THE WHITE HOUSE

Shornberg

June 11, 1991

Dear Jack:

Many thanks for the copy of the booklet "Justice" with its historical data on the Supreme Court. As someone with a Canadian education - one very light on things American! - I found much of this booklet fascinating. It was a

great idea to put it out.

Congratulations and thanks!

I hope that the current legal impediments to your Senate campaign can be dealt with quickly and finally.

With kindest wishes.

Sincerely Alan

THE WHITE HOUSE
WASHINGTON

September 29, 1992

Dear Dr. Tripathi:

Thank you for your recent letter inviting me to participate in the November 15 activities of American Society for Cell Biology. I apologize for the much belated response.

As much as I would like to join you, that date on my calendar is not a good one for me to be away from Washington, so I must regretfully decline.

Thank you for thinking of me and I would like to offer my best wishes for a successful meeting.

Sincerely yours,

A handwritten signature in dark ink, reading "D. Allan Bromley". The signature is written in a cursive, flowing style with a large initial "D" and a prominent "B".

Professor Allan Bromley
Presidential Science Advisor
White House
Washington, D.C.

Dear Professor Bromley,

It was a delightful experience to listen to your talk at the Centennial celebrations of Illinois Institute of Technology, Chicago last year. I was and am very impressed with your keen interest and significant contribution in bringing up the biology- and biotechnology-related issues before the US Government.

Therefore, on behalf of American Society for Cell Biology and on my personal behalf, I would like to invite you to give either a plenary lecture or chair a meeting entitled, "Modern Biology and Public Policy" to be held on November 15, 1992 at Denver, Colorado. This is an international meeting and will give us an opportunity to bring a whole variety of issues on one platform.

Enclosed is a list of other speakers for the meeting. We hope to have representatives from MITI, Tokyo, Japan and Dr. Carla Hills, Ambassador, US Department of Trade to give lectures also. Professor Thomas Edgington, Chairman, Public Affairs Executive Committee, Federation of American Society for Experimental Biology will be the Co-Chair of the meeting. Please do not hesitate to call me to discuss further particulars of the program.

I thank you for your interest in Biology and would feel honored if you would accept my invitation.

Thanking you,

Yours sincerely,

Satish C. Tripathi, Ph.D.
Organizer, ASCE Meeting on
Modern Biology and
Public Policy

Modern Biology and Public Policy

Organizer: **S.C. Tripathi**
IIT Research Institute, Chicago

Biomedical sciences, scientists and institutions are increasingly being exposed to public action and scrutiny. It is, therefore, important to investigate a whole variety of roles that biologists must play in the areas of economic, scientific and technological development of modern society. Biologists are expanding their horizons beyond the realm of their laboratories - as to the world of decision makers and facilitators of decision making processes in government as well as industry thus, providing the opportunities to contribute more directly and significantly to the welfare of society.

As we move closer to the twenty-first century, we, the biologists, are working closer with professionals from other disciplines to formulate public policies. The fascinating policy making in biomedical and biotechnical areas poses a wide variety of challenges. The issues at stake are: under-or over-regulation, national and global competitiveness, post-cold war control of bio-warfare agents, under-defined public policies and postures of governments, declining biomedical funding as a universal trend and finally, failure of our educational system in communicating to the public about the pros and cons of newly evolving technologies.

The goal of this subgroup meeting is to bring together an interdisciplinary group of participants from life sciences, economics, political science, law, environment, engineering and so forth and organize a discussion on why, when, where and how should the various groups act towards the common good.

PROPOSED SPEAKERS INCLUDE:

Robert J. Goldman, Northwestern University, Chicago
S. Tripathi IIT Research Institute, Chicago
Lewis Branscomb, Harvard University, Cambridge
Richard Neufville, MIT, Cambridge
Govindan Parayil, Illinois Institute of Chicago, Chicago
Fernando Quezada, Biotechnology Center of Excellence, Boston
Senator Patrick J. Leahy, The United States Senate, Washington

THE WHITE HOUSE

WASHINGTON

September 23, 1992

Dear Sally:

I was delighted to get your letter with its kind remarks and with the information about your current plans. I think that you have a wonderful career ahead in the whole area of technology policy, competitiveness, and related areas and the year that you plan to spend now at Stanford will certainly provide you with additional background that will be of great use to you.

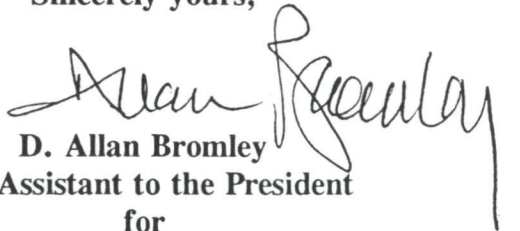

It was a pleasure having Joseph Broz with us this past year and I must say that I still very much regret that the White House Fellows program chose to make it impossible for us to bring you aboard as well. It would have been a great pleasure working with you and I am entirely confident that you too would have made major contributions to the activities of OSTP.

I appreciate your invitation to get in touch with you in Sanford and perhaps to speak to the Sloan Fellows. This is an opportunity that I would welcome and whenever my travels take me in that direction I shall certainly keep this in mind.

If in turn you find yourself back in Washington please do let me know so that I could have the pleasure of taking you to lunch at the White House Mess.

In the meantime, my warmest best wishes for a most successful and happy year at Stanford.

Sincerely yours,

D. Allan Bromley
The Assistant to the President

WHITE HOUSE FELLOW

August 21, 1992

Dear Dr. Bromley,

Thank you for meeting with the 1991-92 class of White House Fellows. Our speaker series had a shortage of science and technology representatives; your talk covered many important issues.

During the year, I have become increasingly interested in U.S. competitiveness, and the role technology plays in the global marketplace in particular. In the fall, I'm off to the Stanford Sloan Program within the graduate school of business, for a one-year M.S. program. I hope to gain a broadened perspective of business management, international trade,

OFFICE OF THE SECRETARY OF DEFENSE
ASSISTANT TO THE SECRETARY OF DEFENSE FOR SPECIAL PROJECTS
WHITE HOUSE FELLOW

world economics, and technology management. If you're in the Palo Alto area, I would certainly appreciate the opportunity to get together. Perhaps you would consider speaking with the Sloan Fellows.

I'd also like to thank you for the mentoring you gave to Joe Broz this year. He had a wonderful learning experience.

Best wishes for the future.

Sincerely,

Sally Thomas

THE WHITE HOUSE

WASHINGTON

August 13, 1992

Dear Elizabeth:

Thank you for your kind letter of July 29 inviting me to give opening remarks and chair the opening session at the 1992 conference on **Global Energy Strategies: Living With Restricted Greenhouse Gas Emissions** scheduled for December 8-10, 1992.

Because of our keen interest in environmental matters I would have like to join you, but I have a conflict of long standing during that time period, so I must regretfully decline.

Thank you for thinking of me and I would like to offer my best wishes for a successful conference on the exceedingly important subject of the environment.

With best wishes,

Sincerely yours,

Dear Bob: (Traxler)

I stopped in yesterday at your office in the hope of catching you but learned from Bill Gidmar that you were in Michigan.

I was very disturbed to learn that you were still recovering from the mugging and hope that your

remaining recovery will be both speedy and complete. It has been a terrible way to close this phase of your very distinguished service to the Nation!

I left with Bill a one pager that outlines the difficult position we in OSD find ourselves as a result of Senate action and would much appreciate any help you can give us with all best wishes. Sincerely,

THE WHITE HOUSE
WASHINGTON

April 15, 1992

Dear Sir John:

Many thanks for your kind letter following my talk to the Royal Society and many thanks, indeed, for the copy of your excellent book on Michael Faraday. I have read it with great pleasure and profit and believe that it is the sort of book that all physics students should have as required reading. Far too few of them have any feeling for the wonderful activities of those upon whose shoulders all of us stand.

Your position at the Royal Institution is one of which you can be justly proud. Going back many years I must tell you that on a visit to London I had occasion to visit your institution with my son, who was then 12 or 13 years old, and we had occasion to attend one of your public lectures. We were both absolutely delighted by the lecture and I remember noting at the time that had I an opening in the Physics Department at Yale University, of which I was then the chairman, I would have offered it immediately to the lecturer. You have a long and wonderful tradition of making science accessible to the general public and I admire the skill and devotion that are evident in each of the lectures that I subsequently had the pleasure of attending during a number of visits to London.

But I should complete this anecdote by telling you that my son, in part, inspired by his exposure to the activities of your institution, went on to study physics at Harvard, later receiving his doctorate in theoretical physics at Stanford. I am sure that a great many young people worldwide have had similar experiences.

Again, my warmest thanks for your hospitality and for your book.

Sincerely yours,

Dear Dr Bromley

I have just returned to my office after listening to your excellent talk at the Royal Society today and to the marvellous replies that you gave in answer to the questions that were posed.

During our conversation with Michael Atiyah I mentioned in relation to your point about the increased use of electricity in the US that I was the present occupant of the post created for Michael Faraday here at the Royal Institution. I am enclosing a copy of my book on Michael Faraday which you might find useful as bedtime reading. The President of your National Academy, Frank Press, uttered kind words about it and so did the reviewer in Scientific American. I hope you enjoy it.

With best wishes

Yours sincerely

John Meurig Thomas

Dr. D. Allan Bromley
Assistant to the President for
Science and Technology
Old Executive Office Building
Washington, DC 20506

C
MAIL ROOM

Dear Dr. Bromley:

I am pleased to invite you to attend a workshop on *Science, Technology and U.S. Economic Competitiveness*, to be held at RAND throughout the week of July 6, 1992. The workshop will bring together a small group of leaders from government, business, and academia to examine issues of public policy connected with the performance and application of R&D and their effects on the U.S. economy.

The workshop is part of a summer institute that RAND is organizing this July and August. The institute will consist of five week-long workshops, each dealing with a critical issue of American foreign and domestic policy. Its overall purpose is described in the enclosure, which also contains detailed information about this particular session.

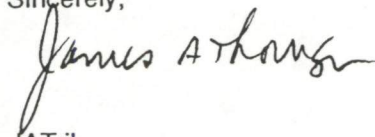

We believe that the institute will be uniquely productive because

- the working procedure is unusual and intended to stimulate but also structure a wide-ranging discussion;
- the workshops will be kept small, with a maximum of 25 participants around the table;
- the list of invitees includes some of the most distinguished figures in the field. For the workshop on *Science, Technology and U.S. Economic Competitiveness*, the list includes Lewis Branscombe, Harvey Brooks, John Deutch and David Mowery.

RAND will, of course, pay your costs of attending the workshop (coach airfare, taxis, hotel and meals). In addition, we offer an honorarium of \$2500. We are asking all participants to commit themselves to attending the entire week's sessions of the workshop.

I very much hope you will accept our invitation. I look forward to a response at your earliest convenience.

Sincerely,

JAT:jl

Enclosure

THE WHITE HOUSE
WASHINGTON

March 31, 1992

Dear Dr. Tirrell:

Thank you for your letter of March 16, 1992, inviting me speak at your symposium entitled "Polymer Science and Technology for the 21st Century" scheduled to be held November 9-10, 1992, at the Plaza Hotel in New York. I apologize for the much belated response.

As much as I would like to join you, I must regretfully decline for scheduling reasons.

I appreciate your thinking of me and offer my best wishes for a successful symposium.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "D. Allan Bromley". The signature is fluid and cursive, with the first name "D. Allan" written in a more compact, stylized manner and "Bromley" written in a more extended, flowing script.

Dear Val:

Many thanks for sending me the revised list of signatures of those who have won Nobel and Wolf prizes. I am passing it on to the appropriate people in the Treasury Department with a renewed request that the tax treatment of such prizes be returned to its former status.

With all best wishes,

Sincerely yours,

A handwritten signature in dark ink, appearing to read "Duan", with a stylized, flowing script.

Dear Mr. Taylor:

I have had an opportunity to review the copy of your resume.

Unfortunately, at the present time we do not have any positions for a person with your particular background and expertise. This is a small office and our budget does not permit the luxury of expertise in every discipline and so some of my staff are stretched pretty far--thus the reality of fiscal constraints.

I have, however, taken the liberty of sharing the information you provided with members of my senior staff and, if an opportunity presents itself, I have asked them to keep you in mind.

I wish you every success in your search for an appropriate position.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "D. Allan Bromley", written in a cursive style.

Dear Val:

I, of course, remember our discussion at Vernon's birthday party and since that time I have indeed taken up the question of the tax treatment of major prizes with both senior Members of the Congress and senior members of our Treasury Department.

I regret to say that thus far the reaction has been uniformly negative and apparently reflects a marked reluctance on the part of all those involved to even consider the possibility of changing the present situation. I must say that I find this almost beyond belief but the uniform feeling is that in the interests of so called fairness "income is income" and all of it should be taxed in the same way.

Because this, in my view, is such a ridiculous position I have not yet given up and the kind of letter that you promise to send me, signed by winners of a variety of the major awards, would be of enormous help in trying a second time to get this tax treatment reversed.

I shall look forward to receiving the signed document from you. In the meantime, all best wishes,

Sincerely yours,

Dear Elizabeth:

Your letter to Bill Reilly was an excellent one and I have talked to him about it and hope that some action can be forthcoming. Obviously, your group has developed an international position of leadership in making available environmental information in convenient and attractive fashion.

Thanks too for sending me the excellent volume of articles. It already has been and will continue to be of very real use to me as we work to develop responsible and sensible policies in the climate change area.

With all best wishes,

Dear Sam:

I have been happy to contact the David and Lucille Packard Foundation with the recommendation that Brandeis be added to our list of universities from whom nominations for Packard Fellowships are accepted.

You might be interested in knowing that my recollection is that Brandeis was on the original list that we put together several years ago but, on the first round, Brandeis was one of the very few universities that did not respond at all to the invitation and in consequence was removed from the list. With you at the helm I am sure that this will not happen again.

I hope that all goes well and that you are enjoying your new responsibilities.

Dear Allan:

During my visit to California in November, I had the pleasure of meeting with Mr. Colburn Wilbur at the David and Lucile Packard Foundation and Dr. Robert Glaser at the Lucille P. Markey Charitable Trust. Following these meetings and at the suggestion of Bob Glaser, I am writing to David Packard regarding Brandeis University's eligibility for the David and Lucile Packard Fellowships for Science and Engineering.

Bob also suggested that I send a copy of this letter to you. I would appreciate any assistance you may offer on this question.

With best regards,

Sincerely,

Samuel O. Thier

OFFICE OF THE VICE PRESIDENT

WASHINGTON

DATE: September 16, 1992

TO: Dr. Bromley

FROM: Karl Jackson *KJS*
Assistant to the Vice President for
National Security Affairs

This is a much delayed letter that finally worked its way through the system. I believe it's more appropriately addressed in your area. Would you please take a look at it and let me know your recommendation.

Don R. Cummings
Don R. Cummings

EXECUTIVE OFFICE OF THE PRESIDENT
OFFICE OF SCIENCE AND TECHNOLOGY POLICY
WASHINGTON, D.C. 20506

Allan Bromley -

- ① Does it is probably right about not being first by 2000. But does that mean we should aim to be #1?
- ② She is just wrong in saying there needs to be a massive infusion of federal funds to bring about change. Some targeted federal funding (teacher training, standards, evaluation) is needed, but the education establishment in total is adequately funded.

July 25, 1991

Dear President Verkuil:

I am delighted and honored by your invitation to participate in the 1992 Charter Day exercises at William & Mary on Saturday, February 8, and to receive an honorary Doctor of Science degree at that time. I would, of course, be delighted to make some remarks appropriate to the occasion.

I would also be very happy to join your Board of Visitors for a black tie dinner on Friday evening, February 7, in the Campus Center Ballroom and look forward to this as a delightful weekend.

I assume that someone from your office will provide me with additional details as we come closer to the dates in question, but in the meantime, let me simply say again how pleased I am to accept your invitation.

With all best wishes,

Sincerely yours,

A handwritten signature in dark ink, reading "D. Allan Bromley". The signature is fluid and cursive, with a long horizontal stroke extending to the right.

Dear Dr. Bromley:

It is with great pleasure that I extend to you, on behalf of the Board of Visitors, an invitation to be present at our Charter Day Exercises on Saturday, February 8, 1992, to receive an honorary Doctor of Science degree in recognition of your career as a distinguished physicist and educator, and to make remarks on the occasion.

Each year on the Saturday closest to the original date of our Charter, granted on February 8, 1693, the College holds its Charter Day exercises in Phi Beta Kappa Memorial Hall. In 1992 these exercises will commemorate the 299th anniversary of the granting of the Royal Charter to the College by Their Majesties King William III and Queen Mary II. The theme of the occasion will be the sciences and their application to society. We are particularly interested in focusing on our neighbors, CEBAF and Langley-NASA.

On Friday evening, February 7, the Board of Visitors will host a black tie dinner in the Campus Center Ballroom. We would be pleased to have you join us for the weekend as the guest of the College.

We would be delighted if you would accept our invitation. I look forward to hearing from you.

Sincerely,

Paul R. Verkuil

THE WHITE HOUSE
WASHINGTON

July 29, 1992

Dear Lourdes:

Many thanks for your note of June 30 which arrived while I was in the Middle East.

Although I certainly cannot guarantee that the plan will make you eventually Assistant to the President for Science and Technology it does seem to me an excellent one leading to a senior position in science policy.

Unfortunately, on the 24th of September I am scheduled to be giving a talk in San Francisco and so unfortunately will not be able to join you for your graduation. On the 21st of September I have to give a speech at the University of Florida but perhaps you could call me sometime early in September so that we can arrange a time for you to stop by if there is time in your schedule on either September 22 or 23.

It was a great pleasure meeting you and hearing about your plans for the future. I want also to thank you for looking after Gil Herrera and me so effectively while we were in Los Angeles for the SHPE national banquet.

With all best wishes,

Sincerely yours,

D. Allan Bromley

THE WHITE HOUSE
WASHINGTON

December 10, 1992

Dear Bob:

I am forwarding herewith a preliminary report on a study carried out by an OSTP consultant, Mr. Willis Shapley, now retired after extensive experience at OMB/BOB and AAAS.

I asked Mr. Shapley, as in the past two years, to examine the FY 1993 appropriations in order to obtain a measure of the amount and kind of earmarks as well as how these have changed in recent years.

It bears emphasis that this report is still in a preliminary state and that reasonable persons might well differ over definitions and identification of specific earmarks. However, the same criteria have been used for all three years during which Mr. Shapley has carried out this analysis so that the trends are clear and credible.

As the table on page 2 of the summary shows, while academic earmarks have remained reasonably stable, nonacademic ones have increased rapidly so that there has been a dramatic increase in the total resources earmarked.

I am sending you this preliminary report because I thought that you would find the results both interesting and distressing.

Sincerely yours,

D. Allan Bromley
The Assistant to the President
for
Science and Technology

The Honorable Robert S. Walker

Dear Luther:

I am very sorry to have to tell you that, even though I initially accepted your invitation to address the luncheon forum scheduled for February 10, 1993, I must now cancel. My apologies for not getting back to you sooner.

I have decided in the immediate future to return to the home that I still own in New Haven and my endowed chair at Yale. I will be returning to New Haven in mid-January and will then really decide what the longer future holds.

With all best wishes for a happy holiday season.

Sincerely yours,

Director, Office of Science and
Technology Policy
Executive Office of the President
Old Executive Office Building
Washington, D.C. 20500

Dear Dr. ^{ALLAN}Bromley:

The National Science Foundation is sponsoring an invitational forum for education leaders and policy makers February 9-11, 1993, in Washington, D.C. The forum is entitled **Beyond National Goals and Standards: Excellence in Mathematics and Science Education K-16**. This forum is designed to accelerate systemic reform in mathematics and science education. The forum will bring together approximately 600 decision makers in the states who must work together to achieve the national education goals. The purpose is to have them identify and plan strategically to overcome systemic barriers to math and science education reform.

I invite you to address the forum participants at a luncheon on February 10, 1993, planned for 12:30 to 2:00pm at the Ramada Renaissance Hotel-Techworld. It is important to the work of these policy leaders and science educators that they understand the commitment of the Bush Administration, the Office of Science and Technology Policy, the National Science Foundation, as well as other FCCSET/CEHR agencies to the revitalization of American mathematics and science education.

I sincerely hope you will be able to accept this invitation. Your participation as featured speaker will not only contribute to the success of the forum, but also to the important work the states must undertake if we are to become first in the world in mathematics and science achievement.

Dear Alan:

Attached is a recent letter regarding the recruitment of a new president by the William Penn Foundation. I am not certain that you would want such a job; however, I did want you to be aware of this opening as an example.

The last president, Bernard Watson, made \$185,000 during 1991 (it is not clear what his benefits were).

As I hear of things, I shall forward them to you.

Cordially,

Colburn S. Wilbur
Executive Director

NOTE TO MARIAN NIDA

FROM: WINDY WHITE ^{WZ}

RE: PHOTO OPPORTUNITY

The attached request was forwarded to my attention from the American Lung Association. The association annually presents the President and Mrs. Bush with their National Christmas Seals. This year they are requesting to give the President and Mrs. Bush flu vaccines in addition to their usual presentation.

I ran this request by Tony Benedi in Scheduling and he suggested that I also run this past Dr. Bromley. At this time, nothing has been added to the calendar. It is an unusual request and I need your guidance before I proceed.

Should you have any questions please do not hesitate to call me. I can be reached at extension 7900.

Thank you.

MEMORANDUM FOR WINDY WHITE

FROM: D. ALLAN BROMLEY

D. Allan Bromley

SUBJECT: FLU SHOTS FOR THE PRESIDENT AND MRS. BUSH

Such shots would be consonant with the public health effort and would help to assure that all older Americans receive flu vaccine annually.* For the Bushes to accept would be a positive, constructive step and I would hope that they might agree. However, the question is whether they would want to schedule any such activity during the weeks in question.

As a point of information I regularly get annual flu shots myself. I believe that the Bushes should also but the question really is whether they would want to do so with as much publicity as is suggested here.

*This is recommended by the National Advisory Committee on Immunization Practice, the American College of Internal Medicine and countless other groups.

The White House
Washington, D.C. 20500

Dear Ms. White:

I am writing to you regarding the American Lung Association's annual presentation of Christmas Seals to the President and First Lady. This year, we are proud to have as our presenter, the 1992 Olympic Figure Skating Gold Medalist, Kristi Yamaguchi who is our National Christmas Seals Chairperson.

This traditional Christmas Seal Presentation ceremony has been the highlight of the American Lung Association's annual Christmas Seal Campaign, and it also underscores, to all Americans, the significance of our continuing efforts to conquer lung disease and promote lung health.

The ideal time for the presentation would be during the weeks of November 9th or November 16th. We understand that the President's schedule must remain flexible, and that he is particularly busy this year, but your effort to select a date, at your earliest convenience, would be greatly appreciated.

We would be especially pleased if Mrs. Bush could be present for the ceremony with the President. Enclosed is an advance sheet of the 1992 Christmas Seals.

Thank you for your assistance and cooperation in this matter. I look forward to working with you to coordinate this annual ceremony. If you have any questions, please contact me directly at (212)315-8802.

Sincerely,

Susan Avery
National Media Relations Specialist

August 11, 1992

Dear Bob and Dan:

Many thanks for sending me the early copy of the new report on **Scientific Assessment of Ozone Depletion: 1991** that you co-chaired. Not only the nation but the entire international community owes the two of you its deep thanks for the remarkably effective work you have done, not only in your own research, but also in pulling together the kind of overview that you have done again and again in areas of vital importance to the policy makers in the country and throughout the world.

I have particularly appreciated your willingness to rally around to provide me and my associates with the latest scientific information -- frequently on short notice and always when you had a great many other things to keep you occupied. You have both made a major difference in terms of impacting U.S. positions in the entire environmental arena. Please accept my personal thanks not only for the report, but much more importantly, for your help throughout the first Bush Administration.

With warmest best wishes,

Sincerely yours,

~~PERSONAL AND CONFIDENTIAL~~

Dear Betty:

Unhappily I now find that the President wants me to be available on October 16 so I will be unable to join you for the memorial service for Bill in Dwight Chapel.

I have, however, jotted down some of my thoughts concerning Bill and have arranged with Charles Bockelman for them to be read at the service. I recognize that this is no substitute for being present in person but I hope that you, Ruth and Alice will understand that, with the pressures of the election on us, my schedule is not my own.

I have provided Charles with a copy of my notes and he will make that copy available to you for your files.

There is so little that any of us can say that really is helpful to you but I hope that from time to time you can draw very real satisfaction from all the years that you had with Bill and the wonderful partnership that you enjoyed throughout them.

With my deepest sympathy and all best wishes,

Sincerely yours,

Dear Allan:-

I have just been
at the lab. Talking to Mike
Zeller and Charles Dickelman
about the Memorial service
for B:11.

They want you "to give
some remarks" if you are
free to come - The
Memorial Service will be in

Dwight Chapel October 16th
at 2 o'clock - I will

phone Tim Watson and
see whether he can come too
and give a few remarks.
The other day he spoke of
a letter B. H. had written him
in 1949 — he would mention
that —

B. H. just faded away with
old age — I had been speaking
him the other day before —

B. H. was cremated and
we had a grave side service
in Grove Street Cemetery with
Rev Harry Adams officiating.
Just Ruthie & John, Steve & we
were present —

I will try to reach you
again in the phone. Goodbye, Betty

this woman?
DJB.

Dear Mr. Henley:

I was reading my husband's copy of **Physics Today** (May 1992) and was shocked to read on page 56 the grave concern over the FSU (former Soviet Union) physicists. The article stated, "...the situation in the FSU states has deteriorated to the point that very good scientists, including an entire generation of young astronomers, face grave difficulties remaining in the field." Since 1988 I have volunteered my time to work with American scientists and engineers in trying to identify where they can continue or begin a career in physics. It is beyond belief to me that you are asking American scientists to contribute \$50.00 to assist FSU physicists when we have astronomical numbers of unemployed American scientists. Add on the number of scientists in the US who have been forced into early retirement or forced into literally selling life insurance and the number of unemployed US scientists is appalling. One should also look at the number of UNDER-employed US scientists and those hanging on to their jobs literally hour-by-hour.

Enlight of the American Physical Society's concern over FSU employment and research problems, I have some questions that I would like a written response from you concerning APS's support of American physicists.

1. Does APS have a task force similar to the FSU program in place for APS's American Scientists?
2. If so, how can I get the unemployed and under-employed American physicist in touch with it so that they will be able to survive the drastic cuts in research in the United States as a direct result of cuts in the Defense Budget, cuts in the support of the national research laboratories, cuts in faculty positions at colleges and universities, and cuts in research and development at US corporations such as GE, Westinghouse, BDM, etc. etc.?
3. Which field(s) of physics research is APS supporting or encouraging? (I ask this because since 1988 I have physicists/engineers who have been unable to market their skills because they have been told the

US is no longer doing this type of work. Fields that have been "rejected": optics, plasma, bio-physics, condensed matter, solid state, geo-physics, astro-physics, power systems engineers, electrical engineering, mechanical engineers, chemical engineers. This affects those with BS, MS, and PHD. Many have returned to college to get additional degrees and/or training only find out these new skills are not marketable either.)

4. Will APS be supporting a program which would allow non-certified advanced degreed scientists to teach in public high schools? (Many of the scientists/engineers I know across the country are returning to college to obtain a teaching certification since their chosen careers have been terminated.) If yes, when will it be in place? If not, why not?

5. Did APS ask Dr. Kevin Aylesworth to be on the task force? Will he be asked to be on any American task force?

6. Are you aware of the work that Dr. Aylesworth has been doing to find jobs for American scientists?

7. Since APS has aggressively informed Congress that it opposed the planned NASA Space Station and now is seeking to "...draft a proposal to the National Science Foundation for an interagency Federal program....." (page 56, May 1992 Physics Today) will APS be equally aggressive in informing Congress and the National Science Foundation that American scientists are looking at having a generation or two or three of lost scientists?

8. If so, when will you present this vital information to Congress?

9. Are you aware that few American scientists are able to attend the APS regional conferences to look for work? Are you aware that the job placement announcements have **never** worked for most scientists who have used the mail-in resume services through APS?

My husband was a member of APS since his under-graduate schooling in physics. He was a member through his masters degree and doctorate degree in physics. And, he was an APS member since he graduated in 1984. Last year he refused to renew his APS membership at the astronomical fee of \$90.00 because we are fearful of his continued employment and no prospects in the future. APS never responded to his concerns that APS was not doing anything on behalf of its members to preserve jobs or re-train scientists out of the sciences and into professions where they can support themselves and their families.

Unemployed and under-employed scientists results in these people not being able to re-pay their student loans. Some of the scientists I have worked with have **over** \$30,000.00 in student loan debt. Most of them have told me they would not recommend the study of science as a career choice for American youth.

I also thought that you should know what American scientists have been doing since 1988. Many have returned to college to re-train out of science and into law, teaching, and accounting. Many have remained unemployed for years and their spouse supports the family---these are the ones still hoping to get a science job. Many more are now selling insurance programs and financial investment packages. Others have opened their own businesses: one PHD physicist sells bottled spring water, one owns a gas station, another is selling self-defense products, and another opened an auto mechanic shop.

I look forward to hearing from you in the near future.

Sincerely,

Cynthia A. Walsh, JD

mainly one of the largest IUPAP meetings, would be noticeably smaller than usual, so that the PRC government would get a clear signal.

In fact, IUPAP officers in the US have the impression that the conference will come off without a hitch and that participation will not be too different from usual. Still, at least three invited speakers are known to have declined, at least partly for political and moral reasons. And a number of eminent European solid-state physicists, such as Manuel Cardona and Minko Balkanski, also will not be going.

Balkanski, a native of Bulgaria who heads the Institute for Solid-State Physics at Paris VI, told PHYSICS TODAY that he "cannot go and support a country in which students are still in prison and still in danger" and that he "would sign any boycott document." Balkanski noted that he normally does go to the conference, and when it took place in France on two occasions, he was its organizer. Cardona, a director of the Max Planck Institute for Solid-State Physics in Stuttgart, said that his reasons for not going were more complex and only partly political. He said he was 99% certain nobody would be in danger at the conference, but he also was 99% certain that participation in the conference will be used by the PRC government for political purposes.

Herman Winick of the Stanford Synchrotron Radiation Laboratory, the current chair of CIFS, concedes that scientists invited to the Beijing conference face a difficult moral choice. In Winick's opinion, if such people attend, then they should raise human rights concerns with their Chinese interlocutors, and if they choose not to attend, they should publicly state their reasons. CIFS has published a brochure, which is available from APS in New York, on how to raise human rights concerns at meetings.

It bears noting that CIFS currently includes as members both Yuri Orlov, the former Soviet dissident now at Cornell, and Fang Li Zhi, the Chinese astrophysicist now at the University of Arizona. Both Orlov and Fang also are members of the newly formed Committee to End the Chinese Gulag, which is based in New York at Human Rights Watch. According to an admittedly incomplete list assembled by the committee, there currently are at least 1100 political prisoners in the PRC, at least 15 of them physicists. The committee is especially concerned about physicist Liu Gang, who is in punitive solitary confinement.

—WILLIAM SWEET

APS AND AAS LAUNCH AID PROGRAMS FOR FSU PHYSICISTS

The American Physical Society and the American Astronomical Society have established programs to aid physicists and astronomers in the states of the former Soviet Union, and both societies are urgently soliciting contributions from members.

The AAS program, which will support small grants and journal donations, was announced in the March AAS Newsletter and in an electronic message sent to members. The electronic appeal said that the situation in the FSU states has deteriorated to the point that very good scientists, including an entire generation of young astronomers, face grave difficulties remaining in the field. Problems are particularly acute for astronomers at observatories, theorists and young people—those in the space program and at universities being only slightly better off.

AAS has set up an advisory committee to help coordinate its aid program. Initially a minimum of 100 small grants of approximately \$100-\$200 have been made, and a second round of grants is following this month. In addition, AAS will finance subscriptions to the *Astrophysical Journal* and the *Astronomical Journal*. The air-freight shipping costs are being borne by the American Academy of Arts and Sciences in an arrangement with United Parcel Service.

The APS program, which was partly inspired by the AAS initiative, also is intended to provide journals and grants to FSU scientists. The program is the first major activity recommended by a special task force on aiding FSU scientists that was established earlier this year by APS president Ernest Henley of the University of Washington.

In a letter to APS fellows, department chairs and leaders of APS divisions and subunits, Henley asked physicists to contribute \$50 or more to support a special fund for FSU scientists. "The task force intends to draw on that fund to provide journals to appropriate FSU institutions, in addition to those that the APS intends to provide from its existing resources," the letter said. "It is also considering the feasibility of a small grants program that would provide various types of support to assist physicists of proven ability to pursue their research. In order to implement these ideas, the task force hopes to establish ad hoc counterpart committees in the westernmost FSU republics, particu-

larly Russia, Ukraine, Belarus and the Baltic states."

Henley said the task force also is investigating the feasibility of directly shipping small pieces of donated equipment and computers, and individuals interested in making such contributions should specify what they have in mind in their communications to APS headquarters.

Looking further ahead, Henley said he had asked the task force to draft a proposal to the National Science Foundation for an interagency Federal program, by means of which APS could "provide assistance to FSU physicists remaining at their home institutions, in addition to brokering some exchange of physicists between US and FSU institutions." Henley said such a program should address the needs of "outstanding established physicists and younger physicists of proven ability, with the objective of preserving the next generation of physicists."

Donations to the APS program should be made payable to The American Physical Society and should be sent to the Task Force on the Crisis in the FSU, Office of International Scientific Affairs, APS, 335 East 45th Street, New York, NY 10017. Donations to the AAS program should be made payable to the AAS FSU Astronomy Program and should be mailed to the AAS Executive Office, Attention FSU Astronomy Program, 2000 Florida Avenue NW, Suite 300, Washington, DC 20009. The AAS and APS donations are tax deductible.

ELECTRONIC ADDRESSES SOUGHT FOR FSU PHYSICISTS

The American Institute of Physics has started an electronic directory of scientists and institutions in the former Soviet Union, which is available on PINET, AIP's electronic communications and database service. Given the current unreliability of telephone links and regular mail service to the states of the former USSR, the new electronic directory could be quite valuable to physicists around the world.

Electronic addresses—e-mail, fax and telex—are sought for FSU scientists and institutions. Individuals with relevant information are asked to contact Mitchell Dinowitz, AIP's administrator of PINET, through Internet at admin@pinet.aip.org or through Bitnet at admin@nip.bitnet.
