THE WHITE HOUSE
WASHINGTON

April 22, 1992

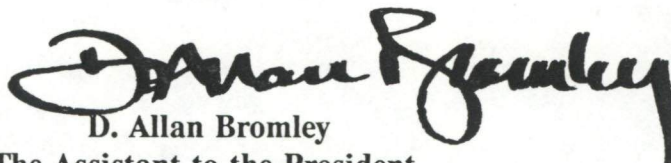

Gentlemen:

Many thanks for your recent letter of March 6 with its suggestions concerning the activities of the Critical Technologies Institute.

We have recently held the first meeting of the Operating Committee of that Institute, to which I am Chairman, and in the very near future, once a minor legal problem is resolved, we will be announcing the formal establishment of the Institute. In the meantime, I much appreciate your taking the time to write with your ideas. They are timely in that we are just now developing the program directions and style for the Institute and we will certainly give your suggestions a careful reading.

Again, my thanks.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "D. Allan Bromley", written in a cursive style.

D. Allan Bromley
The Assistant to the President
for
Science and Technology

Professors Wesley Cohen and M. Granger Morgan

Charter

Operating Committee of the Critical Technologies Institute

A. Official Designation:

Operating Committee (Committee) of the Critical Technologies Institute (Institute)

B. Membership

Pursuant to PL 102-190 822(c) members of the Committee are as follows:

C. Mandated Responsibilities: The Committee through its Chairman shall

- 1. determine the form of incorporation for the Institute (822.(b))**
- 2. be consulted on the Sponsoring Agreement for the Institute (822.(g)(2))**
- 3. specify functions, consistent with the duties specified in 822.(d), to be carried out by the Institute (822.(g)(2)).**

In addition, the Committee shall

- 4. submit an annual report to the President on its activities (822.(f))**
- 5. meet not less often than four times a year (822.(c)(4)).**

D. Oversight Role:

The responsibilities in C. require that the Committee exercise an ongoing oversight and supervisory role. The relevant duties include:

- 1. to review and approve the management structure of the Institute and its capability in carrying out its functions**
- 2. to review the Sponsoring Agreement and approve the portions thereof pertaining to the relationship between the Committee and the Institute**
- 3. to request, review and approve ^{all} plans and reports of the Institute in executing its functions**
- 4. to review and approve any publication of the Institute prior to its issuance.**

E. Executive Secretary

Chairman of the Committee shall appoint a government employee as the Executive Secretary of the Committee, whose duties are as follows:

- 1. To serve as the central point of contact between the Committee and the Institute and to transmit instructions from the Committee to the Institute**
- 2. To be responsible for scheduling the meetings of the Committee and for the timely preparation of its annual report to the President**
- 3. To carry out any other duties related to the Committee as the Chairman of the Committee may designate.**

THE WHITE HOUSE
WASHINGTON

April 20, 1992

Dear Sam:

I had known that you were working to pull together some of the presidential material concerning Whit Griswold and Kingman Brewster and I must say that I congratulate you on this. It is quite clear that they were two of the most distinguished university presidents of the past century anywhere in America and it would be a great pity were there not an appropriate record of their activities many of which, I am sure, were never actually recorded at the time.

I would be more than happy to talk with Geoffrey Kabaservice and he should give me a call at (202) 456-7116 to arrange a mutually convenient time.

I keep hoping that I will be able to convince the dissenters to hold a meeting here in Washington where I would be happy to act as host. The White House Executive Mess does an excellent job at dinners of this kind and I am sure that we could use the Roosevelt Room for the following paper. I have talked both to Paul Johnson and to Jerry Pelican about this possibility but gather that some of our members may not feel up to the trip.

With warmest best wishes,

Sincerely yours,

D. Allan Bromley
The Assistant to the President
for
Science and Technology

Mr. Henry Chauncey, Jr.

March 31, 1992

Mr. D. Allan Bromley
6716 Tulip Hill Terrace
Bethesda, MD 20806

Dear Allan:

As you may be aware a group of us who knew or worked with Whit Griswold and Kingman Brewster have raised some funds to do what we can to assemble their presidential papers and related materials and to conduct some oral interviews with people who knew them. This is not an attempt to write history. Rather, it is an attempt to bring together as much basic material as possible so that when a scholar, or scholars, decide to write the history of these two Yale presidencies, the material will be organized and as much as possible will be available.

Geoffrey Kabaservice has been hired by our group, with Yale's full permission, to work on this project. He is a Yale graduate who has done graduate work in history. He would like to interview you and tape the interview. I have asked him to call or write you directly so that you and he can discuss how he would like to proceed, whether or not you can participate and then, if possible, set a time and place.

I hope you will be able to do this. These two presidencies were important for Yale and you know much of what went on.

All the best.

Sincerely yours,

Henry Chauncey, Jr.

REMINDER

THE OHIO STATE UNIVERSITY GRADUATE SCHOOL

UNIVERSITY DISTINGUISHED VISITING PROFESSORSHIP PROGRAM

CALL FOR NOMINATIONS 1993-1994

THE PROGRAM

The program brings outstanding scholars, scientists, and artists to Ohio State for an extended time. For the 1993-94 competition, funds will be available to support up to six University Distinguished Visiting Professors.

NOMINATIONS

Any faculty member may nominate a candidate for one quarter within the academic year beginning Summer Quarter 1993. Nominations should include 5 copies plus the original of the following:

1. substantive letters of recommendation and support indicating the nominee's qualifications and relation to the work of the nominating department;
2. list of publications;
3. sample publications;
4. extracts from biographical dictionaries; and
5. other relevant information that might be useful to the committee.

COMMITTEE CRITERIA

In its deliberations, the University Distinguished Visiting Professorship Committee uses the submitted nomination materials to consider such matters as significance of scholarly and/or creative achievement, value to the nominating and related departments, strength of publications, and level of professional and public eminence.

DEADLINE: APRIL 15, 1992

Send nomination materials to: Roy A. Koerugsknecht, Dean
Graduate School
250 University Hall
230 North Oval Mall

For more information, call the Graduate School at 292-6031.

Sample nomination dossiers for recent University Distinguished Visiting Professors are available for examination in the Graduate School office. No appointment is necessary.

Curley

April 3, 1992

Dear Mr. Neubauer:

Many thanks for your very kind note and your invitation to stay with you at the residence when next I am in Paris. I would be delighted to accept and will give you as much warning as possible when I next

plan to be in France.

I would welcome a chance to discuss a number of issues at greater depth.

And once again, warmest thanks for your kind hospitality.

Sincerely

William J. Brennan

Dear Praveen:

You may not realize how rare it is to get a letter like yours that suggests that we may be doing something reasonably sensible! It was very thoughtful of you to write — and much appreciated. Look forward to working with you to

make the initiative the success that I know it can be.

We are all indebted to you and to that for your superb NRC report that really made all this possible.

With warmest regards.

Sincerely

Alan

MAIL ROOM

The Honorable D. Allan Bromley
Assistant to the President
Office of Science and Technology
Old Executive Building, Room 358
17th Street and Pennsylvania Avenue, NW
Washington, DC 20506

Dear Allan:

I want to tell you that I think you are doing a terrific job in Washington.

I say this not only because of your initiative in AMPP, but because of my observations over the last few years on the "pulling together" by the federal agencies to mount national initiatives. In many ways the AMPP was the severest test of the process you have put into place. As you know, the materials community is a fractious (and sometimes acrimonious) group. The agencies who implement funding in the area mirror, in many ways, the attitudes of the community. It was, therefore, with great hope for the country that I listened to you and Bob White describe the initiative last Thursday.

I look forward to working with you to get the initiative through Congress and to gently but firmly steer it so that it is more than just additional money for this important area of research.

Over the last week I have spoken with a number of my colleagues and all of them are very enthusiastic about the initiative. In particular, they are delighted at the increase in the NSF's budget.

Allan, I want to thank you again for having listened to us and for having acted on what you heard and what you believed.

With best regards

Praveen Chaudhari

Dear Dr. Bromley:

It was a distinct privilege to have you as our guest here at Loma Linda University Medical Center last November.

Enclosed are a photo album and the latest issue of our publication SCOPE, featuring your visit and your Monday morning convocation address.

Best wishes in your work during 1992.

Sincerely,

W. Augustus Cheatham
Vice President

Enclosures

THE WHITE HOUSE

WASHINGTON

January 13, 1992

Dear John:

Many thanks for sending me a copy of *From Beirut to Jerusalem* by Thomas L. Friedman. I have only as yet had an opportunity to leaf quickly through the book but I am prepared to accept your view that it is the most profound recent book on the Middle East and obviously something that I shall read with great care given the importance of that region in today's world.

My hope that all goes well with Castle Harlan and more particularly, with the Castles. I do miss the opportunity of meeting regularly with you and the other UNC directors; this was a truly unique group and I thoroughly enjoyed my interactions with it. I ran into Bill Hittinger recently and learned about the almost complete reconstruction of UNC into a totally air-oriented organization. I also saw Dan Colussy at the most recent ceremony at which the Malcolm Baldrige Award was being given by the President in the Department of Commerce auditorium.

If you find yourself in Washington, please do give me a call and little warning because I would welcome the opportunity to take you to lunch at the White House Executive Mess.

With warmest best wishes, and the hope that 1992 is a happy, healthy and rewarding one for you and your family.

With all best wishes,

D. Allan Bromley

The Assistant to the President

Dear Dick:

I am forwarding herewith a preliminary report on a study carried out by an OSTP consultant, Mr. Willis Shapley, now retired after extensive experience at OMB/BOB and AAAS.

I asked Mr. Shapley, as in the past two years, to examine the FY 1993 appropriations in order to obtain a measure of the amount and kind of earmarks as well as how these have changed in recent years.

It bears emphasis that this report is still in a preliminary state and that reasonable persons might well differ over definitions and identification of specific earmarks. However, the same criteria have been used for all three years during which Mr. Shapley has carried out this analysis so that the trends are clear and credible.

As the table on page 2 of the summary shows, while academic earmarks have remained reasonably stable, nonacademic ones have increased rapidly so that there has been a dramatic increase in the total resources earmarked.

I am sending you this preliminary report because I thought that you would find the results both interesting and distressing.

Sincerely yours,

D. Allan Bromley
The Assistant to the President

Dear Bruce:

Many thanks for your letter telling me about the successful initial overhaul sea trials of the NR-1. I am sure that you must be extremely pleased and I only regret that I will not have an opportunity to see this marvelous new instrument in action. You are entirely correct that the scientific community will find this a tremendously powerful addition to its arsenal in its exploration of one of the last great frontiers.

I recall with the greatest of pleasure our travels on the Grayling and am sorry that I will not be around for the next four years because I would certainly have tried to arrange to join you for a brief trip on the NR-1.

With warmest personal regards,

Sincerely yours,

Dear Jerry:

Many thanks for sending me the pictures from the Kansas State delegation. This event seems like a very long time ago given the mass of change that has taken place in my activities in the intervening period.

I would very much like to be able to join you for your conference but, as you can gather, this particular autumn is a very hectic one as we prepare for the election.

I am delighted to learn that somebody actually remembers the Green Book on Helium 3 Reactions. Joe Almqvist and I had an enormous amount of fun at Chalk River with the old 4 million volt machine and quite frankly, in retrospect, it is clear that we had more fun with it than we did with our brand new tandem accelerator.

Whenever we did something interesting with the 4 million volt machine everyone was amazed that we were able to get any results of any consequence. Whereas no matter what we did with the new tandem everyone felt that what else would one expect!

I am happy to be able to tell you that the ESTU 1 at the Wright Laboratory at Yale has been behaving beautifully. It has met all of its specifications and more and in its current frame is being opened only when it becomes necessary to replace the foils in the terminal stripper. The intermediate electrostatic shield that we installed following the design of the Strasbourg group has performed exactly as calculated in contrast to the installation at Brookhaven. We now understand what the problem was at Brookhaven, although no one did at the time. Because Brookhaven had changed rather slightly the dimensions of the terminal, the electrostatics were changed rather dramatically at the terminal column-column junction with the result that there was a large spike in the electrostatic field that led to disastrous breakdown.

With warmest best wishes, and again, my deep thanks for the dedication of the recent conference volume.

Sincerely yours,

September 30, 1992

Dear Jay:

Many thanks for the information concerning your AMS program. You have been spectacularly successful as, in fact, I assumed you would but the rate at which you are putting samples through your system now is truly remarkable.

I indeed do derive perverse pleasure from the thought of moving out a particle physics group to make room for a lowly EN tandem. Beyond that I think Bernie Kinsey would be ecstatic because he had very little use for that particular branch of the Church. I don't know whether you have read his book or not but he manages to skewer just about every physicist that he has ever met with special attention being devoted to C. Fred Moore -- not without reason, of course.

I too enjoyed your visit here. Please do let me know when your plans bring you through Washington again and we will try to arrange lunch at the White House Mess. This fall, unfortunately, my schedule is very hectic as you can perhaps imagine and, although I would much like to get out to Livermore again, the probability of my doing it before the end of this calendar year is probably vanishingly small.

Again, congratulations on the AMS work and with warmest best wishes,

Sincerely yours,

D. Allan Bromley

MAIL ROOM

Dear Allan:

I thought I'd pass along to you two numbers that, in different ways, may startle and then amuse you. The first has to do with our current AMS status, the second with the proposed follow-on to our lab at UC Irvine.

When we started the AMS effort at Livermore, I promised that we could probably build a machine that would have the equivalent capacity of 5,000-10,000 samples per year, a factor of two or four improvement over most dedicated facilities. At the time, even my own crew gave me a little guff about that public statement. We now find that on the one day a week devoted to biomedical AMS measurements of ^{14}C , we are running at an equivalent rate of 50,000/samples per year. We do these measurements to 1% precision (and about that accuracy) primarily to give the experimenter a chance to think between sample changes occurring at 60 second intervals. When the new automated back is installed on the ion source, I expect to see another doubling of throughput. We have sustained this rate for several months with the experimental program of Vogel and Turteltaub, so it's no fluke. Such results obviously change the calculus of the business. We don't quite know where we will reveal this fact yet, as we're still digesting the implications, but I thought you'd enjoy knowing in advance.

Discussions at Irvine about a geoscience clone of our facility, carried forward by Ralph Cicerone and Sherry Rowland, have reached the point that we've begun the cartoon design and single figure costing of the project. What will amuse you is the promise by the local grad dean to expel the particle physics group from 4000 square feet of heavy lab space to provide a home for the spectrometer. I know it's unseemly for a low energy nuclear physicist to gloat about the prospect of installing a 30-year old EN tandem in space belonging to the High Energy branch of the Church, but I figured that you could appreciate it better than anyone I know and grant forgiveness, if not absolution, for such thoughts. It's all the greater pleasure for me because I'll use the old Texas machine that Bernie Kinsey was installing

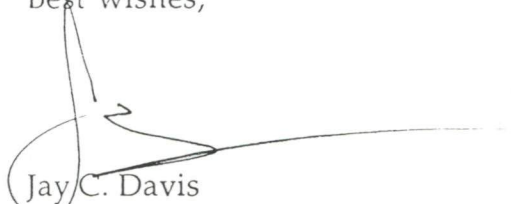

September 3, 1992

Page 2

when I was an undergraduate. I wasn't hired for one of the installation jobs back in '62, so it looks like both the machine and I will get a second chance. Plan on being a speaker at the dedication; I'll bend your arm for that favor.

Enjoyed the visit with you. If your schedule ever allows casual visits, come out and see what our lab looks like now. The past five years have made a big difference. We continue to find the multi-disciplinary aspects of this business rewarding. Yet another patent disclosure is in the works, this time on using PIXE and possibly XRF techniques to replace ^{32}P in postlabeling of DNA adducts.

Best wishes,

Dear Allan:

On behalf of the members of the Business-Higher Education Forum, I would like to invite you to participate in our Winter 1993 Meeting. The meeting is scheduled for Thursday evening, February 4, through Saturday evening, February 6, at the Loews Ventana Canyon Resort in Tucson, Arizona.

As you can see from the enclosed preliminary agenda, we have chosen to organize our meeting around the theme of *First Principles: American Priorities in a New Age and a Different World*. Among the specific topics we intend to focus on are: science and technology, especially the convergence of the two; education as it relates both to K-12 and higher education; the federal budget and its role in promoting (or retarding) economic growth; the press and its responsibilities in a democracy; and alliance building opportunities with Japan and Europe.

Specifically, we are writing to ask you to lead the Saturday morning science and technology discussion on the particular needs and promise of research-intensive universities. We suggest using the upcoming PCAST report to address a wide range of issues affecting the future of American science, technology, industrial competitiveness and higher education.

One Dupont Circle Suite 800 Washington, D.C. 20036
Telephone: (202) 939-9345 FAX: (202) 833-4723
In affiliation with the American Council on Education

Among other PCAST members who we expect to attend the meeting are Harold Shapiro and Peter Likins.

We would be pleased if you could join us for the entire meeting. I think you will find the meeting to be a welcome combination of substantive discussion and friendly socializing. Attendance is limited to the Forum's corporate and academic chief executives, their spouses, and a handful of select guests, such as yourself. In addition, we keep the speeches and presentations to a bare minimum — allowing for more give-and-take among participants.

I have asked Forum Director Don Blandin to follow up this letter with a phone call in the near future to see whether you will be able to join us. Please feel free to contact Don or me if you have any questions.

On behalf of the Forum, I hope to welcome you to Tucson.

Sincerely,

A handwritten signature in dark ink, appearing to read "Bill", written in a cursive style.

We suggest using the upcoming PCAST report to address a wide range of issues affecting the future of American science, technology, industrial competitiveness and higher education.

One Dupont Circle Suite 800 Washington, D.C. 20036
Telephone: (202) 939-9345 FAX: (202) 833-4723
In affiliation with the American Council on Education

Among other PCAST members who we expect to attend the meeting are Harold Shapiro and Peter Likins.

We would be pleased if you could join us for the entire meeting. I think you will find the meeting to be a welcome combination of substantive discussion and friendly socializing. Attendance is limited to the Forum's corporate and academic chief executives, their spouses, and a handful of select guests, such as yourself. In addition, we keep the speeches and presentations to a bare minimum — allowing for more give-and-take among participants.

I have asked Forum Director Don Blandin to follow up this letter with a phone call in the near future to see whether you will be able to join us. Please feel free to contact Don or me if you have any questions.

On behalf of the Forum, I hope to welcome you to Tucson.

Sincerely,

A handwritten signature in dark ink, appearing to read "Bill", written in a cursive style.

William H. Danforth
1992-94 Forum Chairman

Chancellor
Washington University

P.S. Enclosed are some materials to bring you up to date on Forum activities.

THE WHITE HOUSE
WASHINGTON

October 6, 1992

Dear Duncan:

This is a much belated thank you for the information you provided to me concerning activities at the Institute of Optics. The information arrived while I was out of the country on vacation and with the election coming up I have been travelling much of the time since so not had an opportunity to respond.

I thought that both the brochure and the video tape were excellent and would be interested in the response you get from U.S. manufacturers.

As you know, we have undertaken a major study of advanced manufacturing under the aegis of the Federal Coordinating Council for Science, Engineering and Technology (FCCSET) and are very interested in having as close contact as possible with the private sector. As we proceed on this some of my people will be in touch with you because your experience is very pertinent to what we are trying to do on a much broader scale across the nation.

Many thanks for sending me this material. Please do keep in touch.

With all best wishes,

Sincerely yours,

D. Allan Bromley

Dr. D. Allen Bromley
Science Advisor to the President
The White House
Washington, D.C. 20500

Dear Dr. Bromley:

Since your visit to the University of Rochester a little over a year ago to review the programs at The Institute of Optics, a number of significant developments have occurred. One that I would particularly like to call to your attention is the growth of the Center for Optics Manufacturing. This program, which was a cooperative program (in the true spirit of the word) of the U.S. Army Materiel Command, U.S. industry and the academic community, has led to the development of a series of machines to change the method of manufacturing optical elements from a labor-intensive business (in which the U.S. cannot compete) to a capital-intensive business. As manufacturing is becoming a hot issue in Washington, I thought you would be interested in our current successes in this area. I believe that one of the reasons it has been successful is the optics industry is in such terrible shape that companies were willing to work together and share what limited technology already existed. The Center for Optics Manufacturing has become a centerpiece for the U.S. Army Materiel Command programs.

I have enclosed a brochure about the program together with a video tape that we produced to distribute to U.S. manufacturers. If you need more information about the program, please do not hesitate to contact me.

We at the University of Rochester are now committed to the idea of having manufacturing as part of our curriculum and to producing a cadre of students who believe manufacturing technology is important as a career. It is going to be a long haul, but I believe it is the right direction.

Sincerely,

Duncan T. Moore

THE WHITE HOUSE
WASHINGTON

September 30, 1992

Dear Jerry:

Many thanks for sending me the pictures from the Kansas State delegation. This event seems like a very long time ago given the mass of change that has taken place in my activities in the intervening period.

I would very much like to be able to join you for your conference but, as you can gather, this particular autumn is a very hectic one as we prepare for the election.

I am delighted to learn that somebody actually remembers the Green Book on Helium 3 Reactions. Joe Almqvist and I had an enormous amount of fun at Chalk River with the old 4 million volt machine and quite frankly, in retrospect, it is clear that we had more fun with it than we did with our brand new tandem accelerator.

Whenever we did something interesting with the 4 million volt machine everyone was amazed that we were able to get any results of any consequence. Whereas no matter what we did with the new tandem everyone felt that what else would one expect!

I am happy to be able to tell you that the ESTU 1 at the Wright Laboratory at Yale has been behaving beautifully. It has met all of its specifications and more and in its current frame is being opened only when it becomes necessary to replace the foils in the terminal stripper. The intermediate electrostatic shield that we installed following the design of the Strasbourg group has performed exactly as calculated in contrast to the installation at Brookhaven. We now understand what the problem was at Brookhaven, although no one did at the time. Because Brookhaven had changed rather slightly the dimensions of the terminal, the electrostatics were changed rather dramatically at the terminal column-column junction with the result that there was a large spike in the electrostatic field that led to disastrous breakdown.

With warmest best wishes, and again, my deep thanks for the dedication of the recent conference volume.

Sincerely yours,

A handwritten signature in dark ink, appearing to read 'D. Bromley', with a long, sweeping horizontal line extending to the right.

WASHINGTON

September 30, 1992

Dear Jay:

Many thanks for the information concerning your AMS program. You have been spectacularly successful as, in fact, I assumed you would but the rate at which you are putting samples through your system now is truly remarkable.

I indeed do derive perverse pleasure from the thought of moving out a particle physics group to make room for a lowly EN tandem. Beyond that I think Bernie Kinsey would be ecstatic because he had very little use for that particular branch of the Church. I don't know whether you have read his book or not but he manages to skewer just about every physicist that he has ever met with special attention being devoted to C. Fred Moore -- not without reason, of course.

I too enjoyed your visit here. Please do let me know when your plans bring you through Washington again and we will try to arrange lunch at the White House Mess. This fall, unfortunately, my schedule is very hectic as you can perhaps imagine and, although I would much like to get out to Livermore again, the probability of my doing it before the end of this calendar year is probably vanishingly small.

Again, congratulations on the AMS work and with warmest best wishes,

Sincerely yours,

D. Allan Bromley

Professor Allan Bromley
Presidential Science Advisor
Executive Office of the President
Office of Science & Technology Policy
Old Executive Office Bldg., R-360
17th & Pennsylvania Avenue, NW
Washington, DC 20506

Dear Allan:

I thought I'd pass along to you two numbers that, in different ways, may startle and then amuse you. The first has to do with our current AMS status, the second with the proposed follow-on to our lab at UC Irvine.

When we started the AMS effort at Livermore, I promised that we could probably build a machine that would have the equivalent capacity of 5,000-10,000 samples per year, a factor of two or four improvement over most dedicated facilities. At the time, even my own crew gave me a little guff about that public statement. We now find that on the one day a week devoted to biomedical AMS measurements of ^{14}C , we are running at an equivalent rate of 50,000/samples per year. We do these measurements to 1% precision (and about that accuracy) primarily to give the experimenter a chance to think between sample changes occurring at 60 second intervals. When the new automated back is installed on the ion source, I expect to see another doubling of throughput. We have sustained this rate for several months with the experimental program of Vogel and Turteltaub, so it's no fluke. Such results obviously change the calculus of the business. We don't quite know where we will reveal this fact yet, as we're still digesting the implications, but I thought you'd enjoy knowing in advance.

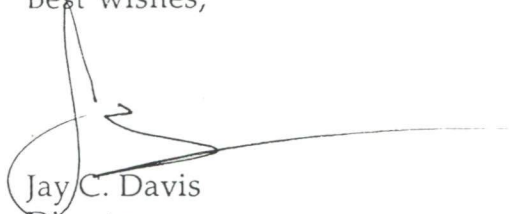

Discussions at Irvine about a geoscience clone of our facility, carried forward by Ralph Cicerone and Sherry Rowland, have reached the point that we've begun the cartoon design and single figure costing of the project. What will amuse you is the promise by the local grad dean to expel the particle physics group from 4000 square feet of heavy lab space to provide a home for the spectrometer. I know it's unseemly for a low energy nuclear physicist to gloat about the prospect of installing a 30-year old EN tandem in space belonging to the High Energy branch of the Church, but I figured that you could appreciate it better than anyone I know and grant forgiveness, if not absolution, for such thoughts. It's all the greater pleasure for me because I'll use the old Texas machine that Bernie Kinsey was installing

September 3, 1992
Page 2

when I was an undergraduate. I wasn't hired for one of the installation jobs back in '62, so it looks like both the machine and I will get a second chance. Plan on being a speaker at the dedication; I'll bend your arm for that favor.

Enjoyed the visit with you. If your schedule ever allows casual visits, come out and see what our lab looks like now. The past five years have made a big difference. We continue to find the multi-disciplinary aspects of this business rewarding. Yet another patent disclosure is in the works, this time on using PIXE and possibly XRF techniques to replace ^{32}P in postlabeling of DNA adducts.

Best wishes,

THE PRESIDENT

July 29, 1992

The Honorable D. Allan Bromley
Assistant to the President for
Science and Technology
Old Executive Building
17th Street and Pennsylvania Avenue, NW
Washington, D.C. 20506

Dear Dr. Bromley:

In previous correspondence we have discussed the possibility of your accepting a Doctor of Science degree, honoris causa, from Adelphi University at our 1993 Commencement.

I am writing to confirm that Adelphi will, indeed, be pleased to confer this degree upon you during Commencement ceremonies to take place on Sunday, May 16, 1993 at 10:00 a.m. I trust that you will reserve this date on your calendar, with the understanding that final arrangements (including your possible attendance at the formal dinner the evening before) will be re-confirmed as the time approaches.

With continuing appreciation for the service you are rendering to President Bush, and our nation, I remain,

Cordially yours,

Peter Diamandopoulos
President

P.S. I am taking the liberty of enclosing a copy of our 1992 Commencement Program. P.D.

COUNCIL ON FOREIGN RELATIONS

Membership Selection Procedure

Membership in the Council is by invitation of its Board of Directors, which acts at least twice a year on a list of candidates proposed to it by the Membership Committee. That Committee, itself chosen with the objective of maintaining diversity, is composed of five members of the Board and six non-members of the Board who serve for terms of four years. The Council's by-laws require that at least two of the non-Board members of the Committee be under the age of 40 when appointed. All names proposed for membership in the Council are referred to the Membership Committee, which also meets at least twice each year.

In its search for qualified younger candidates, the Membership Committee is assisted by a special Term Membership Committee with its chairman drawn from the Membership Committee itself. The Term Membership Committee meets once each year, usually in the spring, to evaluate candidates, age 34 and younger, for consideration as five-year term members of the Council. When the program began in 1970, the Board limited term memberships to no more than 10 each year. The program has been so successful, and the number of highly qualified candidates so large, that the Board has gradually raised the limit on the number of term members who may be elected each year to its present level of 60, no more than 36 of whom shall be age 31 or over. The selection process for term membership is identical to, but separate from, that for regular membership.

NOTIFICATION OF CANDIDATES

At every meeting, the Membership Committee considers a list of significantly more candidates than there are vacancies. Thus, it is inevitable that the names of some candidates will appear before the Committee on several occasions. Given the high level of the competition generally, some candidates may never be elected even though they be thought by some to satisfy the individual qualifications outlined above.

Candidates recommended by the Membership Committee and elected by the Board are so notified, as are their proposers and seconders. Candidates who are unsuccessful at any meeting are not notified, since they remain eligible for consideration at subsequent meetings of the Committee. The process is entirely one of affirmative selection, i.e., from the large and evolving pool of nominees, the Committee and the Board choose a number of members without prejudice to the candidacies of those remaining in the pool.

RULES AND REGULATIONS TO KEEP IN MIND

1. Council membership is restricted to United States citizens (native-born or naturalized).
2. Members of the Council's Board of Directors and Membership Committee are precluded from proposing, seconding and writing supporting letters on any candidate's behalf.
3. A member who is a spouse, close relative (such as a parent, brother or sister, cousin, etc.), or near in-law of a candidate may not formally propose or second that candidate for membership in the Council. Members should also refrain from writing on behalf of clients.
4. Members should write only in support of candidates whom they know well.

(over)

- 2 -

PROCEDURE FOR PROPOSING CANDIDATES

Current procedure requires that every candidate for membership must be formally proposed in writing by one member and seconded by at least one other member of the Council. An additional letter or two reflecting different perspectives would be welcomed but not technically required.

1. PROPOSING LETTERS

Letters proposing a candidate for consideration by the Membership Committee should touch on the following criteria which have always been basic to the Committee's consideration of membership candidates:

1. Intellectual attainment and expertise;
2. Degree of experience, interest, and current involvement in international affairs;
3. Promise of future achievement and service in foreign relations;
4. Potential contributions to Council work;
5. Desire and ability to participate in Council activities;
6. Standing among his or her peers.

To the extent not included in the above, proposing letters should include biographical information about the candidate (a separate *curriculum vitae* or a reference to *Who's Who*, where available, will suffice), which must include his or her date of birth and, if foreign-born, a statement that he or she has been naturalized or is a permanent resident who has made formal application for citizenship. Finally, the proposer should supply the Council with a list of Council members by whom the candidate is well known.

2. SECONDING LETTERS

Seconding letters need not be so comprehensive, but should amplify why, in the opinion of the writer, the given candidate should be considered for Council membership. Thoughtful, candid and succinct comments are far more important than formal endorsements. While technically only one seconding letter is required to assure that a candidate's name will be forwarded to the Membership Committee, a proposer frequently will arrange one or two additional letters in behalf of the candidate. Such letters are particularly helpful to the Membership Committee where they add information or insights about a candidate not already contained in the proposing or seconding letter.

All proposing, seconding and supporting letters should be addressed to:

Kempton Dunn
Director of Membership & Fellowship Affairs
Council on Foreign Relations, Inc.
58 East 68th Street
New York, New York 10021.

3. TIMETABLE

The deadline for receipt of all materials for the winter meeting of the Membership Committee (usually held in late December or early January) is **October 15**; the deadline for the spring meeting (late May or early June) is **March 15**; the deadline for the annual Term Membership Committee meeting (held in the spring) is **January 31**. The preparation of individual membership files for submission to the Membership Committee is a continuing process. Candidates whose files are not completed in time for any given meeting of the Committee are carried forward, without prejudice, to the subsequent meeting.

Kempton Dunn
Director of Membership & Fellowship Affairs

July 31, 1992

Dear Pete:

As you know, Senate Appropriations have recommended a \$446,000 cut in OSTP's FY93 request of \$4.446 million. While I know that you hear from appropriation supplicants daily I must ask for your help in raising the OSTP appropriation to the figure requested by the Administration and agreed to by the House.

During my tenure as Director of OSTP I believe that we have made significant progress in moving science and technology forward. During this coming year I had planned major projects including creation of an intergovernmental council to facilitate S&T cooperation with state and regional authorities; a FCSET cross cut activity, intra agency, on advanced manufacturing; and utilization of the newly created Critical Technology Institute to expand effective utilization of technology in our private sector. The recommended budget cut — on top of the recommended

Requirement that OSTP pay $\frac{3}{4}$ rather than the present $\frac{1}{2}$ of all detailee's salaries (an additional \$225,000) will very seriously impact our ability to implement this as well as other ongoing initiatives in OSTP.

I hope that you will agree that science and technology initiatives have been among the highlights of the President's record, and we need your help to continue successes in this area. I shall much appreciate any help that you can give us.

With all best wishes

Sincerely yours
Dorothy Bromley
Director - OSTP.

THE WHITE HOUSE
WASHINGTON

July 31, 1992.

Dear Senator D'Amato:

As you know, Senate Appropriators have recommended a \$446,000 cut in OSTP's FY93 request of \$4.446 million. While I know that you hear from appropriation supplicants daily, I would ask your help in raising OSTP's appropriation to the figure requested by the Administration and agreed to by the House.

During my tenure as Director of OSTP I believe that we have made significant progress in moving science and technology forward. During the coming year I had planned major projects including creation of an intergovernmental council to facilitate S&T cooperation with State and regional authorities; a FCCSET cross-cut activity - interagency - on advanced manufacturing; and utilization of the newly created Critical Technology Institute to expand effective utilization of technology in our private sector. The recommended budget cut - on

top of the recommended requirement that
OSTP pay $\frac{3}{4}$ rather than the present $\frac{1}{2}$ of all
detailee's salaries (an additional \$225,000)
will very seriously impact our ability to
implement these as well as other ongoing
initiatives in OSTP.

I hope that you will agree that science and
technology activities are among the
highlights of the President's record and we
need your help to continue successes in
this area. I shall much appreciate any
help that you can give us.

If I can be of any help to you in your
current campaign as a speaker in any
appropriate New York location I would
welcome the opportunity.

With all best wishes.

Sincerely yours
Donnan Bromley
Director - OSTP.

P.S. Next time, I will bring both an
overcoat and gloves!

DDB.

THE WHITE HOUSE
WASHINGTON

April 15, 1992

Dear Mr. Dolan:

This is a very much belated response to your warm letter of February 20 in which you did me the honor of inviting me to address the American Club of Paris during my time in France. I regret to say that the three days that I spent in Paris were entirely scheduled with meetings with senior members of the French Government and the formal sessions of the OECD Ministerial on Science and Technology. Our meetings were very successful but, unfortunately, they left no time whatever for any other activities in Paris much as I would have liked to expand my stay and the scope of my activities.

I have the pleasure of knowing a number of senior people in the French scientific community including Hubert Curien, Francois Kourilsky and Pierre Aigrain and would welcome the opportunity to meet the members of your Club on a subsequent visit to Paris. Unfortunately, at this time, I do not have my next European trip scheduled but, if you would permit me, when I do have this information in hand I would be more than happy to let you know and try to discover whether there might be a mutually convenient time for me to meet with the Club.

With all best wishes and my thanks for your kind invitation.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "D. Allan Bromley", written over the typed name.

D. Allan Bromley

Dear Dr. DuBois:

I was delighted to receive the handsome Hardy Lecture Medal and am much indebted to you for it.

I was honored to have been invited to deliver the 1991 Lecture and appreciated the opportunity to meet so many old friends under such pleasant circumstances. Please convey my special thanks to Ellie Adair for her warm hospitality and her efforts to make this all possible.

With all best wishes,

Sincerely yours,

Dear Dr. Bromley,

It is with great pleasure that I enclose your Hardy Lecture Medal, now mounted in a manner suitable for display or use.

On behalf of the Hardy Memorial Lectureship Committee and the John B. Pierce Laboratory, I would like to express my thanks again for your willingness to be our 1991 lecturer. The Hardy Memorial Lecture is the most important event that the Laboratory hosts and it was an unqualified success. It provided an opportunity for our scientists, members of the Yale community and those with an interest in biomedical research to look into the future.

Sincerely,

Arthur B. DuBois
Professor and Fellow
Chair, Hardy Memorial Lectureship Committee

Dear Professor Dzierba:

Many thanks for your invitation to address the 1992 Annual Meeting of the Brookhaven AGS Users Group scheduled for June 4 and 5 at the Brookhaven Laboratory. Unhappily these dates coincide precisely with the June meeting of the President's Council of Advisors on Science and Technology which I chair. This is a meeting with a very full agenda during which we will be meeting with the President and I regret that I cannot be absent from Washington.

It is a great pleasure for me to hear your plans to evolve your user group to include the forthcoming users of RHIC and I am delighted, after all these years, to see RHIC actually under construction.

With all best wishes,

Sincerely yours,

A handwritten signature in dark ink, appearing to read "D. Allan Bromley". The signature is fluid and cursive, with the first name "D. Allan" and last name "Bromley" clearly distinguishable.

Dear Dr. Bromley:

I am asking you to address the 1992 Annual Meeting of the Brookhaven AGS Users Group to be held on June 4 and 5, 1992 at the Brookhaven National Laboratory. Since the plan is to have our Users group evolve to include RHIC Users, this meeting will be attended by both AGS and RHIC Users. I realize that you are extremely busy and I am grateful for any consideration you can give to this request.

Sincerely,

Alex R. Dzierba
