## Introduction

### **Agency Background Information**

The Civil Aeronautics Board (CAB) was established within the Department of Commerce under Reorganization Plans 3 and 4 of 1940, effective June 30, 1940. The Board was made an independent agency by the Federal Aviation Act of 1958 (72 Stat. 731), effective January 1, 1959.

The CAB was given responsibility for regulating economic aspects of air carrier operations, promulgating safety standards, investigating accidents, and promoting international air transportation. The CAB authorized domestic air carriers to engage in interstate and foreign transportation and regulates the operations of foreign air carriers in the United States. It had jurisdiction over subsidies paid air carriers and over tariffs, rates, and fares charged for air transportation and for carrying the mail. The CAB, which regulated the accounting procedures of air carriers and their financial and business relationships, required the carriers to file regular financial and operating reports and made that data available to other Government agencies and the public.

The Civil Aeronautics Board (CAB) ceased to exist (sunsetting) on December 31, 1984. Beginning on January 1, 1985, air carrier reports were handled by the Department of Transportation (DOT), Research and Special Programs Administration (RSPA), Office of Aviation Information Management.

### **National Archives (NA) Background Information**

At one time the National Archives operated a depository for non-archival machine-readable records of high current interest, which have been made, received, or acquired by Federal agencies. Under the terms of inter-agency agreements of September 9, 1977, January 2, 1979, November 14, 1979, and March 25, 1982, CAB transferred copies of many of its machine-readable data files to the physical custody of the National Archives. The National Archives offered reference on these data files.

These records were not appraised at the time they were deposited in the National Archives. In 1982 and 1983, these records were scheduled and many appraised as permanent in Jobs NC1-197-82-1 and NC1-197-83-1. In April 1986, RSPA signed Standard Form (SF) 258,

"Request to Transfer, Approval, and Receipt of Records to National Archives of the United States" this action started the process to formalize the change in status of the permanent machine-readable files produced by the CAB which were now under RSPA's jurisdiction. The SF 258 [NN3-197-89-1](Attachment 1) covers the formal transfer of all permanent machine-readable files CAB produced through December 1984. The attachment to the SF 258 lists the files/surveys; Request for Records Disposition Authority (SF 115) citation, source/producer of the file, number of reels, and "permanent" inclusive dates. (See Attachment 2)

## **National Archives Processing Information**

### *Terms*

Accession Number: A National Archives assigned number for agency's permanent records, that are transferred to the legal and physical custody of NARA. (Example: NN3-197-89-1)

Control Number: These numbers are based on the attachment to the SF 258 (Attachment 2). Some series have the same title but the control number and date span will be different. In these instances, this indicates to the user that there was a change in the record layout.

Record Group (RG): A body of organizationally related records established by an archival agency after considering the organization's administrative history and complexity and the volume of its records. The National Archives uses record group numbers to keep track of agency records during and after the scheduling process, including those transferred to Federal records centers and/or the National Archives.

RG197: Records of the Civil Aeronautics Board

RG 467: Records of the Research and Special Programs Administration  
(Transportation)

Series Title: Obtained from information on CAB Master Data File Description or the "survey" title listed on the attachment to the SF 258 covering [NN3-197-89-1].

\*\*\*\*\*  
When the National Archives decided to formally accession the files warranting long-term preservation, validation and preservation work started. Because of the large number of files requiring preservation (677 magnetic tapes), there was a reluctance to approve the SF 258 without some preliminary validation and preservation work. Based on this preliminary work, the Machine-readable Branch (NNXA) decided to approve the SF 258 in June 1989. It was anticipated that NNXA might encounter some problems with a few tapes, but would be able to secure another copy of the file or would be able to document the problems sufficiently to support reference use of the files.

There are numerous data sets covered by accession NN3-197-89-1. If the National Archives was able to successfully copy the data set and if adequate documentation existed and there are no major discrepancies between the data and the documentation then these data sets are included in this documentation package. The documentation package is divided into surveys/series. (Please see Attachment 2) Each survey is assigned a "Control

Number" which is based on the information in the Attachment to the SF 258. Within a series, there may be more than one record layout that applies to the various data sets. If a series/survey has more than one record layout, I assigned different "Control Numbers" e.g., B9a and B9b.

\*\*\*\*\*

\*\*\*\*\*

There are documents that are common to all of the completed series, except for Control Number B12, Data Bank 5. Data Bank 5 documentation package was completed prior to my involvement with this project. Please see a separate documentation package covering Data Bank 5, (1969 Quarter 3, 1969 Quarter 4, and 1970 Quarter 2 - 1985 Quarter 4). The rest of the series will include a cover page, table of contents page, agency record description, technical description and supplemental information page, validation statement, codebook list, codebook(s), and sample computer dump(s). Agency documentation varies from series to series.

*NA Created Documents Include the Following:*

Codebook List: Provides information about the codebooks used during the validation/verification process.

Sample Computer Printouts: One printout for each data file. NARA staff copied the CAB tapes and then produced two NARA created copies. For the most part, the printouts are dumps of some records from the NARA created copies and the printouts are character representation of the bit pattern usually from the first part of each file.

Page 4 (Revised April 16, 2002)

Table of Contents: Provides the control number, list of the documentation and page count for most sections in a series. Under the first National Archives section of the Table of Contents, "Format X" is listed. Please disregard this item, there are no pages for this item in any series. This introduction is another item listed in the Table of Contents; Control Number B7 is the only series that has the page count listed for this item

Technical Description & Supplemental Information Sheet: Provides useful technical information about each series (data set title, data set short title with date coverage, number of logical records, character set and record format). In addition, supplemental information is provided about the inclusive dates of the permanent records. Based on the dates provided on the attachment to the SF 258 (NN3-197-89-1) it would appear that some data sets are missing from this accession; see Control Numbers [A1a, A1b, A1c, A1d, B4, B10, B12, and B19]. During the processing of this accession, all attempts were made to include all the CAB data sets appraised as permanent. If data sets were missing, NARA sought to obtain replacements from RSPA. If NARA had any problems copying all of the records in a data set, an explanation is provided. (See Control Numbers B7 and B11X respectively).

Under ideal circumstances, only permanent records should be included in this accession. There are instances in which data sets outside of "permanent inclusive dates" are included. For example, see Control Number B11X. I determined that if the series existed and NARA was able to make a copy of the data set, then I would included the data in this accession.

NA User Note: Provides information that would be helpful to users of the data. An example is user note "Subject: SAS Frequencies Run on Several Data Elements" Control Number A4.

Validation Statement: Based on a comparison of the data with the available agency documentation, NARA staff validated two records from each data file that NARA had copied. Any discrepancies noted are listed in this document.

### *Anomalies*

1. National Archives staff found a need to create a revised record layout for Denied Boarding (Control Number A4). The National Archives staff created record layout is based on the CAB Record Description.
2. Some records appraised as temporary are included in the documentation package. [Please see Control Numbers B4, B5, B6, B11X, B13, B13X, and B21]
3. Due to a technical problem, the National Archives was not able to successfully copy three data sets listed for Control Number B7. On April 11, 2000, the Archivist of the United States approved the disposal of these data sets.
4. Some series include RSPA data sets (any data set created after December 31, 1984): [Control Numbers B3, B9b, B11, B12, B17, B18, and B20]

5. Domestic Air Freight Investigations / Priority Air Freight Investigations (DAFRI/PRAFRI), Control Number A2 is excluded from this documentation package. During this accessioning process, National Archives staff did not have access to a CAB File Description/record layout for DAFRI/PRAFRI. We did have a copy of a National Archives created record layout "Domestic Air Freight-Priority Air Freight History File" dated December 1979. Unable to obtain a record layout from RSPA, the National Archives record layout was used to validate records in a data set titled DAFRI/PRAFRI. Major discrepancies were encountered during the validation process. Based on information gathered during the validation process, National Archives staff determined that the data set identified as Domestic Air Freight Investigations/ Priority Air Freight Investigations (DAFRI/PRAFRI) July 1976-February 1978, Control Number A2 is not DAFRI/PRAFRI data.

Attachment 1 --- SF 258 [NN3-197-89-1] {one page}

Attachment 2 --- SF 258 [NN3-197-89-1] Attachment {four pages}

Prepared by: P. Dian Palmer, Archivist  
Date: June 7, 2000

## Notes for All CAB Magnetic Tape Files

1. All Civil Aeronautics Board Magnetic tape files are recorded in 9-track, 800BPI mode with odd parity. They are created on IBM equipment under the IBM Disk Operating System.
2. Where labels are referred to as "standard", it means standard as defined by IBM for its System 360 under the Disk Operating System.
3. On File Definition sheets, under "FILE LABEL INFORMATION", the data between apostrophes is the actual file identification which should appear in the TLBL card when processing the file.
4. Fields with no field description entry are considered self - explanatory.
5. All sort sequences shown are in ascending order unless otherwise specified by the notation "(D)" beside a sort field.
6. Record descriptions contain several columns which require coded entries. The following notes contain the codes and meanings for those columns:

a. Column headed "Justified"

| <u>Code</u> | <u>Meaning</u>  |
|-------------|---|
| R           | Data is stored beginning at the rightmost position of the data field and filling to the left. Fill characters occupy any positions at the left which are unfilled by data.  |
| L           | Data is stored beginning at the leftmost position of the data field and filling to the right. Fill characters occupy any positions at the right which are unfilled by data. |
| - (dash)    | One position fields or fields which are always completely filled with data.   |

b. Column headed "Fill Char."

| <u>Code</u>     | <u>Meaning</u>  |
|-----------------|---|
| ␣               | Unused data positions filled with the EBCDIC representation of a space. |
| - (dash)        | Field will always be completely filled with data.                       |
| any other char. | Unused data positions filled with this character.                       |

c. Column headed "Type of Data"

| <u>Code</u> | <u>Meaning</u>                |
|-------------|-------------------------------|
| A           | Data is alphabetic.           |
| N           | Data is numeric.              |
| A/N         | Data is alphanumeric.         |
| 6           | Field always contains blanks. |

d. Column headed "Data Representation"

| <u>Code</u> | <u>Meaning</u>  |
|-------------|---|
| Binary      | Data is coded in pure binary code.  |
| BCD         | Data is coded in binary coded decimal format. (Primarily for files created by the IBM 1401 System). |
| EBCDIC      | Data is coded in extended binary coded decimal interchange code. (An IBM developed code.)           |
| Packed      | Data is coded in packed decimal format.   |

7. For some files, a column may be added to the record description next to either the "Field Name" or the "Description of Data" column. When next to the "Field Name" column it contains an alternate field reference, such as a field number or coded field name as it appears in some common usage of the file (e.g., the Data Division of a COBOL program). When next to the "Description of Data" column it contains a source document item reference, such as a Form 41 account number. This permits easier cross referencing of the record description to the source document.

Passenger Origin and Destination Survey  
Magnetic Tape Historic Data Files

Introductory Notes

1. The Passenger Origin and Destination Survey has undergone three stages of development, each reflecting to a great extent the capabilities and limitations of the hardware and software existing at the Civil Aeronautics Board at a given time. The first version was designed for an IBM 11401 system with very limited memory, and covers the time period from roughly January 1962 through December 1967. The second was developed to take advantage of the increased capabilities of the IBM System 360, but again was limited by a relatively small memory. Files were extensively redesigned both in content and format. Files dated from the first quarter, 1968, through the first quarter, 1972, were created under this version. The third, and present, version has been designed to take advantage of a more powerful model of the IBM System 360 and considerably greater core storage size than was available for the previous version. The file names and contents are essentially the same, but the formats have been changed to accommodate reprogramming in the COBOL language. Files created in the second quarter, 1972, and thenceforth will be created with this version. These notes pertain only to the second and third versions, for which copies of file and record formats are attached.
2. These file and record formats were developed as part of a documentation library for the Civil Aeronautics Board's Data Processing Division. They will become part of a "user manual" that will also contain code/decode tables which may pertain to several of the Board's data files. References are made throughout the record definitions to these tables in another section of the manual. Since documentation for the first quarter, 1968 - first quarter, 1972, O&D files is in the hands of most present users of the files, and since the coding schemes have not changed, present users are instructed to ignore such references and continue to use existing sources for code interpretations, such as printed volumes of the O&D Survey. Examples of such codes are alphabetic city/airport codes, alphabetic carrier codes, and numeric world area codes.
3. In the file descriptions of some variable length record files, fields within the variable portion of the record are included as sort sequence fields. This is accomplished by using sort exits which alter the records to a fixed length, sort on the entire (altered) record length, then restore the records to their original lengths.
4. Some of the O&D files come under regulations restricting their disclosure, and permission must be obtained from the Chief, Statistical Data Division, Bureau of Accounts and Statistics to access that data.

The following files are so restricted:

1. Ticket O&D (Data Bank 1).
2. Directional O&D (International) (Data Bank 2A).
3. Directional O&D (Domestic) (Data Bank 2B).
4. Coupon O&D (International) (Data Bank 3A).
  
5. The Directional O&D (Domestic) file (Data Bank 2B), restricted in the 1968-1972 version of the Survey, has been eliminated as a historic data bank and only the unrestricted version of the file (Data Bank 2C) will be available after the first quarter, 1972. The City Pair Summary (Data Bank 6) has been made a regular recurrent output of the system in the new version instead of an "as required" file as it was under the previous version.
  
6. The Ticket O&D file (Data Bank 1) was originally designed to hold the current quarter's data and data for each of the seven immediately preceding quarters in separate fields. The historic file dated 694Q does contain all indicated data. The file dated 702Q contains data for the first and second quarters of 1970. All subsequent files contain data for only the quarter of the file date. The format has not changed, but the field for the seven immediately preceding quarters contains zeroes.

Data banks 2A, 2B, 2C, 3A, 3B, and 4, dated 694Q, likewise contain data for each of the eight quarters ending with the fourth quarter, 1969. The same files, dated 704Q and 714Q, contain the four quarters of data for their respective years, with the fields for the other four quarters containing zeroes. Thereafter the formats have been revised to include only the most recent four quarters.

Data Bank 5 is an auxiliary file and contains data as of a given date, not for a given time period.

Data Bank 6 always contains data for the quarter of the file date and totals of that data for the twelve months (four quarters) ending with the file date.

7. Numeric codes for the cities or airports in the various routings have been developed to facilitate the machine processing of O&D records. The codes consist of three components as follows:

- (1) City numeric code. A five digit code which corresponds to the alphabetic name spelling of the city. This code is necessary for sorting since the three letter alphabetic codes frequently do not correspond to the name spelling.
- (2) Airport designator. Many large cities have more than one commercial airport associated with them. This one digit code permits differentiation between airports of a multiple airport city.
- (3) World Area code. A three digit code which specifies in what particular area of the world a city is located. The first digit represents a major geographic area, such as "Ø" for the United States, "L" for Europe, etc.; and the last two digits represent a specific subdivision of the major area, such as a state or country.

Files established under the second version of the O&D system (see introductory note 1) contain numeric codes consisting of all three of the above defined codes assembled in the order listed above from left to right as a nine digit number, and stored in packed decimal format in five positions of a record. The low order (rightmost) position of the packed number contains a binary value of 15 (hexadecimal "F") or 12 (hexadecimal "C") in the last half of the position, to show that the city is a normal point in the routing, or the break point of a domestic portion of an international journey; respectively.

Files created under the third version have all three codes stored as separate packed decimal fields.

8. The City/airport nomenclature file (Data Bank 5) is an auxiliary file used to supply geographic name spellings, coordinates, and additional codes to files containing coded city/airport fields. This is done by matching code fields in the data files to corresponding fields in Data Bank 5 and extracting the desired information from other fields. The City/airport nomenclature file is updated quarterly to correspond to the Ticket O&D file (Data Bank 1). It may also be used to analyze data on any O&D historic files other than Data Bank 1, with file dates corresponding to the Data Bank 5 file date, but may be incomplete when applied to any except the current quarter's data. Discrepancies will be very infrequent; however, if it is necessary to analyze completely all four quarters' data, the four associated quarters' files of Data Bank 5 must be used.

9. O&D City Pair Summary (Data Bank 6) is available for only alternate (second and fourth) quarters prior to 1972. Beginning with the second quarter, 1972 it is available for every quarter.

Validation Statement  
Passenger Origin & Destination Survey:  
Directional Detail-Domestic (Crossposted)

According to the information that was available during the validation procedure, we have determined that sixteen data sets of Passenger Origin & Destination Survey: Directional Detail-Domestic (Crossposted) were transferred to the National Archives. All of these data sets have been validated.

The validation procedure involved the manual comparison of the Civil Aeronautics Board (CAB) Master Data File Description with two records from each data set. The results of the validation are as follows:

Do discrepancies occur between the records and the CAB Master Data File Description?

Please note that in each data set there may be blank records and/or records that are blank except for the hexadecimal value "E0", which appears in a few field positions in a record.

- Yes No ..... Record Format
- Yes No ..... Record Length
- Yes No ..... Starting Position
- Yes No ..... Field Length
- Yes No ..... Type of Data
- Yes No ..... Data Representation

Yes No .... During the validation procedure, was all of the essential documentation available in order to validate the codes?

--- For all data sets: For data elements "Base city numeric code" (field #1) and "Reference city numeric code" (field #2) no codebooks were found.

Were there discrepancies noted between the codes in the records and the codes listed in the data file description, codebook, notes, and/or notices?

- Yes No NA ..... Under column "Description of Data"
- Yes No NA ..... On File Description Notes
- Yes No NA ..... In codebooks

--- For 5 data sets (DO&D DOM CP 61A, 642, 643, 644, and 651): For data elements "Base city alpha code" (field #6) and "Reference city alpha code" (field #7) the value "ZZV" does not appear in the codebook.

Yes No NA ..... In memoranda to users of the data

Shannon Smith revised this validation statement on May 20, 1992.  
P.D. Palmer reviewed this validation statement on May 22, 1992.

|               |                                       | Paragraph <u>3b</u>                |

SUBJECT: Carrier Code for British Island Airways, Ltd.

The two-letter carrier code designator "UK" is assigned to British Island Airways, Ltd. This creates a conflict in O & D Survey reporting, since the code "UK" is used to designate an "unknown" carrier in the routing information in the Survey data reported to the Board.

For Survey purposes, you should continue to use the code "UK" to designate an unknown carrier. In respect to British Island Airways, Ltd., you may, at your option, also use the code "UK" to identify that carrier or you may substitute the unofficial code "BS". Both of these latter codes will be acceptable for British Island Airways in our computer editing of your Survey reports. The use of two codes for British Island Airways will have only a minimal effect on the Survey outputs since British Island's traffic volume is quite small and relatively few records in the Survey will be affected.

Sincerely yours,

W. Fletcher Lutz  
Director, Bureau of  
Accounts and Statistics

# WORLD AREA CODES

**Mailing Address:**

Department of Transportation  
Office of Airline Statistics  
Data Administration Division  
400 7th Street, SW  
Washington, DC 20590

Telephone: (202) 366-4373

**FEBRUARY 1991**

FEB. 1991

## INTRODUCTION:

This document contains the numeric "World Area Codes" used to identify geopolitical areas such as, countries, states (U.S.), provinces (Canada), and territories or possessions of certain countries. The codes are used within the various data banks maintained by the Office of Airline Statistics (OAS). This document will be updated and reissued on a yearly basis. Users may also access ROSCOE member "LL.WAC" to display any interim changes.

For further information, or to request that your name be added to the distribution list, contact Vicki Bradford, Room 4125, telephone: 366-4393.

AREA 1 - MIDDLE AMERICA

- 106 - Belize
- 110 - Costa Rica
- 118 - El Salvador
- 127 - Guatemala
- 131 - Honduras
- 148 - Mexico
- 153 - Nicaragua
- 162 - Panama Republic

AREA 2 - CARIBBEAN, BAHAMAS, and BERMUDA

- 202 - Anguilla, BWI-UK
- 204 - Bahamas
- 205 - Barbados
- 206 - Antigua and Barbuda

- 279 - St. Vincent & North Grenadines  
Includes: Union Island, Mustique, Palm Island
- 280 - Trinidad & Tobago
- 281 - Turks & Caicos Islands - UK  
Includes: Providenciales
- 282 - Virgin Islands -UK

---

\*/ A "Constitutional Conference Agreement on Separate Status" was granted to Aruba by the Dutch on January 1, 1986 with a target date of 1996 for its official independence. While it has not yet become "officially independent", it has been given a unique code in recognition of its current status.

WORLD AREA CODES FEB. 1991

AREA 3 - SOUTH AMERICA

- 303 - Argentina
- 312 - Bolivia
- 316 - Brazil
- 324 - Chile
- 327 - Colombia
  - Includes: San Andres Island
- 337 - Ecuador
- 340 - Falkland Islands-UK
- 344 - French Guiana-France
- 350 - Guyana
- 365 - Paraguay
- 368 - Peru
- 379 - Surinam
- 385 - Uruguay
- 388 - Venezuela

WORLD AREA CODES - FEB 1991

AREA 4 - EUROPE

- 401 - Albania
- 402 - Andorra
- 403 - Austria
- 409 - Belgium
- 411 - Bulgaria
- 417 - Czechoslovakia
- 419 - Denmark
- 425 - Finland
- 427 - France
  - Includes: Corsica
- 428 - 1/
- 429 - Germany 1/
- 430 - 1/
- 431 - Gibraltar-UK
- 433 - Greece
- 437 - Hungary
- 439 - Iceland
- 441 - Ireland (Eire)
- 450 - Italy
- 454 - Luxembourg
- 456 - Malta
- 458 - Monaco
- 461 - Netherlands
- 465 - Norway
- 467 - Poland
- 469 - Portugal
  - Includes: Azores, Madeira Islands
- 473 - Romania
- 479 - San Marino
- 482 - Spain
  - Includes: Balearic Islands, Canary Islands
- 484 - Sweden

1/ New Code

2/ Previously WAC 800, 807, 809, 826, 834, 841, 842, and 888.

WORLD AREA CODES FEB. 1991

Retired World Area Codes As of January 1, 1989

The following World Area Codes were previously assigned to the locations named, but have been changed to reflect the "Current World Area Code", effective as indicated.

| <u>Retired World Area Code</u>             | <u>Current World Area Code</u> | <u>Effective Date</u> |
|--|--------------------------------|-----------------------|
| 160 - Panama Canal Zone                    | 162                            | 1/80                  |
| 174 - San Andres Island                    | 327                            | 1/89                  |
| 209 - Carriacou                            | 273                            | 1/83                  |
| 210 - Cayman Brac                          | 233                            | 1/85                  |
| 234 - Grand Turk                           | 281                            | 1/85                  |
| 257 - Mustique                             | 279                            | 1/89                  |
| 261 - Nevis                                | 275                            | 1/85                  |
| 266 - Palm Island                          | 279                            | 1/89                  |
| 267 - Providenciales                       | 281                            | 1/89                  |
| 268 - Puerto Rico                          | 003                            | 1/89                  |
| 274 - Antigua 1/                           | 206                            | 1/84                  |
| 283 - Virgin Islands                       | 004                            | 1/89                  |
| 428 - East Germany                         | 429                            | 10/90                 |
| 430 - Berlin                               | 429                            | 10/90                 |
| 506 - Canary Islands                       | 482                            | 1/89                  |
| 532 - Ifni-Morocco 2/                      | 548                            | 1/89                  |
| 540 - Madeira Islands                      | 469                            | 1/89                  |
| 561 - Principe Island                      | 567                            | 1/77                  |
| 594 - Burkina Faso 3/                      | 593                            | 1/89                  |
| 599 - Zimbabwe 4/                          | 565                            | 1/89                  |
| 667 - Peoples Democratic Republic of Yemen | 694                            | 5/90                  |

- 
- 1/ WAC 206-Barbuda changed to "Antigua & Barbuda" in 1983, but WAC 274 was not dropped until 1984.
- 2/ Ifni-Morocco inadvertently dropped due to typographical transposition of codes with Ivory Coast effective 1/83. Actual consolidation in Master Coordinate File effective 1/89, however.
- 3/ Burkina Faso (formerly Upper Volta) should have retained WAC 593 but was assigned 594 in 1986. Corrected 1/89.
- 4/ Zimbabwe (formerly Rhodesia) should have retained WAC 565 but was assigned WAC 599 in 1981. Corrected 1/89.

## WORLD AREA CODES

FEB. 1991

Retired World Area Codes As of January 1, 1989 (continued)

|   |     |      |
