EXHIBITION

ALFRED GRÜNWALD

1884 - 1951

Bank Austria

AUSTRIAN CULTURAL INSTITUTE

Alfred Grünwald was one of the most successful librettists of the "silver era" of classical Viennese Operetta, which stretched from the opening of Franz Lehár's *THE MERRY WIDOW* in 1905 to the 1930s. During this period of tumultuous political and social upheaval in Central Europe, the Viennese operetta combined elements of romance, humor, and nostalgia so winningly that it won admirers internationally. Besides creating more than 40 operetta librettos, Alfred Grünwald wrote non-musical plays, short stories, and newspaper articles, and was the theatre critic for the *New Viennese Journal*. He emigrated to the U.S. in 1940 and became an American citizen.

The curator for this exhibition is Richard Traubner.
Sponsored by Bank Austria AG.

Dear Allan:

On behalf of the American Chemical Society (ACS), I am extending an invitation for your participation as a speaker in the plenary session of a symposium entitled "Materials Chemistry: An Emerging Subdiscipline." This session will be held on Monday, August 24, 1992 in Washington, D.C..

Professor Len Interante, Editor of the new ACS Journal, ***Chemistry of Materials***, Professor Dennis Hess (Lehigh University), and Professor Gary Wnek (Rennselaer Polytechnic) are co-chairing the symposium which is being held as part of the ACS' 204th National Meeting. Beyond the plenary session, the symposium will have sessions covering specific subfields of materials, such as composites, electronics materials and advanced ceramics processing. Another session also is being organized by Professor Ellis (University of Wisconsin-Madison) in which the integration of materials sciences in chemistry curricula and the education of "materials chemists" will be discussed.

In view of the vital role of the material sciences to both the economic and military competitiveness of this Nation, your personal perspectives will be of great interest to our symposium participants. Your willingness to take part in this plenary session would be greatly appreciated. Other plenary speakers being invited include Dr. Walter Massey, past ACS President Mary Good, and other leaders in the science and engineering community.

We look forward to your acceptance of our invitation and would be pleased to furnish you with any additional information you may require. Ms. Kathleen Ream, Head of our Department of Government Relations and Science Policy, will be contacting your office shortly regarding your availability.

Sincerely yours,

S. Allen Heininger

January 8, 1992

Dear Mr. Heininger:

Thank you for your letter of November 27 inviting me address the plenary session of your **Materials Chemistry: An Emerging Subdiscipline** symposium scheduled for August 24 here in Washington, D.C. I apologize for the much belated response.

Although I would like to join you and your colleagues for this occasion, I must regretfully decline because I have a previous commitment of long-standing.

Thank you for thinking of me and let me offer my best wishes for a successful symposium.

Sincerely yours,

D. Allan Bromley

Dr. D. Allan Bromley
White House Science Advisor
The White House
1600 Pennsylvania Avenue
Washington, D.C. 20500

Dear Dr. Bromley:

Your speech to the research and federal liaisons section of NASULGC was most enjoyable. As I indicated to you after dinner, I would be honored if you would visit New Mexico State University at a time suitable to your schedule which might coincide with another visit to the Southwest or Southern California.

As a Carnegie I Research University, with over $80 million in research expenditure annually, NMSU is a major research institution and ranked sixth among all universities in NASA research funding. The two enclosed brochures will expand on our research endeavors.

If a 12 to 24-hour stopover could be arranged, I would suggest an agenda to include a meeting with the President and his staff, and an address to both our Sigma XI Chapter and the Physics Department. We are 20 miles from the White Sands Missile Range and the Johnson/NASA Test Facility. Therefore a quick visit could be arranged to one or both of these installations. Sandia and Los Alamos National Laboratories are 225 and 300 miles, respectively, north of Las Cruces; therefore if you wish to visit either or both a second day in the Southwest would be needed.

El Paso International Airport, El Paso, Texas, is the logical air terminal, and good connections are available from Washington, D.C., National via Chicago or Dallas/Fort Worth. New Mexico State University would be honored if you could arrange to visit the enchanted land of New Mexico and our university.

Sincerely,

Averett S. Tombes
Vice President for Research and
Economic Development

cc: James E. Halligan, President, NMSU
Pete Domenici, Senator
Jeff Bingaman, Senator

WASHINGTON

December 16, 1991

Dear Mr. Tombes:

Thank you for your letter of November 20, 1991, inviting me to visit New Mexico State University. I apologize for the much belated response.

I would, indeed, like to visit your university and, when I have an opportunity to be in the Las Cruces area I will contact your office so that it might be arranged.

I appreciate your thinking of me.

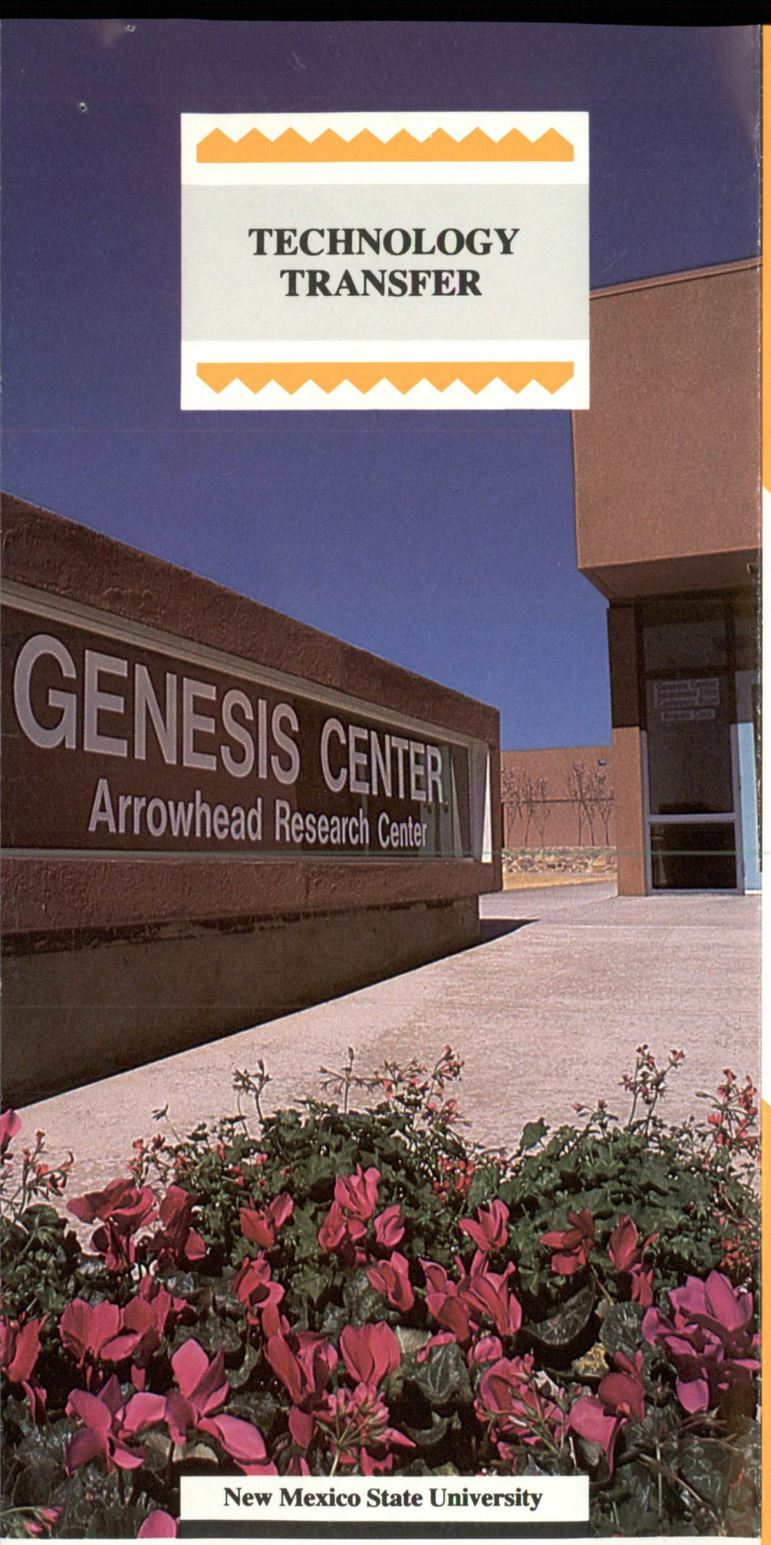

With all best wishes,

Sincerely yours,

D. Allan Bromley
The Assistant to the President

TECHNOLOGY TRANSFER

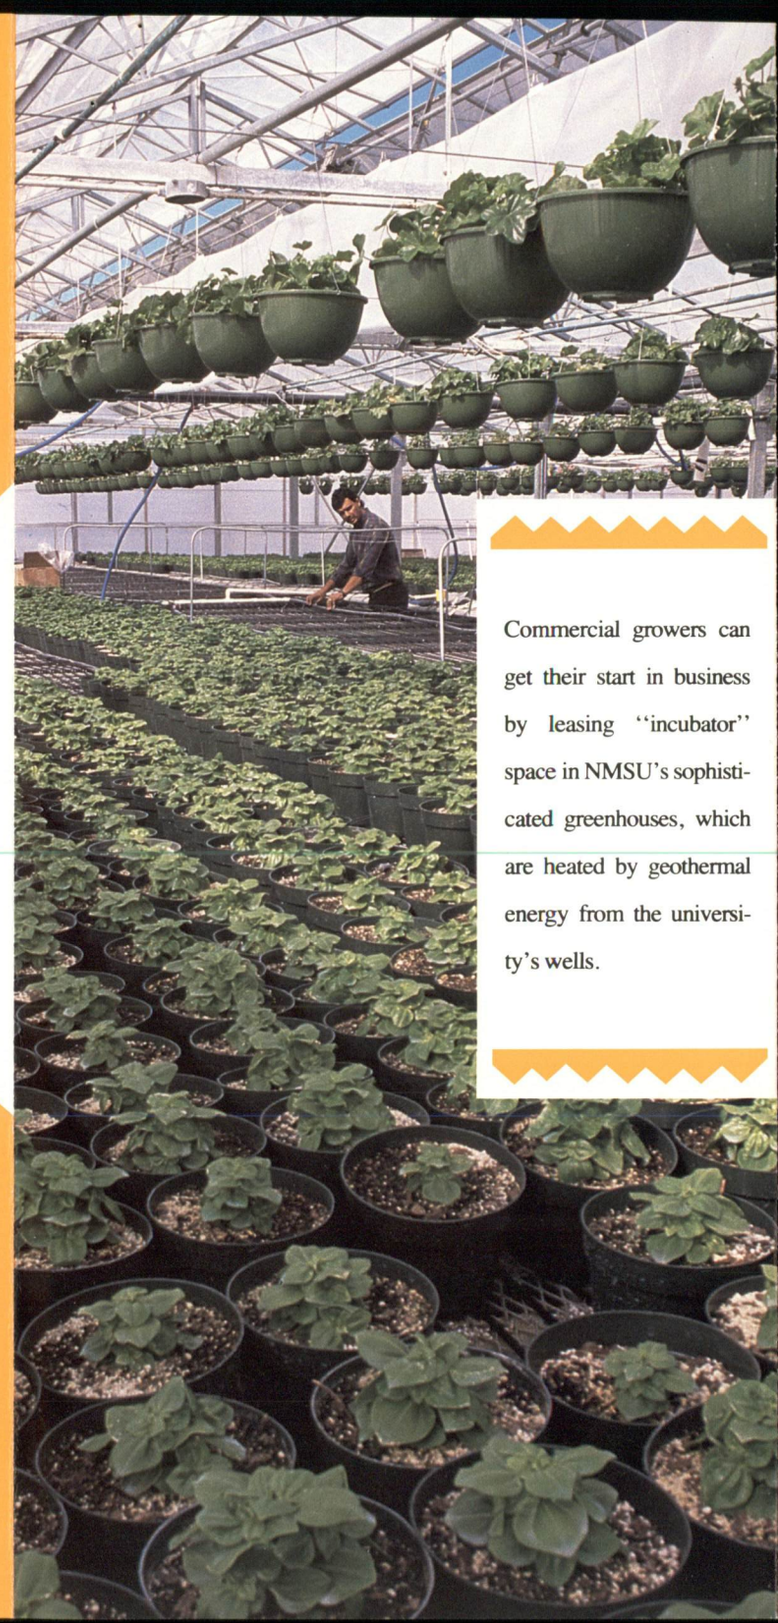

New Mexico State University

The mandate of the modern university goes well beyond educating young minds for future leadership. Today, universities must spark the transfer of ideas and technology into the marketplace.

Technology transfer is central to the mission of New Mexico State University, which has a century-old tradition of research and service as the state's land-grant institution. Today, NMSU holds more than $200 million in total research contracts. It also anchors the southern end of the Rio Grande Research Corridor, linking New Mexico's large number of scientists and technologists in universities and facilities such as Los Alamos National Laboratories, NASA's White Sands Test Facility, and Sacramento Peak and Apache Point astronomical observatories.

In recent years, NMSU has formed nontraditional partnerships with the private sector to stimulate new industries, more jobs, and a stronger New Mexico economy. Entrepreneurs from off campus as well as on campus bring promising ideas to the marketplace through the university's Arrowhead Research Park, the Genesis Center, the NMSU Office of Intellectual Properties, and other R & D facilities.

The university helps fledgling firms survive the early critical years by offering various benefits: ''incubator space''; an adventuresome, motivated labor force available among students and graduates; campus resources and expertise, ranging from library and computing facilities to world-class researchers; and cultural and recreational amenities.

Commercial growers can get their start in business by leasing ''incubator'' space in NMSU's sophisticated greenhouses, which are heated by geothermal energy from the university's wells.

Arrowhead Research Park

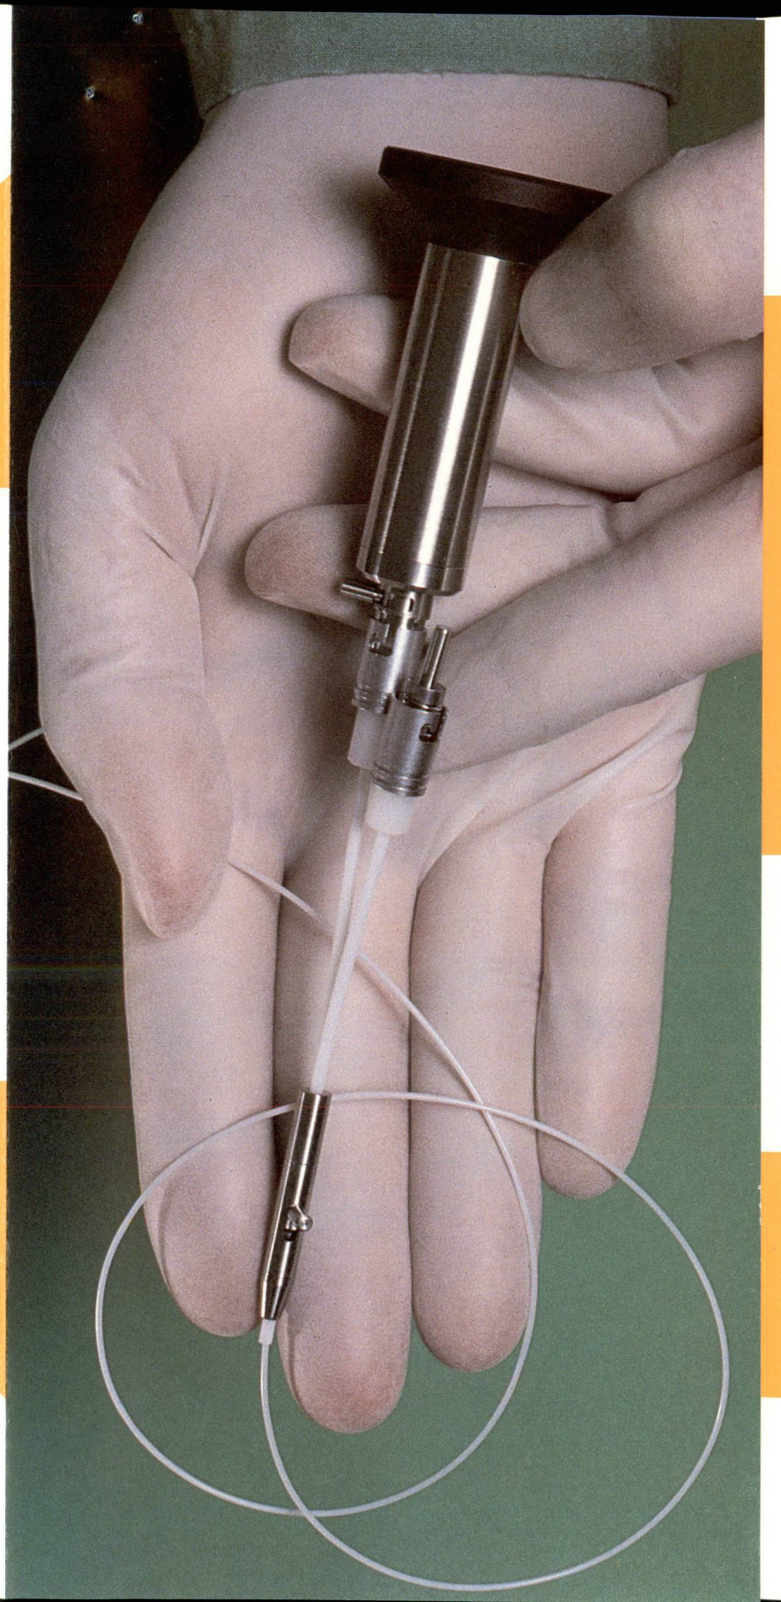

Arrowhead Research Park is part of a long-term technology transfer effort, created through the New Mexico State University Research Park Corporation and the New Mexico State University Technology Transfer Corporation. The park lies on a 365-acre tract on the south end of the NMSU campus, at the intersection of interstate routes 25 and 10. Geographically distinctive, the site is bordered by the Organ Mountains, desert mesas, and the fertile Rio Grande valley. The park is designed for companies specializing in research, development, and light manufacturing as well as those businesses supporting these activities.

Companies like Tesar Instruments, which produces endoscopes and opto-medical instruments, benefit from being located near the resources and expertise found on the NMSU campus.

Genesis Center

The Genesis Center, located on the northern edge of Arrowhead Research Park, provides affordable incubator space to small technology-based start-up companies. The center's 30,000-square-foot building is divided into three pods of 10,000 square feet each. In addition, the center has a supporting office complex, including a reception area and conference room available to tenants.

Businesses in the Genesis Center generally focus on high-technology and related activities. Some companies are developing technology spun off from NMSU research. Other businesses founded by outside entrepreneurs are located in the Genesis Center to be near the university.

Related Efforts

pharos group, inc., a company created by former NMSU staff members, designs computer data communications systems and markets original software. Among its products are SITE, a highly flexible image processor, and LanScan, an expert diagnostic system for troubleshooting elaborate computing networks.

Tesar Instruments produces miniature endoscopes and related optomedical instrumentation. The company has two types of endoscopes: small-diameter, rigid endoscopes that bring endoscopy to fields such as pediatric surgery; flexible endoscopes, which may contain channels for laser fibers or miniature instruments.

Southwest Technology Development Institute

New Mexico's sunny skies make the university an ideal site for a photovoltaic experiment station that tests solar cells from manufacturers around the world.

The Southwest Technology Development Institute at NMSU promotes technology transfer and economic development through its activities in photovoltaic energy technology and in geothermal greenhouse operations.

The Southwest Region Experiment Station is a solar-cell test facility of 12 prototype buildings and several open test structures for evaluating residential photovoltaic systems.

Two greenhouses, each 6,000 square feet and geothermally heated, are leased as incubator space to start-up growers. The greenhouses have innovative heating and cooling systems, fully computerized environmental controls, and state-of-the-art film cover materials.

Genesis Center Companies

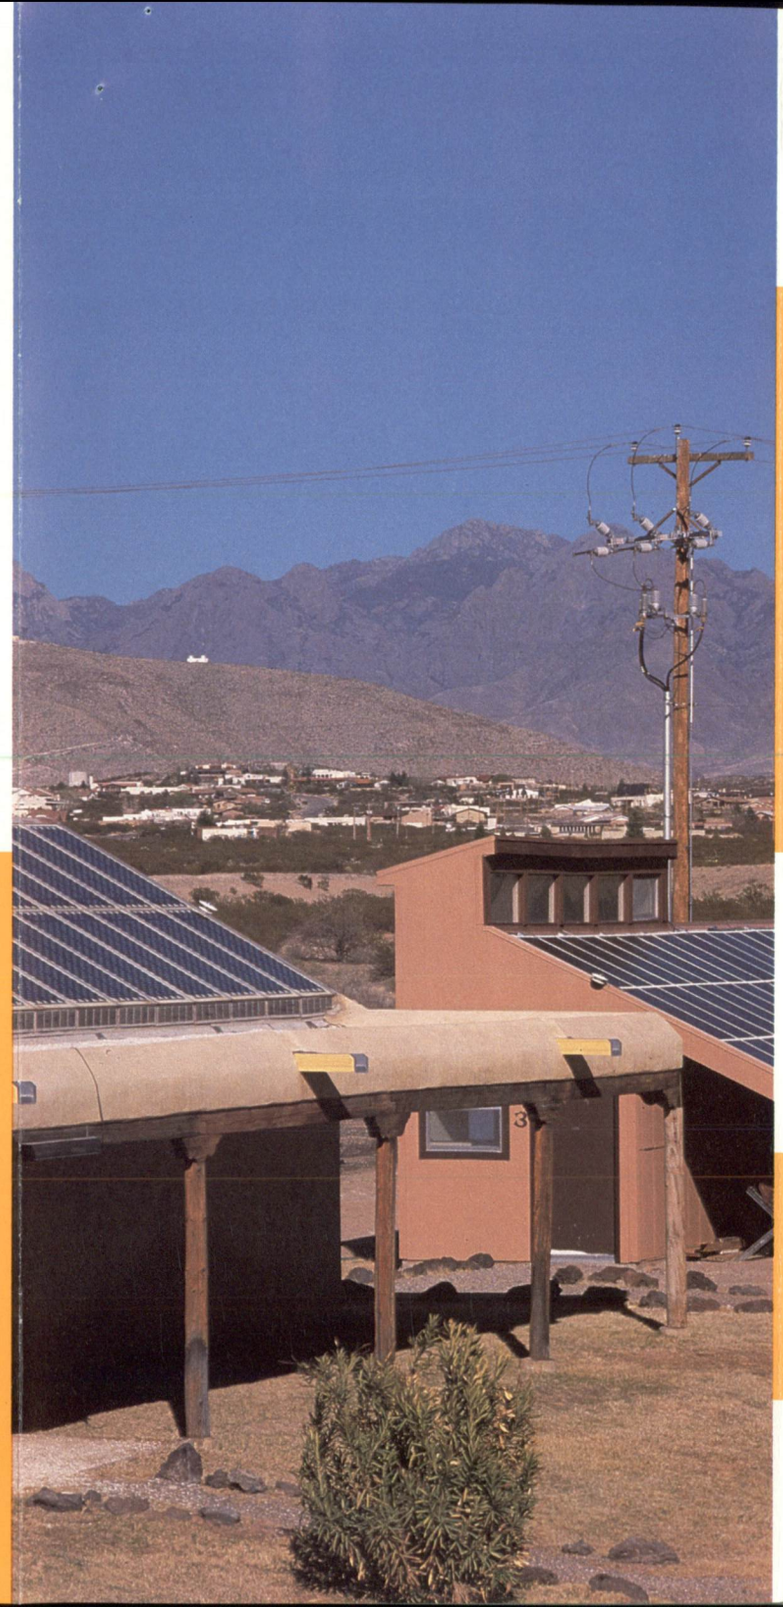

Bio-Recovery Systems Inc., a spin-off from NMSU research, manufactures and markets a patented, algae-based, automated treatment system to remove toxic and heavy metals from water. The company's founder, Dennis Darnall, discovered algae's attribute while conducting basic research as an NMSU chemistry professor. Bio-Recovery has targeted three markets: wastewater treatment, groundwater treatment, and recovery of precious metals from geothermal wells.

Terametrix Systems International Inc. has developed the Portable Computer Augmented Telemetry System (PCATS). PCATS is a unique system for transmitting, displaying and storing information received from remote sources, such as space vehicles. Compatible with an IBM personal computer, PCATS does not require users to have large scientific computing systems or programmers. The technology was developed by a team of engineers at NMSU headed by Steve Islas, now president of Terametrix.

Spin-offs from university research—such as Terametrix's portable telemetry system—are being commercialized in the Genesis Center.

Amparo Corporation provides sophisticated consulting in applied physics and electrical engineering. Its areas of expertise include RF systems design, ionospheric research, remote sensing and image processing, radiation diagnostics, hydrodynamics, and material science.

Daystar, Inc. provides energy engineering solutions for system engineering/integration, hardware design, fabrication, testing, and report/proposal preparation. Daystar offers expertise in the design of photovoltaic power systems. Equipment is located in several sites throughout the United States.

RESEARCH

Research is fundamental to the life of a university. New Mexico State University is well situated as a research center. The university anchors the southern end of the region designated by the state as the Rio Grande Research Corridor. Along this corridor, from Los Alamos to Las Cruces, are five state centers of technical excellence, two of which are at NMSU. The NMSU Computing Research Laboratory focuses on artificial intelligence, and the Plant Genetic Engineering Laboratory concentrates on using advanced techniques to adapt plants to arid environments.

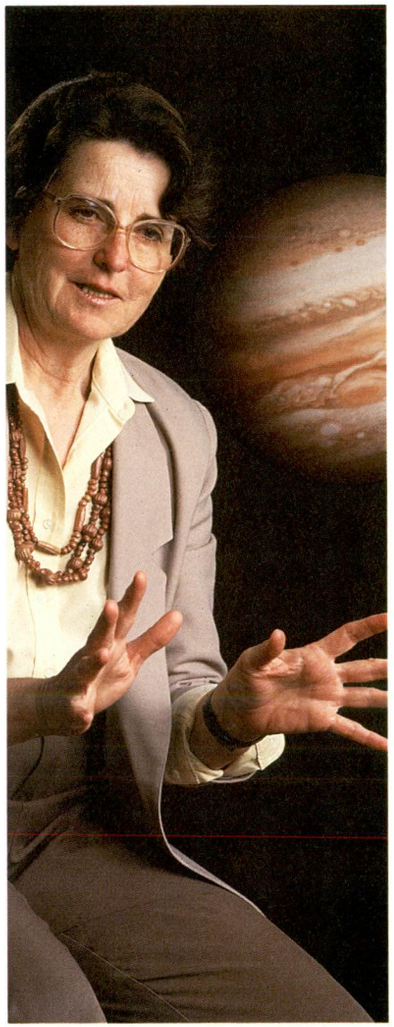

The high-tech corridor capitalizes on the strengths already existing in New Mexico in numerous research facilities such as Sandia National Laboratory, Los Alamos National Laboratory, White Sands Missile Range, the Phillips Lab, the National Aeronautics and Space Administration's White Sands Facility, the Sacramento Peak Observatory, the Telemetry Data Relay Satellite facility, and the Army Atmospheric Science Laboratory.

NMSU, categorized by the Carnegie Foundation as a level one research institution, holds more than $300 million in total research contracts. In 1989, NMSU ranked 44th among public universities receiving federal support and 21st among land-grant universitites. Annual expenditures were nearly $80 million.

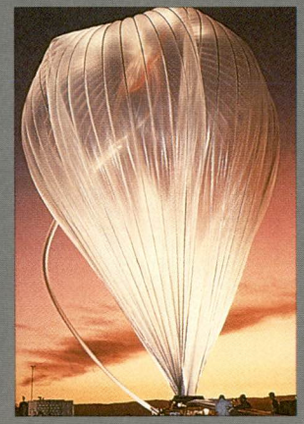

Over the past two decades, NMSU scientists have attracted substantial funding for long-term studies of the fragile ecosystems of the desert.

Dr. Reta Beebe, astronomy professor, is an active investigator on National Aeronautics and Space Administration projects.

New Mexico State astronomers soon will begin to use the world's second-largest university-owned telescope at Apache Point Observatory in New Mexico's Sacramento Mountains near Cloudcroft.

The earth's thin upper atmosphere is being probed by NMSU researchers who are world leaders in scientific ballooning.

New Mexico State University enrolls more than 12,500 undergraduates and 2,000 graduate students on its main campus. Doctorates are granted in the following disciplines: agronomy, animal and range science, astronomy, biology, business administration, chemistry, computer science, counseling psychology, curriculum and instruction, educational administration, engineering, mathematics, molecular biology, physics, psychology, rhetoric and professional communication, and interdisciplinary. The educational specialist degree is offered in four areas, master's degrees in 47 areas, and the baccalaureate in 71 areas.

The New Mexico Regional Primate Research Laboratory, located on Holloman Air Force Base near Alamogordo, N.M., maintains a large chimpanzee and research monkey colony. Research is in all areas of bio-medicine, including immunology, toxicology, AIDS, pharmacology, and pathology.

The Computing Research Laboratory is a Center of Technical Excellence. An interdisciplinary lab with researchers from numerous university departments, the CRL focuses on natural language systems, automated problem solving, user interfaces, and scientific computing supported by parallel computing research. CRL has three SUN/Lisp machine software labs.

The Plant Genetic Engineering Laboratory, Center of Technical Excellence, develops plant biotechnology innovations for crop plant adaptation to semi-arid regions and stimulates long-term economic development in New Mexico through high-technology expertise and technology transfer.

The Physical Science Laboratory, founded in 1946, is a multi-discipline, nonprofit contracting agency engaged in defense and space-related technology projects. It conducts research, development, test evaluation, and engineering support for White Sands Missile Range, NASA, Department of Defense, and other national, state, and commerical organizations. Annual expenditures exceed $40 million, and 650 employees pursue work in electromagnetic technology, telemetry, satellite instrumentation and control systems, data reduction, processing and analysis, real-time digital systems, operations research, and solar, wind, and geothermal research and development.

The Center for Latin American Studies was established in 1979 under the NMSU College of Arts and Sciences. As a consortium with the UNM Latin American Institute, it is funded by the U.S. Department of Education. It promotes research by faculty and students in Latin American area studies and languages and sponsors outreach activities and schools.

The Border Research Institute develops programs that foster cooperation betweeen the agricultural, business, and academic sectors to increase opportunities for international trade and culture exchange with Mexico. BRI serves as an information clearinghouse for the general public, academicians, and policy makers.

Creative activity and scholarly studies play key roles in NMSU's research scenario, enriching the university's cultural climate and enhancing its reputation as a comprehensive center of learning.

Representative of the creative work of the fine arts faculty is Prof. Amanda Jaffe's ceramic mural commissioned for the Staten Island Zoo.

and minigrants. Examples of strong research programs are astronomy, biology, computer science, chemistry, mathematics, and physics. Excellence in the liberal arts is exemplified by research programs in art, English, history, music, and theatre arts. Interdisciplinary studies are encouraged.

The Center for International Programs manages NMSU's international activities encompassing academic and research programs. CIP also supervises various short-term training programs. Foreign projects include the National Agricultural Research Project in Egypt, funded through the U.S. Agency for International Development, and the Natural Resources Management Project in Niger, funded by the government of Niger. NMSU works on technical assistance projects in cooperation with the Consortium for International Development, composed of western-state universities.

The Educational Research Center facilitates research, development, and service activities within the College of Education. One branch of ERC, the Dove Learning Center, includes the NMSU preschool, a preschool for handicapped (TRESCO), preschools for gifted and deaf, and Headstart. Other divisions within ERC are the Center for Rural Education and the MIS/VTIS Project.

The New Mexico Water Resources Research Institute at NMSU, founded in 1963, was the first such agency established at a land-grant university. WRRI has no in-house researchers but administers projects for all of New Mexico's major universities and assists researchers in obtaining funds. In addition, the institute publishes a quarterly newsletter and numerous technical reports, publicizes events, and maintains a water-resources library that includes videotapes available to the public. The annual $1.5 million budget includes approximately 50 percent state funds and 50 percent federal funds.

The Southwest Technology Development Institute's mission is to provide applied research services in energy-related technology development, such as solar and geothermal, to private and public sector clients. The institute's focus is to help stimulate New Mexico's economic base through commercialization of promising technologies.

The New Mexico Regional Primate Research Laboratory, located on Holloman Air Force Base near Alamogordo, N.M., maintains a large chimpanzee and research monkey colony. Research is in all areas of bio-medicine, including immunology, toxicology, AIDS, pharmacology, and pathology.

The Computing Research Laboratory is a Center of Technical Excellence. An interdisciplinary lab with researchers from numerous university departments, the CRL focuses on natural language systems, automated problem solving, user interfaces, and scientific computing supported by parallel computing research. CRL has three SUN/Lisp machine software labs.

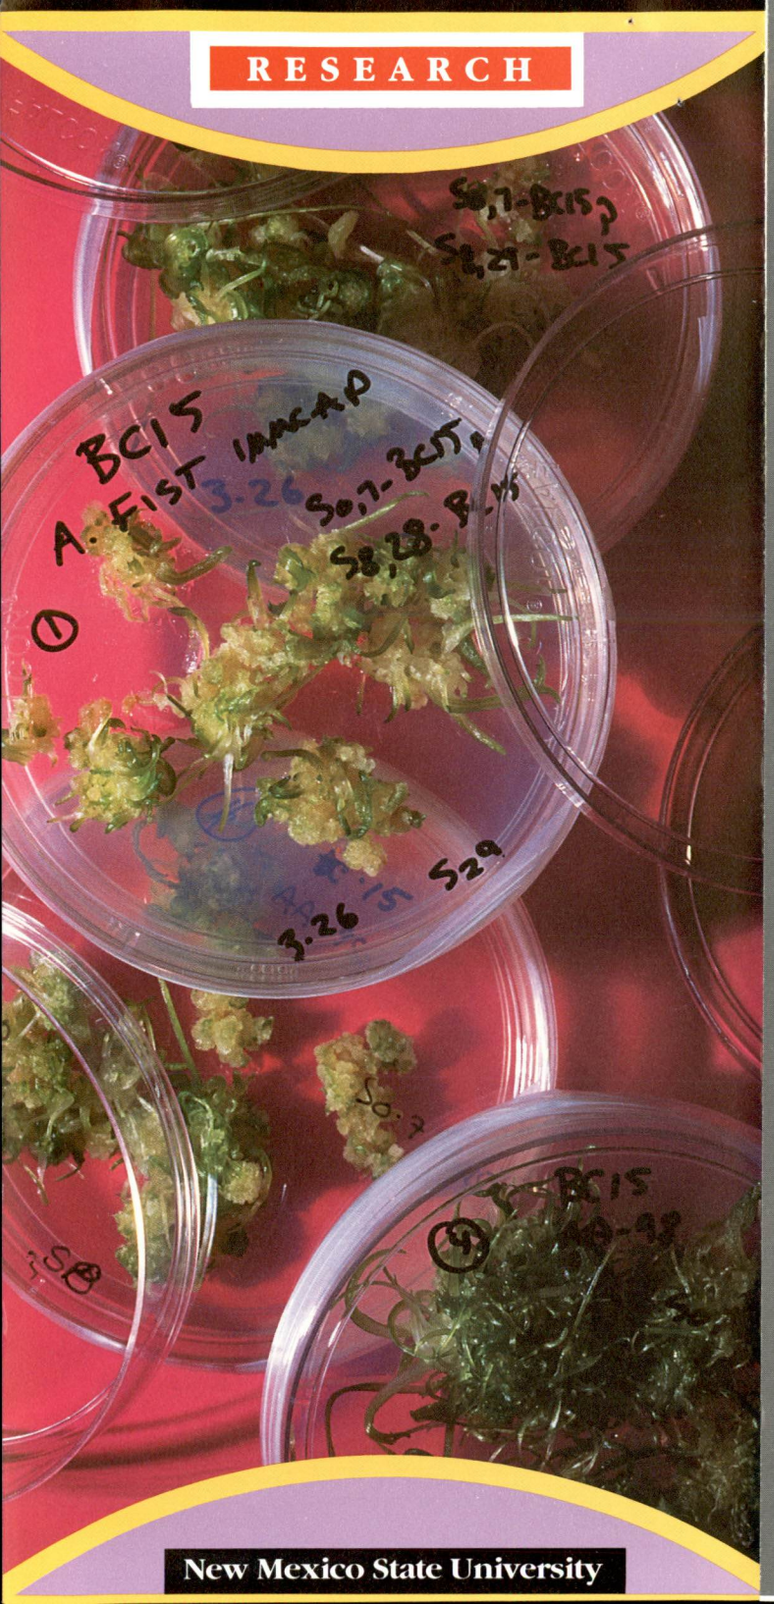

The Plant Genetic Engineering Laboratory, Center of Technical Excellence, develops plant biotechnology innovations for crop plant adaptation to semi-arid regions and stimulates long-term economic development in New Mexico through high-technology expertise and technology transfer.

The Physical Science Laboratory, founded in 1946, is a multi-discipline, nonprofit contracting agency engaged in defense and space-related technology projects. It conducts research, development, test evaluation, and engineering support for White Sands Missile Range, NASA, Department of Defense, and other national, state, and commerical organizations. Annual expenditures exceed $40 million, and 650 employees pursue work in electromagnetic technology, telemetry, satellite instrumentation and control systems, data reduction, processing and analysis, real-time digital systems, operations research, and solar, wind, and geothermal research and development.

NEW MEXICO STATE UNIVERSITY

NMSU research is conducted through various institutes, laboratories, and other programs:

The Agricultural Experiment Station conducts basic and applied research supporting agriculture, natural resources management, environmental quality, and improved quality of life. Based on the main campus, the AES has a statewide network of 13 research facilities.

The Cooperative Extension Service conducts off-campus, research-based education. Faculty offer programs in agriculture, urban horticulture, economic development, natural resources, 4-H, and home economics in each county. Volunteers assist, and advisory groups guide, program efforts.

The Center for Business Research and Services provides business and economic research and consultation services to both public and private sectors. It includes the Center for Management and Professional Development, which provides management training seminars and consulting services; the State Data Center, which makes federal census and business data available to the public; the Real Estate Research Center; the Center for Econometric Modeling and Forecasting, which publishes a quarterly forecast for the state and national economies; and the Center for Transport and Travel, focusing on the transport of goods and the transit and travel industry.

The Engineering Research Center coordinates and promotes research in agricultural, chemical, civil, electrical and computer, geological, industrial, and mechanical engineering. In addition to individual grants and contracts, faculty conduct research through various centers: Center for Transportation Research, Center for Electronic Vision and Robotics, Center for Biochemical Engineering Research, Optics and Materials Science Lab, Center for Environmental Engineering and Science, Manuel Lujan Space Tele-engineering Laboratory, Particle Astrophysics Lab, and Estimations and Contol Lab. In recent years, research expenditures have grown more than 100 percent with approximately 70 percent of the funds from federal sources. Close ties exist between the College of Engineering faculty and New Mexico's federal laboratories.

The Arts and Sciences Research Center supports a broad spectrum of research, service, and scholarly activities, including proposal writing, pre- and post- award administration, seed funds,

The Honorable D. Allan Bromley
Assistant to the President for
Science and Technology
The White House
Washington, DC 20500

Dear Mr. Bromley:

The President's Committee on the Arts and the Humanities and the Institute of International Education have been working together to generate understanding and increased private support for international programs in the arts and the humanities. Expanded opportunities for international educational and cultural programs will be of enormous significance in preparing the United States for the challenges of a competitive international marketplace.

The centerpiece of our work will be an international forum, a one-day program designed to enlighten funders about preparing the United States for the demands of world cultural leadership. It is my pleasure to invite you to attend events at the State Department on Friday, December 13, from 8:30 a.m. until 5 p.m., as an observer. We will be joined by distinguished speakers representing the Cabinet and top business and cultural institutions. Participants will include chief executives of major U.S. corporations, foundations, and cultural institutions. A conference agenda is enclosed.

As space is limited at the State Department, please call 202-682-5409 or reply via FAX using the enclosed form as soon as possible. We hope that you can join us.

With best wishes,

Sincerely,

Diane Paton

Diane J. Paton

Bassam Z. Shakhashiri is Professor of Chemistry at the University of Wisconsin.

This program commemorates the 200th anniversary of the birth of Michael Faraday, the noted English physicist and chemist. Faraday originated the tradition of Christmas Lectures for children at the Royal Institution of Great Britain in the 1840s.

This lecture will contain dramatic demonstrations with multicolored liquids, exploding balloons, flames and smoke, blasts and excitement.

Special guests, including a visitor from the North Pole, will help celebrate this important occasion.

Southern California Edison

On January 1, 1992, Southern California Edison will make history with the first all-electric powered float in Pasadena's Tournament of Roses Parade.

Southern California Edison, through its electric transportation program, is committed to helping bring technological solutions to two of Southern California's serious environmental problems — poor air quality and traffic congestion.

The parade's theme, "Voyages of Discovery," presents Edison with an ideal opportunity to bring home the message to 325 million people internationally that electric transportation is a practical and viable solution to Southern California's environmental problems.

The 35,000 pound float, paid for with SCEcorp shareholder funds, will be powered by the same components used in SCE's fleet of electric G-Vans.

Continue your New Year's celebration with

Southern California Edison Company

You and your family are invited to join us at the Rose Bowl Hospitality Concourse.

Events

Brunch 11:00 a.m. - 2:00 p.m.

Dr. D. Allan Bromley
Assistant to the President for Science and Technology
Director, Office of Science and Technology Policy
Old Executive Office Building - Room 358
Washington, DC 20500

Dear Dr. Bromley:

On Friday, January 10, 1992, The European Institute will conduct an international round table seminar entitled "TOWARDS A TRANSATLANTIC ENVIRONMENTAL POLICY." On behalf of the Board of Directors of The European Institute, I would like to invite you to participate in the seminar. I also cordially invite you and Mrs. Bromley to join us at the opening dinner on January 9 with **MAURICE STRONG**, Secretary-General of the United Nations Conference on Environment & Development (UNCED), who will participate in the entire seminar and take its conclusions to Brazil.

Within the context of the forthcoming UNCED "Earth Summit," this exclusive meeting of 40 to 50 top transatlantic policy-makers will address the challenges of coordinating European and U.S. environmental policies. The discussions will examine differing approaches to pending international issues such as the creation of an "ecological tax," and assess the impact of European and American policies on national competitiveness and the implementation of environmental protection. The seminar will also examine the necessity to coordinate European and American legal advice on environmental policies in Eastern Europe.

The program is being sponsored in part by The Ford Foundation. The seminar will bring together top negotiators and policy-makers from the U.S., the E.C. Commission, the European Parliament, EFTA, and Eastern Europe. For example, **ROBERT REINSTEIN**, Deputy Assistant Secretary for Environment of the U.S. State Department, **ROBERT RYAN**, Chief U.S. negotiator for UNCED, and **JOHN BELL**, Special Advisor on the Environment, Canadian Department of External Affairs, are already planning to participate. A preliminary agenda, as well as information on The European Institute, are enclosed for your review.

In order to facilitate the organization of this high level seminar, we would appreciate your early consideration of this invitation. I hope that you will be able to join us. We will contact your office to provide further information. In the meantime, if you have any questions, please have your staff call me directly at (202)966-5071.

Sincerely,

J. Grapin

THE EUROPEAN INSTITUTE

PRELIMINARY PROGRAM AGENDA

"TOWARDS A TRANSATLANTIC ENVIRONMENTAL POLICY"

An International Round Table Seminar Conducted by The European Institute

January 9 and 10, 1992

The Four Seasons Hotel
Washington, DC

4801 MASSACHUSETTS AVENUE, N.W. SUITE 400, WASHINGTON, DC 20016
TELEPHONE: (202) 895-1670 ■ FAX: (202) 362-1088

THE EUROPEAN INSTITUTE

The European Institute was established in Washington, DC and officially launched on June 15, 1989 by Jacques Delors, President of the Commission of the European Communities. An independent private institution, the Institute serves as a non-profit center for dialogue on the full spectrum of issues facing European economic, political and security developments, and relations with the United States. It maintains balanced representation of Americans and Europeans in all aspects of its activities, including boards, staff, discussion leaders, participants, and funding. The Institute brings together European and American government officials and policy makers, members of the US Congress, European parliaments, and the E.C. Commission, corporate executives, labor representatives, academics, journalists, and foreign policy and economic experts.

PROGRAMS

Euro-American Issues Dinners

Each dinner features a European leader with his or her American counterparts. The 1990-1991 program included: ENRIQUE BARON CRESPO, President of the European Parliament; VICE PRESIDENTS HENNING CHRISTOPHERSEN, FRANS ANDRIESSEN and SIR LEON BRITTAN of the EC Commission; and DR. HANS SIMONS, State Secretary for Health and Welfare of the Netherlands. American officials such as AMBASSADOR CARLA HILLS, United States Trade Representative, regularly participate in the meetings.

European Integration Series

A series of working discussions are held on issues related to European integration, EC-EFTA relations, and West European co-operation with Eastern Europe. Discussion leaders have included VICE PRESIDENT FILIPPO MARIA PANDOLFI of the EC Commission and MIKAEL SOHLMAN, Under Secretary for Foreign Trade of Sweden.

Transatlantic Business Advisory Committee

Composed of corporate members of the Institute, the Committee engages in focused, in-depth discussions with European and American officials on issues related to transatlantic trade and investment.

Founding Members Meetings

Private, high-level meetings are convened in Washington and New York City for founding members and special guests with senior decision-makers and CEOs from Europe such as: VICE PRESIDENT MARTIN BANGEMANN of the EC Commission; PASCAL LAMY, Chief of the Staff of President Jacques Delors; and CHRISTIANE SCRIVENER, EC Commissioner in charge of tax harmonization.

International Seminars and Conferences

The Institute was the first organization in 1990 to conduct a seminar in the US on the implications of the European Economic Area. In April 1991, it convened in Brussels a high-level seminar on "Evolving European Institutions and Their Impact on International Business and Economic Policy" to examine developments of the two intergovernmental conferences on European monetary and political union.

BOARD OF DIRECTORS

The members of the Board of Directors include: UMBERTO AGNELLI, Vice Chairman, Fiat SpA; ROBERT AGOSTINELLI, General Partner, Lazard Frères; DR. MARIO ARCARI, Managing Director, Banca Commerciale Italiana; SIR JEFFERY BOWMAN, Senior Partner, Price Waterhouse; JACK CLARKE, Director and Senior Vice-President, Exxon Corporation; DR. HANS DECKER, Vice Chairman, Siemens Corporation; PHILIPPE GISCARD D'ESTAING, President, Thomson International; RICHARD H. IMUS, President, Daimler-Benz Washington, Inc.; YVES-ANDRE ISTEL, Vice Chairman, Wasserstein, Perella International; DR. ABRAHAM KATZ, President, US Council for International Business; LANE KIRKLAND, President, AFL-CIO; DAVID MAXWELL, former Chairman, Federal National Mortgage Association (Fannie Mae); and SIMONE VEIL, Member of the European Parliament. FRANCIS BLANCHARD, former Director General of the International Labor Organization is the Chairman of the Board.

The Institute is a non-partisan, non-profit charitable foundation formed under section 501(c)(3) of the U.S. Internal Revenue Code.

Changing European Institutions Forseen at Seminar in Brussels

Elements of uncertainty in EC developments have been fueled internally by two ongoing intergovernmental conferences on European political cooperation and economic and monetary union, and externally by the will of a number of EFTA and Central European countries to join the European Community. These issues were examined by Frans Andriessen, Vice President of the European Communities in charge of foreign policy, at a seminar on "Evolving European Institutions and Their Impact on International Business and Economic Policy" organized by The European Institute in Brussels, April 7 to 9. Considering that a "Community of 24 countries" is not out of the question for the future, he added that internal institutional changes would be necessary within the EC to accommodate the prospect of a larger Community at the same time as new members of the EC would have to adjust to comply with Community obligations.

In any case, the EC does not wish to start negotiations for new members before the single market is completed in 1993. This will allow time to deal with immediate concerns such as the GATT negotiations which, according to Frans Andriessen, failed in December 1990 "for the very simple reason that negotiating tactics were pursued for too long while real negotiations started too late." Ambassador Paul Trân Van Thinh, who is the EC 's GATT negotiator, confirmed that a trade agreement between Europe and the US should take place before the end of 1991 in order to allow a multilateral trade agreement within the GATT. He emphasized that beyond the liberalization of trade in manufactured goods, the Uruguay Round is also designed to initiate

(continued on page 3)

Martin Bangemann, Vice President of the Commission of the European Communities, exchanges views with Earle J. Harbison Jr., President of Monsanto Company, during European Institute meeting in New York.

European Policy Should be Free Trade-Oriented, But Pragmatic

Martin Bangemann, Vice President of the Commission of the European Communities responsible for internal market and industrial affairs, commented on the EC's controversial industrial policy during a meeting organized in New York by The European Institute and the Friedrich-Naumann-Stiftung on June 19.

"We have to face the difficulty that 'industrial policy' in Europe as well as in the US is a four-letter word," he admitted. "To deal with this problem we try to convince people that industrial policy is neither something which is deeply embedded in socialist or centrally administered economic thinking, nor is it something which must be totally aligned with a market society. A pragmatic approach has to be worked out."

For Martin Bangemann, a member of Germany's Free Democratic Party, Europe is in a unique situation with the implementation of the single market and the development of Central Europe. Both are breaking up old structures, forcing people to accept the underlying idea that it is necessary to face structural changes. "We have said clearly that free trade is not something hostile to industry. It is an element of industrial policy because to have a competitive industry, we must have free trade. Our first aim is to ensure that industry is competitive not only in the framework of the internal market, but also for the world market. More and more, the internal market will be integrated in the global market."

Bringing down internal barriers, developing common standards, and creating a market of nearly 350 million people with a high level of consumer activity will change the conditions under which industries have thus far been working. Therefore, the Commissioner explained that it is not sufficient to bring about this new market without "taking into consideration what this means for industry and help it fight against some structural weaknesses so that it may be as competitive as possible. We cannot run the risk of having social unrest if structural changes lead to considerable layoffs and there is no direct replacement of jobs in the given region or in total. We have to be pragmatists..." ■

Europe in Washington
News in Brief
See page 2

Dr. Zbigniew Brzezinski, former National Security Advisor, in discussion with Dr. Bernd Wilz, Chairman of the Defense Policy Working Group of the Christian Democratic Union, Christian Social Union, and Free Democratic Party of the German Bundestag.

Europeans Ask for Greater Burden-Sharing

The need to reshape European security in view of the end of the Cold War and the growing economic and political strength of the EC are among the challenges addressed in a new European Institute series on European defense. On May 9, a discussion took place with a German parliamentary delegation led by Dr. Bernd Wilz, Chairman of the Defense Policy Working Group of the Christian Democratic, Christian Social, and Free Democratic Parties in the German Bundestag. On May 31, a dialogue was organized with Ambassador Gilles Curien of France, special envoy of the Ministry of Foreign Affairs.

Both officials sought to reassure their American audience about the future of NATO. Ambassador Curien stated, "we are worried because the Americans are worried." Both expressed the firm commitment of their governments to the Atlantic Alliance, described by Dr. Wilz as the "secure anchor for our future." Both felt that the evolution of a common security policy in Europe, the "European pillar," would strengthen transatlantic ties.

Discussion at both sessions focused heavily on the changing relationships between NATO, the EC, and the Western European Union (WEU). Dr. Wilz envisages developing a supporting role for the WEU. Ambassador Curien also sees a "complementary" relationship between the various institutions, including the CSCE (Conference on Security and Cooperation in Europe). But Dr. Wilz called for joint thinking on how to "develop more practice" with the CSCE to put it to better use.

Helping the newly democratic nations of Eastern Europe is a priority for German security in particular, and for Western Europe as a whole. In this area it is the Germans, not the Americans, who are asking for greater "burden-sharing." Timely and generous action can help to avert what Dr. Zbigniew Brzezinski, a luncheon guest, called the possibility of a "security vacuum" in the region.

The Persian Gulf War raises the politically sensitive question of military action beyond the geographic scope of NATO. According to Ambassador Curien, even if European interests were different from those of the US, there would be full consultation within NATO. For Germany, the issue raises consultation questions as well as historical sensitivities. Dr. Wilz believes that Germany will fulfill its obligations as a responsible friend and ally, but he stressed that "we need time."

By Dr. Ellen Frost, Corporate Director, International Affairs, United Technologies Corp.

Richard Imus, President of Daimler-Benz Washington Inc., with Peter Allgeier, Deputy USTR

Transatlantic Business Advisory Committee

The European Institute inaugurated a series of meetings of its Transatlantic Business Advisory Committee with Richard Wright, First Secretary for Commercial Affairs of the Delegation of the Commission of the European Communities on May 17, and Dr. Peter Allgeier, Assistant US Trade Representative for Europe and the Mediterranean on June 20. During the fruitful exchange with Institute corporate members, it was agreed that although agriculture is important, industry should not be neglected. Mr. Wright, who is responsible for monitoring US trade legislation and executing EC trade policy in Washington, noted that the agenda of pending issues between the EC and the US is rapidly increasing. He emphasized the necessity to reach solutions both bilaterally and multilaterally. Dr. Allgeier noted, "There will be no successful conclusion of the Uruguay Round unless there is agreement between the US and the EC. If there is agreement between these two, it is hard to imagine the Round failing." He attributes the number of disputes to "the successful commerce between the EC and the US." Specific issues of the negotiations, such as raising the standard of protection in the TRIPS (Trade Related Intellectual Property Protection), lowering US tariff peaks, and finding a common ground on government procurement, were examined. ■

The European Institute is a non-profit, non-partisan center for dialogue and information exchange on European economic and political developments and Euro-American relations. It provides a neutral forum for direct, substantive contact among government decision and policy makers, corporate executives, economic and foreign policy experts, journalists, and academics from both sides of the Atlantic.

Independent from the EC Commission, European states, and the US government, the Institute maintains a balance between public and private funding and between European and American participation. Activities include:

- **Euro-American Issues Dinners**
- **European Integration Series**
- **International Seminars**
- **Transatlantic Business Advisory Committee**

SUNDAY, SEPTEMBER 22

7:30 p.m. **Welcome Reception and Dinner**

Opening remarks by Francis Blanchard, Chairman of the Board of Directors, The European Institute

Keynote Address: Europe in the 90's: Integration and Disintegration
The Honorable Sir Leon Brittan, Vice President of the Commission of the European Communities-responsible for competition and financial institutions

MONDAY, SEPTEMBER 23

8:00 a.m. **Registration**

8:30 **Conference Opening Remarks:**

- Jacqueline Grapin, President, The European Institute
- His Excellency Andreas van Agt, Head of the Delegation of the Commission of the European Communities

Morning Moderator: Robert D. Hormats, Vice Chairman, Goldman Sachs International

THE IMPACT OF EUROPEAN INVESTMENT IN THE U.S.

Opening Remarks:

- The Honorable Roger B. Porter, Assistant to the President for Economic and Domestic Policy

Panel:

Trends in European Investment in the U.S.
- William E. Barreda, Deputy Assistant Secretary for Trade and Investment Policy, U.S. Department of the Treasury

European Business Organizations Vis-à-Vis European Investment in the U.S.
- Carlos Ferrer, President, UNICE (Confederation of European Employers)

An American View of Foreign Competition in the U.S.
- Dr. Abraham Katz, President, U.S. Council for International Business. Member of the Board of Directors, The European Institute.

New Role of Labor Unions
- Dr. Rudolph Oswald, Director of Economic Research, AFL-CIO

10:30 **Break**

STATE VERSUS NATIONAL PRIORITIES

10:45 **Panel: Factors Influencing Investment Decisions**

European Investment in the U.S.: Key Issues, Location Criteria and Implications
- Francine Lamoriello, Senior Manager International, KPMG Peat Marwick

Changing Views of State Economic Development Policies
- Brenda Lopes, Director, Office of Foreign Investment, California State Department of Commerce

Corporate Panel: The Criteria for Investment in the U.S.

- Dr. Hans Decker, Vice Chairman, Siemens Corporation. Member of the Board of Directors, The European Institute.
- Peter Boxer, Senior Vice President, British Aerospace
- Dr. D. Joseph Donahue, Senior Vice President, Thomson Consumer Electronics, Inc.

12:30 p.m. **Luncheon**

Keynote Address: The Future of American Banking Regulation
The Honorable Jim Leach, U.S. House of Representatives
Ranking Minority Member, House Banking Subcommittee on International Development, Finance, Trade and Monetary Policy

2:00 **Special Address:** The Honorable Sharon Pratt Dixon, Mayor of the District of Columbia

Afternoon Moderator: Michael Elliott, Washington, DC Bureau Chief, *The Economist*

2:15 **NEW FACTORS INFLUENCING CORPORATE INVESTMENT STRATEGIES**

State Legislative and Regulatory Policies Affecting Foreign Investment in the U.S.
- Ruurd Leegstra, Partner, Price Waterhouse

Corporate Panel:

Environmental Concerns: A European Experience in the U.S.
- Robert W. Murdoch, President & Chief Executive Officer, Lafarge Corporation

Criteria for High-Tech Industry in Dallas
- Leif Kallen, President & Chief Executive Officer, Ericsson, North America, Inc.

Financial Regulation and Deregulation
- Winfried Spaeh, Senior General Manager, Dresdner Bank AG

Organizational Structure and Management
- Richard M. Clarke, Chairman and President, Akzo America, Inc. Member, Board of Directors, European Community Chamber of Commerce in the U.S.

3:45 **Break**

4:00 **FEDERALISM IN A GLOBAL ECONOMY**

Globalization of the Telecommunications Market: Foreign Investment Issues
- The Honorable Alfred C. Sikes, Chairman, Federal Communications Commission

Economic Regulation at the State and Federal Level: Europe and the U.S.
- Riccardo Perissich, Director-General, Internal Market and Industrial Affairs (DG III), Commission of the European Communities

Federalism versus Global Coordination in International Investment Policies
- Joseph Connor, Chairman, International Chamber of Commerce. Chairman, Price Waterhouse World Firm Inc.

6:30 **Reception:**
Residence of His Excellency Andreas van Agt, Head of the Delegation of the Commission of the European Communities

THE EUROPEAN INSTITUTE

PROGRAM AGENDA

EVOLVING EUROPEAN INSTITUTIONS AND THEIR IMPACT ON INTERNATIONAL BUSINESS AND ECONOMIC POLICY

APRIL 7-8-9, 1991

HOTEL AMIGO
BRUSSELS, BELGIUM

A European-American Seminar Conducted by The European Institute

4801 MASSACHUSETTS AVENUE, N.W. SUITE 400, WASHINGTON, DC 20016
TELEPHONE: (202) 895-1670 ■ FAX: (202) 362-1088

SUNDAY, APRIL 7

7:30 p.m. **WELCOME RECEPTION AND DINNER:**
EUROPEAN INSTITUTIONS AFTER THE GULF CRISIS

Keynote remarks by Sir Leon Brittan, Vice President, Commission of the European Communities

MONDAY APRIL 8

9:00 a.m. **INTRODUCTION AND OPENING REMARKS:**
. Francis Blanchard, Chairman, Board of Directors, The European Institute, Former Director-General, International Labor Organization
. Jacqueline Grapin, President, The European Institute

EUROPEAN INSTITUTIONS: CHANGING ROLES IN THE NEW GLOBAL ARCHITECTURE

Moderator: Michael A. Bartholomew, Contributor, Wall Street Journal, President, BART Information and Monitoring Services

9:15 a.m. **SESSION A:**
Opening remarks by Viscount Etienne Davignon, Chairman, Société Générale de Belgique

. Latest Developments in European Institutions: An Overview
Peter Ludlow, Director, Centre for European Policy Studies
. New responsibilities for the European Parliament
Willy de Clercq, Member of the European Parliament
. The E.C. Commission
Carlo Trojan, Deputy Secretary General, Commission of the European Communities

11:00 a.m. **SESSION B:**
. The U.S. "Wish List:" European institutions and transatlantic dialogue
William V. Roth, Jr., United States Senate. Ranking Minority Member, Finance Subcommittee on Taxation and Debt Management. Ranking Minority Member, Governmental Affairs Committee
. The politics of member states
Dr. Gerd Langguth, Delegation Head, Commission of the European Communities to Germany
. The UK and the European Monetary Union
Sir Peter Petrie Bt CMG, Advisor to the Governor of the Bank of England

12:45 p.m. **LUNCHEON: OUTSIDE CHALLENGES TO EUROPE**

Keynote Remarks by Vice President Frans Andriessen, Commission of the European Communities

THE EMERGING EUROPEAN ECONOMIC AND SOCIAL ENVIRONMENT

Moderator: Roland E. King, O.B.E., Director, European Community Services, Price Waterhouse

2:45 p.m. **SESSION C:**

Opening Remarks: Competition, Mergers and Antitrust Policies
Claus-Dieter Ehlermann, Director-General for Competition, Cartels and State Aids (DG IV), Commission of the European Communities

. Immediate consequences for business
Pierre Hessler, Director General of Marketing, IBM Europe
Baron Daniel Janssen, President, Solvay & Cie
. Private mergers and acquisition strategies
Robert Agostinelli, General Partner, Lazard Frères & Co. Member of the Board of Directors, The European Institute
Yves-André Istel, Chairman, Wasserstein Perella International. Member of the Board of Directors, The European Institute

4:15 p.m. **SESSION D:**

. Regional E.C. development policies
Philip Lowe, Chef de Cabinet, Commissioner Bruce Millan, (DG XVI), Regional Policies, Commission of the European Communities
Dr. Volker Charbonnier, Executive Vice President, Bayer U.S.A. Inc. Currently on assignment at the Treuhandanstalt
. Financing needs versus financing resources
Dr. Mario Arcari, Managing Director, Banca Commerciale Italiana. Member of the Board of Directors, The European Institute
David Maxwell, Former Chairman, Federal National Mortgage Association (Fannie Mae). Member of the Board Directors, The European Institute

7:30 p.m. **"BELGIAN DINNER"**

BALANCING POWER BETWEEN THE EUROPEAN COUNCIL, PARLIAMENT, COMMISSION, AND MEMBER STATES

Keynote remarks by Simone Veil, Member and past President, European Parliament. Member of the Board of Directors, The European Institute

Dinner Chairman: Willy de Clercq, Member of the European Parliament

TUESDAY, APRIL 9

BUSINESS STRATEGIES FOR THE SINGLE MARKET

8:30 a.m. **SESSION E:**

Opening remarks: Reorganizing Corporate Structures

By session moderator, Roland King O.B.E, Partner and Director of European Community Services, Price Waterhouse

. European and U.S. corporate policies
  Zygmunt Tyszkiewicz, Secretary General, UNICE
  John Russell, European Community Affairs Manager, E.C. Committee of the American Chamber of Commerce in Belgium
  Francine Lamoriello, Senior Manager, KPMG Peat Marwick
. Private investment choices in various regions
  Jacob Wallenberg, Deputy Managing Director, Investor and Providentia
  Jean-Louis Gergorin, Senior Corporate Vice President, Strategy and International Development, MATRA

10:45 **SESSION F:**

Moderator: Ambassador Abraham Katz, President, Council for International Business. Member of the Board of Directors, The European Institute

. The GATT negotiations
  Ambassador Paul Trân Van-Thinh, E.C. Permanent Representative to the GATT, Geneva
. Revival of the European Social Charter
  Francis Blanchard, Chairman, Board of Directors, The European Institute

12:45 **LUNCHEON: THE CHALLENGE OF THE EUROPEAN MONETARY UNION**

Remarks by Dr. Heinrich Matthes, DG II (Macroeconomic and Monetary Affairs), Commission of the European Communities

TRANSATLANTIC COORDINATION AND COOPERATION

Moderator: Francis Blanchard, Chairman, Board of Directors, The European Institute. Former Director-General, International Labor Organization

2:30 p.m. **SESSION G:**

. Technological cooperation between Europe and the U.S.: Future Prospects
  Dennis Kloske, Under Secretary for Export Administration, U.S. Department of Commerce
. European and American economic cycles: Coordination for global economic growth
  Dr. Michael Darby, Under Secretary for Economic Affairs, U.S. Department of Commerce

4:00 **KEYNOTE CLOSING REMARKS**

. Ambassador Thomas Niles, U.S. Representative to the European Communities
. Bernhard Zepter, Cabinet of President Jacques Delors, Commission of the European Communities

THE EUROPEAN INSTITUTE

DINNER IN HONOR OF

Dear Allan,

Allow me to send to you some publicity information on our forthcoming conference Baryons '92. As you can see in the attached program we thought it will be best to schedule your talk on Sunday night so as to make sure that in fact it will happen (we assume the white house rests on Sundays...).

We are receiving a very enthusiastic response on this conference and more about it when I see you (or so I hope) on your next visit to Yale on December 13th.

With Best Regards Sincerely,

Moshe Gai

Moshe Gai

Preliminary program "Baryons '92" (for your eyes only, not for circulation):

Sunday, May 31st:

4:00-7:00 PM Welcome reception
wine & cheese, Sloane Physics Lounge
Musics by: Susan Zimmermen and Anthony Morrison-Middletown, CT

a special pre-conference colloquium, chair: **Alan Chodos-Yale**
8:00-9:00 (60) **D. Allan Bromley-White House**, "Science policy into the 21st century"

Monday, June 1st:

(A.1) 9:00-9:15, Welcome session, Chair: **Moshe Gai-Yale**

Michael E. Zeller-Yale, Physics, Chair
Benno C. Schmidt-Yale, President, Yale

(A.2) Chair: **Herman Feshbach-MIT**

9:15-9:45 (40) **Frank E. Close-Rutherford Lab**, "What Do We Know and Would Like to Know About the Structure of Baryons"
9:45-10:25 (40) **Bary Holstein-Massachusetts**, "Chiral symmetry and the Structure of the Nucleon"

10:25-10:45 Coffee Break

(A.3) Chair: **Bernard Frois-Saclay**

10:45-11:25 (40) **Volker Burkert-CEBAF**, "the N^* program at CEBAF"
11:25-12:15 (40) **Perhaps John McLelland-LAMPF**, "Studies of Nucleon Resonances at LAMPF"
12:15-12:55 (40) **Perhaps M. Comyn-TRIUMF**, "Baryon Spectroscopy at KAON"

(A.4) Chair: **Feza Gürsey-Yale**

2:00-2:40 (40) **Greg Kilcup-Ohio State**, "Lattice Gauge Theories"
2:40-3:20 (40) **Hary Lee-Argonne**, "Electromagnetic Excitations of Baryons"
3:20-3:40 (20) **Andy M. Sandorfi-Brookhaven**, "Nucleon Resonances at LEGS"

3:40-4:00 Coffee Break

(A.5 - A.7) 4:00-6:00 (15) Contributed papers
Three parallel sessions (8x3=24 talks)
Chairs: **Peter Morsch, Bernard M.K. Nefkens, unnamed (theory)**

(A.8) Chair: **Richard H. Dalitz-Oxford**, "Three Decades of the Quark Model"

8:00-8:30 (30) **Harry Zvi Lipkin-Weizmann**
8:30-9:00 (30) **O.W. Greenberg, Maryland**
9:00-9:30 (30) **Gabriel Karl-Guelph**
9:30-10:00 (30) **Finn M. Ravndal-Oslo**, "How Feynman derived the parton model"

Tuesday, June 2nd:

(B.1) Chair: **Ernie Moniz-MIT**

9:00-9:40 (40) **Francesco Iachello-Yale**, "Algebraic Models for the Structure Hadrons"
9:40-10:00 (20) **Dimitri Kuznezov-Yale**, "Electromagnetic Decay Widths of Hadrons"
10:00-10:40 (40) **M. Rho-Saclay**, "The Structure of the Nucleon (Cheshire Cat)"

10:40-11:00 Coffee Break

(B.2) Cair: **Peter Barnes-LAMPF**

11:00-11:40 (40) **Kilian-Julich**, "Studies of the Structure of Hadrons at CERN and COSY-Julich"
11:40-12:20 (40) **Dave Hertzog-Illinois**, "Search for Exotic Mesons at LEAR-CERN"
12:20-12:50 (30) **Joseph Speth-Julich**, "The Structure of Scalar and Vector Mesons"

(B.3) Chair: **Gerry E. Brown-Stony Brook**

2:00-2:35 (35) **Tom Cohen-Maryland**
2:35-3:10 (35) **Perhaps Wambach-Illinois**
3:10-3:45 (35) **Perhaps Hatsuda-Seattle**
3:45-4:15 (30) Open

(B.4) Chair: **Stavros Fallieros-Brown University**

2:00-2:15 (15) **Al Nathan-Illinois**, "Polarizability of the Proton"
2:15-2:30 (15) **Jörg Schmiedmayer-Harvard**, "Polarizability of the Neutron"
2:30-2:45 (15) **L'vov-Lebedev Inst., Moscow**, "Theorectical aspects of the polarizability of the Nucleon".
2:45-3:00 (15) Questions for last three speakers.

(B.5) Chair: **Bernhard Mecking-CEBAF**

3:00-3:25 (25) **Roy Holt-Argonne**, "Nucleon Resonances in the Photo-Disintegration of the Deuteron and the Nucleon"
3:25-3:50 (25) **Richard Milner-MIT Bates**, "G_M^n from Polarized Electrons on Polarized ^3He"
3:50-4:15 (25) **Ray Arnold or Peter Bosted-American University**, "G_E^n at SLAC"

4:15-4:30 Coffee Break

(B.6 - B.8) 4:30-6:00 (15) Contributed papers
Three parallel sessions (18 talks)
Chairs: **Ralph Minehart, Nimai Mukhopadhyay, unnamed (theory)**

(B.9) 6:30-7:30 Reception, Beinekee
Musics by: Susan Zimmermen and Anthony Morrison-Middletown, CT

(B.10) 7:30-9:30 Banquet, Chair: **Evangelos Hadjimichael-Fairfield**
Nicholas P. Samios-Brookhaven, "After Dinner Remarks"

Wednessday, June 3rd:

(C.1) Chair: **Jack Sandweiss-Yale**

9:00-9:40 (40) **Brian Quinn-CMU**, "Search for the H particle at Brookhaven"
9:40-10:00 (20) **Jechiel Lichtenstadt-Tel Aviv**, "Search for the Penta-quark at Fermilab"
10:00-10:40 (40) **Carl B. Dover-BNL**, "Strangelets"

10:40-11:00 Coffee Break

(C.2) Chair: **Vernon W. Hughes-Yale**,

11:00-11:40 (40) **Robert Jaffe-MIT**, "Spin Structure Functions"
11:40-12:20 (40) Papavassiliou-Yale (most likely other person), "EMC-NMC-(SMC) Data"
Alternative speakers: Dieter von Harrach (most recommended), Terry Sloane, Claus Rith.
12:20-13:00 (40) **Emlyn W. Hughes-SLAC**, "Future Experiments at SLAC and HERA (HERMES)"

(C.3) 3:00-6:00 Social afternoon
1. Sailing the Quinipiac, coordinator: M. Gai-Yale.
2. Visit Museums and Chamber Music concert (Peabody, British Art Center, Yale Art Gallery), coordinator: E. Hadjimichael-Fairfield.

Thursday, June 4th:

(D.1) Chair: **Thomas A. Appelquist-Yale**

9:00-9:50 (50) **Steve Weinberg-Texas**, "Chiral Symmetry"
9:50-10:30 (40) **Nathan Isgur-CEBAF**, "Spectroscopy of Heavy Quark Baryons"

10:30-10:50 Coffee Break

(D.2) Chair: **John Dirk Walecka-CEBAF or Stan Kowalski-MIT Bates**

10:50-11:30 (40) **Anatoly V. Radushkyn-Dubna**, "Sum Rules and the structure of the Nucleon"
11:30-12:00 (30) **Elizabeth Beise-Caltech**, "Neutral Currents Weak Form Factors"
12:00-12:30 (30) Open

(D.3) Chair: **Stan Brodsky-SLAC**

2:00-2:30 (30) "Theoretical Aspects of Color Transparency"
Glenys Farrar-Rutgers, or Al Mueller-Columbia, or Jerry Miller-Seattle, or Byron Jennings-TRIUMF, or Mark Strikman-Penn.
2:30-3:00 (30) **Robert D. McKeown-Caltech**, "Color Transparency (e,e'p) experiment at SLAC"
3:20-3:40 (20) **Paul Stoler-RPI**, "Nucleon Resonances at High momentum Transfer"
3:40-4:10 (30) **Carl Calson-William and Mary**, "High Momentum Transfer and the transition to PQCD"

4:10-4:30 Coffee Break

(D.4) Closing Session, Chair: **Erich W. Vogt-TRIUMF**

4:30-5:30 (60) **Wolfram Weise-Regensburg**, "Concluding Remarks"

Bitnet: GAI@YALEVM

FIRST CIRCULAR

The International Conference on the Structure of Baryons and Related Mesons will be held at Yale University, 1-4 June 1992. The conference received the enthusiastic support of major national laboratories in the USA, Canada, and Europe, as well as some private companies (see below for list of co-sponsors). It is the sixth in the series: Duke (1970), Purdue (1973), Oxford (1976), Toronto (1980), and RPI (1988). The scope of this conference is however, somewhat broader in an attempt to define open questions in the field of baryon spectroscopy and the topics to be discussed include:

The Spectroscopy of Baryons (and Mesons)
Electromagnetic Transition Form Factors
Neutral Current Weak Form Factors
Semileptonic Decays
Spin Structure Functions
Polarizability of the Nucleon
Searches for Exotic Matter and Particles
Gluonic Excitations
Quark Models
Algebraic Models and Dynamical Symmetry
Single Quark vs Collective Quark Excitations
Lattice Gauge Theories
The Role of Chiral Symmetry
QCD Sum Rules
The Transition to PQCD
Color Transparency
Baryons in Nuclear Matter

Conference Site: The conference will take place at Yale University, New Haven, Connecticut. New Haven is conveniently located between New York City and Boston, on the shore of the Long Island Sound and has the largest harbor north of New York City. The weather in New Haven at that time should be comfortably warm and some showers may be expected.

Contributions: Intended participants are invited to submit titles of planned contributions. Please use the attached form of expression of interest to indicate the title of your contribution(s), and any other suggestions you may have for the conference. A call for abstracts will be mailed in the second circular. The abstracts will be circulated to participants of the conference and a large number of papers will be selected for oral presentation.

Proceedings: The proceedings of the conference will be published by World Scientific Publishing Company and speakers will be requested to bring camera ready manuscripts to the conference.

Conference Fee: The conference registration fee is **$170.00** (US currency), if paid prior to April 15, 1992. The registration fee paid at the conference will be slightly higher.

Accommodations: Hotel accommodations at the price range $40-80/per night and a limited number of dormitory rooms (50 people) at approximately $20/per night will be available.

Social Program: The social program will include two separate activities: an afternoon sail on New Haven's flag ship, the Quinnipiack, a 91' schooner, as well as a visit to Yale art museums with a reception and a musical event.

Co-Sponsors: Argonne, Bates-MIT, Bicron, Brookhaven, CEBAF, COSY-Julich, KAON-TRIUMF, LAMPF-Los Alamos, LeCroy, Yale.

Timetable:		
	Return of Expression of Interest:	15 December 1991
	Second Circular:	15 January 1992
	Abstracts of Contributed papers:	15 March 1992
	Registration Fee:	15 April 1992
	Conference:	1-4 June 1992

Professor D. Allan Bromley
Executive Office of the President
Office of Science & Technology Policy
Old Executive Office Building - Rm. 360
17th & Pennsylvania Avenue, N.W.
Washington, D.C. 20506

Dear Allan,

It was good to see you yesterday in the lab. Hope we had better things to discuss, but I think one must face reality. Thanks for accepting our invitation to address "Baryons '92" at Yale. I think this will turn out to be a major conference with over 300 participants. We already received a total of $20,000 contributions from: Brookhaven, CEBAF, KAON, LAMPF, Argonne, Bates, Julich, as well as Bicron and LeCroy. However we are very disappointed from the way we are treated by IUPAP.

Akito Arima, chair IUPAP-C12 commission on nuclear physics, informed me that his commission in its meeting last June, at Kanazawa, Japan, recommended (with high priority) that "Baryons '92" be sponsored by IUPAP. Don Shapero, secretary US liaison committee, informed me that on August 27th his committee decided to sponsor "Baryons '92". On Sept. 21st however, the executive committee in its meeting in Lisbon (or Lisboa?), decided not to accept this recommendation as I understand from a brief note from the assoc. secretary of IUPAP Wolfgagng Heinicki. The sponsorship by IUPAP is particularly important for us as we intend to apply for and NSF grant for the support of students and young researchers. We very much appreciate your offer to help.

I should at that time perhaps quote Professor Hans Frauenfelder, vice president US liaison committee, who claimed that IUPAP is turning into a byzantine organization, some what like the United Nations, governed by third world country without much science input. If he is correct than I can understand my frustration in dealing with this organization. I simply can't find where the strings are...

On behalf of the organizing committee let me thank you for your help,

Sincerely,

Moshe Gai

----------Original message----------

Moshe--
I forgot during our conversation that I had a copy of a memo from Bill Havens to the IUPAP officers in a pile of papers on my desk. In case you have not seen it, it briefly describes what happened at the IUPAP executive council. IUPAP had a significant increase in requests for sponsorship in 1991 and they wanted to reduce that number. The problem is so serious that they agreed that at their meeting in September 1992, the IUPAP executive council will consider ways to reduce the proliferation of conferences. Your conference made it to the final selection, but someone pointed out that it had a large overlap with the PANIC conference, which was held in 1990 and the next in 1993, and because of the pressure to reduce the number of conferences, it was turned down. That is all I have besides what you already know.

Dear Dr. Riemer,

Thanks for your e-mail concerning IUPAP decission not to sponsor Baryons '92. This only underscores our comments on IUPAP's (mis) function as a scientific organization. While Baryons '92 is a topical conference PANIC is a general medium energy conference. By definition PANIC has an overlap with all topical conference that cover medium energy physics, and to exclude sponsorship for Baryons '92 due to the existence of this general conference (i.e. PANIC) would imply that members of IUPAP have no clue to how science works. Perhaps as an example one may suggest that since every three years the Nuclear Physics Commuinty holds a general conference entitled "Nuclear Physics", its sponsorship by IUPAP will then exclude sponsorship of any topical conference in Nuclear Physics, that (by definition) have a large overlap with the general conference on Nuclear Physics.

In any case as I mentioned to you over the phone we are going to submitt a proposal for a grant to the NSF for the support of students participation in Baryons '92, and quote Professor Herman Feshbach who suggested that IUPAP (Bizantine) politics should not affect funding agency in the USA, particularly after our conference was recommended for sponsorship by the IUPAP US Liaison committee and the IUPAP C12 comission on Nuclear Physics.

Best Regards Moshe Gai.

THE WHITE HOUSE

WASHINGTON

December 3, 1991

Dear Moshe:

I have written to the Secretary General of IUPAP, Professor Jan Nilsson, requesting that he, together with the President, Professor Yuri Ossipyan, take action to grant approval for your Baryon '92 Conference as a class C conference. I believe that when the conference was presented to the Executive Council of IUPAP it was mistakenly identified as a class B conference and, in the Council's effort to reduce the number of such conferences, it did not receive approval. Under the bylaws, the Secretary General and the President have the authority to act between meetings of the Executive Council to grant approval to class C conferences, although that approval does not carry any financial contribution from the Union. It is my understanding that you are much more interested in getting the IUPAP imprimature than you are in the very small amount of money that would, in any event, be awarded to a class B conference.

I shall let you know as soon as I hear from Professor Nilsson.

With all best wishes,

Sincerely Yours,

D. Allan Bromley

Dr. D. Allan Bromley
Office of Science and Technology Policy
Old Executive Office Building
Washington, D.C. 20506

Dear Dr. Bromley,

Shirley Brignall from Professor Paul F. Slattery's office at the University of Rochester's Physics Department called you recently to discuss your availability to speak at the University's 1992 Reunion, Saturday, June 6, 1992. I am writing to follow-up on Shirley's call and to formally invite you to participate by giving the University's fourth annual "Lecture of Distinction."

The "Lecture of Distinction" was instituted three years ago. It is given by a prominent alumna/us and follows the President's State of the University Address. Typically, 300-400 alumni are in attendance. Our 1991 presenter was Harvard Law School Professor Arthur R. Miller '56. We would be honored if you would accept and help us continue this prestigious tradition.

A member of our staff, Thomas J. Farrell, will contact you next week. We are very excited about the prospect of your participation and eagerly await your positive response.

Yours for Rochester,

Gordon

THE WHITE HOUSE

WASHINGTON

December 11, 1991

Dear Secretary Watkins:

It was good seeing you at the signing ceremony for the "High Performance Computing Act." I certainly appreciate the Department of Energy's important contributions to the President's High Performance Computing and Communications initiative and its help in negotiating an effective and responsible authorization bill.

I would like to express my special appreciation for the work of Fred Tathwell, Senior Congressional Affairs Officer with DOE's Office of Congressional Affairs. Fred provided invaluable assistance and advice to my staff during negotiations on S. 272. His ability to work smoothly with the Senate Energy Committee was particularly important, given that Committee's seminal role in shaping the final bill.

Thank you again for the efforts of yourself, your staff, and the Department in developing the President's HPCC initiative and in helping to negotiate the authorization bill. I look forward to continuing to work with you on other important science and technology initiatives.

Sincerely,

D. Allan Bromley
The Assistant to the President
for
Science and Technology

Dear Elaine:

I am very sorry that I will be in Boston giving a speech to the US Materials Research Society Annual Meeting and thus cannot attend your swearing-in — much as I would have liked to!

I know that you will do your usual superb job at the Peace Corps and wish you every success and satisfaction in the new position.

Sincerely,

Brian
