Dear Allan:

Thank you for your recent letter of congratulations. I am honored to have been appointed as managing partner and look forward to working with the Washington business community.

It is very encouraging to have friends like you offer me their good wishes and support.

Thank you again and my best wishes to you and your family for the holidays and the New Year

Sincerely,

Dr. D. Allan Bromley
The Assistant to the President for Science and Technology
and Chairman, President's Council of Advisers on Science and Technology
The White House
Washington, DC 20506

Dear Dr. Bromley:

I want to thank you again for your participation in the SUPERCOMPUTING '91 conference this past November in Albuquerque. Your presence, at a time when funding for the HPCC was under debate in Washington, was most timely. In addition, your keynote address set the tone for the conference in a way no other presentation could have done. I am sure you heard as many compliments as I did on the value of your talk.

I am also glad we had some time to discuss some of the issues facing computational science, in particular those topics we covered during our luncheon on November 19th. In appreciation, I'm enclosing a Center for Research in Parallel Computation t-shirt.

I hope we'll have the opportunity to meet again in the near future.

Sincerely,

Ken Kennedy

Dr. D. Allan Bromley
Executive Office of the President
Office of Science and Technology Policy
Old Executive Office Building
17th and Pennsylvania Ave. N.W.
Washington, D.C., 20506

Dear Dr. Bromley:

Thank you so much for honoring the memory of Jim Hardy, the Pierce Laboratory, and Yale by addressing us on Friday, Dec. 13th. Your messages about science and education were received with rapt attention.

What a wonderful legacy Hardy and his generation left by facing down the evil empires that grew up in Germany, Japan, Russia, and later Russian surrogates. Despite the price (still being paid) for this defense of freedom by the United States, post-war scientists in America developed physical and biological sciences which show promise of sequencing the genome and ultimately explaining brain function. Your plans for guidance of this new scientific effort were made clear by your lecture.

Attached is a sheet for expenses. Under separate cover we will forward a Hardy medal to commemorate your fine lecture. Thank you again.

Sincerely yours,

Arthur B. DuBois, M.D.

THE JOHN B. PIERCE FOUNDATION LABORATORY, INC.
EXPENSE REPORT

Date of Departure
Date of Return
(Attach Hotel, Transportation, etc. Receipts)

Time
Time[illegible]

PREPARATION INSTRUCTIONS FOR TRAVEL EXPENSE REPORT

1. Expenses of authorized travel will be reimbursed upon receipt of completed vouchers signed by the traveler and approved by the Director or his designee.
2. All pertinent information should be filled in as requested. Unusual circumstances which affect the travel expenses should be fully explained.
3. Expenses for transportation by privately owned car will be reimbursed on a mileage basis at a rate not exceeding twenty cents (20c) per mile, plus toll charges and necessary parking fees, if any, when travel by car is for the convenience of the Laboratory or when means of public transportation are impractical. Use of a privately owned car at the traveler's convenience will be reimbursed, to the extent that the cost of travel plus related subsistence expenses do not exceed the cost of travel by common carrier plus related subsistence expenses.
4. Personal expenses such as laundry, insurance, bar and valet are not allowable charges.
5. Travel advances will be accounted for on the voucher in the space provided. Travel costs in excess of advances will be reimbursed. In case the advance is greater than the travel costs, the traveler will return the unused portion when submitting the voucher.
6. Reimbursement for the use of rented automobiles on authorized travel will be made, provided that circumstances make it impossible or impractical to use other means and that the traveler submits information indicating the necessity for the use of a rented automobile. The car rental receipt should be attached to the travel voucher.
7. Financial commitments for any travel shall be approved in advance by the Director or his designee.
8. Subsistence costs will be reimbursed at an itemized actual cost basis, in an amount not to exceed \$125 per day for lodging and \$28 per day for food. Alternatively, subsistence costs will be reimbursed without itemization at a rate of \$50 per day.
9. Per diem and subsistence costs apply only for days of work and time of travel.
10. When the traveler is claiming reimbursement for greater than economy or tourist class air fare, the traveler should furnish an explanation on the face of the voucher.
11. Travelers should submit receipts for tickets, hotels and other special items to support their claim for reimbursement.

D. Allan Bromley, Ph.D.
Science Advisor to the President
The White House
Washington, DC 20506

Dear Dr. Bromley:

Your visit to the Pierce Laboratory this past Friday was a splendid success by all accounts. Your lecture was erudite and articulated clearly the many advances made by the Office of Science and Technology Policy since you became its Director. You further spelled out the challenges that we scientists and we who administer scientific institutions must address in the upcoming decades. These were fitting and appropriate themes for the Pierce Laboratory's Hardy lecture series, and we remain grateful to you for your willingness to come to New Haven on our behalf.

The banquet afterward was a success in our eyes as well. On a personal note, I enjoyed very much the opportunity to join in the conversation with you and learn about your lives in Washington and at Yale.

I promised to send to you a reprint of my *American Scientist* article on human powered flight and a copy of the brief tribute to Ellie for her twenty-five years of service to the Pierce Lab, and these are enclosed. I am pleased to tell you that Ellie was completely surprised by the event and promises to use her engraved Mont Blanc fountain pen with pride.

Thanks once again. I hope you will stop by on your next visit to New Haven and visit our newly-renovated facility.

Sincerely,

Ethan R. Nadel, Ph.D.

Assistant to the President
for Science and Technology Policy
Washington, D.C. 20506

Dear Allan:

Thank you for taking part in last night's mathematics and science education reception and announcement of next year's National Science Bowl.

It is hard to imagine a time when the Nation didn't have programs such as the Science Bowl or the teacher and student programs at the National Laboratories. Now that we do, we must work to institutionalize them so that they can continue to serve America's teachers and students for many years.

I appreciate the support that you, Tom Ratchford and Charles Dickens have given Peggy Dufour and my staff, and look forward to working with you to present an excellent FCCSET-CEHR mathematics and science education budget to the public on behalf of the President next January.

Sincerely,

James D. Watkins

91 DEC 1 1991

MAIL December 5, 1991

Dear Mr Bromley:

I want to thank you for taking the time to discuss the various issues in health care with me during our flight from Washington to New York last week. I am attempting to bring useful information technology directly to the point of the patient - physician encounter. Thus, our project to collect ambulatory care data from a physician will focus on the 85-90% of routine problems a physician sees in his/her practice. Our goal is simply to give the physician a data collection tool that will produce ALL the necessary forms and documentation required for an outpatient visit; the necessary administrative and clinical management information is produced as a by-product. I plan to have the tool "learn" each physician's practice pattern and feed that pattern back to them for each common problem. I am hoping to incorporate the Physician Data Query as an expert source for cancer problems. Cancer data entered into the tool will produce information for both the patient and the physician as well as Tumor Registry reports. With some luck and long nights, I plan to have the first version of this tool operational within six months.

The second component is a teaming effort with DARPA to develop an advanced, intelligent workstation. This project will lead to a new programming paradigm. The computer will become the user which learns from the physician. The computer and its associated systems will adapt to how the physician works, will provide information when he/she wants or needs it (transparently to the physician) and will anticipate what the physician will do next.

As I mentioned to you, I demonstrated these concepts during Secretary Sullivan's Forum on Administrative Costs of Health Care. I am scheduled to repeat this for Mr Edelson and other staff of the House Committee on Energy and Commerce, as well as other national organizations. I would be happy to provide you and your staff with a demonstration if you desire. Please do not hesitate to have your assistants call me if you desire additional information. My telephone number is (301) 295-3741.

Sincerely yours,

John S Silva, Col, USAF, MC

The White House
Washington, D.C. 20050

Dear Allan,

As a follow-up to our phone conversation, I am delighted that you are willing to entertain the possibility of serving as Honorary Chairman at the dedication of our Library and Center for Advanced Technology in Telecommunications, our centerpieces in Metrotech.

We are asking you as Honorary Chairman to lend your name to our four-day celebration and introduce the main speaker, who we hope will be the President, on Thursday, May 28, 1992, Dedication Day. As part of our festivities, there will also be a two-day symposium on "Science, Technology and the Nation: a Compact for the 21st Century," chaired by John Mayo, President of AT&T Bell Laboratories and featuring many luminaries from various fields of science and technology.

Let me reiterate that Metrotech is the largest urban industry/research park in the nation, creating over 16,000 jobs, covering 16 acres and costing some \$1.2 billion. Of particular significance to you and the President, it is an example of public/private cooperation and enlightened public policy. We at Polytechnic are especially proud of Metrotech as an example of the ability of an institution with limited resources to triumph against overwhelming odds.

A letter of invitation from me to President Bush is enclosed and we would be most grateful if you would guide it through the proper channels.

I very much hope that you will be able to join us next May as Honorary Chairman and wish you no hurdles on the issue of conflict of interest.

Sincerely,

George Bugliarello

/GB

P.S. Joe Jacobs, our Chairman and Chairman of Jacobs Engineering Group, is writing President Bush with a supporting letter of invitation.

George Bugliarello, President

Polytechnic

UNIVERSITY

December 4, 1991

The Honorable George H. Bush
President of the United States
The White House
Washington, D.C. 20500

Dear Mr. President,

Polytechnic University is dedicating this spring a tangible monument to the power of the private sector, encouraged by government, to revitalize the economy, provide jobs and promote technological innovation.

Polytechnic - a private university with a 138-year old history - spearheaded, in partnership with industry and local government, the development of a 16-acre, \$1.2 billion research/industry park. Metrotech is creating an economic renaissance in the depressed urban area of downtown Brooklyn, attracting 16,000 new jobs and developing advanced telecommunications and information technologies which support the primacy of the United States in the area of financial and other services.

In Metrotech, we are proving that a private institution, limited in resources but wealthy in vision and determination, can make a major contribution for the public good - to our community and nation. We ask now for the privilege and honor of your endorsement of our faith and perseverance - and of their successful realization today - by inviting you to inaugurate the centerpiece of Metrotech.

On Thursday morning, May 28, 1992, Polytechnic is dedicating that centerpiece, the Bern Dibner Library of Science and Technology and Center for Advanced Technology in Telecommunications. Your inauguration of the complex and your words would have not only enormous meaning for us but would send a message to all about the triumph of the American will over great odds and the importance of scientific and technological education and research in securing America's pre-eminence in the world.

New York City:

Page 2 - President Bush

Polytechnic is the second oldest independent technological university in the United States. Our pioneering work in electrical, microwave and aerospace engineering and polymer chemistry, as well as telecommunications and information systems, is well known. Our faculty and researchers have been widely recognized as leaders in their fields, winners of the highest honors and awards.

In 1980, Dr. Herman Mark, known throughout the world as the "Father of Polymer Science," was awarded the National Medal of Science. Another distinguished faculty member, the microwave engineering pioneer Dr. Ernst Weber, won the National Medal of Science in 1987. And it was only this year that a third National Medal of Science was bestowed on a member of the Polytechnic family - Dr. Gertrude B. Elion, a doctoral student here in the 1940's who also shared the Nobel Prize in Medicine in 1988.

I sincerely hope that you will be able to be with us on May 28 for this momentous occasion.

Sincerely

A handwritten signature in dark ink, reading "George Bugliarello". The signature is fluid and cursive, with the first name "George" and last name "Bugliarello" clearly legible.

George Bugliarello

/GB

THE WHITE HOUSE
WASHINGTON

December 18, 1991

Dear George:

Congratulations are indeed in order for your leadership in developing Metrotech and I am happy to do what I can to persuade the President to be the main speaker at the celebration on Thursday, May 28.

You and your associates can indeed be proud of what you have accomplished and Metrotech serves as a model for the urban centers of all of our great cities today.

The President's speaking schedule is never finalized until about six weeks prior to the actual event as I am sure you will understand, but having the request in the files at an early point certainly helps. So having your letter and that of Joe Jacobs on hand now is certainly a move in the right direction. What I shall do is follow up with a memorandum to the head of the scheduling office, Ms. Kathy Super, and at a later time will talk to the President himself about the occasion.

In the meantime, let me take this occasion to wish you and your family a very merry Christmas and the happiest, healthiest and most rewarding of New Years.

With warm regards,

Sincerely yours,

D. Allan Bromley
The Assistant to the President
for
Science and Technology

P.S. The Padua student hat is a major addition to my academic garb
and I am very much indebted to you for it.

A handwritten signature in black ink, appearing to read 'D. Bugliarello', with a stylized flourish at the end.

Dr. George Bugliarello
President

Dear Dr. Bromley,

On behalf of the Inamori foundation, I wish to express my heart-felt gratitude for your kind assistance in obtaining President Bush's congratulatory message to the laureates of the 1991 Kyoto Prizes.

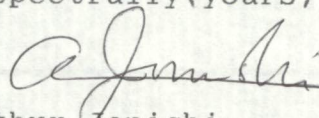

The 1991 Kyoto Prizes ceremony has been successfully completed, and the laureates and their family have returned to their home safely, with them the memories of happiness and joy.

The message of Mr. President was read by U.S. Consul-General in Osaka-Kobe Mr. Gregory L. Johnson at the presentation ceremony. It was to our great honor to be bestowed upon us the congratulatory message from the head of the Government of the United States which certainly symbolized and highlighted the international recognition of the Kyoto Prizes. We are certain that the three laureates were similarly impressed and gratified for the message.

As a means to convey the feeling we shared with the laureates, we have enclosed some photographs of the presentation ceremony herewith.

Again on behalf of the Inamori Foundation, I take this opportunity of thanking you for your thoughtful consideration and kind cooperation.

Respectfully, yours,

Arthur Jonishi
Senior Managing Director
The Inamori Foundation

Allan Bromley, Ph.D.
Science Advisor to the President
The White House
Washington, D.C. 20500

Dear Dr. Bromley:

Thanks once again for your support and guidance regarding the letter from the President to my father on the occasion of his birthday and retirement. I am afraid I complicated things initially by emphasizing the chair in Surgery which the University of Virginia had established in his name, as noted in your draft of November 7. Late in the afternoon on Friday, November 15, someone in the office of the White House counsel pointed out to Linda DeHart that any mention of the chair might be used for fundraising purposes. It was hard to persuade them that all this fundraising was over. Eventually, Lisa Coldwell and John Gardner were able to straighten things out and composed a graceful and substantial letter. I realize there is no way to adequately thank you. I suspect you see this as one of the duties of your office. Yet I also suspect you know that honors like these mean a great deal to people who make a scientific or medical contribution.

If you find yourself in San Diego investigating some aspect of science, big or small, I hope you will allow us to give you the tour of Scripps and Salk and be our honored guest.

Sincerely,

Ward Casscells, M.D.

Dear Dr. Bromley:

I would like to extend our thanks and appreciation for your participation in the GIS Symposium in Raleigh. This forum offered us the opportunity to continue our dialogue in seeking to establish a technological partnership which will benefit both the local and federal levels of government. We were able to bring together some of the best minds in the geographic information field from both the public and private sectors, to address the issue of technology exchange between our levels of government.

Your presence, personal interest and concern for the myriad of technological issues facing us meant a great deal to all in attendance. The fact that you were willing and able to spend a significant amount of time focusing and sharing your observations with the representatives from government, industry, and academia was very much appreciated. This meeting was an important step forward in our mutual efforts to establish pilots to demonstrate the practicality of establishing the technology transfer partnership we've proposed.

Your continued support and leadership means a great deal to NACo and we look forward to working with you and your staff in setting up the second symposium in Los Angeles next spring.

Thanks again for being with us and for being of such assistance and so supportive of our local technology concerns.

Sincerely,

Herb Stout, Chair
NACo R & T Focus Group

THE WHITE HOUSE

Dear Allan:

I just wanted to drop a general note to follow up on my earlier phone call. As I mentioned, I decided to accept an offer from Thermo Electron although it was for a different position from the one we discussed. For my first six to nine months with the corporation, I am acting as Director of Sales and Marketing for ThermedeTec, a rapidly growing division focused on drug and explosive detection systems. My "permanent" position, however, will be as Assistant to the Chairman and President, George Hatsopoulos. This is a fabulous opportunity to learn about the corporation first hand initially and then have the chance to work with a person who I have long admired.

I appreciate your taking the time to meet with me last summer to discuss this next step in my career. My first two months in this new position have been a terrific challenge (hence my delay in writing). Thermo Electron has turned out to be exactly the right choice for me.

Thank you again for your help.

Sincerely,

Kristine A. Langdon

Dear Dr. Bromley:

On behalf of Dr. Raymond Loehr, Chair of the Science Advisory Board (SAB), and the entire SAB membership, I want to express my appreciation for your participation in our Third Annual Membership meeting late last month.

Your remarks on the many facets of peer-review were "right on the money". By discussing the effects of science on policy and the effects of policy on science you were able to cover a broad range of interests of our members.

Your availability for the photo session was also appreciated. Rest assured that you will soon be receiving a tangible memory of your afternoon with Board!

I would be remiss if I did not mention my personal appreciation for Ms. Vickie Sutton's close cooperation in helping to arrange for this meeting.

I look forward to further interaction with you and your office as we work toward the common goal of improving the Federal process through the contributions of science and engineering.

Sincerely,

Donald G. Barnes

Dear Dr. Bromley:

On behalf of all of us at CL Washington Research Group, I would like to thank you for your outstanding presentation at our Annual International Symposium on October 25th at The Willard Hotel.

The conference was our most successful ever, with over 250 guests from the U.S., Canada, Europe and Asia. All were highly impressed with the caliber of speakers and we received many positive responses from our guests.

As you spoke, I thought how fortunate your students at Yale were to have you as a professor. Our clients were pleased with your insight and ability to relate the White House's priorities.

Thank you again for your presentation -- and if we can ever be of assistance to you, please feel free to contact me.

Sincerely yours,

Clifton L. Wiens

Dr. Allan D. Bromley
Assistant to the President
for Science and Technology and Director
Office of Science and Technology Policy
Room 360
Old Executive Office Building
Washington, DC 20506

Dear Dr. Bromley:

Dr. Kazuo Inamori, the founder of the Inamori Foundation and of Kyocera Corporation, and I extend our sincere gratitude for your assistance in obtaining President Bush's letter of congratulations to the laureates of the 1991 Kyoto Prize.

As I am sure you agree, we believe that this endorsement by the President signals the strong commitment of the United States to the advancement of science and technology. As you may be aware, Americans represent the single largest nationality of Kyoto Prize laureates.

Again, on behalf of the Inamori Foundation, Dr. Inamori and Kyocera, we thank you for your kind support.

Kindest regards,

A handwritten signature in dark ink, appearing to read 'Rodney Lanthorne', written in a cursive style.

Rodney Lanthorne
President

17th and Pennsylvania Avenue, N.W.
Washington, D.C. 20500

Dear Allan:

Thank you for your congratulatory note. I appreciate your thinking of me and taking the time to write. I am finding that it is, indeed, a terrific job.

Although I have been at the agency but a few days, the Vice President and I have already jointly announced that the Baltics have requested Peace Corps programs for their countries. And, I have just returned from a trip to Bulgaria where I headed a Presidential delegation to mark the opening of the American University in Bulgaria. While there, I had the opportunity to visit Peace Corps Volunteers in the field and Peace Corps country directors from Poland, Hungary, Czechoslovakia, Romania, Poland and Bulgaria. Their work there is exciting and inspiring. They are training English teachers, helping teach small business skills and working on programs to clean up pollution and protect the environment.

Thanks again for the kind thoughts.

Sincerely,

Elaine L. Chao
Director

THE WHITE HOUSE
WASHINGTON

December 2, 1991

Dear Elizabeth:

Many thanks for your kind note concerning my talk in Rochester at your annual meeting as well as for your warm hospitality and for getting me back to the airport in time for my flight back here to Washington.

You asked about possible sources of funding for your activities and it seems to be that the logical source would be the Environmental Protection Agency. I would suggest that you write to Mr. William Reilly, the Administrator at EPA, telling him that you are writing at my suggestion, telling him something of the nature of your center, and sending him some sample copies of your publications.

If you would let me know when you send this off to Bill Reilly, I would be happy to call him on your behalf to see what we can do to get the support that would make it possible for you to expand your already excellent activities.

With warmest best wishes,

Sincerely yours,

D. Allan Bromley

Dear Dr. Bromley,

I write with great appreciation for your timely, challenging and most informative presentation. You have surely stimulated our membership toward stronger support and participation, and have helped us to raise funds for the Center. We are most grateful.

Funding for a nonpartisan, nonprofit organization is always difficult and we would appreciate any specific advice and help you can give us in approaching federal sources. CEI offers a unique, cost-effective vehicle for information transfer among the many constituencies which have a stake in the outcome of environmental policy decisions.

Again, many thanks for taking time from your busy schedule to be with us in Rochester.

Sincerely,

Elizabeth Thorndike

Dear Dr. Bromley:

We appreciated very much your again giving the keynote speech for the Earth Observations & Global Change Decision Making: A National Partnership conference. It set a constructive tone for what I thought was a very good meeting. It is gratifying to see the progress that has been made over the last three years, and I am hopeful that the momentum will continue.

I was interested in your comments about the international regional centers. It was also interesting to note that IIASA may play a key role after all of the previous history of that organization.

Best regards,

Russ O'Neal

Dr. D. Allan Bromley
Assistant to the President
for Science & Technology Policy
Old Executive Office Building
17th St. & Pennsylvania Ave., N.W.
Washington, D.C. 20500

Dear Dr. Bromley:

I want to express my appreciation for taking time out of your busy schedule to meet with me and the Vice President of our Washington office, Gerald E. Connolly. I believe that our meeting afforded us an opportunity to describe the important scientific research underway here at our Menlo Park headquarters and at the David Sarnoff Research Center laboratory in Princeton, New Jersey. It would be my fond hope that at some point in the not-so-distant future, you might visit one or both of these facilities to see first-hand some of the cutting-edge work in science and technology that is carried out by SRI International.

Your leadership in raising the profile of the national science and technology agenda is deeply appreciated by all of us in the scientific community. If there is any way that I or my colleagues at SRI International can be of assistance to you, please do not hesitate to contact us.

With every best wish,

Sincerely,

A handwritten signature in blue ink that reads 'James J. Tietjen'.

Dr. Allan Bromley
Presidential Science Advisor
The White House
Washington, D.C. 20500

Dear Dr. Bromley:

Thank you so much for meeting me last Monday regarding Presidential appointments. I appreciate your advice and encouragement. The most likely potential opportunity that has been identified from my meetings around town is a position on the yet to be funded chemical spill and safety board/commission.

In the meantime, I asked Cecelia Hall and Kelly Sinclair if I could be considered for part-time advisory committee positions at DOD or EPA, respectively, to provide value-added service to the Administration and to better position myself in "the system". I would also be interested in an advisory committee role under the auspices of your office, if such a thing exists.

Again, thank you for your help. Please feel free to call me for any reason at 213 640-0045.

Yours truly,

Jack R. Witz, D.Env.
