THE WHITE HOUSE

July 14, 92

Jan Barbara =

Happy Distille Day!

Enclosed here with are photographs taken during the award of the National medals of Technology. I thought that you would wish to put these as well and forward them to the Medals. Best regards. Ann

To W. Lincoln Hawkins

Congratulations and best wishes, *Ed Burl*

THE WHITE HOUSE
WASHINGTON

October 7, 1992

Dear Dr. Grumley:

Thank you very much for your comments on the talk I gave at the Grove; it was a great pleasure for me to be there as well. However, you might have misinterpreted something I said, since the Office of Science and Technology Policy has never been a grant-making agency. Rather, the agency that would be most interested in your retrofit system is the Department of Energy, where R&D support for energy conservation and pollution prevention has risen dramatically in recent years. I would suggest that you contact them, and I wish you the best of luck with your business.

Sincerely yours,

A handwritten signature in dark ink, reading "D. Allan Bromley". The signature is fluid and cursive, with the first name "D. Allan" and last name "Bromley" clearly distinguishable.

EOB Room 358
The White House
Washington, DC 20500

September 24, 1992

Dear Dr. Bromley,

Among your many honors, you can now add Executive of the Year by R & D magazine. Congratulations.

Furthermore, your talk, "Where Goes U. S. Technology?" at the Grove was the best explanation I've heard of the President's policies in science and technology. I've repeated much of the program - including Jose, the bank robber.

At that time, you said that your Office of Science and Technology Policy had grants to make it possible for small business to contribute and compete in technology.

For a short period of time, we have been marketing a patented, AGA approved retrofit System. The patent applies to oil or gas fired appliances, forced air combustion wood burning appliances, coal-fired heating plants and warm-air furnaces boilers and water heaters. We **guarantee** the System will improve the gross heating efficiency of these heating appliances by 25% to 45%.

The main reason for the gain in efficiency is the increased heat transfer caused by slowing the flue gases through the boiler itself. With more heat retained and transferred, stack loss is reduced and this results in a dramatic growth in gross heating efficiency. On a 250 H.P. Cleaver Brooks boiler for a Fortune 100 Company, we have reduced the stack velocity from 4,500 fpm to 200 fpm and increased the thermal efficiency from 55% to 83%.

Many believe that this astonishing reduction in flue velocity could be a major contribution in removing pollutants in the post combustion flue gas clean-up. Nearly dormant polluted gases allow more residence time for wet scrubbers and/or sorbent injection in already existing ductwork. Pollution recapture is greater! With it's application on large or small heating appliances and its present 2 to 2 1/2 year payback, **cleaning the air may be a low cost by-product** for a large number of polluting plants.

Please send forms or other information you require to allow us to apply. Our company is a small business and a minority company.

I hope to hear you again. Perhaps again at the Grove.

Thanks,

James J. Grumley

THE WHITE HOUSE
WASHINGTON

October 6, 1992

Dear Mr. Falcon:

This is a much belated reply to your letter of July 20 which unfortunately was misplaced within the White House mail handling system. Let me first of all thank you for a copy of your paper **Furthering U.S. Industrial Competitiveness Through Department of Energy National Laboratory, Industry and University Partnerships**.

You make a number of excellent points and I should tell you that I have become convinced that with the end of the Cold War and the emergence of the European Community and the Western Pacific Nations as economic superpowers, as well as the many changes that have taken place in our own society it seems to me time for us to rethink the entire question of research and development in the United States.

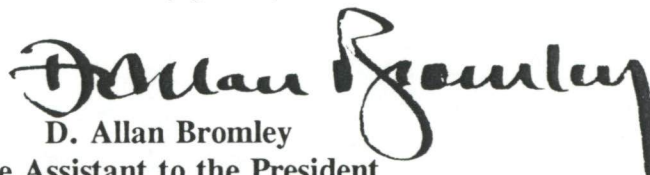

As you know, the remarkable document **Science: The Endless Frontier** produced under Vannevar Bush's leadership in 1946, provided a blueprint for research and development in the United States for the latter half of the 20th Century. It seems to me that the time is now ripe for us to attempt a new look at the entire structure of, support of, and utilization of research and development in this country. If we are even fractionally successful in articulating a vision for the 21st Century as Vannevar Bush was for the latter half of the 20th we will have made a very major contribution to U.S. society and all its aspects. To that end it has been my plan to undertake such an overview of the entire R&D situation very early in the next Administration.

We already have two major studies of research intensive universities underway because I still consider that we make unique demands in this country on those universities, not only for the production of new knowledge but also for the training of the next generation of young people preparing them to use that knowledge in creative fashion. Education remains the foundation on which we build all else in our technologically oriented society and we have failed rather badly at the pre-college levels, although in the Bush Administration I believe we have finally begun to take the appropriate corrective measures. At the same time, while focussing on pre-college, we cannot take for granted the leadership that we have enjoyed since World War II in higher education because the environment in our research universities has changed dramatically in the past few years. It is for this reason that our present studies are underway with the goal of reports around mid-December of this year. The issues involved are too important to be caught up in partisan politics hence, this targeted release date after the election.

It is also quite clear that the role of the Federal laboratories requires reexamination. The roughly \$22 billion that we spend on the more than 700 Federal laboratories represents a very major investment on the part of the tax payer and I am not convinced that the returns from that investment are optimized. The third leg of the triad on which the strength of our science and technology enterprises are based is, of course, the private sector and we look forward to working closely with George Fisher's Competitive Council to provide appropriate input from that sector.

Again, warmest thanks for your note. I expect that we will be back to you as our studies proceed. With all best wishes,

Sincerely yours,

A handwritten signature in dark ink, reading "D. Allan Bromley". The signature is fluid and cursive, with the first name "D. Allan" and the last name "Bromley" clearly distinguishable.

THE WHITE HOUSE
WASHINGTON

October 5, 1992

Dear Nancy:

Many thanks for your note and the copy of Freeman Dyson's book. I had a chance to read it on a recent flight to San Francisco and it is clearly up to Freeman's normal standards of excellence.

From the sound of things you are settling in at ICF and the problem you are addressing concerning the shipment of radio active waste is an extremely important one.

I have not had a chance to talk with Charles Herzfeld in the recent past but he is an absolutely first-class individual and someone who knows the Washington scene backwards and forwards as well as having extensive experience in the industrial world.

Clearly between now and the election my schedule is completely impossible but after that perhaps we can get together to discuss some topics of mutual interest.

In the meantime, warmest best wishes and every success in the work that you have underway.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "D. Allan Bromley". The signature is fluid and cursive, with a large, stylized "D" and "B".

Sept. 11, 1992

Dear Dr. Bromley:

I wanted to drop you a note to say hello, and to give you a bit of an update on my current activities. I've been working for the environmental consulting firm, ICF, for six months now, doing what I suppose could loosely be called science policy work. One project, for example, takes up the transportation of radioactive wastes from the HFBR at Brookhaven through New York City. We're working for DOT, and carrying out a quantitative route risk assessment of alternative routes. It's an interesting project, though not really quantitative enough for my tastes. Not even one integral!

In any case, I'm learning, and writing a lot, and slowly making the adjustment away from research. I recently spent some time at Brookhaven, and while there, met Jack Sandweiss, who was working for awhile with my old research group, the Accelerator Test Facility (formerly headed by my ex-advisor, Claudio Pellegrini). I told him of my meetings with you, and how helpful you have been. We chatted about physics, science policy, science books, etc. We both agreed that the new Freeman Dyson book was worth reading. Hence, because I thought you might enjoy it, and to thank you for your help, I'm enclosing it here.

I've also been in touch with Dr. Charles Herzfeld. I'm so very pleased to be able to talk with him, and have also discovered that he knew my father, when both worked at IIT.

I hope all is well with you, and look forward to keeping in touch.

Warmest regards,
Nancy Felsch

Dear Barbara:

With the events surrounding the awarding of the National Medals of Science and Technology still fresh in my mind, I wanted to let you know how much I enjoyed this year's activities with you. The delightful ceremony in the Rose Garden concluded a series of events that were done with enormous style and elegance.

My staff tells me that your staff, especially Florence Feinberg, were extremely professional and a pleasure to work with throughout the planning process.

This year's ceremony and attendant activities were first rate, and I was delighted to be part of them and to share them with you.

My best wishes,

Sincerely,

D. Allan Bromley

Executive Office of The President
Old Executive Office Building
Washington, D.C. 20506

Dear Dr. Bromley:

I wanted to drop you a note to say hello, and to give you an update on my current job situation. I apologize for the delay in this letter, however things have been rather hectic, with my moving down here and starting a new position all in the same month.

I thought you would be interested to know that I am now working for a private consulting firm in Fairfax, VA, called ICF, Inc. My position is that of Associate. The firm works mainly on a contract basis for the government, with over half of its work coming from EPA. I work with a particular group made up of a physicist, two chemists, a lawyer, and a policy expert. It's rather coincidental that our first project involves a study for DOT on transporting radioactive wastes from Brookhaven Lab through New York City. My job entails doing some of the route risk analysis, which is fairly quantitative, and hence, enjoyable. In this regard, I am reading a book by a physicist from U. of Santa Barbara, H.L. Lewis called Technological Risk, which is very informative. If there is any additional information on the topic of quantitative risk analysis that you are aware of, I would be very grateful if you could pass this along to me.

My thanks to you again, for all your help and encouragement. It's been such a pleasure, and inspiration to meet with you, and your staff there, in particular, your assistant, Marion.

Sincerely yours,

Nancy Forbes

Dear Bob:

Many thanks for your letter of April 27 with its remarkable data concerning the Return-on-Investment in the GM Research Laboratories. I recognize that numbers of this kind are necessarily less than totally precise but this kind of information is of tremendous importance. Specifically I must ask you whether this information is material that I can use in speeches and other public presentations. I would not want to do this without your explicit permission but I assume that you must be as proud of this as anyone.

I welcome the suggestion that I go to Walter Robb of GE because stories of this kind are, as you can imagine, of enormous value in countering nay sayers.

It is always good to talk with you and I look forward to our paths crossing soon.

With all best wishes,

Sincerely yours,

Honorable D. Allan Bromley
Science Advisor to the President
Office of Science and Technology Policy
Executive Office of the President
Washington DC 20506

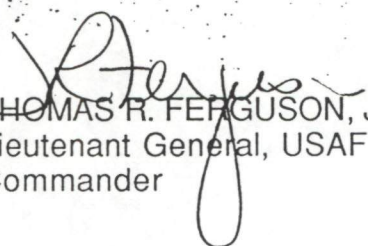

Dear Dr Bromley

In 1992 the Materials Directorate of our Wright Laboratory will celebrate the 75th Anniversary of its founding as the premier organization devoted to the development of advanced materials and processes for United States Air Force systems. This organization has a long history of distinguished accomplishments and an enviable reputation for excellence across the Department of Defense and the nation. I have attached a brief summary of some of their history.

I wish to invite you to participate in this celebration as principal speaker at the banquet which will be held on Thursday, 5 November 1992, at the Air Force Museum located on Wright Patterson Air Force Base in Dayton, Ohio. My office has been in contact with Dr Karl Erb to deal with arrangements.

We look forward very much to your participation and hope that you will be able to work it into your schedule. Thank you for your kind consideration.

Sincerely

THOMAS R. FERGUSON, JR
Lieutenant General, USAF
Commander

THE WHITE HOUSE
WASHINGTON

March 18, 1992

Dear Mr. Freeman:

I am very sorry to tell you that, even though I initially accepted your kind invitation to address the Technical Computing Executive Conference scheduled for April 28-30, 1992, in Palm Springs, California, I must cancel my visit as a result of Presidential scheduling which requires me to remain in Washington on the dates in question.

I had looked forward to participating in your conference and appreciate your thinking of me. I hope that the conference goes well for you.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "D. Allan Bromley". The signature is fluid and cursive, with the first name "D." being small and the last name "Bromley" being larger and more prominent.

THE WHITE HOUSE
WASHINGTON

January 21, 1992

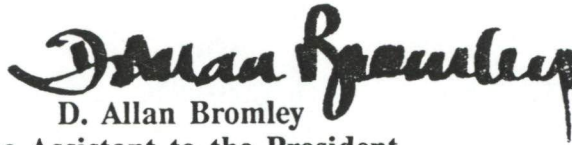

Dear Mr. Freeman:

I am responding to your letter of January 14 in which you invite me to address your Technical Computing Executive Conference scheduled for April 28-30 in Palm Springs, California.

My calendar at the moment does make it possible for me to join you on Thursday, April 30 but, as always, I must caution you that my time is at the disposal of the President. Subject to that caveat, I am delighted to accept your invitation.

Please keep me informed as preparations for the meeting progress. I look forward to seeing you in Palm Springs if not before.

Sincerely yours,

D. Allan Bromley
The Assistant to the President
for
Science and Technology

Subject: 1992 IBM Technical Computing Executive Conference

Dear Dr. Bromley:

On April 28-30, 1992, IBM will hold its annual Technical Computing Executive Conference in Palm Springs, California. The audience will consist primarily of key executives from major corporations in the United States involved in research and development activities. I would like to invite you to address the executives on Thursday, April 30.

The goal of our conference is to display IBM's leadership role in developing and providing scientific and technical computing solutions. Our increased commitment to this area in recent years has resulted in dramatic growth in attendance from year to year. This year we expect to host approximately 500 customer executives.

As briefly mentioned, the audience will be comprised primarily of vice-presidents and directors of research/engineering, chief scientists, and university deans/departments chairs. Your thoughts on our government's science and technology focus, federal initiatives, and progress regarding the HPCC challenge will be of vital interest to them.

I've attached a brief description of our conference for your perusal. I sincerely hope that you will be able to join us in Palm Springs.

1992 IBM TECHNICAL COMPUTING EXECUTIVE CONFERENCE

The 1992 IBM Technical Computing Executive Conference will be held in Palm Springs, CA, on April 28-30.

The conference will feature an outstanding series of general session speakers, top quality elective sessions, and the demonstration of many leading edge technical computing application technologies and solutions.

AUDIENCE: Vice-presidents and directors of research/engineering, deans and department chairs, chief scientists and other end user executives from corporations, research universities, and institutions who have responsibility for technical, scientific or numerically intensive computing applications. Key trade press and consultants for this industry will also be present.

Applications solutions to be discussed in detail will include the following:

- Petroleum Exploration/Production
- Engineering Analysis
- Computational Chemistry
- Mathematical Sciences
- Earth Sciences
- Electronic Analysis
- Physical Sciences
- Computer Assisted Software Engineering (CASE)

Key technologies discussed and demonstrated will include:

- Advanced Technical Workstations
- IBM Supercomputer Solutions
- System and Workstation Clustering
- Technical Computing Languages
- Image Processing/Visualization
- Open/Heterogeneous Systems
- Data Archival/Storage Management

THE WHITE HOUSE
WASHINGTON

February 7, 1992

Dear Herb:

I apologize for any misunderstanding that may have occurred regarding my participation in the Inaugural Ceremony of the World Space Congress scheduled for August 28 to September 5, 1992.

Unfortunately I will be out of the country on August 31 and will, of course, be unable to introduce Dr. Boorstin as you had requested.

With regard to your request that the President attend the Inaugural Ceremony, his scheduling office asks that your request be made about three months prior to the event.

I appreciate your thinking of me and hope that your request to the President is successful.

Sincerely yours,

A handwritten signature in dark ink, appearing to read 'D. Allan Bromley', with a long horizontal flourish extending to the right.

D. Allan Bromley
The Assistant to the President

American Institute of Aeronautics and Astronautics
370 L'Enfant Promenade, Southwest
Washington, D.C. 20024

1/21

The answer re having the President participate is, of course, the same....too early for consideration.

Are you interested in making brief remarks and introduce Dr. Boorstin on August 31?

Your guidance please.

Marian

*Will be out of
the Country
on Aug 31.

Scheduling asked them to renew their request closer to the event.

It appears that these people are misguided. They also are asking DAB to give brief remarks.*

Dear Dr. Allan:

DAB disagrees.

You have kindly agreed to help us secure the presence of the President in the Inaugural Ceremony of the World Space Congress, and we are most grateful. Although we know that we are not going to get an answer for several months, we would like to indicate in our third announcement of the Congress that he has been invited and print his photograph, which we will need by December 15. Could we ask you to get us such a photograph?

I would also like to invite you to make some brief remarks at the Inaugural * Ceremony and introduce Dr. Boorstin, who will give the keynote address on the philosophy of exploration and discovery. We need by December 15th the following from you:

1. A black and white glossy photograph, head and shoulders, any size.
2. The way you would like to be listed; i.e., your name and title.
3. A short biography.
4. Your preferred address, telephone, and fax.

Again, we are delighted to have your participation.

Sincerely,

Herb

THE WHITE HOUSE
WASHINGTON

May 6, 1991

Dear Herb:

Thank you for your letter of April 25 bringing me up to date on International Space Year and the planned World Space Congress.

I believe that the President will very much want to address the Congress. However, because the dates are so far in the future, it would not be effective to send a request to the scheduling office this early. I suggest that we wait until the spring of 1992 and formally ask the President to address the opening plenary session.

I will hold this letter until the spring and would ask that you write again at that time to remind me to seek a commitment for August 31, 1992.

My best wishes,

Sincerely

April 25, 1991

Dr. D. Allan Bromley
Office of Science and Technology Policy
The White House
Washington, D.C. 20500

Dear Allan:

To celebrate the 500th anniversary of the landing of Columbus in the New World in the context of the Space Age, 1992 has been designated the International Space Year. COSPAR, The Committee on Space Research of the International Council of Scientific Unions and IAF, the International Astronautical Federation, will organize a World Space Congress, to be held in Washington, D.C., August 28 to September 5, 1992. The host organization is the American Institute of Aeronautics and Astronautics (AIAA). Gerald A. Johnston, President of McDonnell Douglas Corporation, is General Chairman of the meeting. I represent COSPAR and James J. Harford represents IAF on the International Program Committee.

The WSC will be an unprecedented gathering of more than 3,000 scientists and engineers from all countries having active participation in space programs. It will mark the first joint meeting of COSPAR and IAF, the two leading international organizations in the fields of space science and applications.

Because of President Bush's steadfast support of the exploration of space, the organizers of the meeting would be highly honored to have him address the formal opening plenary on Monday morning, August 31, 1992 at the Washington Convention Center. The WSC will offer a fine opportunity for the President to reaffirm his policy during the International Space Year before a gathering of many of the world's most distinguished space scientists and engineers, as well as members of Congress, officials of scientific and technical agencies and foreign diplomats.

I realize that a firm commitment is not possible at this early time, but earnestly ask you to urge the President to place it high on his agenda of public appearances. He could provide an inspiring message to set our future directions in space.

With best regards,

Sincerely,

Herbert Friedman

SPECIAL INSTRUCTIONS:

THE WHITE HOUSE
WASHINGTON

December 10, 1992

Dear Paul:

I am forwarding herewith a preliminary report on a study carried out by an OSTP consultant, Mr. Willis Shapley, now retired after extensive experience at OMB/BOB and AAAS.

I asked Mr. Shapley, as in the past two years, to examine the FY 1993 appropriations in order to obtain a measure of the amount and kind of earmarks as well as how these have changed in recent years.

It bears emphasis that this report is still in a preliminary state and that reasonable persons might well differ over definitions and identification of specific earmarks. However, the same criteria have been used for all three years during which Mr. Shapley has carried out this analysis so that the trends are clear and credible.

As the table on page 2 of the summary shows, while academic earmarks have remained reasonably stable, nonacademic ones have increased rapidly so that there has been a dramatic increase in the total resources earmarked.

I am sending you this preliminary report because I thought that you would find the results both interesting and distressing.

Sincerely yours,

D. Allan Bromley

Dear Ms. Guerrero:

On behalf of the President, it gives me great pleasure to inform you that you have been selected for a Presidential Award for Excellence in Science and Mathematics Teaching. Through your outstanding accomplishments as a teacher, you exemplify the excellence this program is designed to recognize and encourage. You have both the President's and my warmest congratulations and appreciation for your vital contributions to the future of this Nation.

As The Assistant to the President for Science and Technology and Director of the Office of Science and Technology Policy, I am acutely aware of the importance of attractive high quality education in science and mathematics for all students. I am also fully aware of the central role of the teacher in that education. No profession is more important to the future of science and mathematics in this country than yours. For that reason, I am delighted to have the honor of inviting you to participate with your fellow awardees as representatives of the outstanding science and mathematics teachers of this Nation, in a week of activities that we have planned.

You are invited to spend the week of March 9, 1993 as guests of the President, here in Washington, to participate in a series of activities designed to recognize each of you personally for your teaching contributions, and to focus public attention on the importance of science and mathematics in our schools.

You will be notified shortly by staff of the National Science Foundation and the National Science Teachers Association with more specific information on your visit to Washington. I shall look forward to meeting you personally.

Sincerely,
