DATA BASE: T-100 – International Segment Data – **DB28IS**

FILE DESCRIPTION: File contains ASCII, comma delimited separated data reported by US and foreign air carriers operating non-stop between airports where at least one airport is located outside the boundaries of the United States or its territories. Non-US (foreign) air carriers are required to report all non-stop segments where at least one point is in a US state or territory. These data fields contain information by aircraft type and service class for departures performed, available capacity and seats, passengers transported, freight and mail transported, scheduled departures, and aircraft hours ramp-to-ramp and airborne.

For additional information concerning this data set, write to OAI at the address below.

NOTES - DB28IS - International Segment Data:

A. Airport Alpha Code:

The three letter code identifying the airport. This code is used in all of the major airline reservation systems and is recognized by the International Air Transport Association (IATA).

B. Airport Numeric Code:

A five-digit code which corresponds to the alphabetic name spelling of the principal city served by the airport. Airports that share service at a particular city will therefore have identical numeric codes. The number is used primarily for sorting records by city name and for grouping multiple airports within a city.

C. World Area Code:

A three-digit code which specifies in what area of the world a city is located. The first digit represents a major geographic area, such a "0" for the United States, "4" for Europe, etc. The last two digits represent a specific subdivision of the major geographic area, such as a state or a country. Contact the Office of Airline Information at the address listed on the cover for a complete list of these area codes.

D. City Name:

The name of the principal city served by this airport.

E. Carrier Alpha Code:

The 2 or 3-character code used to represent the carrier reporting these data to the DOT.

**F. Carrier Entity Code:**

A five-character code assigned to each air carrier that is used primarily for DOT reporting purposes. It is used to separate the Domestic, Atlantic, Latin America, and Pacific operations of each air carrier. For Non-US air carriers, the code is used to identify the country of origin of the air carrier. Contact the Office of Airline Information at the address listed on the cover for a complete list of carrier entity codes.

**G. Carrier Group Code:**

This numeric code classifies the US air carriers by the amount of total operating revenue for the previous year unless the carrier is a domestic ONLY all-cargo. Domestic ONLY All-Cargo carriers are assigned the Carrier Group Code 8.

When the DB28's are generated, the Carrier Group Codes are ...

- International Carriers - 0
- Regional Carriers - 1 (Includes Large, Medium, Commuter, Small Certificated)
- National Carriers - 2
- Major Carriers - 3
- Domestic Only All Cargo Carriers - 8

**H. Distance:**

The great circle distance in statute miles between the Origin and Destination airports.

I. Service Class:

The Service Class Code refers to the class of service used:

- F Scheduled Passenger/Cargo Service
- G Scheduled All Cargo Service
- L Non-Scheduled Civilian Passenger Service
- P Non-Scheduled Civilian All Cargo Service

J. Aircraft Type:

Type of aircraft used on the non-stop segment.

1. Aircraft Group Code. This code indicates the general category of aircraft type reported.
2. Aircraft Type Code. This code identifies the specific make and model of the aircraft.
3. Cabin Configuration Code. Passenger = "1" , Cargo = "2" , Combination Passenger/Cargo = "3".

K. Departures:

Revenue Aircraft Departures:

1. The number of revenue aircraft **departures performed** in revenue scheduled service, including extra sections.
2. The number of aircraft **departures scheduled**, whether or not actually performed. This field is not applicable for foreign air carriers, and contains a value of zero.

L. Available Capacity:

1. **Available Capacity-Payload** reflects the total available capacity for passenger, freight, and mail applicable to the aircraft with which this flight is performed.
2. **Available Seats** reflect the actual number of seats for sale, excluding those blocked for safety and operational reasons.

M. Cabin Identification:

All data are consolidated into First Cabin for Foreign carriers. Middle and Coach Cabin fields will each contain a value of zero.

N. Mail:

Foreign carriers do not report transported mail. This field will contain a value of zero for those carriers.

O. Elapsed Time:

The total elapsed time computed in minutes:

1. **Ramp-to-Ramp** time is the total elapsed time computed from the moment the aircraft moves under its own power until it comes to rest at the next point of landing.
2. **Airborne time** is the elapsed time computed from the moment the aircraft leaves the ground until it touches down at the next point of landing.

ACCOUNTING AND REPORTING DIRECTIVE

No. 249 Issue Date: 12-1-00 Effective Date: 1-1-2001  
Part: 241  
Section: 04  
Subsection: N.A.  
Paragraph: (b)

AIR CARRIER GROUPINGS

This Accounting and Reporting Directive updates the reporting groups for filing the Form 41 report during calendar year 2001. Section 04 of Part 241 of the Department's Economic Regulations allows an air carrier to petition for reconsideration of its assigned carrier grouping. American Trans Air requested that the Department review its revenue level for the 12-month period ended June 30, 2000. From this review, we decided to update the carrier groupings as follows:

AIR CARRIER	NEW REPORTING GROUP
Casino Express	Group I Over \$20 Million
Champion Air	Group II
Expressnet	Group I Under \$20 Million
Falcon Air	Group I Over \$20 Million
Reliant	Group I Over \$20 Million
Zantop	Group I Over \$20 Million

Carriers are grouped according to the operating revenue boundaries contained in Section 04 of Part 241. The current reporting levels are:

Group III	Over \$1 billion
Group II	Over \$100 million to \$1 billion
Group I	\$100 million and under
Subgroups	
Group I	\$20 million to \$100 million
Group I	Under \$20 million

Changes in the reporting groups will become effective January 1, 2001. Any questions regarding the groupings should be directed to Mr. Bernie Stankus on (202) 366-4387.

## WORLD AREA CODES

This document contains the numeric "World Area Codes" used to identify geopolitical areas such as countries, states (U.S.), provinces (Canada), and territories or possessions of certain countries. The codes are used within the various data banks maintained by the Office of Airline Information (OAI) and are created by OAI. Also included is the 2 letter ISO Country Code (or state/province code for US/Canada) for each listing. This document will be updated and reissued on a yearly basis unless no changes occur. DOT users may access ROSCOE member "LL.WAC" to display any interim changes.

For further information, or to request that your name be added to the distribution list, contact Sami Parbhoo by telephone: 202-366-4393 or e-mail: [sami.parbhoo@bts.gov](mailto:sami.parbhoo@bts.gov).
