Dear Dr. Arndt:

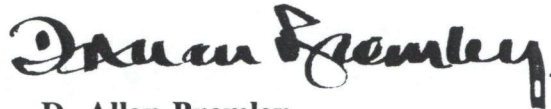

Thank you for your letter of September 11 inviting me to visit Pretoria early next year. I apologize for the much belated response.

I am happy to accept your invitation but must caution you that occasionally I have to cancel engagements at the last moment due to President requests. I sincerely hope that this does not happen.

As the time of my visit approaches, my staff will contact you to work out details for my itinerary.

I am looking forward to meeting with you.

Sincerely yours,

A handwritten signature in dark ink, reading "D. Allan Bromley". The signature is fluid and cursive, with a small horizontal line at the end of the last name.

1992-09-11

Dear Dr Bromley

Following the meeting that Dr Pouris, Head : FRD Advisory Centre for Policy and Evaluation, had with you in Washington recently, and our telephone conversation with Mr Ralf Brescia, I should very much like to take this opportunity to invite you to visit South Africa as the guest of the FRD.

Science and technology policy, together with the issues surrounding it, is very much in the spotlight in South Africa at present. The challenges facing anyone venturing into this field are daunting, bearing in mind the widely ranging viewpoints that need to be addressed and possibly accommodated. Your presence would, clearly, impact very positively in terms of consolidating different efforts and providing a baseline from which to proceed.

From our conversation with Mr Brescia it appears that early next year - I would like to suggest February/March - would be most convenient for you. Once we have established an agreeable time for such a visit we would be happy to arrange an itinerary that will put you in touch with people in your own field of science as well as with major players in science and technology in the RSA. It would also give us great pleasure to show you some of our country's well-known scenic attractions.

I sincerely hope that you can accept our invitation : I am convinced that science and technology activities, including those of our universities, research councils and the private sector, can benefit enormously from your vast experience and insight.

I should appreciate it if you would notify us of your decision as soon as possible.

Yours sincerely

REINHARD R. ARNDT
President

August 10, 1992

Dear Dr. Abrahamson:

Thank you for your letter of July 29 inviting me to address a seminar for scientists and technical specialists scheduled on September 9-11, 1992.

With the understanding that it is always possible that Presidential scheduling may force a change in my plans, I would be delighted to accept your invitation for September 9. I will be out of town on September 10-11. I hope that you might be able to accommodate my schedule. As the time of the seminar approaches, my staff will contact you to work out details for the event.

I am pleased that you thought of me and look forward to the occasion.

Sincerely yours,

A handwritten signature in black ink, appearing to read "D. Allan Bromley". The signature is fluid and cursive, with the first name "D." being small and the last name "Bromley" being larger and more prominent.

Dr. D. Allan Bromley
Assistant to the President for
Science and Technology
Old Executive Office Building, Room 360
17th Street and Pennsylvania Avenue, N.W.
Washington, DC 20500

Dear Dr. Bromley:

The Air Force will host a seminar for its top civilian scientists and technical specialists in Washington, D.C., 9-11 September 1992. These individuals, known as "STs", hold key positions of Senior Research Scientist, Chief Scientist, and Technical Advisor. The seminar is an opportunity for these individuals to meet with senior government leaders in a learning and discussion forum. We anticipate an agenda that emphasizes topics and developments of current interest to the science and technology community. A list of invited participants is attached.

If your schedule permits, we would appreciate your addressing the group for approximately 30 minutes, followed by questions. I will call you to see if your schedule will permit you to participate and to answer questions.

I hope you will be able to join us.

Sincerely,

GEORGE R. ABRAHAMSON
Chief Scientist

WASHINGTON

May 1, 1992

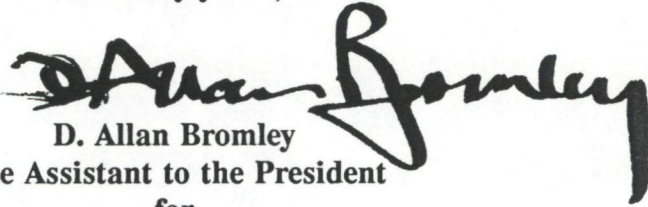

Dear Mr. Allenby:

Many thanks for sending me a copy of the commemorative booklet for Charter Day 1992. I was honored to participate in this event and, of course, both delighted and honored to receive a doctorate honoris causa from your university.

Many thanks for the booklet which I shall keep as a treasured memento of the occasion.

With warmest best wishes,

Sincerely yours,

D. Allan Bromley
The Assistant to the President
for
Science and Technology

Mr. Edward T. Allenby
Vice President
The College of William and Mary in Virginia
Williamsburg, Virginia 23186

March 1992

Dear Friends of the College:

Enclosed is the commemorative booklet for Charter Day 1992 at which D. Allan Bromley, The Assistant to the President of the United States for Science and Technology gave the Charter Day address and received an honorary degree. Sir Cyril A. Clarke, Cambridge-educated physician and former professor of medicine at the University of Liverpool, Hermann A. Grunder, director of the Continuous Electron Beam Accelerator Facility, and Richard H. Peterson, associate administrator for the Office of Aeronautics and Space Technology at NASA also received honorary degrees from the College of William and Mary. I hope that it serves as a special memento of that occasion.

As we look toward the 300th anniversary of the granting of William and Mary's charter next year, each of us at the College is eagerly anticipating the exciting events that will surround that occasion. We are grateful for your interest in our programs, and look forward to your continued involvement as part of the William and Mary family in the future.

Sincerely,

Edward T. Allenby
Vice President

Dear Dr. Aylesworth:

Thank you for your letter of February 1, 1992, regarding your concerns for the future of young scientists and inviting me to meet with the Young Scientists's Network. I apologize for the much belated response.

Because we are concerned about the future of our upcoming scientists, I would have liked to contribute to your organization's efforts to this end. However, my schedule is extremely busy for the next several months and will, I am afraid, become even more so, so I must regretfully decline your invitation.

I appreciate your thinking of me and have passed your letter on to my staff for their consideration.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "D. Allan Bromley". The signature is fluid and cursive, with a large initial "D" and a long, sweeping underline.

Washington, DC 20506

RECEIVED
92 FEB 6 AM 11:51 2-1-92

Dear Dr. Bromley,

MAIL ROOM

My Name is Kevin Aylesworth. I hold a Ph. D. in physics and am the founder of a group called the Young Scientists' Network. As you may recall, we spoke briefly after your address at the April 1991 American Physical Society meeting in Washington, DC. I would like to compliment you on the excellent job you are doing formulating science policy during these trying times.

The purpose of this letter is two-fold. First, I would like to give you a brief update on the employment situation as my generation sees it, and second, I would like to invite you or your representative to attend meetings of the Young Scientists' Network at the APS conferences this March and April.

You will probably not find it very surprising that my colleagues and I don't think that the job prospects for Ph.D.'s in physics have improved in the last year. In fact, the (necessarily) anecdotal evidence that we have been able to gather indicates that the situation continues to worsen. Last year the average number of applications received by physics departments for tenure-track positions was about 300. This year the average seems to be more like 400, with the largest confirmed number of applicants surpassing 800 (at Amherst College). Even though many universities continue to advertise, I suspect that about half will not be funded. The situation for industrial positions appears to be even worse.

It is my hope that you or your emissary will be able to attend one or both meetings of the Young Scientists' Network in order to speak to us and to learn more about our concerns. The meetings will be held on Wednesday, 18 March from 6:00pm - 8:00pm in Indianapolis, IN and on Wednesday, 22 April from 6:00pm - 8:00pm in Washington, DC.

Respectfully yours,

Dr. Kevin Aylesworth
Founder, Young Scientists' Network

THE WHITE HOUSE
WASHINGTON

December 15, 1993

Dear Mr. Abatemarco:

Many thanks for sending me the additional copies of **PS4KIDS** which I have shared with some of my senior colleagues here in the Office of Science and Technology Policy.

Because life at the moment during the transition is extremely hectic I will only give you a few brief comments that result from some discussion concerning these prototype copies.

Our general impression is that this is an excellent start but we have a few concerns. First of all, the issue is extremely densely packed with information and we have the feeling that a great many children will be somewhat saturated by it. Our suggestion would be that you reduce the total content and leave significantly more white space so that there is a less dense format throughout.

Second, on the basis of our exposure to what may not be representative youngsters in the school systems around Washington, we have the feeling that you may have somewhat overestimated the ability of your target audience to assimilate scientific material and that you may find it necessary to assume not only less background but also less intrinsic interest if you are to capture what I understand you have in mind.

Thirdly, we would repeat a suggestion that I made to you during your visit to my office, namely that you feature role models in each of your issues, giving for the selected role model an accessible discussion of how they developed as scientists and the science for which they are famous. We particularly need women and minority group members to attract a group that is woefully underrepresented in American science.

Let me then thank you and your associates for sharing this new and important venture with us. I hope that these few brief comments will be of use to you and we look forward to seeing this new publication once you have officially launched it on the magazine shelves across the Nation.

With all best wishes for a successful launch and a happy holiday season.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "D. Allan Bromley". The signature is fluid and cursive, with the first name "D." being small and the last name "Bromley" being larger and more prominent.

July 16, 1992

Dear Jesse:

This is a much belated thank you for the prepublication copy of the Carnegie Commission Report on Global Climate Change.

Although I only spent a few days in Rio with the President, I have talked at length with Bill Reilly and others who were there for the full two weeks and my conclusion is that the results are substantially better than we had any right to expect. In particular, I think Bill Reilly did an absolutely outstanding job as Head of the U.S. Delegation operating under what were frequently extraordinarily difficult circumstances.

It is now very important that we follow-up on the Rio activities and, unfortunately, I sense a certain letdown feeling on the part of everyone here in Washington which may be inevitable considering all the fuss that preceded Rio.

One of my concerns is that the U.S. media has not done anything vaguely resembling an adequate job of presenting what actually happened and I have contacted Walter Sullivan to suggest that he talk at length with Bill Reilly to try to get some more reasonable reflection of the actual proceedings available to the public.

The proposed meeting that you mention in your cover letter, that would be sponsored by the Academy's Office of International Affairs, to discuss post-Rio activities could be a very useful one and please do keep me informed.

As many times in the past, my congratulations on a continuing excellent output of very useful documents and reports.

With all best wishes,

Sincerely yours,

A handwritten signature in dark ink, appearing to read "Allan", with a stylized flourish at the end.

Dear Allan,

Enclosed is the approved final version of a new Carnegie Commission report that you might want to take as airplane reading for Rio. The report addresses possible next steps for bringing to fruition initiatives such as the Inter-American Institute for Global Change Research and the "START" network. In particular, it proposes the formation of an international consultative group of sponsors of environmental research as related to development. The new acronym is "CGREEN."

The report also addresses how assessment processes such as the IPCC might be handled on a regular basis. For this purpose, the report considers both the strengthening of international organizations such as ICSU and the more effective international networking of national organizations such as OSTP, OTA, and the NRC.

Tom Malone and I took the lead in preparing this report. Tom and I and our colleagues in the Commission look forward to discussing it with you. Printed reports will be distributed around the end of June.

We have tentatively agreed with the Academy's Office of International Affairs to host a discussion in the latter part of July on how the U.S. scientific community should follow up on the Rio meetings. Your participation is obviously essential, and we will consult with you about date, agenda, and so forth.

Best of luck in Brazil. We hope you find this report helpful. Prepublication copies are also being shared with State (OES), NSF, EPA, and NOAA.

Sincerely,

Jesse H. Ausubel
Director of Studies

March 26

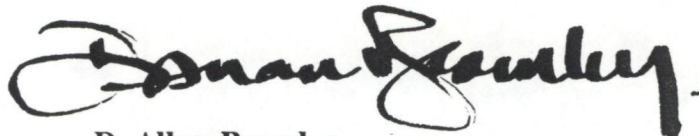

Dear Mr. Allen:

Sam Skinner passed your letter along to me, since I am President Bush's Assistant for Science and Technology. We in this office, and throughout the Administration, have followed Dr. MacCready's accomplishments with interest, admiration, and a certain sense of shared pride. As you note in your letter, his achievements have been remarkable, and I am sure that his prolific energy and inventiveness will lead to many more advances.

President Bush does confer special recognition on this country's scientists and engineers, including the National Medals of Science and Technology, the highest honor that this Nation can pay to its researchers and inventors. If you wish to receive an application that you can use to nominate Dr. MacCready for the National Medal of Technology, you can write to Paul Braden, Manager, National Medal of Technology, Technology Administration, U.S. Department of Commerce, Room 4418, Washington, D.C. 20230 or call 202-377-5572.

Thank you for writing to us.

Sincerely yours,

Dear George:

I am forwarding herewith a preliminary report on a study carried out by an OSTP consultant, Mr. Willis Shapley, now retired after extensive experience at OMB/BOB and AAAS.

I asked Mr. Shapley, as in the past two years, to examine the FY 1993 appropriations in order to obtain a measure of the amount and kind of earmarks as well as how these have changed in recent years.

It bears emphasis that this report is still in a preliminary state and that reasonable persons might well differ over definitions and identification of specific earmarks. However, the same criteria have been used for all three years during which Mr. Shapley has carried out this analysis so that the trends are clear and credible.

As the table on page 2 of the summary shows, while academic earmarks have remained reasonably stable, nonacademic ones have increased rapidly so that there has been a dramatic increase in the total resources earmarked.

I am sending you this preliminary report because I thought that you would find the results both interesting and distressing.

Sincerely yours,

D. Allan Bromley

Dear Richard:

Many thanks for sending me the copy of **Drexel University: A Century of Growth and Challenge** which is indeed a marvelous photographic essay regarding your university.

I have been remiss in not writing to you earlier to again express my deep appreciation of the honor that you have done me in the award of a Drexel degree. I thoroughly enjoyed the time I spent on your campus and the opportunity that it provided to meet not only some old friends but a number of new ones as well.

I was much impressed by your local educational activities in the K-12 range as well as by what you have underway in your university itself.

Again my thanks and congratulations. You will understand that these weeks are more than a little chaotic as we prepare to hand over the affairs of the government to the Clinton-Gore team.

With all best wishes,

Sincerely yours,

A handwritten signature in dark ink, appearing to read "D. Allan Bromley".

November 24, 1992

Dear Mr. President:

Please accept my resignation as your Assistant for Science and Technology and as Director of your Office of Science and Technology Policy effective January 20, 1993.

It has been a rare privilege to serve in your Administration. Given your continuing strong support it has been possible to make a number of important changes in the effectiveness with which science and technology are utilized in support of economic competitiveness and job creation as well as that with which available funding has been invested in strengthening our entire science and technology enterprise.

No President in memory has been more sensitive to the importance of science and technology or more prepared to support them as an investment in the Nation's future.

It is my intention to return to Yale, as the Henry Ford II Professor of the Sciences, at the end of my Washington service.

May I then thank you for the wonderful opportunity that you have given me to serve in your Administration. You have not yet received anything like appropriate credit for your remarkable accomplishments during the past four years -- accomplishments that have changed the face of world civilization -- but I am sure that history will be more than generous in its recognition of them.

Let me finally wish you and Mrs. Bush a very long, happy and rewarding future with every success and satisfaction in all that you do.

Sincerely yours,

A handwritten signature in dark ink, reading "D. Allan Bromley". The signature is written in a cursive, flowing style with a large, prominent "D" and "B".

D. Allan Bromley

November 13, 1992

Dear Jim:

Many thanks for your letter of October 16 and also for stimulating Ed Sands at Calvert-Woodley to send me a very cordial note and a copy of his catalogue.

Unfortunately, I had not discovered this marvelous enterprise earlier in my Washington stay but I will certainly take advantage of it before I depart this scene some time in January. It is not yet clear what exactly I will be doing after that time but this has been a fascinating four years and I feel that my colleagues and I in the Office of Science and Technology Policy have been able to accomplish some good things.

Unfortunately, President Bush received essentially no credit for all the remarkable things that he accomplished during his administration and I am convinced that the public simply decided on a change. I can only hope that they are satisfied with what they have obtained.

With respect to science and technology, Mr. Clinton and Mr. Gore have both indicated that they do not anticipate any significant changes in the structure that I have assembled in my office and the few names that I have heard under discussion as potential successors are individuals for whom I have deep respect. For these reasons I am reasonably optimistic that the changes that we have been to make will not disappear with us.

Your wine is really magnificent and I congratulate you on it. I also really must apologize for not getting back to you sooner concerning the superb quality of the samples that you provided to me at the Bohemian Grove but I hope that you will understand that these past several months have been absolutely chaotic.

Please give my warmest best wishes to Jane. I will let you know once I decide what comes next and will look forward to seeing both of you at the earliest opportunity.

Again, my warmest thanks.

Sincerely yours,

A handwritten signature in dark ink, appearing to read 'D. Allan Bromley', with a long, sweeping horizontal line extending to the right.

October 16, 1992

The Hon. D. Allan Bromley
The Assistant to the President
for Science and Technology
Executive Office of the President
The White House
Washington, D.C. 20506

Dear Allan:

We finally produced enough Chardonnay to send a modest supply to Washington, D.C., so I telephoned my long-time friend Ed Sands at Calvert-Woodley, just as the enclosed advertisement (page 39) says.

During my UNC days from 1976-82 Ed was my No. 1 wine supplier, and there really was no No. 2. He naturally assumed that I lived in Falls Church, which I almost did. Some of the best Bordeaux and Burgundy wines in our cellar are the result of his selections. You are invited to test the truth of this statement in person at any time, but you already know that your standing invitation is irrevocable.

Also enclosed is page 34 from their Fall Wine Sale catalog. I will ask Ed to send a copy of this catalog to you. I believe you received a bottle of '87 Beringer Private Reserve Cabernet Sauvignon in the Bohemian Grove package. It is 50% our grapes.

The Beringer '89 Bancroft Ranch Merlot (100% our grapes) has just been released and is not in this catalog. This Merlot has always been tightly rationed, but all wineries treat Calvert-Woodley with respect. In the event of any problem I could always ask for a special allotment. It is less expensive than the P.R. Cabernet and is of equal quality (in my always unbiased judgment).

I recognized a familiar voice on the car radio recently. Your remarks in support of President Bush were probably the best I have heard. He does seem to need a miracle.

With warmest regards,

Sincerely,

James R. Bancroft

Two Old Friends FROM HOWELL MOUNTAIN

Two excellent, yet very different Chardonnays from this famous premium wine growing area. Chateau Woltner has been featured by us before and needs no introduction. Their single vineyard Chardonnays are of legendary quality and this Howell Mountain Blend represents great value!

Jim Bancroft was a Woodley (before Calvert Woodley) customer while living in the D.C. area in the late 1970's. He has owned the property since 1969 and in 1974 sold a portion which is now La Jota Vineyards. In 1982 he established what is today a 90 acre vineyard and his first vintage, an experiment, was 1986 . . . only 200 cases. It wasn't until the superlative 1990 vintage that Jim felt he was making wine in sufficient quantity so that he called Ed Sands, reestablished an old friendship and offered us some wine . . . Ed jumped at the opportunity. Thanks for calling Jim!!

ITEM#		SALE	REG
2218	'91 Woltner Howell Mountain Chardonnay	9.99	13.99
<i>Brimming with fresh fruit on the nose, very full with a long lasting finish. Drinking perfectly now. A Steal!</i>			
5127	'90 Bancroft Howell Mountain Chardonnay	11.99	14.99
<i>Unlike many Chardonnays, Bancroft's 1990 will benefit from extended bottled age, but is excellent to drink right now. Lightly oaked, its fruit is intense and is a terrific complement to food. 30 minutes aeration will bring out all its lovely flavors and nuances.</i>			
<i>"This wine opens up handsomely in the glass to reveal scents of lemon, apples, toast and butter. In the mouth, the wine is medium to full-bodied, ripe, and rich, with good acidity, weight, power, and elegance . . . Robert Parker</i>

file right in
lars (\$85,000,000.00)
pence account

There are only two things that can happen to this money. Either it is transferred out as payment to an already concluded contract or it is being paid back to the Government purse as a surplus overflow of government budget. The later, we have decided not to do. So, the favour I am asking you to do is to act as a Beneficiary to this fund by providing me with an account number and your bank to transfer this fund into. You will be given 30% of this fund for this provision. We have done the homework very well and it is fool proof. 10% of the fund also has been set aside for any kind of expenses anybody could incur. While the officials will settle for 60%.

All the Personnel that will approve of these papers will have their due shares. So we do not anticipate any problems. So long as everything is confidentially handled, there is nothing to worry about. I believe you can be trusted to that fund. This is because all the officials involved will fly into USA for the final disbursement as soon as your bankers confirms this fund transferred successfully. This is a life opportunity and I will not want to miss it. Please get in contact with me through the fax or the telex line immediately and indicate your opinion for time is not in our favour.

I have my reasons for deciding to ask you of all persons to act as the Beneficiary to the fund. I believe this is an international relationship and I will do everything to keep it.

I await your urgent reply.

Yours faithfully,

DR. OSSAI PAUL

copying correspondence.

Any comments or suggestions
would be welcome.

Alan

Dear Dr. Bromley,

I was pleased to read the article in The Toronto Star last Sunday. We at Queen's have been privileged to share your expertise and we are pleased that a Queen'sman has risen to such an eminent place in the administration of the United States.

Your ideas on the importance of manufacturing can certainly be transferred to Canada. The possibility of joint ventures is an encouraging one.

Best wishes to you from Queen's.

Sincerely yours,

A handwritten signature in cursive script that reads "Robert Buller".

September 8, 1992

Dear Dr. Brandinger:

Many thanks for sending me a copy of **Transferring Technology** -- your 1992 Annual Report. I have found it to be an interesting and impressive document. Some time in the not too distant future I anticipate inviting you to join other persons holding similar positions in other states across the nation to join us here in Washington for a kick-off of a new Intergovernmental Council on Science, Engineering and Technology that I am putting together under the Federal Coordinating Council. I am convinced that not only are there a remarkable number of activities underway within the Federal Government that would be of use to state and local governments, but also that there are a great many activities, some of those that you have described in your Annual Report, that are being carried out by various states that are totally unknown outside the state boundaries. In both cases we believe that we can perhaps play a constructive role in making appropriate information much more widely available.

As you know, Bob and Ellie Adair are very old friends in as much as Bob and I joined the Yale faculty at the same time and my wife and I moved into the house that Bob and Ellie vacated after their first year in New Haven.

Again, my thanks and all best wishes,

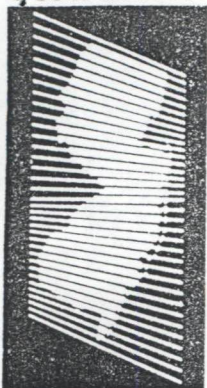

Sincerely yours,

D. Allan Bromley

July 1992

Dr Bromley,

Dear Friend:

Please accept with our compliments the enclosed Annual Report of the New Jersey Commission on Science and Technology.

This report is intended as a general introduction to the ways in which our Commission's program of targeted R&D support is paying dividends to the state's business community, the form of technologies developed and transferred to the commercial marketplace.

The report itself could not have been prepared, in these difficult budgetary times, without the generous assistance of the David Sarnoff Research Center in Princeton, which I am pleased to acknowledge with thanks.

My staff and I stand at the ready to introduce interested parties to any of the programs described in this report. You will find us eager and willing to promote jobs creation in the state through application of advanced technology. Please bear us in mind if you are acquainted with any technology-based business that is facing decisions that could be affected by access to our programs.

Additional copies of the report, either singly or in bulk, are available on request. We would like to see the greatest number possible in private-sector hands, and we are seeking leveraged distribution through trade shows, public agencies, and other channels. I also welcome your feedback on the report or on the programs it describes.

Sincerely,

Jay J. Brandinger

Dear George:

I have just nominated J. Thomas Ratchford for membership in the Council on Foreign Relations and would much appreciate it if you would be good enough to provide a seconding letter on Tom's behalf to:

Mr. Kempton Dunn
Director of Membership and Fellowship Affairs
Council on Foreign Relations, Incorporated
58 East 68th Street
New York, New York 10021

For your convenience, I am enclosing herewith a copy of a recent curriculum vitae that Tom prepared. As you know, the Council's membership group in particular is interested in international experience and the letters are particularly helpful when they contain some personal experience or anecdote that might add to the formal sort of material that usually comes to the committee with the nominating initiative itself.

Tom has done an outstanding job as my Associate Director for Policy and International Affairs and I believe that he would be a very effective and interesting member of the Council on Foreign Relations. Your support would be much appreciated.

With warmest best wishes,

Sincerely yours,

D. Allan Bromley

THE WHITE HOUSE
WASHINGTON

August 11, 1992

Dear Laney:

Many thanks for your note telling me about your college plans. Naturally I think you made the right choice in going to Yale but the other universities to which you applied were also good ones and you would have made no mistake with any of them. I think at Yale, however, that you will have perhaps a somewhat broader set of opportunities, both intellectual and social, and that you will very much enjoy the time you spend in New Haven. Yale is the only university in the United States that has a functioning college system and this gives you the advantages of the small college at the same time as those of the major research university. This really is a unique situation and a second unique aspect of Yale is that, at least in the departments with which I am most familiar, all senior faculty members teach undergraduates and no seminars or laboratories are under the control of graduate students. This does not mean that on occasion graduate students may not be even more competent than faculty members but if you have to bet, as you do, your odds are substantially better with an experienced faculty member.

I urge you during your Yale years to take advantage of the very broad spectrum of courses and activities that are open to you and in particular would urge that you not specialize too narrowly or too soon. These four years are the ones that give you the greatest freedom to expand your mind and to explore totally new areas that you have perhaps never even considered previously. You are really in no hurry and I would urge you not to make the mistake that so many freshman do of feeling that they are under pressure to narrow down the focus of their activity to some specific future career. Those people who have been most successful, in my experience, are those who have not worried much about the specific career aspects until later in their program and have simply done their best to make themselves into educated humans.

Please give my warmest regards to your parents and let me wish you every success and happiness in your days at Yale.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "D. Allan Bromley", with a long, sweeping horizontal line extending to the left.

D. Allan Bromley
The Assistant to the President

Dr Bromley,

How are you? I am fine. I am writing to inform you of my college plans. I have been accepted at University of Connecticut, University of Rochester, RPI, Colby College, Cornell University, and Yale University. I have decided to attend Yale University. During Future Freshman Days, I spent two days attending classes and meeting professors and students. Needless to say, I fell in love with Yale. (OVER)

I would like to thank-you again for your sage advice.

Sincerely,

Janey Davis

P.S. I called your office earlier this week to find out if you would be interested in speaking at my high school graduation. Unfortunately, you were already busy. I thank you anyways.

MEMORANDUM FOR PAUL W. BATEMAN

FROM: D. ALLAN BROMLEY

SUBJECT: SPACE

I have been travelling extensively so this is a belated note of appreciation of your effective assistance to us with respect to opening up Room 571. It really does make a tremendous difference to our group engaged in National Security related science and technology and I want to thank both you and Lou Pearson for your cooperation.

We still have, as I think some of my people have discussed with you, a very real problem with respect to space. As we tried to take on some of the new responsibilities that we are receiving both from the Congress and from the Administration I recognize that there simply is no additional space available in the OEOP and 744 Jackson Place is now absolutely jammed. We need two kinds of space: the first, and hopefully the easiest, is simply storage space so that this year, for example, we would be able to use some available funding to stockpile supplies for the coming year. Our problem at the moment is that we simply have no place to put such supplies. And any help that you could provide would be enormously valuable. Secondly, of course, we need additional space for people and recognizing that there is none in either the OEOP or 744 Jackson Place my question is whether there is additional space anywhere near by so that we could possibly acquire a few rooms for overflow. As I am sure you appreciate, once that overflow space gets too far removed from our base of operations, it becomes of relatively little value because the people in it lose all contact with our central operations and very rapidly become totally isolated intellectually as well as spatially.

Again, any help you can give us would be much appreciated and I do understand the difficulties you face.

MEMORANDUM FOR D. ALLAN BROMLEY

ASSISTANT TO THE PRESIDENT FOR SCIENCE
AND TECHNOLOGY AND DIRECTOR OF THE
OFFICE OF SCIENCE AND TECHNOLOGY POLICY

FROM:

PAUL W. BATEMAN 
DEPUTY ASSISTANT TO THE PRESIDENT FOR MANAGEMENT
AND DIRECTOR OF THE OFFICE OF ADMINISTRATION

SUBJECT:

Space Requirements - Fifth Floor, Old Executive
Office Building

This refers to your June 25, 1992, memorandum concerning Office of Science and Technology Policy space on the fifth floor of the Old Executive Office Building. Specifically, you expressed concern regarding the crowding of staff and poor ventilation in Room 572, and requested the use of Room 571 to alleviate these problems.

I have asked Lewis Pearson, Director, Facilities Management Division, Office of Administration, to contact your staff concerning the ventilation problem in Room 572 and to make arrangements for your use of Room 571.

Please let me know if you require further information.

THE WHITE HOUSE
WASHINGTON

August 11, 1992

Dear Ed:

Many thanks for the excellent photographs taken while we were in Strasbourg and let me begin by congratulating you on your forthcoming honorary degree at Frankfurt. I can tell you from my 1981 experience that Frankfurt does this of thing with rare style and I know that you will have a wonderful time.

It seems hard to believe that you are about to retire from the Directorship at TUNL but in doing so you must certainly feel a great sense of satisfaction for what you have accomplished building on the activities that Henry Newsom had initiated a great many years ago. You can be particularly proud of the students whom you have trained over the years and the combination, Henry, and Russ Roberson effectively established a dynasty that will be characterized by very real excellence as well as instrumental elegance and ingenuity.

I never doubted that Berndt Müller would be a tremendous addition and without any trace of modesty, I must say that had I still been at Yale I think I could have probably persuaded him to join us. He is an absolutely first class physicist and makes major contributions in all sorts of fields in the tradition of the old-time professor who managed to avoid the kind of specialization that is all too common today. Since Yale did not get him I am delighted that he chose to go to Duke because I am sure, from everything he tells me, that he is enjoying Duke as much as Duke is enjoying him.

It was good to see you, albeit very briefly, at the meeting we held to gain input for our study on the health of research-intensive universities and colleges and I was impressed again by the general elegance of the Duke campus and activities. I am only sorry that we did not have more time to talk but we were scheduled almost minute by minutes.

I have been travelling a very large fraction of the time of late and at the end of this week will be leaving for my place up in Canada for two weeks that I badly need.

Again, my thanks for the pictures and congratulations on your Frankfurt degree.

With warmest best wishes,

Sincerely yours,

A handwritten signature in dark ink, appearing to read "Allan", with a long, sweeping horizontal flourish extending to the right.

Executive Office of The President
Washington, D. C. 20500

Dear Allan:

Enclosed are several pictures that will remind you of a pleasant time in Strasbourg. I'm sure Andre has sent you others taken during the formal ceremonies. You can add these pictures to your collection since they show two ladies who hold you in high regard.

I reached sixty-five this year and, because of University rules on administrators, I stepped down as Director of TUNL. I've had a good time in this job and I feel that TUNL now has an international reputation for a high quality physics program, as a developer of new instrumentation and a source of vigorous young scientists. We now have awarded 166 Ph.D.s in nuclear physics (one third in universities, one third in national laboratories and one third in industry). Currently we have thirty-four students in the program. I've been Assistant Director, Deputy Director and Director since 1961 so my whole life is tied up in this laboratory. Henry was a joy to work with and I think he would be pleased to see how far we have come. I hasten to add "with friends like you who are committed to excellence of science in the university environment". Russ Roberson has assumed the duties of Director of TUNL for the next four years after which he will probably be replaced by a senior outside person.

Berndt Müller is doing a wonderful job here. He is a wonderful teacher, fantastically organized, and highly respected by the scientific community. We have added another young theorist to our faculty and DOE seems to be willing to see theory grow in the Research Triangle area. In a way, I'm glad that you were not at Yale when we were trying to attract Müller--otherwise we might not have been successful.

Sincerely yours,

Edward G. Bilpuch
H.W. Newson Professor of
Physics

July 30, 1992

Dear President Braverman:

I too was sorry that we were unable to meet during my recent visit to Israel and I must say that I very much enjoyed my breakfast meeting with your colleagues.

I much appreciate your sending me your interesting article **Braving the Peace Frontier** and I have mentioned to Mike Boskin that we had made contact although had not been able to meet while I was in Israel.

My own impression gathered from an admittedly brief visit to Israel, Jordan and Egypt is that the prospects for peace are better now than they have been at any time since 1948.

While I currently have no plans to return to Israel in the near future I too would very much look forward to the opportunity of seeing what you have accomplished at Israel's newest university.

With warmest best wishes,

Sincerely yours,

D. Allan Bromley
The Assistant to the President

THE PRESIDENT

אוניברסיטת
בן-גוריון
בנגב
BEN-GURION
UNIVERSITY
OF THE NEGEV

29 June 1992

Dr. D. Allan Bromley
Assistant to the President of the United States
for Science and Technology

Dear Dr. Bromley,

Welcome to Israel.

To my regret, I will not be able to meet with you during your current visit. I was eager to discuss Ben-Gurion University with you but I do have the best of excuses. I am getting married tomorrow.

Ben-Gurion University of the Negev, Israel's youngest institution of higher learning together with the State of Israel are facing a critical period. If Israel is to succeed in the two momentous goals she is now facing - the absorption of hundreds of thousands of new immigrants from the former Soviet Union, and the achievement of true peace with our neighbors, the Negev must play a crucial role. The Negev looks to Ben-Gurion University with its reservoir of experts in medicine, arid-zone agriculture and many other fields, to lead the way.

I do hope you will return to Israel soon so I will have the opportunity of hosting you in the Negev and showing you some of our unique accomplishments.

With best wishes.

Dr. Avishay Braverman
President

P.S. Enclosed is an article I wrote recently called "Braving the Peace Frontier" which I hope you will find of interest. I gave the article to our mutual friend, Mike Boskin, my former teacher and colleague from Stanford University, as well. As you may know, I worked in the World Bank for more than ten years and I consider Washington my second home.

THE WHITE HOUSE

WASHINGTON

July 15, 1992

Dear Sara:

My apologies for the long delay in responding to your good note of June 19. The combination of Rio, two trips to the west coast, and ten days in the Middle East, have completely chewed up my office schedule for the past month.

* I hope that by now you and your husband are happily established in Budapest and that you are enjoying it just as much as you had expected you would.

Let me take this opportunity to tell you what a superb job you did at OSTP. Clearly, one of the best decisions I have made in the office was that of trying to convince you to remain here rather than head for Commerce. Your activities here have established a level of performance toward which others aspire and I want you to know that you should take pride in having made a very major contribution to the activities of the office and through that, to our international activities worldwide. It has been a very real pleasure working with you.

If I can be of any assistance to you on your return to Washington in two years, or for that matter before, please do let me know. I would welcome the opportunity to provide letters of recommendation or whatever else might prove useful.

With warmest best wishes,

Sincerely yours,

D. Allan Bromley
The Assistant to the President
for
Science and Technology

Ms. Sara R. Bowden

*I have just learned of your father's illness and very much hope that his situation has improved.

EXECUTIVE OFFICE OF THE PRESIDENT
OFFICE OF SCIENCE AND TECHNOLOGY POLICY
WASHINGTON, D.C. 20506

June 19, 1992

Dear Dr. Bromley:

I am sorry that you were out of town during my final week at OSTP, but I am pleased that you are taking a long overdue vacation to a place that I know will afford great relaxation. I hope it was enjoyable and invigorating.

I want to take this opportunity to express my sincere appreciation to you for giving me the opportunity to work with you over the past three plus years. It has been exciting, challenging, intellectually stimulating, and one of the best experiences of my life. I depart with some regret that I will no longer be at the center of some of the most interesting policy questions and surrounded by such outstanding individuals and dedicated public servants. And, it is with great admiration for you and all that you have accomplished at OSTP, that I take my leave.

As you know, I will be accompanying my husband to Budapest where I am looking forward to spending some quality time with my daughter and getting to know my way around that exciting city. Should your travels take you in that direction, please do not hesitate to give me a call. I would appreciate the chance to see you again and provide any assistance. Furthermore, if I can be of any help to OSTP, I would be more than happy to assist on an informal basis. Finally, I shall return to Washington in two years, and intend to return to the federal government. I hope that our paths will cross again at that time.

I will miss OSTP and am proud to have contributed to the success of this organization during the Bush Administration. Thank you for your support, leadership and friendship.

Sincerely yours,

Sara Bowden

The Honorable D. Allan Bromley
The Assistant to the President

THE WHITE HOUSE
WASHINGTON

July 16, 1992

Dear Gerry:

This is a very much belated reply to your letter of June 10 but much of my time in the interval has been spent traveling to Rio and the Middle East. So my correspondence has gotten horribly delayed.

I think that you are probably right about not attempting to nominate anyone new in Nuclear Physics this year for Academy membership. I do think, however, that, although Gerry Garvey is an old friend and someone with whom I worked closely at Yale for a number years, that his chances of being elected have now peaked and are probably not all that good; Eric Adelberger, on the other hand, looks like a good candidate to me.

Steve Koonin is an excellent possibility and has an excellent track record as well as I believe the respect of both the nuclear and particle physics communities. Whether it would be viable or not I think that Joe Weneser at Brookhaven is someone who really deserves consideration given a lifetime of quiet, unassuming, but very high quality work. I would support both with considerable enthusiasm.

With all best wishes,

Sincerely yours,

D. Allan Bromley

Dear Mr. Barron:

Thank you for your invitation of June 8 to attend the Convergence Conference scheduled to be held October 19 through 21, 1992, in Dearborn.

I am happy to accept your invitation for the 21st but cannot attend the VIP reception and dinner on October 19. However, I must caution you that occasionally I have to cancel engagements at the last moment due to Presidential scheduling that requires my presence. I sincerely hope this does not happen.

As the time of the banquet approaches, my staff will contact you to work out details for the event. The date is on my calendar and I look forward to the occasion.

Sincerely yours,

Dear Fred:

With the events surrounding the awarding of the National Medals of Science and Technology still fresh in my mind, I wanted to let you know how much I enjoyed this year's activities with you. The delightful ceremony in the Rose Garden concluded a series of events that were accomplished with unusual style and elegance.

I understand from my staff that your staff, especially Susan Fannoney, were extremely professional and a pleasure to work with throughout the planning process.

This year's award ceremony and attendant activities were first rate, and I was delighted to be part of them and to share them with you.

Sincerely yours,

D. Allan Bromley

THE WHITE HOUSE
WASHINGTON

April 17, 1992

Dear Rudolf:

The week of April 20-24 is almost impossibly crowded with people coming to Washington for the APS meeting and my need to be out of town for several talks. I have been able to rearrange my schedule, however, and hope that you and Liselotte might be able to have lunch with me on Monday April 20.

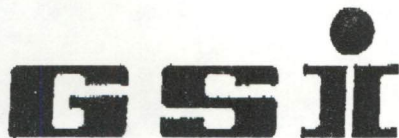

If you would come to Room 358 of the Old Executive Office Building at 17th and Pennsylvania Avenue, Northwest, we can go from there. I look forward to seeing you.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "Allan", written in a cursive style.

Gentlemen:

You may be unaware of the rarity of letters received in this office that express anything approaching approval for any of our actions. For that reason I am particularly grateful for your letter of March 10 with its comments concerning our publication of the so-called **Scope** document in the **Federal Register** of February 24 of this year.

Both personally and on behalf of all of my colleagues here in OSTP, I want to express to you my appreciation of your continued help and support and we look forward to working with you in the months ahead.

With warmest best wishes,

Sincerely yours,

A handwritten signature in dark ink, appearing to read "D. Allan Bromley", written in a cursive style.

Dr. D. Allan Bromley
Science Advisor to the President
Director, Office of Science and Technology Policy
Executive Office Building
Washington, DC 20506

FAX 202 395 3261

Dear Dr. Bromley:

We both have busy schedules, and I suspect it may be difficult for us to connect on the phone. However I will continue to try. Let me introduce myself. I am a vice president at Hewlett-Packard Company and have responsibility for HP's activities in Latin America and Asia Pacific. Because of this, as well as a strong personal interest I have become involved with the U.S. National Committee for Pacific Economic Cooperation, currently serving as Vice Chairman representing industry, and for the last three years have been co-chair of the Pacific Economic Cooperation Conference (PECC) Science & Technology Task Force.

The next PECC plenary session will be held September 23-24, 1992, in San Francisco. A unique feature of this year's conference is the inclusion of concurrent sessions on the second day, which will allow delegates as well as invited guests to focus in greater depth on PECC activities in their fields of interest. In this connection I have assumed chairmanship of the concurrent session on science and technology. The objective of this session will be to examine the implications of science and technology policy and related human resource development issues through the presentation of four policy reviews followed by a panel discussion. In conversations with members of the U.S. National Committee, as well as HP's president John Young and my friend Jay Keyworth, your name was consistently mentioned as the most obvious and appropriate spokesperson for the United States in this area.

Dr. Bromley, we would be honored to have you join us in San Francisco. Once you have had a chance to read over the materials I have attached, please contact me at (415) 857 2503 so that we might discuss this in greater detail. I am most anxious to finalize the agenda before the end of February.

Dr. D. Allan Bromley
