rating, clinic mean = 4.13, SD = .87; institutional mean = 4.53, SD = 1.22). Thus, the questionnaire discriminates appropriately among populations known to be different.

Table 1

Comparison of Ratings on Five Dimensions for  
Community, Clinic, and Institutionalized Subjects

	Community		Clinic		Institution	
	Mean	SD	Mean	SD	Mean	SD
Social Resources	2.24	1.00	3.26	1.18	4.20	1.13
Economic Resources	2.79	1.08	2.91	1.02	3.26	.84
Mental Health	2.79	1.06	4.13	.87	4.53	1.22
Physical Health	3.04	1.02	3.60	.91	3.74	.98
ADL	2.36	1.42	3.64	1.48	5.31	.91
N	997 <sup>a</sup>		98		102	

<sup>a</sup> Due to insufficient data some subjects did not receive ratings. The number receiving ratings was: Social—980; Economic—971; Mental—970; Physical—994; ADL—996.

### Reliability

Pretesting indicated that the CSQ and the MFAQ could be readily understood and responded to appropriately by persons similar to those for whom it was intended and that the questionnaire yielded information which could be rated. These matters are crucial to obtaining reliable data (Rose and Bell, 1971). Beyond that, however, we were concerned with test-retest reliability (the extent to which a person would give the same response on a second testing occasion), inter-rater reliability (the extent of agreement among different raters), and intra-rater reliability (self-consistency in rating).

*Test-retest reliability.* After an interval averaging five weeks (it ranged from three to eight weeks), the CSQ was readministered to thirty community residents who were representative of those aged sixty-five and over in the local area. On being seen again, these subjects were also asked whether certain major life events had occurred since the first administration of the CSQ so that these changes could be taken into account in examining the data. One third of the community resident population had experienced personal injury or sickness or the death of a close friend or family member. Response given the first time was compared with response given the second time. In all, 240 pairs of discrete items were examined. Not included among these were items concerned with the previous month (a time period not common to the two testing occasions) and ADL item beginning, "Could you do. . . ." (These were asked of very few subjects.) When only the final score of a scale was legitimate, the individual items comprising the scale were

not examined; otherwise, individual scale items and final score were considered.

Certain differences in response on the two occasions were considered acceptable. Differences of one point were disregarded for all items which had to be answered on a scale of three or more points and in which the distinction between adjacent items was not clear (e.g., "quite often"/"sometimes"/"almost never"). Where distinctions between adjacent items were very clear (e.g., "without any help at all"/"with some help"/"completely unable"), no difference was acceptable.

Overall, 95.3 percent of the items were answered on both occasions, 91.7 percent of the responses being identical by our definition. Items concerned with subjective matters were the most likely to alter, with 11.4 percent of the subjective items and 7.3 percent of the objective items changing. In addition, while, as can be seen in Table 2, all but one of the test-retest correlations of the scores of combined items were statistically significant, correlations tended to be lower for groups of subjective items than they were for objective items.

Physical	.82**

\*p < .05

\*\*p < .001

The changes typically indicated a better level of functioning at the first interview than at the second, and responses were internally consistent, the initial higher objectively determined level of functioning being accompanied by a

## APPENDIX I

subjectively determined good state of feeling, and the poorer objective level on re-interview being accompanied by a lower subjective self-assessment.

Although subjects differed widely in basic demographic characteristics, all answered most of the questions (range unanswered = 0.7, mean = 3.46, SD = 1.87). The number of items answered differently on the two occasions ranged from 9 to 43 (mean = 19, SD = 8.38), with little obvious difference between high and low response changers.

In summary, rate of response was high and there was some variability in consistency of response, with changes being greatest for subjective matters. The latter is not unique (see, e.g., USNCHS, No. 43; Zubin, 1969). Level of functioning was poorer on the second occasion than on the first. This may reflect the actual situation, for, as mentioned earlier, a third of the subjects had experienced some untoward event since first being seen. But it may also reflect the impact of good interviewers and of increased accuracy in reporting symptoms and chronic conditions on re-interview (USNCHS, Nos. 26, 45), matters which are typically underreported (USNCHS, No. 23).

*Inter-rater agreement.* Following a training session, each of eight CSQs, labelled "initial" questionnaires, were rated by ten raters, and an additional nine questionnaires, called "in-common" questionnaires, were rated over a period of time by eight raters. These nine questionnaires were dispersed among groups of twenty questionnaires which were only rated by one individual.

Inter-rater agreement was calculated separately for each dimension for the "initial" and "in-common" sets of questionnaires. Intra-class correlation coefficients (Haggard, 1958) were statistically significant for all dimensions, but were low for the economic dimension. Figures, first, for the "initial" questionnaires and, second, for the "in-common" questionnaires on each of the five dimensions are: Social Resources .73, .79; Economic Resources .69, .18; Mental Health .68, .55; Physical Health .83, .67; and ADL .93, .86. (These figures tend to be underestimates of extent of agreement since the available computer program could make assessments only when some disagreement was present; questionnaires on which there was complete agreement among raters had to be excluded.) The economic dimension was the only dimension on which discipline of rater seemed to have an effect.

As can be seen in Table 3, the results of Kendall's coefficient of concordance, W (Siegel, 1956), were in agreement and showed that raters agreed with each other regarding the relative severity of those assessed.

Examination of the specific ratings assigned indicated that on at least 70 percent of the occasions identical ratings were assigned, that differences were rarely greater than one point (two-point differences occurred only 2 percent of the time), and that disagreement on placement in an impaired category (ratings of 4-6) or unimpaired category (ratings of 1-3) occurred about 7 percent of the time. An independent examination of inter-rater agreement on the MFAQ, in which ratings made by interviewers were compared with those of an independent rater, showed that, for sixty-nine randomly selected questionnaires (from a set of 3,345), identical ratings occurred on 86 percent of all possible rating occasions, with differences of one, two, and three points occurring 7 percent, 5 percent, and 2 percent of the time, respectively (Laurie, 1977).

\*p &lt; .05

\*\*p &lt; .01

\*\*\*p &lt; .001

Two other questionnaires similar in certain respects to our instruments but concentrating more heavily on assessing mental health have been reported: the interview schedule used in the Midtown Study (Langner and Michael, 1963; Srole, Langner, Michael, Opler, and Rennie, 1962) and the Structured and Scaled Interview to Assess Maladjustment (SSIAM) (Gurland, Yorkston, Stone, Frank, and Fleiss, 1972; Gurland, Yorkston, Goldberg, Fleiss, Sloane, and Cristol, 1972). In the Midtown Study, the two psychiatrists who made mental health ratings—like OARS, on a six-point scale—were in perfect agreement only 43 percent of the time, but within one point of each other 87 percent of the time—a percentage agreement somewhat lower than that obtained on the CSQ or the MFAQ. In the second study, four of the five areas of maladjustment measured by the SSIAM were subjected to factor analysis. Inter-rater agreement among three raters for fifteen subjects on the six factors obtained indicated high agreement on rank ordering of subjects, but perhaps not such high agreement on the numerical rating assigned, for raters differed significantly on two factors. The data from these two well-designed studies suggest that trained raters using our instruments compare favorably with other trained raters using different instruments to measure similar phenomena.

*Intra-rater agreement.* In order to assess self-consistency of rating, the CSQs rated in the studies examining inter-rater agreement were rated again twelve to eighteen months later by the seven raters (of the original ten) who remained.

In view of the extended time period between rating and re-rating, the substantial intra-rater reliability seen in Table 4 (where Pearson product moment

correlations range from .47 to 1.00 and are typically significant at the .1 percent level) indicates that rating standards remain stable over a considerable period of time. The lowest correlation of .47 for rater D on mental health may reflect D's change in knowledge of the area, for while D worked as a social worker, his entry into the program had been from a different discipline.

Table 4

Community Survey Questionnaire  
Intra-Rater Reliability<sup>a</sup>

Rater	Social Resources	Economic Resources	Mental Health	Physical Health	ADL
A	.86 <sup>b</sup>	.90	.76	.92	.97
B	.87	.80	.96	.87	.90
C	.87	.72**	.87	.78	.97
D	.95	.87	.47*	.82	.98
E	.82	.91	.83	.83	.88
F	.93	.79	.83	.92	1.00
G	.91	.67**	.89	.90	.97

<sup>a</sup> Pearson product moment correlations

<sup>b</sup> All unstarred correlations are significant at  $p < .001$

\*  $p < .05$

\*\*  $p < .01$

The data indicate that trained raters, even when drawn from different disciplinary backgrounds, rate in a similar manner and maintain their style of rating for a substantial period of time.

### Summary

Part A of the Multidimensional Functional Assessment Questionnaire is designed to assess personal level of functioning on five dimensions: social resources, economic resources, mental health, physical health, and ADL. Raters read the

## APPENDIX I

answers given to each of the structured items on the questionnaire and, on the basis of these responses, assign a level of functioning rating on a six-point scale (1 = level of functioning excellent, 6 = totally impaired) on each of the five dimensions. Examination indicates that assessments of four of these dimensions (social resources, economic resources, mental health, and physical health) are comparable to assessments of the same individuals made by appropriate professionals but that the questionnaire may underestimate impairment on the fifth dimension, ADL.

The items on the questionnaire are readily understood, and people do not object to repeated administration. The information yielded is adequate to assess level of functioning, and raters from different disciplines use the questionnaire equally effectively and maintain their standards of rating for a considerable period of time.

## CHAPTER 15

ADMINISTRATION OF THE OARS MULTIDIMENSIONAL  
FUNCTIONAL ASSESSMENT QUESTIONNAIRE

CONNIE SERVICE AND BECKY HERON

The OARS Multidimensional Functional Assessment Questionnaire (MFAQ), reproduced in full in Appendix A of this manual, consists of two parts: Part A and Part B. Part A is designed to assess the functioning of individuals, particularly in the areas of mental and physical health, economic and social resources, and activities of daily living, and it forms the basis for making quantitative judgments of individuals on each of these five dimensions on a six-point scale. Part B of the questionnaire explores what services individuals are receiving, with what intensity they are being received, who is providing them, and subjects' perceived need for services.

The entire questionnaire takes about forty-five minutes to administer. However, while most people choose to administer the entire questionnaire--both Part A and Part B--some people may be interested in only one part, and they should note that the two parts can be administered separately, in which case the guide appearing at the end of this chapter, and again in appendix A, should be followed. If information is desired from both Parts A and B, both should be administered on the same occasion.

While it is designed to produce similar results in the hands of both professionals and laymen, the MFAQ is a structured instrument which requires rigid, but easily mastered, techniques of administration. In addition, reliability requires that the meaning of the MFAQ's assessment strategy be understood by all users. Hence, for these reasons, and because only a thorough understanding of the instrument--its limitations as well as its uses--can provide users with a reliable and effective method for gathering information about individuals and/or populations, the OARS staff makes training available in the administration and in the uses of the MFAQ once each month and functions continually as a source of assistance to aid in any problems and to answer any questions concerning the instrument.

Definitions

**Subject, or S:** The person about whom the questionnaire is seeking information.

**Informant:** A person who knows the subject well--a relative, a household member, or someone taking care of the subject--and who answers some questions about and/or for the subject.

**Respondent:** Anyone answering a question, either subject or informant.

## APPENDIX I

### Ratings

After completing the questionnaire, the interviewer is to make a quantitative judgment of the subject on each of the five scales: social resources, economic resources, mental health, physical health, and activities of daily living. The scales are found on pages 38 through 42 of the questionnaire, and the interviewer is to circle the *one specific* number from one to six on each scale which best describes the subject of that particular interview.

Although the rater should use the description of levels for each scale to arrive at the appropriate level, the basic meanings of the six levels, which are the same for all five scales, should be kept in mind:

- 1 = Excellent
- 2 = Good
- 3 = Mildly impaired
- 4 = Moderately impaired
- 5 = Severely impaired
- 6 = Totally impaired

A trained person who has not seen the subject may later rate him or her based on the recorded information.

### Administration of the Questionnaire

The OARS MFAQ is not intended to be an open-ended instrument. It asks specific questions and limits answers to specific categories. *Questions should be asked exactly as they are written* so that results from subject to subject are comparable. The interviewer should maintain an unhurried, objective manner but should try to control any excessive talking on the part of the respondent, who should be gently urged on to the next question.

Most of the questions require the respondent to choose among specific answer options. If the respondent does not answer with an option, or qualifies one, the options should be repeated and the subject asked to make a choice. For example, if the subject, in answer to "How would you rate your health. . . ?" says "Good--most of the time," ask if, in general, it was excellent, good, fair, or poor. The interviewer is to circle the number which precedes the correct answer option. These numbers, with the exception of "1 Yes," "0 No," and the ADL section have no consistent meaning.

If the subject will not or cannot answer a question, the "Not answered" option should be circled and an explanation provided, such as "IDK" for "I don't know" or "Subject refused." If a question is left blank it must be assumed that it was not asked. In probing for scorable answers the interviewer should take care not to influence the answer or overly irritate the subject. It is helpful to mark all repeated questions and probes with a "Q" (question) to indicate that the answer was difficult to elicit.

Some questions--such as question 44, for example, "Do you have any of the following illnesses at the present time?"--have many sections to be checked.

## APPENDIX I

The interviewer *must ask each subquestion separately* and check the "YES" or "NO" for each. A blank does not mean "NO."

Since the questionnaire responses may later be coded and computerized, only coded responses are acceptable. For example, in answer to "How many times did you see a doctor last year?" neither "3 to 4 times" nor "regularly" can be coded, so interviewers are asked to probe and so indicate. However, interviewer notations explaining inconsistencies, or anything unusual, are very helpful to coders. In addition, an accurate answer occasionally may just not fit one of the answer options. In that case, please write in the answer so that a coding decision may be made later.

Statements to the interviewer which are not to be read to the subject have been printed in capital letters throughout the questionnaire. Explicit instructions to the interviewer have also been bracketed. *These instructions are very important.*

### Guiding Principle

The general principle which should guide the interviewer throughout the whole questionnaire is to get the best, most complete information in every case. It is better to get too much information than not enough.

### Questionnaire Outline

The entire MFAQ asks questions about the "Subject" we wish to assess and is set up in sections which deal with different aspects of his or her functioning and use of services. The Preliminary Questionnaire is a mental status examination designed to help interviewers decide if subjects are capable of answering the rest of the "factual" questions for themselves (this process will be described below) and also provides evidence of intellectual functioning. Questions 1 through 5 are *demographic questions*. The five major dimensions of functioning cover questions 6 through 70. Questions 6 through 14 inquire about the *social resources* of subjects; 15 through 30 their *economic resources*; 31 through 36 (and the Preliminary Questionnaire) their *mental health*; 37 through 55 their *physical health*; and 56 through 70 their *ability to perform the activities of daily living*. Each of these sections has been labeled. Question 71 inquires about services: the kinds and amounts of services subjects are receiving, from whom they receive them, and subjects' perceived need for services.

Questions 73 through 82 are to be asked of a reliable informant, if one is available. If an informant is not available at the time of the interview, a call-back need not be made to find one, unless, of course, the subject is unreliable (defined below). It is assumed that an informant will always be available in an institution.

The remaining questions are to be answered by the interviewer immediately after leaving the interview site. Questions 83 through 86 seek information about the interview and the quality of the data obtained. In questions 87 through 96 interviewers are asked not only for their impressions of the subject based upon the total interviewer experience with the subject and/or the informant, but also

## APPENDIX I

for any other impressions gathered from the environment. In questions 97 through 101 the interviewer is asked to rate the subject's current level of function on each of the five dimensions--social resources, economic resources, mental health, physical health, and activities of daily living (ADL).

### Reliable Subject

Most subjects will be able to answer the questions reliably, but occasionally a decision will be required as to the subject's ability to answer. The Preliminary Questionnaire (Pfeiffer, 1975a) on page two of the MFAQ gives an indication of the subject's reliability. A total error score of 4 or more is an indication that the subject may be unable to give correct factual answers. Other factors, however, should be weighed. If the subject's educational level (question 5) is very low (3rd grade or less), it may account for some of the errors. If there is an indication that the subject may not be reliable, *nevertheless ask questions 5 through 14*. If the subject gives good answers, continue the questionnaire; if not, ask the subject only the subjective questions (those in boxes) described below. Special care should be taken when interviewing mentally retarded subjects since their answers may appear valid but may be distorted, particularly when reporting amounts of anything within periods of time.

### Acceptable Informant

An acceptable informant must be eighteen years of age or older, or have been married (if younger than eighteen), and well enough mentally and physically to answer reliably for the subject. Acceptable informants, in order of preference, are:

1. A member of the household related to the subject by blood, marriage, or adoption.
2. Someone responsible for the care of the subject.
3. A member of the household unrelated to the subject.
4. A member of the subject's immediate family but not living in the household.

The word *respondent* applies to either subject or informant, whoever is answering the question.

### Subjective/"Factual" Questions

Throughout the questionnaire are subjective and what we call *factual* questions. The subjective questions deal with the subjects' feeling about things and so must be answered by subjects only. In the case of factual questions, however, accuracy is important; so if subjects are unreliable an acceptable informant should answer these questions for them.

## APPENDIX I

The subjective questions have been outlined by boxes on the questionnaire so that the interviewer can easily identify them. The factual questions, which are not boxed, are to be asked of subjects if they are reliable. Otherwise, factual questions should be asked of the informant. One set of questions is to be asked of an informant if one is available in all circumstances.

### In summary:

#### If the subject is reliable:

1. Ask all questions through page 32, and make a brief concluding statement.
2. If an informant is available, ask questions 73 through 82.

#### If the subject is unreliable:

1. Ask the subject all the boxed questions.
2. Ask the informant all other questions (except those questions clearly marked to be answered by the interviewer).

Get the best, most complete data available; that is, if the informant cannot answer a question for the subject and the subject seems to know the answer, use the subject's answer. Occasionally a subject will be completely unable to answer even subjective questions. In this case, get an "informant only" interview—one in which only the factual, or unboxed, questions are answered.

### Privacy

Each respondent, subject or informant, should be seen alone. The interviewer should state that the interview needs to be conducted with the subject alone and, if an informant is present, that there are also questions for him or her, also to be asked alone. If it is *impossible* to see the subject alone, whoever is present must be asked not to speak. If the subject insists on remaining while the informant is interviewed, the interviewer may find some of the questions, 73 through 82, too embarrassing to administer and should so indicate on the questionnaire.

### Introductory Statement

Just prior to beginning the interview, interviewers should again reassure subjects of the confidentiality of their answers and of the importance of their contribution to the project. Subjects should then be told: "I am going to be asking you lots of questions. Some of them may not seem to apply to you, but please bear with me and answer them as best you can. These questions were designed to apply to many different kinds of people, but it is important that each person answer them all."

Questions Requiring Special Consideration

A few of the items on the questionnaire require special consideration from the interviewer. The remainder of this chapter will be concerned with their description, beginning with a discussion of the Preliminary Questionnaire (PQ) and progressing, in order of occurrence, through question 101. In addition, a guide to the administration of the institutional form of the MFAQ and a guide to the separate administrations of Part A and Part B of the MFAQ appear at the end of this chapter.

Question  
Number

PQ The Preliminary Questionnaire should be approached in a very matter-of-fact manner. Despite the apprehension of many new interviewers, subjects answer these questions readily. However, if subjects seem disconcerted by the questions, a statement such as "I know they seem silly, but please bear with me; I have to ask them," or something similar, should put them at ease. An answer is correct only if all parts of it are correct. For example, if a subject gives the correct month and year for "What is the date today?" but fails to give the correct day, the whole answer is wrong. Every part of each question should be asked and the answers recorded. For example, all of the following information should be recorded, in the space provided, for the first question on the Preliminary Questionnaire:

MONTH	DAY	YEAR
-------	-----	------

All ten questions of the Preliminary Questionnaire should be asked of all subjects (unless there are problems in their understanding them because of language difficulties or deafness). A score of 10 errors is a meaningful score, but unless *every* question is asked we cannot assume that the total number of errors is 10.

4. When date of birth and age conflict, we assume that the date of birth is correct if it is reasonable and compute age from it.
7. Please include parents-in-law under "Parents"; brothers and sisters-in-law under "Brothers and sisters"; etc. Foster parents, however, should be included under "Others" and "Foster parents" indicated.
10. Question 10 applies to social relationships at work as well as outside of work.
14. Question 14 asks if there is "anyone who would give you any help at all if you were sick or disabled. . . ?" This question is in the social resources section and therefore applies to social, not economic, support. It does not apply to paid workers.

## APPENDIX I

### Question Number

16. Please note that this question asks for the work done throughout *most* of the subject's life. Only one occupation can be coded. It is very important that the occupation be specifically described since this question is a major indicator of socioeconomic status. If the subject was a farmer, for instance, being a tenant farmer would be quite different from being a farm owner. The size of the farm is also very important. Occupations like "engineer" are not specific enough. Is the subject a train engineer or a civil engineer, or does the subject perhaps own a company? If the subject was a factory worker, find out what the subject's particular job was in the factory.
17. This question is to be answered if the subject was ever married, even if the former spouse is no longer living.
- 17a. Here again, elicit the work done the longest, and specify the job in detail.
- 18-22. Income, reserves, debts, etc. are generally shared by a married couple. Therefore, questions about finances, ownership, and obligations refer to the couple if the subject is married and to the individual if he or she is not.
18. Regular assistance from family members applies only to regular contributions of money. Family aid in the form of providing a place to live, having the subject for meals, etc. should not be included in question 18, but is covered elsewhere. Since it is important to know the total income figure for the subject, if *any* amounts are not included in question 18, then question 18a must be asked.
- 18a. Since some people are very sensitive about revealing their income, an income card should be shown to subjects when question 18a is asked and subjects requested to reply with the letter which represents their income category. Be sure to establish the correct letter, especially if the subject replies with an amount which would be quite different if it were a monthly rather than a yearly figure.
19. Question 19 asks how many people altogether live on the reported income. This should include the subject and any others, such as the spouse, who receive more than half of their support from this income.
21. Question 21 asks about assets and financial resources. This should include savings, stocks and bonds, real estate holdings, etc. that could aid in an emergency.
34. Question 34 is, in fact, a psychiatric evaluation (Pfeiffer, 1975b). Although some of the questions may seem ridiculous to subjects, it is important that they answer them as they best apply to them. In answering any queries subjects may have, you should be careful to tell them only that you are interested in the problems and needs of people in

Question  
Number

general and ask them to try and answer as best they can. Since some less intelligent people may have trouble with word meanings in this section, the interviewer may define difficult words as necessary, being *extremely careful* not to interpret the meaning of the sentence or change it in any way. We do not want this to be an intelligence test, but the schedule is set up so that the subject's interpretation of each question is important.

The answers to these questions which are in the pathological direction are in capital letters. If the sum of responses in capital letters is 5 or more there are probably psychiatric problems. The higher the number over 5, the stronger the evidence.

- 42-44. It is very important that both interviewer and subject remain aware of the particular time span on certain questions. Question 42 asks for information on the *past month*; 44, at the *present time*. In asking these questions the interviewer should repeat the introductory question often, stressing the time span. In asking question 42, for example, the interviewer might say: "Have you had any arthritis medication in the past month? How about prescription pain killers? Have you taken any high blood pressure medicine in the past month?"

- 56-69. Questions 56 through 69 are the OARS scale for determining the subject's capacity to carry out the activities of daily living, that is, capacity for self-care. The questions ask "Can you. . . ?" rather than "Do you. . . ?" since, for example, subjects may not cook or do housework because husbands or wives do these things for them, yet be perfectly capable of doing them themselves.

The interviewer is cautioned to be aware that not only physical disabilities cause a subject to require help with ADL activities. Some subjects who are physically capable of ADL activities may nevertheless be unable to perform them regularly because of dementia, depression, intellectual deficit, etc., in which case the answer is "1 with some help" or "0 Unable. . . ." Subjects unable to do something regularly are considered to need help or to be unable even though they may be able to perform the activity occasionally.

Since there is a specific transportation question within the activities of daily living questions, transportation should not influence the answers for such things as shopping and doing laundry. We want to know the subject's capacity (ability) to go shopping or do laundry. Subjects may not do their own shopping because they have no transportation, but if they are capable of doing it regularly they should get a 2 answer.

69. If, in answer to Question 69, subjects wet or soil themselves less than once a week, they are considered not to wet or soil themselves and the "Never" option should be circled.

## APPENDIX I

### Question Number

70. Be sure to get full information on helpers. In follow-up studies these persons may be crucial in locating the subject.
71. Utilization of Services. Question 71 (subquestions 1 through 24) asks about services that the subject may or may not be receiving. Each subquestion asks about a specific service, which has been labeled. The numbers correspond with those of the service list in Appendix B. Although subquestions about each service are not identical, they do follow a general pattern. For most questions we wish to know if the subject has gotten the service at all within the past six months and, if so, who provided it and in what quantity. We then ask if the subject is still receiving the service and if he or she perceives a need for it. The need question applies whether or not the subject is receiving the service. For example, in subquestion 2, some subjects may be receiving social/recreational services and yet say they really do not need it, while others who are getting it may feel they do need it.

Since it is often difficult for subjects to think in terms of "the past six months," the interviewer is asked to calculate in advance what period the past six months has covered and to remind the subject that it means, for example, since last June. This procedure has been indicated in subquestions 2, 3, and 7, but the interviewer is urged to repeat it when necessary to insure that the subject is answering in terms of the past six months.

In the services section an additional burden is placed on the interviewer to get "the best possible information." In most cases the questions are clear and straightforward, but some will require further explanation. It is important that the interviewer understand what is meant by each service and make sure that the respondent, either subject or informant, also understands.

### Services with Special Problems

(2) SOCIAL/RECREATIONAL SERVICES are any *planned* and *organized* activities designed to increase a person's social interaction or foster creative use of leisure time. Social clubs, church clubs and groups (excluding church services), hobby, recreation, and special interest groups as well as volunteer projects and all classes taken for pleasure or self-enrichment are examples. Planned and organized crafts and hobbies, etc. should also be included.

(4) SHELTERED EMPLOYMENT applies to employment in special industries, offices, or shops designed to employ the impaired or handicapped. Goodwill Industries and industries for the blind are examples.

(5) EDUCATIONAL SERVICES, EMPLOYMENT RELATED includes any training to prepare a person for a job. Secretarial courses, professional schools

## APPENDIX I

### Question Number

(dental or law), retraining for older workers, and on-the-job training such as apprenticeships are all examples.

(6) REMEDIAL TRAINING is any training--except physical therapy, which is covered separately (see subquestion 13)--designed to improve the capabilities of a person whose abilities are limited. Included are speech therapy, remedial reading or literacy courses, reality orientation, training in self-care for the mentally or physically impaired, training for the blind, etc.

(7) MENTAL HEALTH SERVICES includes family or marital counseling along with all forms of individual or group mental health counseling or psychotherapy. Evaluation for psychiatric hospitalization is also included.

(9) PERSONAL CARE SERVICES refers to daily help in bathing, dressing, grooming, feeding, and toilet care. A weekly trip to the hairdresser would not be included.

(10) NURSING CARE, as defined here, can be provided by a nurse or by someone else. In this set of questions we wish to know about treatments or medications provided by or monitored by a nurse, attendant, family member, or someone else. Administration of medicine--either orally or in injections--catheter care, changing dressings, and taking of blood pressure and temperature are all examples. But nursing care here *does not* include other services--personal care services, continuous supervision, etc.--even when they are performed by a nurse.

(13) PHYSICAL THERAPY must be a *planned* set of physical exercises, massages, or treatments, but may be supervised by an attendant, a nurse, a family member, or by a physical therapist.

(14) CONTINUOUS SUPERVISION applies to continuous, twenty-four-hour-a-day monitoring of an individual. Someone need not always be in the room with the person but must be nearby--within calling distance. Individuals who have to have someone with them twenty-four hours a day--and need a sitter if, for example, a daughter goes to the drug store--are receiving continuous supervision. In a nursing home continuous supervision is available for all if needed, since there is always a nurse available; but we ask whether or not someone "had to be with you all the time to look after you?" In other words, continuous supervision exists only if supervision is provided as a necessity and not when it occurs just because of the presence of others.

(15) CHECKING SERVICES. Usually, subjects who have received continuous supervision in the past six months are asked only subquestion 15c, but an occasional exception occurs. If the subject is no longer receiving continuous supervision he or she may now be receiving checking. In that case, do *not* skip the checking questions since it is necessary to know if the subject received checking after the continuous supervision stopped.

## APPENDIX I

### Question Number

(17) **HOMEMAKER-HOUSEHOLD SERVICES** asks, "Did someone *have to* help you with routine household chores. . . ?" not, "Did someone help you. . . ?" We do not want to know, for example, about the wife who cleans, does laundry, etc. for her husband, *unless* it is required because he couldn't do it for himself.

(18) **MEAL PREPARATION** also asks, "Did someone *have to* prepare meals for you," not "Did someone prepare meals for you?"

(19) **ADMINISTRATIVE, LEGAL, AND PROTECTIVE SERVICES** apply to any help subjects have had in managing business and administrative affairs—legal help, someone paying bills for the subject (with the subject's money), and help with business dealings, such as that with landlords, for example. An extreme case is that of guardianship.

(20) **SYSTEMATIC MULTIDIMENSIONAL EVALUATION** must be of the individual's overall functioning, including social and economic resources and mental and physical health. The gathering of information in these areas is not sufficient; it must be evaluated. Examples are case conferences on a patient by a doctor, a social worker, and others; staff conferences on patients in nursing homes; or a case review of a client in a multi-disciplinary clinic.

(24) **COORDINATION, INFORMATION, AND REFERRAL SERVICES** asks "Did someone see to it that you got the kinds of help that you needed?" It goes on to say, ". . . did someone give you information about the kind of help that is available or put you in touch with those who could help you?" We are not interested here in a casual referral, for example, of a friend saying, "You really should check with the Senior Center. They could help you." We want to know here about people who take responsibility for seeing to it that the subject gets the kinds of help he or she needs.

- 73-82. Questions 73-82 follow the concluding statement to the subject and should be asked of an informant if one is available. This should not be done in the subject's presence. (See Privacy, above.)
74. Question 74, like the identical Question 14, which is asked only of the subject, does not apply to paid help for the subject if sick or disabled but, rather, to family, friends, and neighbors. It is a social rather than an economic support question and has been included under that title within the informant questions.
83. Length of interview should include only the time with the subject or informant(s) in filling out pages 2 through 35.
- 86a. Additional information about the physical and/or mental state of the subject may be obtained in 36a. We want to know if the subject refused or if the informant refused for him or her and why. It is also

## APPENDIX I

### Question Number

very important to know if the subject is too sick or too mentally disturbed to talk to the interviewer or if perhaps the subject is deaf or in a coma.

- 87-96. In questions 87-96 interviewers are asked to give their impressions of subjects based on experience with the subject, information from the informant, the subject's environment, etc. In some cases the interviewer will feel there has been insufficient information to answer some of these questions and should so indicate. But even in an informant-only interview generally enough information is obtained from the informant to answer these questions. The interviewer is urged to answer all of the questions or as many as possible based upon whatever information and evidence were gathered.
- 97-101. Ratings. Please also read the information on ratings provided in the introduction to this chapter. The five rating scales are designed to help the interviewer make a summary assessment of the subject. These judgments are to be based on the interviewer's overall impression of the subject from information contained in the survey questionnaire and from all other sources. The interviewer will rate the subject's current level of function on social resources (questions 6-14, 73, 74, 87, and 88), economic resources (13-30, 75, 89-91), mental health (the Preliminary Questionnaire and questions 31-36, 76-80, and 92-95), physical health (37-55, 81, 82, and 96), and activities of daily living (56-69). Although the interviewer should use the descriptions of levels for each scale to arrive at the appropriate level of functioning, the basic meaning of the six levels should be kept in mind (see Ratings, above):

- 1 = Excellent
- 2 = Good
- 3 = Mildly impaired
- 4 = Moderately impaired
- 5 = Severely impaired
- 6 = Totally impaired

Ratings should be based on the subject's functional level *at the time of the interview* even if the condition is viewed as temporary. The interviewer must circle a specific level number, even when finding it difficult to choose between two levels. Ratings between numbers--such as a rating between 2 and 3--are not permissible.

97. THE SOCIAL RESOURCES RATING SCALE incorporates two concepts: how satisfying the subjects' social network is to them, and the adequacy of social support in case of disability. The most common combinations are listed as examples in the scales, but the interviewer is reminded to return to the basic meaning of the scales for guidance when the subject does not fit a description.
98. THE ECONOMIC RATING SCALE incorporates two concepts in various combinations: the adequacy of the subjects' income and the presence or

## APPENDIX I

### Question Number

absence of reserves that could help in times of trouble. It is often impossible to rate economic status based on monetary income and reserves alone, since many subjects are receiving supplements to their income in the form of such things as meals and housing provided by their families, or are living in subsidized public housing or receiving food stamps or regular meals from a federal program. The adequacy of income, for purposes of rating, therefore, should incorporate these supplements.

The interviewer is reminded that if the subject does not fit one of the categories described, the overall meaning of the numbered ratings should be used.

99. The term *psychiatric symptoms* refers not only to psychotic symptoms, but also to depression, hypochondriasis, etc.
100. The term *disability* refers here to any deficit such as a missing limb, paralysis, a nonfunctioning internal organ, etc. In some cases these disabilities have been compensated for so well that they no longer present a physical problem or require treatment. In other cases the disability either alone or in combination with illness is disabling or requires treatment. The scale attempts to describe varying degrees of physical impairment. Again, when in doubt revert to the overall descriptions.

SERVICE DEFINITIONS

In our study we identified and created variables for 28 services as defined by the Duke University Center for the Study of Aging and Human Development. To help the user understand these services as they appear in the data base, we have provided the following definitions. Each service definition gives the purpose of the service, the activity involved, relevant personnel, unit of measure and most include an example. The service definitions are reprinted from Appendix V of our prior report. "The Well-Being of Older People In Cleveland, Ohio", HRD-77-70, April 19, 1977. Service information is contained in certain questionnaire items (primarily 1.215 through 1.293 and 2.215 through 2.293), service items 1.342 through 1.369 and 2.342 through 2.369) and cost items (3.001 through 3.133).

DEFINITIONS OF SERVICES1. ADMINISTRATIVE, LEGAL, AND PROTECTIVE

Purpose: To aid and assist an individual in dealing with administrative affairs.

Activity: To act as intermediary, advisor, or guardian for the individual in his dealings with agencies, businesses, landlords, etc.; aiding with business affairs, e.g., paying bills.

Relevant  
Personnel: Lawyer, social worker, guardian, institutional personnel, consumer advocate, family member.

Unit of  
Measure: Incidents.

2. CHECKING

Purpose: To monitor an individual periodically to make sure he has not become ill and unable to get help.

Activity: Establishing regular phone or personal contact (at least five times per week) with an individual.

Relevant  
Personnel: Agency worker, institutional personnel, family member.

Unit of  
Measure: Contacts (telephone or personal).

Examples: Agency or volunteer program which maintains lists of subscribers who are contacted regularly; family or friends who either live with the individual or who regularly check on him; service provider who sees the individual at least five times a week. A specific example is "telephone reassurance." Contacts may be initiated by the elderly person or the service provider.

3. CONTINUOUS SUPERVISION

Purpose: To supervise an individual who cannot be left alone.

Activity: Monitoring an individual's activities to assure his safety and well-being and to be available to readily respond to his immediate needs and emergency situation.

Relevant Personnel: Family member, institutional personnel, paid companion, attendant.

Examples: Constantly supervising a person with severe memory loss and confusion either in his own home or an institution.  
Day Care for Adults should be included in this category.

Unit of Measure: Day (count fractional part of day as 1 day).

4. COORDINATION, INFORMATION, AND REFERRAL

Purpose: To insure that an individual receives an integrated set of services appropriate to his situation.

Activity: Designing an appropriate service program, providing information about available sources of help, making referrals to other agencies or professionals including aiding with appointments, coordinating, implementing, and monitoring the entire treatment program.

Relevant Personnel: Social worker, health professional, allied health personnel, family member.

Unit of Measure: Number of above activities which occurred on behalf of a client.

5. EDUCATIONAL SERVICES, EMPLOYMENT RELATED

Purpose: To develop or improve occupational skills in order to make the individual more readily employable.

Activity: Formal courses or instruction planned to develop occupational skills either in a preparatory or remedial manner.

Relevant Personnel: Teacher, instructor, or training supervisors in educational, business, or industrial settings.

Unit of Measure: Training session hours.

Examples: Shorthand and typing courses in preparation for secretarial career, professional schools (e.g., dental and law), beautician's college, training courses for older service workers, on the job training, apprenticeship programs.

6. EDUCATIONAL SERVICES, NOT EMPLOYMENT RELATED

Purpose: To increase knowledge or skills for personal enrichment. The purpose of the educational services provided under this category is not to make a person more readily employable.

Activity: Structured and prescheduled courses or instruction.

Relevant Personnel: Professors, instructors, and teachers who are experts in their field, acknowledged by training or expertise.

Unit of Measure: Training session hours.

7. EMPLOYMENT

Purpose: To provide assistance in finding employment.

Activity: Aiding an individual in finding employment by counseling and/or by referring the job applicant to businesses and agencies seeking employees.

Relevant Personnel: Employment counselor, social worker, guidance counselor, family member.

Unit of Measure: Number of times such assistance was provided.

8. ESCORT

Purpose: To enable an elderly individual's use of public or private transportation (buses, taxis and cars) and/or help him/her accomplish the purposes of the trips (e.g., grocery shopping and medical appointments).

Activity: Accompanying an individual or group.

Relevant Personnel: Service provider staff or assigned volunteer.

Unit of Measure: One-way trips.

9. FINANCIAL ASSISTANCE

Purpose: To insure an individual has sufficient income to maintain an adequate standard of living.

## Classes of Financial Assistance:

- a. UNDESIGNATED: Money provided to be used entirely at the discretion of the individual.

--Unit of Measure: Dollars.

--Examples: Supplemental Security  
Income Welfare payments,  
Aid for Dependent  
Children, financial  
assistance from family  
members, financial aid  
from private organiza-  
tions or churches,  
charity.

- b. DESIGNATED: Money or subsidies provided for specific uses.

--Unit of Measure: Dollars or dollar  
equivalent of  
designated aid.

--Examples: Food stamps, Medicaid,  
public housing rent  
subsidies.

10. FOOD, GROCERIES

Purpose: To provide the raw materials for meal preparation.

Materials: Groceries, such as canned goods, produce, meat, and dairy products.

Unit of Measure: Dollars.

Examples: Groceries purchased by or for an individual for his own use; food provided for an individual by his family, e.g., weekly groceries given to aged person by his adult children; food provided by an institution for one of its residents, e.g., the food a patient eats while in a hospital.

11. HOMEMAKER-HOUSEHOLD

Purpose: To regularly aid in the performance of necessary homemaker and household activities.

Activity: General household work, including cleaning, laundry, shopping for food and clothing, and minor home maintenance and repairs. Home chore services should be included in this category. (Note: This does not include things for which one would ordinarily hire a specialist, e.g., plumber, house painter, or gardener.)

Relevant Personnel: Homemaker, housekeeper, attendant, family member.

Unit of Measure: Visit.

12. HOUSING REPAIR AND RENOVATION

Purpose: To enable elderly persons, through financial assistance and otherwise, to repair and renovate their homes so that their homes will meet minimum housing standards. Also, to adapt existing housing or construction of new housing to meet the needs of elderly persons suffering from physical disabilities.

Activity: Arranging for major electrical, plumbing, carpentry, heating, and similar repairs and renovations.

Relevant Personnel: Contractors and/or individuals (union or nonunion) having skills needed to perform major housing repairs and renovations.

Unit of Measure: Jobs and total cost.

13. LIVING QUARTERS

Purpose: To provide a habitable place to live.

Materials: Room, bed, other furnishings, toilet.

Unit of Measure: Number of nights.

Examples: Room, apartment, or other living quarters provided by an individual for his own use; room, etc., provided for an individual by his family, e.g., an aged person living with married daughter and her family in their home; room, etc., provided by an institution for a resident, e.g., room in a rehabilitation center.

14. MEAL PREPARATION

Purpose: To regularly prepare meals for an individual.

Activity: Meal planning, food preparation, and cooking.

Relevant Personnel: Cook, homemaker, family member.

Unit of Measure: Meals.

Examples: Meals provided under 42 U.S.C. 3045 (supp. V, 1975), the Older Americans Act, meals-on-wheels programs.

15. MEDICAL

Purpose: To maintain and/or improve an individual's physical health.

Activity: Medical history taking and performance of physical examinations; evaluation, treatment and monitoring of acute and chronic illnesses.

Relevant Personnel: Physician, physician's assistant, nurse practitioner.

Unit of Measure: Number of visits.  
DRUGS: Dollars.  
PROCEDURES: Dollars.

Examples: Annual physical health checkups, prescribing medical treatment or regimen, surgical procedures, radiation therapy, special diagnostic procedures--e.g., gastrointestinal series, lumbar puncture.

16. MENTAL HEALTH

Purpose: To identify and evaluate mental impairments which relate to both intra- and interpersonal relationships, including individual, marital, familial, and environmentally related problems; to provide counseling and/or therapy in order to aid the individual to resolve these problems or to cope with them.

Activity: Mental health evaluation, diagnosis and treatment.

Relevant Personnel: Psychiatrist, social worker, psychologist, nurse; educational, rehabilitation, and pastoral counselors.

Unit of Measure: Sessions.

Examples: Psychotherapy (individual or group), counseling, crisis intervention, evaluation of need for psychiatric hospitalization.

17. NURSING CARE

Purpose: To coordinate, implement, and monitor the plan of care prescribed by health care professional.

Activity: Administration and/or monitoring of prescribed medication or treatment regimens; health counseling; communication with primary clinician and other health team personnel.

Relevant Personnel: Registered Nurse, Licensed Practical Nurse, attendant, family member.

Unit of Measure: Visit.

Examples: Administration of oral medications, intramuscular or intravenous therapy, catheter care, dressings, taking blood pressure.

18. OUTREACH

**Purpose:** To contact and inform elderly persons with unmet service needs, particularly the isolated, of programs that coordinate or provide services and to facilitate their appropriate use.

**Activity:** Canvassing neighborhoods or obtaining names of isolated persons or others likely to need services and contacting them in person or by telephone to describe available services and encourage participation.

**Relevant Personnel:** Social worker, outreach worker or other staff having a good understanding of the range of community resources available to older persons and sensitive to potential needs of persons.

**Unit of Measure:** A "yes" or "no" answer is sufficient. "Yes" would indicate that the needs of the individual were identified via an outreach service; "No" would indicate the contrary.

19. PERSONAL CARE

**Purpose:** To aid an individual in performing the personal physical activities of daily living.

**Activity:** Aiding an individual with bathing, dressing, grooming, feeding, and toilet care.

**Relevant Personnel:** Licensed Practical Nurse, attendant, volunteer, family member.

**Unit of Measure:** Visit.

**Example:** Home health aide services.

## APPENDIX II

### 20. PHYSICAL THERAPY

**Purpose:** To assist an individual in achieving partial or total use of some portion of the body which is not functioning normally.

**Activity:** A planned set of physical exercises and/or massages and treatments.

**Relevant Personnel:** Physical therapist, individual (either professional or non-professional) who has been trained to administer and follow a set of prescribed exercises, e.g., attendant, nurse, family member.

**Unit of Measure:** Sessions.

### 21. PSYCHOTROPIC DRUGS

**Purpose:** To improve the mood and/or psychological function of an individual who is symptomatic, manifesting anxiety, depression, thought disturbances, or physical symptoms with psychological overlay.

**Activity:** Evaluation of need for psychotropic drugs; prescribing and/or dispensing of psychotropic drugs.

**Relevant Personnel:** Any physician.

**Unit of Measure:** Quantity and type.

**Examples:** Valium, Librium, Thorazine, Mellaril, Stelazine, Elavil, Triavil, Tofranil, Miltown, Equanil, Haldol.

22. RELOCATION AND PLACEMENT

Purpose: To help an individual locate and secure a new place to live.

Activity: Locating available and suitable places to live and assisting in contracting for a new place to live, including institutional placements.

Relevant Personnel: Social worker, case worker, housing authority personnel, family member.

Unit of Measure: Moves.

Example: Foster Care for Adults.

23. REMEDIAL TRAINING

(This does not include physical therapy.)

Purpose: To improve the capabilities of an individual who is unable to perform some basic personal or instrumental functions because of trauma, illness, deprivation, or other impairment.

Activity: An organized course of instruction or training including the development of personal skills necessary for self-maintenance or for further learning.

Relevant Personnel: Speech therapist, specialized educational personnel, attendant, family member.

Unit of Measure: Sessions.

Examples: Speech therapy, remedial reading or literacy course, reality orientation, training in self-care for the mentally or physically impaired, training for the blind.

24. SHELTERED EMPLOYMENT

Purpose: To provide employment for people who because of physical or mental impairment cannot find a job in the competitive labor market.

Activity: Providing a setting, supervision, materials, and/or equipment necessary to allow handicapped or impaired people to work.

Relevant Personnel: Workshop supervisor, rehabilitation counselor, special education personnel.

Unit of Measure: Hours of employment.

Examples: Goodwill Industries, Industries for the Blind

25. SOCIAL/RECREATIONAL SERVICES

**Purpose:** To increase the quality and quantity of an individual's social interactions; to foster skills in making creative use of non-work time including artistic and intellectual development.

**Activity:** Social interaction, planned and organized activities (either individual or group) to provide creative expression, physical, mental, and intellectual development, or community involvement.

**Relevant Personnel:** Social worker, activity therapist, volunteer coordinator, social club personnel, recreation worker, occupational therapist, educational personnel, crafts teacher.

**Unit of Measure:** Session.

**Examples:** Social clubs, recreation groups, church groups, hobby groups, special interest groups, volunteer projects, adult education classes, craft courses, speed reading, painting, crafts, and hobbies. Friendly visiting and drop-in (client initiated visit to a designated center where the individual is received by staff who express continued interest in client's welfare) are service elements included under social/recreational services.

26. SUPPORTIVE DEVICES AND PROSTHESES

Purpose: To compensate for physical disability that interferes with an individual's independent functioning, or to cosmetically correct physical deformity.

Activity: To supply and/or fit the appropriate device.

Relevant Personnel: Orthopedist, prosthetist, brace fitter, corsetiere (breast prostheses), other personnel involved in the creating and fitting of devices.

Unit of Measure: Dollars.

Examples: Walker, wheelchair, leg brace, artificial limb, hearing aid, kidney dialysis machine, facial prostheses.

27. SYSTEMATIC MULTIDIMENSIONAL EVALUATION

Purpose: To systematically evaluate an individual's overall condition.

Activity: The systematic evaluation of an individual's overall functional state, including his physical and mental health, his social and economic resources, and his capacity for self-care.

Relevant Personnel: A multidisciplinary team or group; individuals specially trained in multidimensional assessment such as a specially trained social worker, nurse, psychiatrist, or family practitioner.

Unit of Measure: Number of hours spent in evaluation.

Examples: Evaluation of a person by a multi-service center; complete medical, psychiatric, and social workup of a new patient in a group medical practice.

28. TRANSPORTATION

Purpose: To provide access (outside of walking distance) to the community, e.g., to service providers, businesses, friends, leisure activities, and special events.

Activity: Transporting an individual from one place to another.

Relevant  
Personnel: Project staff and/or community volunteer drivers.

Unit of  
Measure: One-way trips.

Examples: Dial-a-bus.

SOCIAL PLANNING AREAS  
IN CLEVELAND, OHIO

The following descriptions of the social planning areas in the City of Cleveland are excerpts from the publication "Area Facts", Federation for Community Planning, Cleveland, Ohio, April 1978. The descriptions provide the general demographic characteristics of the areas from which we drew our sample of older people. The social planning area in which an individual in our sample lived can be identified by using item number 1.340 or 2.340 for phase 1 and phase 2 respectively. The sources of data, definitions and rate bases used in compiling the information are also included in this section.

SOURCES OF DATA

All data under the following major headings were compiled from the Census Bureau publication, "Census of Population and Housing: 1979, Cleveland, Ohio Standard Metropolitan Statistical Area, Final Report (PHC(1)-45".

Population Characteristics, 1970

Labor Force Characteristics, 1979

Household Characteristics, 1970

Family Income, 1969

Housing Characteristics, 1970

APPENDIX III

Sources for the remaining items were as follows:  
Public Financial Assistance, 1976: Cuyahoga County Welfare Department; Juvenile Delinquency, 1976: Cuyahoga County Juvenile Court; Major Adult Crimes, 1975: Department of Safety, City of Cleveland; Births and Deaths, 1975: City of Cleveland Division of Health.

### DEFINITIONS

Age: The age at last birthday.

Non-White Population: Includes all who indicated their race as Black or Negro, West Indian, American Indian, Chinese, Japanese, or as of other than Indo-European stock; excludes all who indicated race as White, Mexican, Puerto Rican or as of Indo-European stock.

Native and Foreign Stock: Native Stock refers to persons native born of native parents, i.e., in the United States, Puerto Rico. Foreign Stock includes those either foreign born of foreign parentage, or native born with one native born parent.

School Years Completed: Refers to full years of school completed.

Civilian Labor Force: Consists of all persons 16 years and over who at the time of the Census were at work, not working but with a job, or looking for or available to accept a job. Members of the Armed Forces on active duty are excluded.

Unemployed: Those in the civilian labor force who were without a job and looking for work or available to accept a job.

Household: A household is any group of persons who together occupy a room or rooms which constitute a housing unit. A housing unit is a house, an apartment, a group of rooms or single room occupied or intended for occupancy as separate living quarters. Occupants may include any group of related or unrelated persons who share living arrangements. Institution inmates and other groups of five or more persons unrelated to the household head are counted as occupying group quarters and not as persons in households.

Household Occupants: In each household, one person who is so regarded by the members of the household is designated the head of the household; but, if a married woman living with her husband is so regarded, the husband still is designated the head of the household. A head of a family is a head of the household who is living with one or more persons to whom he or she is related by blood, marriage or adoption. A primary individual is a head of a household living alone or with persons to whom he or she is not related. A wife of a head of the household is a woman who is married to and living with a head of a household, including a woman in common-law marriage. Other relatives of heads of households are other persons related to the head of a household by blood, marriage, or adoption.

Change in Residence: SRTSA refers to the Standard Metropolitan Statistical Area consisting of Cuyahoga, Lake, Geauga, and Medina Counties. A change of residence occurred when a person was occupying on April 1, 1970 a different usual place of residence than he or she occupied on April 1, 1965.

Family: A family consists of a head of a household and one or more other persons related by blood, marriage or adoption, living in the same household. Family Income

III-2  
587

## APPENDIX III

Is the total gross income received during 1969 by all members 14 years of age or over from salaries and wages, self-employment, Social Security and other retirement programs, interest on savings, public assistance and the like. Not included are money income from the non-business sale of property, money value of income in kind, bank withdrawals, gifts and inheritances, insurance payments, and the like. Median family income is that dollar value which is exceeded by the family incomes of one-half of all families, and below which the family incomes of one-half of all families lie. Poverty level is that established by the Federal Government in 1969 which takes into account family size, age of head, and urban or rural residence. It is not specific to Cleveland and for a four-member non-farm family in 1969 was \$3,743.

Housing Characteristics: For definition of Housing Unit, see Household, above. All other terms here are self-explanatory. For more detailed definitions of these and all other terms used here, refer to the Census Final Report PHC(1)-45 previously mentioned.

## RATE BASES

When working with rates presented in the Area data sheets--especially in making comparisons with apparently similar rates from other sources--a knowledge of the particular population base upon which each rate is constructed upon the same bases are they fully comparable.

Aid for Dependent Children. The monthly average number of AFDC-R cases receiving payment in 1976 per 1,000 occupied family units in 1976. AFDC-U rate has the same base and may be directly added to the AFDC-R rate to obtain total rate.

General Relief. Same base as AFDC-R and AFDC-U rates above. May be directly added to both of these to obtain a total economic dependency rate for the non-aged.

Major Adult Crime. Number of complaints filed in 1975 per 1,000 persons age 18 and older in 1970.

Live Births. The number of resident live births in 1975 per 1,000 total population in 1970.

Illegitimate Births. The number of illegitimate births in 1975 per 100 resident live births in 1975.

Illegitimate Teenage Births. The number of illegitimate teenage births in 1975 per 100 total illegitimate births in 1975.

Infant Mortality. The number of infant deaths in 1975 per 1,000 resident live births in 1975.

Total Deaths. The number of deaths in 1975 per 1,000 total population in 1970.

Suicides. The number of suicides in 1975 per 1,000 total population in 1970.

Homicides. The number of homicides in 1975 per 1,000 total population in 1970.
