THE WHITE HOUSE
WASHINGTON

September 23, 1992

Dear Alan:

Many thanks for the photographs from my recent visit to Argonne; they provide a wonderful memento of the occasion.

It was a very real pleasure to have the opportunity to get away from Washington and to be able to see some of the excellent research that you have underway at the laboratory. It was particularly pleasant to be able to chat with you about so many topics during the luncheon and as I mentioned there, I was much impressed with the programs to which I was exposed. You are to be congratulated for the outstanding job that you have done in changing the entire ambiance in Argonne into one that is fully cognizant of the laboratory's national responsibilities.

I was pleased also to receive the publication concerning your educational programs where again you are playing a leadership role.

On a more personal note I wonder if you have made your decision yet concerning the environmental position in your office that we discussed during my visit. Whenever your travels bring you to Washington please do let me know. I would be delighted to have an opportunity to take you to lunch at the White House Mess.

With all best wishes,

Sincerely yours,

D. Allan Bromley

Office of Science and Technology Policy and
Assistant to the President for Science
and Technology
Old Executive Office Building
Washington, D.C. 20506

Dear Allan:

It was a pleasure to have you at Argonne again, to show you some of our work in progress and to give our staff a chance to hear your colloquium address.

To have a knowledgeable, interactive scientist like you talk with our people helps to renew faith throughout the Laboratory that science is well represented in the Washington halls of power. I hope you could sense that, as I did, especially in the question and answer period following your colloquium.

Enclosed are a few photo mementos of the day. I'm also including a publication describing our educational programs which was published in July, 1991. On the basis of our discussion, we are re-examining the distribution to make sure we cover any areas that we missed on the first distribution.

Thank you again for coming to Argonne.

Very truly,

Alan Schriesheim
Director

Dear Chauncey:

Many thanks for your letter of April 24 with its enclosed letter to President Bush which I shall certainly pass on to him. The mail has been running at a very high level concerning the UNCED Conference with the Union of Concerned Scientists, for example, delivering 10,000 letters urging the President to attend the conference and a great many others taking precisely the opposite view.

Unhappily, the situation here is a complicated one and the President has not yet made a final decision concerning his participation in the conference. Rest assured, however, that we in the Bush Administration are determined that we will get a resolution at the conference that will avoid the north/south polarization that could be devastating.

The points you make in your letter are well taken and I am sure that the President will consider them very carefully.

With all best wishes,

Sincerely yours,

D. Allan Bromley

April 27, 1992

Dear Dr. Sandvold:

Many thanks for your very gracious letter of April 9. I was delighted to have had the opportunity to meet with you during your visit to Washington but regret that I did not have more time.

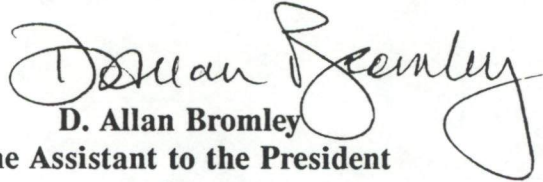

I was glad to learn that you felt that your visit with many of my colleagues here in Washington had been profitable and that you were able to report that result to Professor Nilsson and his colleagues in the Copernicus Program.

I was pleased by your remarks concerning Minister Heinz Riesenhuber of Germany because I have had the pleasure of working with him on a large number of topics and have found him to be a very interesting and able individual as well as an outstanding representative of German science and technology. I know that he is interested in having input from states like Norway that are not yet formally part of the European Community.

I am, of course, very much in favor of the point that you raise in your letter concerning the importance of informal contacts on the working level and would be happy to work with you and your colleagues in Norway and mine in the Washington agencies to establish better communications in whatever form seems most appropriate. I would be very interested in hearing from you with your thoughts on what an appropriate mechanism would be that would guarantee the appropriate level of communication without requiring too much of a formal overburden of bureaucratic structure.

I was delighted to have the chance to meet you and would ask that you convey my warmest best wishes to Jan Nilsson and accept them yourself.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "D. Allan Bromley". The signature is fluid and cursive, with the first name "D." being small and the last name "Bromley" being larger and more prominent.

Dear Ken:

Many thanks for sending me the excellent book **Discovering the Brain** that has been produced by Sandra Ackerman for the IOM.

As yet I have only had an opportunity to glance through it but I look forward to reading it in much more detail. It would seem that it has struck just the right balance between hard science and public accessibility.

With all best wishes,

Sincerely yours,

Dear John:

It was indeed a pleasure meeting you at Queen's in the midst of what turned out to be a real blizzard. I was delighted to get the copy of the **Canadian Standard for Risk Analysis** and have made it available to the members of the committee that I have formed under our Federal Coordinating Council for Science, Engineering, and Technology that is currently looking at risk assessment across all the agencies of the US Government. I also must thank you for the copy of **Manging Risk in the Public Interest** by Niels Lind, and others. It is indeed consistent with the views that my colleagues and I in the Bush Administration hold with respect to global climate change.

I hope that our paths cross in the not too distant future but, in the meantime, warmest best wishes both personally and for the success of your unique institute.

Sincerely yours,

D. Allan Bromley

Dear Allan:

It was a pleasure meeting you at Queen's last month. I found your talk on global warming very stimulating. I promised to send a copy of the Canadian Standard for Risk Analysis (enclosed). It provides for common risk terminology for health, environment, power, chemicals, etc. It may assist you with your need to find a common basis for risk management. Niels Lind, one of our members, was the chair of the Standards Committee.

I also enclose a copy of Managing Risk in the Public Interest by Niels Lind and others. It proposes an approach to risk management which is consistent with the U.S. policy on global warming which you discussed in your talk.

If Niels or I can be of further service, please let us know.

Yours truly,

John Shortreed
Director
Institute for Risk Research

Dear Dr. Skolnikoff:

I am very sorry to have to tell you that, even though I initially accepted your kind invitation to speak at the conference **University Interactions with Industry and Foreign Governments** scheduled for April 9, 1992, at MIT, I must cancel my visit as a result of Presidential scheduling that requires me to remain in Washington on the dates in question.

I had looked forward to coming. I hope that the conference goes well.

RECEIVED
91 OCT 16 4 8 : 39
OFFICE OF THE
DIRECTOR

Dear Allen:

One of the major issues confronting American research universities such as MIT is the nature and extent of their research and educational interactions with industry, universities and governments of foreign countries. The subject has become an important political matter in recent years, especially as concern has risen about the nation's technology competitiveness.

We are planning a one-day conference on April 9, 1992 to bring the range of views before the community, and would be very pleased if you were able to join us and participate as a panelist on the program. The conference will have as its starting point a study on this subject completed in May of this year by a faculty committee under the direction of Professor Eugene B. Skolnikoff; a copy is enclosed in the event you have not seen it.

The agenda of the conference will provide for expression of the views of industry, of the American government, of foreign industries or government, and of American universities. Professor Skolnikoff will be co-chair, along with Professor Richard Lester, who was executive director for an earlier MIT study on productivity of American industry that resulted in the book Made in America, and is currently director of the MIT Industries Project.

We would hope that you could present in roughly twenty minutes how you see the various aspects of this issue from your perspective, and what you believe our policies should be. There would then be opportunity for discussion among the panelists and questions from the audience. No formal paper is necessary, though a paper would be useful in the event it proves feasible to publish the proceedings.

The conference will begin at 9 AM on April 9, so that it is advisable to arrive the evening before. No formal session is planned for the evening of April 8, but we will assemble as many of the participants and invited guests as are present for an informal dinner; we hope you can join us. The conference will finish by 5:30 PM on April 9. We can, of course, provide transportation and local costs if that is necessary.

My colleagues and I hope that you will be able to join us for what ought to be a particularly interesting occasion and one of considerable importance for us.

Sincerely yours,

A handwritten signature in cursive script, appearing to read "Chuck".

March 25, 1992

Dear Ed:

Unhappily I have to be in San Diego and so cannot join all your other friends in honoring you for your twenty years of effective and devoted service to Yale physics and to Yale physicists.

It is difficult to believe that it is now that many years since you, Irv Pollack and I sat in the Chairman's office in Sloane and discussed the possibility of your joining the Department.

Since the day you arrived it has been a very real pleasure having you and Pepita as members of the Departmental family. You have made major contributions to the education of a very large number of Yale students now spread around the world and have made teaching those students a much easier and more rewarding process for me and all my faculty colleagues in the Department.

Your ready cooperation, technical skills and, I must say, your unflagging good humor--often in the face of provocation--have established a benchmark for service to the Department against which all your successors will find themselves measured.

I have much enjoyed our personal interactions over the years and want to take this opportunity to add my thanks to that of my colleagues and to wish you and Pepita a very long, happy, and rewarding time together. Deep down, I have a suspicion, however, that you may flunk retirement--and if so, let me also wish you every success and happiness in whatever you next undertake.

With warmest regards to both you and Pepita.

Sincerely,

A handwritten signature in dark ink, appearing to read 'D. Bromley', with a stylized flourish at the end.

THE WHITE HOUSE
WASHINGTON

January 16, 1992

Dear Dr. Sward:

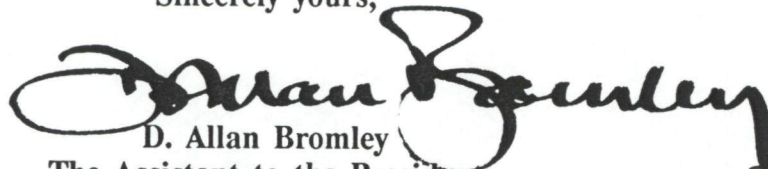

Many thanks for sending me a copy of your publication entitled **Mathematical Scientists at Work** and let me quickly congratulate you on the excellence of the booklet.

It is hard to overestimate the importance of attractive, easily accessible presentations of this kind in terms of reaching a broad audience which has a remarkable degree of immunity to most communications relating to mathematics, science, engineering or, for that matter, technology.

You have presented mathematicians at work in a highly attractive readable fashion and I hope that every school in the Nation gets a copy of this publication. Indeed, I only wish that there was a comparable document for physics! And I know that this displays a deplorable parochialism.

Again, my thanks and congratulations.

Sincerely yours,

A handwritten signature in black ink, appearing to read "D. Allan Bromley", written in a cursive style.

D. Allan Bromley

Washington, DC 20506

Dear Dr. Bromley:

The Mathematical Association of America is pleased to provide you with the enclosed copy of *Mathematical Scientists at Work*, a booklet showcasing a few of the diverse occupations undertaken by holders of degrees in the mathematical sciences. This special distribution is made possible by a dissemination grant to the MAA from the National Science Foundation.

This booklet was developed by the MAA to emphasize the value of the mathematical sciences to a wide variety of careers. Too many students, especially those from underrepresented groups, lose challenging employment opportunities by abandoning the study of mathematics before knowing the real consequences of doing so. The result is a shortage of graduates with appropriate mathematical education at all degree levels, from technical workers in industry through research specialists.

The MAA was founded in 1915 to promote the interests of mathematics, especially at the collegiate level, and has a membership of 33,000 mathematicians, mathematics teachers, and students. It is engaged in a broad range of activities to promote excellence in teaching mathematics, cultivate mathematical talent, and enhance public awareness of mathematics.

I hope you find *Mathematical Scientists at Work* informative. Please feel free to contact me if you would like further information on the MAA's efforts to encourage students seeking careers in the mathematical sciences.

Sincerely,

Marcia P. Sward
Executive Director

Dear Mike:

I was delighted to get your letter bringing me up to day on you career since we worked together on the WHSC Panel on the Health of Universities and Colleges and I hope that all goes well for you in your consulting activities.

It would indeed be great to get together again and I shall certainly keep your name on file here because from time to time we do find it essential to get outside help in some of our activities and biotechnology is obviously one of the growth fields.

I have often wondered whether during your days with John Marcum at OECD you ran into a former student of mine at Yale, Nancy Field, who spent two years with John working on some aspect of biotechnology as one of the Fellows or interns that the OECD had made available to John for his tour of duty.

If your travels ever bring you to the Washington area, please give me a heads up so that we can arrange to have lunch together. It would be great to see you again and to catch up on details.

With warmest best wishes for every success in the new year,

Sincerely yours,

D. Allan Bromley

Dear Allan:

Relaxing in front of the fire with the January 1992 issue of Scientific American yesterday, I was pleased to find your picture and an article on your numerous achievements as Science Advisor. This inspired me to begin the new year by dropping you a line.

You may recall that following my work with you on the WHSC University Panel I went to Paris to work for John Marcum at the OECD. While there I helped John set up an industrial consortium called the European Institute of Technology, now based in Italy, spending most of my time organizing the biotechnology program, which I subsequently ran full time. I then returned to the US, and took an MS in Biochemistry at UCLA and an MBA at the University of Chicago, the latter of which I finished last June. Since then I have been on my own doing marketing and financial consulting for biotechnology companies here in California.

With this rather curious mix of experience and education, I now find myself able to contribute my skills and perspective to a wide range of activities. It occurred to me in running across the article that from time to time you may need some assistance on a consulting basis, and that in areas related to biotechnology, international science and technology issues, and a number of others, I might be able to help. Of course I would be delighted to contribute to your efforts in any way I can, and would relish the prospect of working with you again.

Please accept my best wishes for the new year, and feel free to contact me if I can be of service.

Sincerely,

Michael J. Schwartz

FILE: P-INVITATION-SPEECH

THE WHITE HOUSE

WASHINGTON

January 10, 1992

Dear David:

I am responding to your letter of December 23 in which you raise the question of a possible Allan Bromley chair in Science Policy.

Let me say at the outset that I am, of course, very much honored that this proposal has surfaced at all but let me also say that, at least by U.S. standards, it is perhaps somewhat premature. I do not know of a single case where a named endowed chair has been established before the person named was either deceased or perilously close to that situation. Any rumors that you may have heard to the effect that I was in either of these conditions are also, of course, premature.

Given the intense competition for such funding among American colleges and universities, I would also imagine that it would be extremely difficult to raise funds for such a chair in the U.S. for its establishment outside of the country.

My first conclusion then is that, although the idea obviously has very attractive features as far as I personally am concerned, I am afraid that it somewhat premature.

I congratulate you on the establishment of your School of Policy Studies because far, far, too little has been done in academia in this vitally important area. Such schools have much to contribute to national well-being by giving some longer range strategic thought to the issues involved than is typically possible in the actual circles of government where brush fires all too frequently take precedence.

Let me say finally that, for what it is worth, my experience in raising funding for endowed chairs, such as the Henry Ford II one that I currently hold (on leave) from Yale, suggests that it is much more probable to obtain the necessary funding from the appropriate single individual than as a collection taken up from a broad spectrum of individuals. The going rate at Yale at the moment is about \$4 million dollars for a fully funded endowed chair and I would be interested in knowing what the equivalent number is in Canada.

I shall give this question some further thought and when I see you at the end of February we can perhaps discuss it at a little greater length.

Let me emphasize that I am honored by the thought and let me take this occasion to wish you a 1992 that is happy, healthy and rewarding in every respect.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "D. Allan Bromley", with a stylized, cursive script.

The White House
Washington, DC 20506

Dear Allan,

There is an idea which several of us have been mulling over here at Queen's, and I am emboldened to approach you directly on it.

We have recently established a School of Policy Studies and we are expecting it to stimulate work on policy issues in a number of key areas. One of these is science policy. It is an area in which Canada has been woefully weak and in which we should be establishing better international research links. The University has some very good people in both policy studies and in some of the policy aspects of science, but we clearly need a chair to establish leadership.

You are one of our most distinguished graduates. You have emerged as one of the foremost advisors on science policy. We have been wondering what the chances are of raising the funds for an Allan Bromley Chair in Science Policy. We do not know whether you would lend your name to this chair. Since funding would most likely have to be secured in the United States we are not sure who to approach.

I would welcome your honest views on this matter. If it is easier to telephone rather than write, my telephone number is 613-545-2201.

With very best wishes.

Yours sincerely,

A handwritten signature in dark ink, appearing to read "David C. Smith".

Vice-Chancellor

THE WHITE HOUSE
WASHINGTON

January 3, 1992

Dear President Swygert:

Many thanks for your warm letter of December 20 and your invitation to spend some additional time surrounding the May 17 commencement when I might give a seminar or public lecture. I regret that I must tell you that I am completely committed both on the 15th and the 18th of May and I suspect that your student body would not be particularly interested in a lecture on Saturday, the 16th.

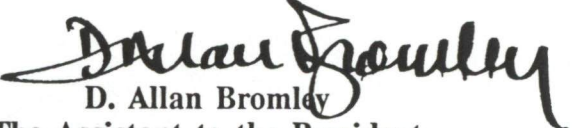

My present plans call for me to come to Albany directly from Colorado on the morning of the 16th and to return to Washington sometime following the commencement activities on the 17th. Should you feel that there would be anyone interested in either a seminar or lecture on the afternoon of Saturday, May 16th, I would be more than happy to provide one, of course.

Let me again say how pleased and honored I am and look forward to becoming a member of the University at Albany family and I am deeply grateful to you and to Professor William Lanford and his colleagues for making this possible.

As we get closer to the actual event, I would welcome information from you concerning such items as whether I would need to bring my own academic gear or whether that will be provided at the commencement.

Let me take this opportunity to wish you and your family a very happy, healthy, and rewarding 1992.

Sincerely yours,

D. Allan Bromley

Dear Chauncey:

Many thanks for sending me a copy of your paper **Climate Projection: Risks and Strategies**. I very much enjoyed it, find myself very much in agreement with the thrust of your arguments, and am making copies of the paper available both to Hank Habicht, who is the Deputy Administrator of EPA and Chairman of the Risk Assessment Working Group under the Federal Coordinating Council, as well as to my Assistant Director for the Environment, Dr. Nancy Maynard, who interfaces between my office and all the global climate change research activities that are now underway. I know that these people will also find this an excellent piece of work and I congratulate you on it.

Let me take this opportunity to wish you a 1992 that is happy, healthy, and rewarding.

MAIL ROOM

Dear Dr. Bromley:

Because of its pertinence to the current development of global policy on climate warming, you may be interested in the enclosed paper prepared for presentation at the Society of Risk Analysis meeting on December 10. The first part deals with the process of risk analysis and strategic choices, and the second with an illustrative analysis of the probabilities of degrading global habitability for various strategic options. The second paragraph of the abstract states the following:

"This illustrative exercise suggests that with present uncertainties, the probability of a serious degradation of global habitability by the middle of the next century is modest in every case (18% or less). This probability would halved by mandating constraints now, but would be further reduced if such action awaited the results of the global research program. The very large cumulative global cost estimated to result from mandated constraints (sufficient to prevent CO₂ induced climate warming) emphasizes the apparent merit of awaiting research findings first. Recognizing the judgmental nature of such probability and cost estimates, this analysis illustrates the magnitudes of the factors pertinent to strategy choices."

The final paragraph of the paper concludes that:

"In the time frame of the next half century it is plausible that we face feasible accommodation rather than catastrophe, and that we have the time to fill the gaps in our knowledge of the biosphere and the consequences of alternative strategies. This implies, of course, that we will use this time for intensive biosphere research, for stimulation of energy system efficiency, for development of low emission and nonfossil technical options, for study of long-range alternatives for climate modification, and for building the collaborative framework for international cooperation."

Although this study was intended to be illustrative of a decision-making process, I believe the probabilities presented are reasonable and defensible. As this is an initial exploratory effort, I would appreciate any suggestions.

Sincerely,

Chauncey Starr
President Emeritus

Dear Dr. Bromley:

Please accept this letter as an invitation to speak at Allen-Bradley's 1992 Annual Innovation Awards Dinner, September 10th at the Allen-Bradley Headquarters, Milwaukee, Wisconsin. Attached, please find the tentative agenda for this event. The audience will be Senior Executives of our parent company, Rockwell International and Allen-Bradley and Engineers/technical personnel comprising an audience of approximately 120-140.

This Awards Dinner is non-commercial. The purpose of this event is to honor those Engineers and technical personnel recognized for achievements in patents and proprietary innovations and significant contributions to achieving manufacturing excellence.

We would be extremely honored if you could attend and share your thoughts on the importance of science and technology, teamwork and achieving manufacturing excellence in the United States and abroad.

If for some reason you are unable to attend, I would appreciate a reply at your earliest convenience. I may be reached at (216) 646-3005.

Sincerely,

ALLEN-BRADLEY CO.

THE WHITE HOUSE

WASHINGTON

August 11, 1992

Dear Gene:

I have just nominated J. Thomas Ratchford for membership in the Council on Foreign Relations and would much appreciate it if you would be good enough to provide a seconding letter on Tom's behalf to:

Mr. Kempton Dunn
Director of Membership and Fellowship Affairs
Council on Foreign Relations, Incorporated
58 East 68th Street
New York, New York 10021

For your convenience, I am enclosing herewith a copy of a recent curriculum vitae that Tom prepared. As you know, the Council's membership group in particular is interested in international experience and the letters are particularly helpful when they contain some personal experience or anecdote that might add to the formal sort of material that usually comes to the committee with the nominating initiative itself.

Tom has done an outstanding job as my Associate Director for Policy and International Affairs and I believe that he would be a very effective and interesting member of the Council on Foreign Relations. Your support would be much appreciated.

With warmest best wishes,

Sincerely yours,

D. Allan Bromley
The Assistant to the President
for
Science and Technology

Enclosure

Dr. Eugene B. Skolnikoff
Center for International Studies
Massachusetts Institute of Technology
E51-228
77 Massachusetts Avenue
Cambridge, Massachusetts 02139

NAS Condensed Matter Screening Panel:

E. Abrahams, G. Ahlers, G. Benedek, D.A. Bromley, M. Cohen, B. DeWitt, E. Hahn, B. Halperin, P. Hohenberg, C. Herring, C. Jeffries, C. Kittel, W. Knight, W. Kohn, D.A. Lee, P. Martin, D. Osheroff, A.W. Overhauser, D. Pines, J. Reppy, R. Richardson, D. Scalapino, R. Schrieffer, F. Seitz, C. Slichter, H. Suhl, M. Tinkham

Colleagues:

Enclosed is a screening panel ballot. R. Laughlin and R. Ferrell, both having received more than 40% on last year's informal ballot of Section 13, will appear automatically on this year's. I have included their names on the ballot since our rankings may be taken into account by the Class Membership Committee, which prepares the (final) Preference Ballot.

You may vote for additional write-ins on this ballot. Please rank not more than seven, in numerical order, beginning with 1 for your first choice. I will score, as in the past, as follows:

First	5 points
Second	3 points
Third	2 points
Others	1 point

If clear choices emerge on this ballot, I will so inform Dan Kleppner, and I will solicit supporting material from those of you who appear to be most suitable to prepare it. If clarity is not achieved on this ballot, I will prepare a second one. Please indicate where you may be reached between now and August 15.

I need to receive your ballots by August 3. Please send them to:

D.J. Scalapino
Department of Physics
University of California
Santa Barbara, Ca. 93106-9530

You may also send e-mail to me via leslie@spock.physics.ucsb.edu.

THE WHITE HOUSE
WASHINGTON

July 31, 1992

Dear Senator Stevens:

As you know, Senate Appropriators have recommended a \$446,000 cut in OSTP's FY93 request for \$4.446 million. While I know that you hear from appropriation applicants daily I would ask for your help in raising OSTP's appropriation to the fig. we requested by the Administration and agreed to by the House.

During my tenure as Director of OSTP, I believe that we have made significant progress in moving science and technology forward. During the coming year I had planned major projects including the creation of an intergovernmental council to facilitate S&T cooperation with state and regional authorities; an interagency FCCSET cross cut on advanced manufacturing; and utilization of the newly created Critical Technology Institute to expand effective use of technology in our private sector. The recommended budget cut will very

Seriously impact availability to implement these as well as other ongoing initiatives in OSTP. — particularly when it comes on top of the recommendation that OSTP pay $\frac{3}{4}$ rather than the present $\frac{1}{2}$ of all detailees' salaries (an additional \$25,000).

I hope that you will agree that science and technology activities have been among the highlights of the President's record and we need your help to continue successes in this area. I shall very much appreciate any help that you can give us.

I had the great pleasure of visiting your state very briefly a few months ago and it always was enormously impressed with your spectacularly beautiful real estate!

With all best wishes.

Sincerely yours
Dorian Smiley
Director OSTP

THE WHITE HOUSE
WASHINGTON

June 25, 1992

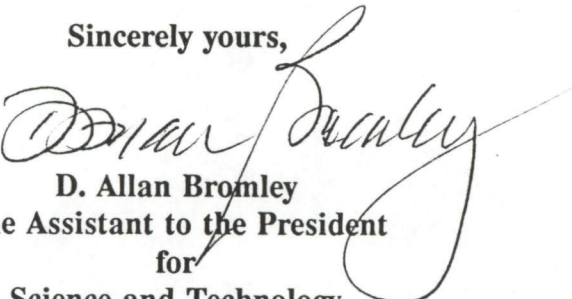

Dear Messrs Sullivan and Rossotti:

Thank you for your kind letter of May 13 inviting me to be the keynote speaker at the Fifth Awards for Achievement in Managing Information Technology scheduled to be held on November 10 in New York City. I apologize for the much belated response.

Because my schedule has become increasingly consumed with election year activities as well as my regular duties, I must regretfully decline.

Thank you for thinking of me. With best wishes,

Sincerely yours,

D. Allan Bromley
The Assistant to the President
for
Science and Technology

THE WHITE HOUSE
WASHINGTON

July 6, 1992

Dear Mr. Schrote:

Thank you for your letter of June 16. I have looked into the situation regarding the New York Times article, and have the following observations.

Dr. Tucker is a well-respected biologist, with Masters and Ph.D degrees from the College of Forestry at Colorado State University, and substantial expertise in ecosystem studies. He has been one of the world leaders in the scientific community in the study of ecosystems using remote sensing techniques. The methods used to conduct the study in question are straightforward, and have previously been presented in international scientific meetings, most recently the World Forest Watch Conference in Sao Jose Dos Campos, Brazil. Questions about the factual basis of the research study can most profitably be pursued by independent analyses of the data. I understand that the Department of the Interior has requested the data, and that Dr. Tucker sent them to Mr. Allan Watkins, Chief, National Mapping Division, USGS, on June 22, 1992, to be forwarded and reviewed by experts at the Eros Data Center.

I note your concern over ethical issues. As is usual in any scientific study, the analyses in progress have been discussed with colleagues in open scientific meetings well before the UNCED conference, and as a result of such discussions, the New York Times reporter became aware of the work in late April or early May. Therefore, the timing of publication was clearly under control of the New York Times, and not due to any scientist's personal political agenda.

The ethical issue of most concern is that working scientists not be intimidated from discussing their methods and results in the spirit of full and open exchange of information, because of concern, or potential concern, over the possible implications of the results. I am sure you will agree that scientists must have the freedom to discuss their research in open scientific

forums without fear that reaction to media reporting will adversely affect them. The scientific community will ultimately be the arbiter of the factual reliability of Dr. Tucker's research, and the implications of his findings.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "D. Allan Bromley", with a stylized, flowing script.

D. Allan Bromley

Dear Sue:

I am so terribly sorry to learn of your son's death. I know that there is really nothing that anyone can say at such a sad time that is of much help. But I do want you to know that you and your wife are in my

thoughts and prayers.

If there is any way in which I can be of help, please do let me know.

Sincerely
Allan

MEMORANDUM FOR WILLIAM SITTMAN

FROM: D. ALLAN BROMLEY *D. Allan Bromley*
SUBJECT: TRAVEL TO ISRAEL, JORDAN AND EGYPT

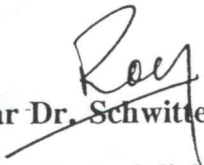

PURPOSE. To inform you of my planned travel to Jerusalem, Israel; Amman, Jordan; and Cairo, Egypt.

INFORMATION. I will travel to the Middle East June 28 - July 5, 1992. In Jerusalem, I will speak at the U.S.-Israel Binational Science Foundation (BSF) Symposium in celebration of their 20th anniversary. The symposium addresses regional cooperation in science and technology. In conjunction with the visit, I will travel to Amman, Jordan and Cairo, Egypt, following the visit to Israel, to meet with the Science and Technology Ministers.

THE WHITE HOUSE

WASHINGTON

May 21, 1992

Dear Dr. Schwitters:

I am delighted to hear that you have agreed to join us for the meeting of the President's Council of Advisors on Science and Technology (PCAST) on Thursday, June 4, 1992. As you are aware, the PCAST was established by the President to provide him with private sector advice on science and technology issues of national importance. For your convenience, I have enclosed a list of the PCAST members along with the Agenda for the June 4 meeting.

If you can provide us with handout materials by Friday, May 29, we will include them in our briefing books. Finally, please note that the meeting will be open to the public and we expect that 10 to 15 members of the press will attend.

My office will be in contact with you shortly regarding your travel arrangements. If you should have further questions regarding the meeting, please feel free to contact Dr. Alicia Dustira, Executive Secretary for PCAST, at (202) 395-4692.

The PCAST and I look forward to seeing you on June 4.

Sincerely yours,

Dr. Allan Bromley
Assistant to the President
for
Science and Technology

THE WHITE HOUSE
WASHINGTON

July 16, 1992

Dear Michael:

Many thanks for your letter of July 9 with all the interesting information about your proposed program in nuclear astrophysics. I was particularly impressed by the research plan document that you enclosed because it gives a very concise, thoughtful, and logical program for the absolutely essential early work in converting the Holifield facility to radio active beam work.

I shall be happy to write to the people at Oak Ridge in support of your application for a DOE Distinguished Postdoctoral Research Program Fellowship.

For someone interested in experimental nuclear physics you have in a relatively short time obtained a most impressive array of experience working with Peter Parker, Charlie Barnes and Willy Fowler. Your experience while working with Peter Parker at Argonne, Princeton, Yale, Washington, Seattle, and Toronto also will stand you in very good stead as you develop your career further. Let me then wish you every success as you move ahead in what promises to be a very distinguished career.

With warmest best wishes,

Sincerely yours,

D. Allan Bromley
The Assistant to the President
for
Science and Technology

Dr. Michael Smith
W. K. Kellogg Radiation Laboratory 106-38
California Institute of Technology
Pasadena, California 91125

CALIFORNIA INSTITUTE OF TECHNOLOGY

W.K. KELLOGG RADIATION LABORATORY 106-38

July 9, 1992

Dr. D. Allan Bromley,
6716 Tulip Hill Terrace
Bethesda, MD 20816

Dear Dr. Bromley,

I hope that things are going well for you in Washington. It is unfortunate that our paths have not crossed on return trips to WNSL. I have been back three times since my graduation in the fall of 1990 to give Nuclear Physics seminars, to work with Peter Parker, and to give moral support to the graduate students. I still am very interested in doing research in nuclear physics, due in large part to the good experiences I had at WNSL.

I am writing to you to ask for a letter of recommendation for a position at Oak Ridge National Laboratory. I am currently finishing up a postdoc at Kellogg Radiation Lab at Caltech, and have been searching (for almost a year) for a way to continue my research in experimental nuclear astrophysics. I have worked on experiments here at the Pelletron accelerator, as well as on a long computational physics project involving Big Bang Nucleosynthesis with Willy Fowler and his postdoc. I have included a resume and publication list to give you an idea of the work I have been doing.

My negotiations for a position at ORNL began when I recently attended a workshop at ORNL with Art Champagne (now at TUNL) and three other nuclear astrophysicists to discuss what experiments our community would like to do with radioactive ion beams (RIBs) at the Oak Ridge Exotic Beam Facility (OREBF). You are probably aware that astrophysics makes up a substantial portion of the proposed research program at OREBF, but they currently have no astrophysicists working there. This is where I spotted my opportunity. I actually invited myself to the workshop, because I knew the organizer (Jerry Garrett) and because I had done a nice experiment with Claus Rolfs and Charlie Barnes at Caltech which applies to future RIB experiments: we measured an excitation function of a radiative capture reaction with a recoil mass separator. Well, I gave a talk and they were impressed, but there really weren't any openings at ORNL. I figured that I had to be bold, so I returned to Caltech and wrote them a letter which included a hypothetical job description of a postdoc who worked in astrophysics at OREBF, and would get ORNL ready to do astrophysics experiments at OREBF when it is finished in two years. This person would be the contact person between the astrophysics community and OREBF, to

Dr. D. Allan Bromley,
July 9, 1992

2

stimulate the involvement of University Labs in OREBF, and to excite the ORNL staff members into doing astrophysics research.

My letter (and good fortune) swayed them to make me an offer of a Senior Research Associate, splitting my time between astrophysics and development work at OREBF and work on a computational physics project (Supernova modeling) with Michael Strayer. I am very excited about the offer, and am currently waiting for it to be put into writing before I accept it.

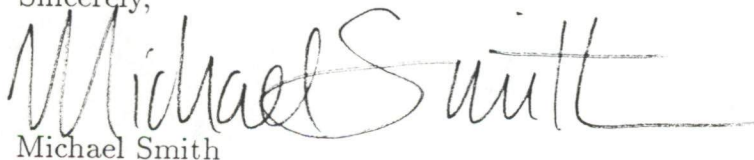

However, there is another possibility that would give me more freedom in the work I want to do at OREBF, and that is to get one of the new DOE Distinguished Postdoctoral Research Program (DPRP) Fellowships. You are probably aware that the goals of the program are to allow young scientists to continue to pursue basic research, to benefit research programs at the national labs, and to foster cooperation between the academic and government research communities. I think that the project I have proposed to do at OREBF meets these criteria, and helps support the DOE's new initiative in RIB research. I would greatly appreciate it if you could write me a letter of recommendation for a DPRP Fellowship at OREBF. I have included a research proposal to give you an idea of the projects that I feel will help OREBF get off the ground in astrophysics. Jerry Garrett and Fred Bertrand at ORNL, and Art and Peter, are all enthusiastic about these projects.

I will most likely accept the Senior Research Associate at ORNL and start sometime this fall. However the DPRP, which would start in January, has a number of advantages over the SRA: it would (possibly) give me a bit more clout at ORNL as far as getting equipment, beam time, and cooperation from the other staff members; it would make it easier to get the travel money I need (since ORNL would essentially get me for free); it would give me a larger salary and an impressive title on my resume, since only 10 fellowships will be awarded in the country (it will be *very* competitive); and it would give me more freedom to concentrate on the experimental nuclear astrophysics work.

I have included a special recommendation form, but you can substitute a traditional letter or use both. The deadline for the letter is August 1. Please contact me if you have any questions on the projects that I would like to perform, on the DPRP program, or on OREBF.

Thank you very much for your time, and best of luck in Washington,

Sincerely,

Michael Smith
