Dr. D. Allan Bromley
Assistant to the President for
Science and Technology
Old Executive Office Building
Room 358
17th St and Pennsylvania Ave., NW
Washington, D.C. 20506

Dear Allan:

I am pleased to invite you to participate in a dialogue sponsored by the National Academy of Sciences on issues of science and technology policy in the United States and the Soviet Union. Dr. Gerald P. Dinneen, Foreign Secretary of the National Academy of Engineering, and I will be the American co-chairs of the meeting. The discussion will take place in Washington, D.C. on November 21-22 in the Board Room of the National Academy of Sciences at 2101 Constitution Avenue, N.W.

As you may know, the idea of a regular interacademy dialogue on science and technology policy grew out of last year's visit of Soviet President Gorbachev. The purpose is to provide a high-level but off-the-record forum for a bilateral discussion of issues affecting the science and technology base in both countries. At the same time, it should open an authoritative window on Soviet science and technology capabilities in the ebb and flow of perestroika.

We are very impressed with the Soviet participants who will participate in the meeting. The leader of the Soviet delegation, Academician Yuriy Osipyan, has assembled a first-rate team which includes high-ranking members of the Soviet Academy of Sciences and the new Russian Academy of Sciences, as well as representatives from the Russian government, academia, and industry. A list of the Soviet delegation, as well as a preliminary

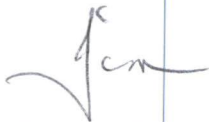

November 13, 1991
Page Two

agenda, is enclosed for your information.

This is a unique opportunity to discuss issues of science and technology since the entire structure and process of research and development in the former USSR is open to advice from Western colleagues as never before. We hope that you will join us in what promises to be an interesting and stimulating discussion.

Please ask your staff to confirm your participation for some or all of the sessions, or the participation of one of your senior colleagues, with Ms. Kathleen Trivers at 202/334-3654.

Sincerely,

A handwritten signature in dark ink, appearing to read 'J. Ebert', with a stylized flourish at the end.

James D. Ebert
Vice President

PRELIMINARY AGENDA

U.S.-SOVIET SCIENCE AND TECHNOLOGY POLICY DIALOGUE

November 21-22, 1991

NAS Board Room

Thursday November 21

CONTINENTAL BREAKFAST

Research infrastructures: current trends, problems, and possible solutions

a) Trends in technical manpower needs and the ability of educational systems to fulfill such needs (Soviet presentation);

Professor Nikolay Karlov, Deputy of the Supreme Soviet, Rector of the Moscow Physical-Technical Institute (presenter)

Dr. Alvin Trivelpiece, Director, Oak Ridge National Laboratory (respondent)

b) Linkages among universities, research institutions, and industrial organizations (Soviet presentation);

Professor Vladimir Shukshunov, Deputy Chairman, State Committee on Higher Education of the USSR (presenter)

Dr. James D. Ebert, NAS Vice President (respondent)

LUNCH IN NAS REFECTORY

c) Increasing role of states/republics in promoting the development of effective research capabilities (American presentation);

Mr. Richard F. Celeste, Former Governor of Ohio (presenter)

Soviet respondent to be announced

d) Balancing research support among fields and between big and little science (American presentation).

Dr. Erich Bloch, Former Director of NSF (presenter)

Soviet respondent to be announced

RECEPTION IN NAS ROTUNDA

Friday November 22

CONTINENTAL BREAKFAST

Innovation in applied research and development

a) Government's role in creating financial and other incentives to encourage industrial innovation (American presentation);

Dr. Jordan J. Baruch, President, Jordan Baruch Associates (presenter)

Soviet respondent to be announced

b) Trends in the internationalization of industrial technologies through the private sector (American presentation);

Dr. John A. Armstrong, Vice President, IBM Corporation (presenter)

Soviet respondent to be announced

LUNCH IN NAS MEMBERS ROOM

c) Role of public sector financing of industrial research in the transition to market economy (Soviet presentation);

Academician Nikolay Laverov, Vice President of the ASUSSR, Former Deputy Prime Minister (presenter)

Dr. William Howard, Former NAE Fellow (respondent)

d) Relationships between development of military and civilian technologies in the 1990s (Soviet presentation).

Academician N. Bunkin, General Designer, Director of Research and the Production Facility "Almaz" (presenter)

Dr. Gerald P. Dinneen, NAE Foreign Secretary (respondent)

SOVIET DELEGATION

1. Academician Yuriy A. Osipyan: Vice President of the Academy of Sciences of the USSR, Adviser to President Mikhail M. Gorbachev, Head of the Delegation
2. Academician Nikolay P. Laverov: Vice President of the Academy of Sciences of the USSR, Former Deputy Prime Minister
3. Academician Yuriy S. Osipov: President-Organizer of the Russian Academy of Sciences, Director of the Institute for Mathematics and Mechanics, Sverdlovsk
4. Professor Nikolay V. Karlov: Corresponding Member of the Academy of Sciences of the USSR, Deputy of Supreme Soviet, Rector of Moscow Physical-Technical Institute
5. Academician Boris V. Bunkin: General Designer, Director of Research and the Production Facility "Almaz"
6. Professor Yuriy Ryzhov: Chairman of the Subcommittee on Science and Technology, Supreme Soviet of the RSFSR
7. Professor Valentin Ye. Shukshunov: Deputy Chairman, State Committee on Higher Education of the USSR
8. Dr. Yuriy K. Shiyan: Executive Director of the Soviet Interacademy Group on Science and Technology

THE FORTY-FOURTH ANNUAL WRIGHT MEMORIAL DINNER

“AVIATION: SUCCESS BY DESIGN”

December 13, 1991

The Wright Brothers Memorial Trophy, administered by the National Aeronautic Association, honors Orville and Wilbur Wright and commemorates the anniversary of man's first flight. The trophy is presented annually to a living American citizen who has contributed significant public service of enduring value to aviation in the United States.

The citation accompanying the award reads

Benjamin A. Cosgrove

"For a lifetime contribution to commercial aviation safety and to the technology development of four generations of Boeing commercial jet transport aircraft."

Dear Allan:

On behalf of the organizing committee, I wish to invite you to participate in a special U.S. National Academy of Sciences Colloquium on Physical Cosmology to be held March 27 and 28, 1992, at the Academy's Beckman Center in Irvine, California.

Attached please find a registration form and a copy of the preliminary program. There will be a reception on the evening of Thursday, March 26, and the talks will start on Friday morning, March 27 and continue through Saturday afternoon, March 28. Participation is by invitation only.

I do hope you will be able to accept this invitation. In any event, please inform me as soon as possible regarding your participation, as places are limited

Sincerely,

David N. Schramm

THE WHITE HOUSE
WASHINGTON

January 8, 1992

Dear Professor Schramm:

Thank you for your letter of November 11 inviting me to participate in the U.S. National Academy of Sciences Colloquium on Physical Cosmology scheduled for March 27 and 28, in Irvine, California. My apologies for the much belated response.

As much as I would like to join you and your colleagues, that date on my calendar is not a good time for me to be away from Washington so I must regretfully decline.

Thank you for thinking of me and let me offer my best wishes for a successful colloquium.

Sincerely yours,

D. Allan Bromley

Dear Dr. Swygert:

I am happy to accept your kind invitation to attend the State University of New York at Albany commencement ceremony on May 17, 1992 and to receive the Honorary Degree of Doctor of Science.

I shall be most happy and honored to the State University of New York at Albany family and will look forward to receiving from you the details concerning commencement plans mentioned in your letter of November 11, 1991.

With all best wishes for a happy and prosperous 1992,

Sincerely yours,

Dear Dr. Bromley:

On behalf of the Chancellor and Board of Trustees of the State University of New York and the faculty of the University at Albany, I am privileged to offer you the Honorary Degree of Doctor of Science to be awarded at the University at Albany's Commencement ceremony on May 17, 1992.

The awarding of this degree recognizes your achievements as a physicist, your leadership of your discipline, and your commitment to an informed public policy response to issues of science and technology.

We would appreciate having notice of your acceptance by mid-December so that the State University of New York Board of Trustees may pass the formal resolution that accompanies the degree. Following that action by the Board, a public announcement will be made.

Please accept my warmest personal congratulations on being selected to receive an Honorary Degree from the State University of New York. The University at Albany would be deeply honored if you are able to accept.

Sincerely,

H. Patrick Swygert

Dear Dr. Bromley:

For the past several years, the public's concern about the potential of health effects from exposure to Electric and Magnetic Fields (EMF) has grown considerably. Because this issue may have important health, energy, economic, and societal implications, these concerns deserve a serious and coordinated response from the Federal Government. The U.S. Department of Energy (DOE) has been designated by Congress as the lead agency for EMF research and coordination of research conducted by the Federal Government. In this Federal leadership role, the Department wants to work proactively with key stakeholders in a collaborative effort to resolve EMF issues.

As part of the process to develop a unified Federal approach to EMF issues, DOE is hosting a workshop, involving representatives from the research community and a broad range of Federal, State, and private sector organizations. The purpose of the workshop is to assist in developing the basis for a comprehensive and coordinated Federal EMF program that includes scientific research, engineering research, and communications activities.

I would appreciate having a representative from the Office of Science and Technology Policy participate in the workshop, which will be held on November 20-21 in the Washington, DC, area. Please ask your designated representative to contact Mr. Marvin Gunn, U.S. Department of Energy, (202) 586-5377 for more information on the workshop.

Sincerely,

James D. Watkins
Admiral, U.S. Navy (Retired)

Dear Dr. Bromley:

On behalf of the American Industrial Health Council (AIHC), it is my pleasure to invite you, as our guest, to our 1991 Annual Meeting. The theme of the meeting is "Enhancing the Use of Science in Assessing Risk." This event will be held on December 5, 1991, at the ANA Hotel in Washington, D.C.

This event attracts thought-leaders and decision-makers from academia, industry, and the regulatory community. Some of the highlights include a keynote address by Dr. Kenneth Olden, Ph.D., Director, National Institute of Environmental Health Sciences (NIEHS), who will discuss "New Directions in Environmental Health Research" and, syndicated columnist Warren Brookes, who will offer his insights on "Reassessing the Risk Models." In addition, a distinguished panel will examine "Science Applications and Regulatory Decisions" and there will be four concurrent technical sessions on major issues in risk assessment, including cancer risk assessment, exposure assessment, risk assessment of non-cancer endpoints, comprehensive methodology, and risk characterization.

Enclosed is a copy of the program and a complimentary registration form to be returned by November 27, 1991. We hope you will be able to join us for what promises to be a thought-provoking meeting.

Sincerely,

A handwritten signature in cursive script that reads 'M.J. Sloan'.

"Reassessing the Risk Models"

American Industrial Health Council

The American Industrial Health Council (AIHC) is a broad-based industry association that advocates the importance of sound science in regulatory decision-making on chronic human health hazards.

AIHC's mission is to promote the sound use of scientific principles and procedures in the assessment and regulation of risks of chronic human health effects and directly related public policy issues.

The Council's membership is a diverse coalition of companies and trade associations, including producers of consumer products, chemicals, foods and beverages, high technology, aircraft products, pharmaceuticals, petroleum products, and motor vehicles.

AIHC does not act as an advocate for any product or substance although its generic positions directly affect the scope and impact of individual regulatory decisions.

*The mission of AIHC is to promote
the sound use of scientific principles
and procedures in the assessment and
regulation of risks of chronic human
health effects and directly related
public policy issues.*

Cost

The meeting cost for AIHC members is \$200.00 and \$250.00 for non-members. Refunds will be made if a request is received in writing by November 27, 1991, however, a \$25 processing fee will be deducted from the registration fee. No refunds will be issued after November 27, 1991. Substitutions may be made up until the day of the meeting.

Transportation

Continental Airlines is offering 50% off full coach fares, 50% off first class fares, and 5% off round trip excursion fares. Call 1-800-468-7022 for Continental reservations and refer to 'Management Services' Easy Access Number EZ14QP26. If you are ticketing through a travel agent, please ask the agent to call that same number to take advantage of the discount.

Accommodations

The ANA Hotel is located at 2401 M Street, NW, Washington, D.C. Please call the ANA Hotel directly at (202/429-2400) for room reservations. The AIHC room rate is \$155.00 for single/double occupancy. AIHC's block of rooms at this special rate will only be held until November 11, 1991. **You must mention that you are an AIHC Annual Meeting attendee in order to get the special room rate.**

Additional Information

For additional information, please contact Tracey Carl, at the American Industrial Health Council, (202) 659-0060.

Washington Convention Center ■ December 10-11, 1991

Dr. D. Allan Bromley
Assistant to the President for
Science and Technology and
Director, Office of Science
and Technology Policy
OEOB
17th St. & Penna. Ave., N.W.
Washington, DC 20506

Dear Dr. Bromley:

Inside the enclosed newsletter you will find the agenda for a unique meeting in which I hope you will participate. It is scheduled for December 10th at the Washington Convention Center and will bring together, for the first time, Paul Strassmann, the man some call "the information czar" at the Department of Defense, Jack Arthur and Richard Kuzmach from the Office of Management and Budget (OMB), plus representatives of all three major groups involved in choosing what types of computers and software federal agencies should be buying to ensure they meet the standards of "open systems."

Dr. Strassmann's keynote is the highlight. He has implemented a strategy for moving to open systems that fully half of all government data processing organizations are already following. This letter is your personal invitation to attend Dr. Strassmann's briefing, from 8:30 to 9:30 am on December 10th, and an invitation to one or two of your staff members to accompany you.

You and your staff may attend Dr. Strassmann's keynote without paying any fee. (The regular conference fee is \$400). In addition, we have been awarded a grant to allow approximately 30 federal executives to attend the full conference (either one or both days) without paying a fee. If you or your staff would like to be considered for one of the free full-conference positions, please check the line on the attached form. We will let you know within a week of the decision.

To summarize:

1. You and your staff may attend Dr. Strassmann's keynote at no cost (if we receive your VIP registration within a week.)
2. You and your staff may be eligible for free registration at the entire Federal Open Systems Conference. Use the same

4610 Tournay Road ■ Bethesda, Maryland 20816 ■ Telephone: 301/229-1062 ■ Telefax: 301/229-1063

Sponsors: Washington Area UNIX Users' Group, AFIPS (DPMA, IEEE, and ACM), ASIS, and The Open Systems Conference Board.

3. FAX your registration to us at 301-963-5518.

4. Please circulate the enclosed newsletter to other people interested in open systems.

We look forward to hearing from you soon.

Alan Paller
Conference Co-chairman

Use This Form

Federal Open Systems Report

Monitoring Standards-Based Computing
In the Federal Government and Federal Contractors

Special Issue For FOSC'91

September 1991

DoD CIM Takes The Lead On Open Systems

Director Of Defense Information Paul Strassmann is leading the Department of Defense in the largest consolidation and standardization project ever undertaken in information systems management history.

Strassmann, who will keynote the Federal Open Systems Conference (FOSC'91) on December 10 and 11, 1991, aims to use his CIM (Corporate Information Management) program to cut DoD expenditures by \$71 billion in functional management and \$6 billion in direct spending on information systems.

Senior officials from the Office of Management and Budget will join Mr. Strassmann at FOSC'91 to discuss how the lessons learned in the CIM program can be shared with other federal agencies. Strassmann advocates shifting the focus of information systems more toward business requirements rather than technological needs.

Nonetheless, Strassmann has set four ambitious information technology missions for CIM:

1. 100% re-usable data and infinite life for data elements
2. More than 80% re-usable code and 20+ year life on software elements
3. Four-to-one ratio of development to maintenance
4. Technology asset life at least two to three times the technology innovation cycle.

To meet these goals, Strassmann has established four CIM Systems Principles which may well serve as a manifesto for open systems throughout government:

1. Effective variety is constructed from standard elements.
2. There are no future systems and no interim systems. There are only migration systems.
3. Tightly-focused rapid implementation within a generally defined strategy offers the greatest gains and the lowest risks.
4. The ultimate technical objectives of CIM are vendor-independent systems, assembled from standard components, inter-operable, with single-point data entry, non-redundant databases, and customer freedom of choice.

See Pages 2 and 3 for the FOSC'91 Program.

The Downsizing Wars

In many government agencies, three armed camps of computer professionals can often be found lobbing verbal grenades at each other. The first group, composed of the mainframe programmers, can best be identified by their rallying cry of "Don't touch the mission-critical systems." The mainframers' primary adversary is the PC expert who loudly proclaims that "PCs can do anything mainframes can do, cheaper." Finally, there is the group of people who fought the mainframers in the late Seventies and early Eighties and won. They acquired one or a whole network of mini-computers from Digital, Prime, Data General or one of the other minicomputer manufacturers.

While the claims of the PC experts may be overstated, the lower costs of today's workstations and PCs cannot be ignored. Even for mission critical applications, the responsiveness and graphical user interfaces of personal computers can be indispensable in improving service. Today, the PC experts and the mainframe proponents are collaborating as they make the

See Downsizing on Page 4...

In his keynote at FOSC'91, Mr. Strassmann will explain these principles in more detail and describe how open systems are being fostered inside DoD.

Please use the enclosed form to reserve a place at this unique conference.

Will Open Systems Meet Their Promises?

While most industry experts are carried along in the euphoria of the open systems movement, a few thoughtful analysts are advising users not to accept all the vendors' promises at face value.

See Promises on Page 4...

Federal Open Systems Conference

A unique three-part program designed for senior federal officials and officers of federal contractors.

PRELIMINARY AGENDA

Part 1: Open Systems and DoD's CIM Program Tuesday, December 10, 1991 8:00 am - 11:30 am

The Defense Department's entire information systems budget, accounting for nearly 50 percent of all federal information systems spending, is now being managed under a single program called CIM. Under its new leadership, directed by DOD Director of Defense Information Paul Strassmann, CIM has quickly become the world's largest concerted effort to bring about open systems. With Congressional staffers and the Office of Management and Budget supporting the program, it won't be long before the civilian agencies begin lining up to follow DoD's lead. This part of the program provides you with a road map to help guide the way:

★ THE MANDATE, STRATEGIES AND TACTICS OF CIM

What caused DoD to change the way information systems spending was managed? How can DoD coordinate such a massive and multifaceted data processing community?

Paul Strassmann, Director Of Defense Information,
U.S. Department of Defense

Prior to assuming his present position, Mr. Strassman was president of Strassman, Incorporated, a management consulting firm, president of The Information Economics Press and principal of Management Tools and Information Services, Incorporated, a research consortium in Boston, Massachusetts. Mr. Strassman has authored more than 60 articles on information management and information worker productivity. He has written two books: Information Pay-off—The Transformation of Work in the Electronic Age, and The Business Value of Computers. In the last three years, he has made over 200 presentations on topics dealing with methods of how to extract benefits from information technology investments. Mr. Strassman has also served on the board of directors of the Information Institute and on the board of trustees of the Strategic Planning Institute. He was chairman of the committee on information workers for the White House conference for productivity.

★ CIM GOLDEN NUGGETS

Programs that demonstrate how CIM and standardization can work across the military. What the programs try to accomplish, and the lessons learned.

Senior Program Managers for RAPID, Stamis, and other CIM Golden Nuggets

★ TRANSFERRING CIM TO CIVILIAN AGENCIES

How will lessons learned through the DoD CIM programs be shared with other federal agencies?

Jack Arthur, Director of Critical Information Systems,
Office Of Management and Budget, and

Richard Kuzmack, Chief, Information Technology
Management Branch, OIRA

Part 2: Profiles For Open Systems Tuesday, December 10, 1991 1:30 pm - 5:00 pm

Choosing standards for open systems is challenging. More than 140 separate standards exist in the OSI (Open Systems Interconnect) arena alone, and dozens more can be found in every other area of open systems: operating systems, programming languages, databases, user interfaces, and many more. With so many standards, two agencies could install standards-based information systems and still not have interoperability between their systems. The only solution on the horizon is a concept called "profiles" in which users agree on the sets of standards they are going to adopt. This session provides a blueprint for making those choices. It presents a DoD profile, a NIST profile, and a profile selected by a consortium of the largest American corporations that use computers heavily.

★ OPEN SYSTEMS: A REALITY CHECK

What open systems are and what they are not, and how to begin the process of transitioning from proprietary to open systems.

Alan Paller, Chairman, FOSC and
President of the AUI Division of Computer Associates

★ NIST'S APPLICATION PORTABILITY PROFILE (APP)

This just-published document may be the foundation that will guide government open information systems procurement.

Roger Martin, Manager of Software Engineering Group,
National Institute of Standards and Technology

★ DOD'S COMMON OPERATING ENVIRONMENT (COE)

Agreement on COE has been reached between the Navy and Marines. Air Force and DoD units appear ready to join the agreement. COE is a profile for Command and Control information systems. But those systems must inter-operate with other DoD systems, so COE may have a major role in all open systems decisions. It is said to supplement NIST's APP.

★ CORPORATE AMERICA'S STANDARDS PROFILE

Fifteen of America's largest companies have agreed on how they will implement open systems. Their choices are similar to, but not the same as COE. The differences are instructive.

Jim Collins, Manager of Open Systems
Program Office, DuPont

★ THE COMPUTER INDUSTRY RESPONSE

How the hardware and software industry will respond to the challenges of open systems.

David Tory, President, Open Software Foundation

★ DIRECTION FOR FUTURE PROFILES: A PANEL DISCUSSION

Federal Open Systems Conference

Part 3: Downsizing to Open Systems
Wednesday, December 11, 1991
8:30 am - 5:30 pm

Billions have been invested in essential applications now running on government mainframes and proprietary minicomputers. Everyone knows it is time to get started moving those applications to open systems environments. But how? This full-day session provides the blueprints.

TO SEE WHETHER YOU SHOULD ATTEND THIS SESSION, ANSWER THE FOLLOWING QUESTIONS:

- ★ What are the key steps in moving to standards-based information technology?
- ★ What are the real justifications for downsizing? (The answer is not lower-cost equipment)
- ★ Are networks and workstations mature and stable enough for mission-critical applications? What's missing? When will it be available?
- ★ What criteria make an application a good candidate for downsizing? Should every application be downsized?
- ★ What database management system should you use if you are building new applications on downsized systems? If you are moving existing applications to downsized systems?
- ★ What tools are available to assist in the downsizing efforts? Do they work?
- ★ How can you integrate PCs, Minis, and Mainframes in Open Systems Environments?
- ★ Can your existing data processing staff be moved to a networked, downsized world, or will new people have to be hired? Is there a way to avoid relearning all the lessons learned over the past decades?
- ★ What management challenges will you face if you attempt to downsize?

If you can answer all nine questions confidently, you should be part of the faculty for this meeting. If not, please set aside December 11, 1991 to get the best available answers to these questions and many more.

Among the other faculty that have been invited to share their knowledge at the Downsizing meeting will be the following executives from inside and outside government. Several additional speakers will join these experts.

- ★ Alan Paller, President, AUI/CA
- ★ Mark Boster, Assistant Commissioner for Management, Farmers Home Administration
- ★ Ron Zeidlinger, General Motors
- ★ Ben Martindale, Sybase
- ★ Joel Gemmel, Oracle
- ★ Anders Vinberg, Computer Associates
- ★ Speaker from Cincom
- ★ Plus representatives from organizations that have made the transition

PRELIMINARY AGENDA

★ OPEN SYSTEMS: MANAGING THE MIGRATION TO STANDARDS-BASED ARCHITECTURES

This presentation will focus on key strategies for planning and migrating to open systems and provide practical insights into the process whereby an organization develops a standards-based information technology architecture for enterprise computing. DMR Group will describe a fast-path process currently being implemented in three large federal agencies, and designed to achieve practical results in a matter of months, not years. Specific steps in a continuous process include an architectural framework, baseline definition, target architecture definition, implementation opportunity identification, migration options, harvesting benefits, and reality testing the architecture. The presentation offers practical steps on transitioning to open systems that senior agency officials can take the day after the conference ends. The material is taken from the STRATEGIES FOR OPEN SYSTEMS* report described elsewhere on this page.

Burnes P. Hollyman, Director, Architecture Consulting DMR Group, Inc.

Burnes P. Hollyman is director of architecture consulting in the Emerging Technologies Region of DMR Group, Inc., and principal author of Standards-Based Architectures, in DMR's STRATEGIES FOR OPEN SYSTEMS program. Mr. Hollyman has directly advised on open systems strategies with government agencies in Australia, Canada, and the United States and currently oversees teams planning standards-based architectures at three large U.S. federal agencies.

★ JUSTIFYING THE MOVE TO DOWNSIZED SYSTEMS

Benefits for development teams; Benefits for users; Hard dollar benefits?; Case studies.

★ CHOOSING THE RIGHT DATABASE FOR DOWNSIZING

A hard-nosed shoot-out between the primary vendors of database management systems that work in open systems environments.

★ INTEGRATING PCs, MINIS, AND MAINFRAMES IN OPEN SYSTEMS ENVIRONMENTS

A technical briefing for managers on the ins and outs of integration.

★ DOWNSIZING CHALLENGES AND BLUEPRINTS

The best place to start, good pilot projects; when to downsize, staffing challenges, network management challenges; solutions when they are available.

*STRATEGIES FOR OPEN SYSTEMS (SOS) is a cooperative effort bringing vendors, users, and government together to investigate standards, technologies, and implementation strategies for open systems. Federal Government sponsors include Agriculture, Army, Air Force, Census, Coast Guard, Defense, Energy, EPA, FAA, FMS, IRS, Navy, NOAA, Postal Service, and VA. For government, the most valuable document is the program's Stage IV: Standards-Based Architectures, which includes a transition management process for migration to vendor-independent IT architectures. Lloyd Mosemann, the Air Force's Deputy Assistant Secretary for Communications, Computers, and Logistics, has called the documentation "very helpful [in] crystallizing the Air Force strategy for open systems." SOS is conducted by DMR Group, Inc., and sponsored by NIST, X/OPEN, UniForum and more than 100 other groups.

Downsizing continued from page 1.....

move toward open systems and application downsizing and development.

Many questions must be answered before such a move becomes feasible or acceptable to the people who manage essential information systems in government: What are the key steps in moving to standards-based information technology? Where is the move justified and where is it not? What are the real justifications for downsizing? What is the right database management system to use for downsizing? These are some of critical questions that will be addressed on the second day of the Federal Opens Systems Conference (December 11, 1991). Leading off the day will be Burnes Hollyman, the principal author of the Strategies for Open Systems Study being heralded widely inside and outside government for providing the best transition management process to vendor-independent information technology architectures.

To register for the Federal Open Systems Conference, use the form provided with this report or call 301-229-1062.

Promises continued from page 1...

Open systems vendors commonly make two commitments:

1. Systems will inter-operate so users can get information regardless of where it is kept, and
2. Software will be portable to higher performing and less expensive hardware as it becomes available.

These benefits will come, say the vendors, as long as vendors' products adhere to standards specified by the users.

But it may not be that easy.

Communications analysts point to the enormous number of competing communications standards -- over 140 at last count. Two users who each select different subsets of the standards will be no better prepared to communicate than would two users of proprietary computer systems. Inter-operability is out the window.

Further, vendors have an insatiable desire to add proprietary extensions to standards. When users take advantage of those extensions, the promise of open systems transportability no longer applies because other vendors may not offer the same extensions.

The analysts who point out these problems have good reason to worry. If users specify standards chaotically, or use proprietary extensions widely, then open systems will become nothing more than marketing hype.

However, government and commercial users have recognized this risk and are attempting to forge solutions. Their basic approach is to select and commit to a subset of standards. They believe their joint buying power will encourage vendors to offer products that will help them meet the promise of open systems.

On December 10, 1991, federal managers will get the first comprehensive look at the profiles likely to shape open systems in the Federal government.

Registering For The Federal Open Systems Conference, December 10-11, 1991 at the Washington Convention Center.

You may attend either one or both days at FOSC'91. The fee for one day is \$355, the fee for two days is \$625. These fees reflect a 10% discount available to federal managers. Registrations received after October 26 require an additional \$75 late registration payment. You may pay by Federal Government Purchase Order, VISA, MC or AMEX credit card, or enclose your check payable to FOSC'91. Call 301-229-1062 to get a copy of the 32 page brochure describing the other courses being offered in conjunction with FOSC'91.

Washington, D.C. 20500

Dear Allan:

It is with great pleasure that I invite you to participate actively in a meeting to assess prospects for enhancing the healthy development of American adolescents. On April 12-14, 1992, at the ANA/Westin Hotel in Washington, D.C., Carnegie Corporation will convene about 200 of the nation's leaders from diverse sectors of our society to consider effective approaches to fostering the health and well-being of adolescents.

Adolescents today are in trouble. Fully one-fourth of the nation's adolescents are at serious risk for a cluster of health-related problems; another one-fourth are at moderate risk. These problems include cigarette smoking, alcohol abuse, use of illicit drugs, accidents and other violence, early adolescent pregnancy, sexually transmitted diseases, and educational failure associated with health-damaging behavior.

Despite the gravity of such problems, there are effective and promising approaches to preventing disease and disability--and indeed to promoting health-enhancing practices for a lifetime. These approaches are likely to have maximum effect if they are fully integrated into the efforts of key institutions with which adolescents have contact. Thus, appropriate strategies should be a vital part of education reform in the middle and high schools. The potential contributions of a broad array of community institutions such as youth organizations are also becoming clear. We especially need to foster their capacity to reach adolescents growing up in high-risk environments. Similarly, various media have great potential for communicating and demonstrating healthy practices. These themes recur in recent studies of adolescent health by several organizations and represent substantial consensus among informed parties. This meeting will present these themes and clarify useful paths for the nation.

A powerful stimulus for our deliberations will be a landmark report by Fred M. Hechinger, formerly Education Editor of *The New York Times* and President of the New York Times Foundation. This report will synthesize the existing evidence and experience about the nature of adolescent problems and ways to improve adolescent health. It will

be issued in conjunction with the conference.

Drawing heavily on work sponsored by the Carnegie Council on Adolescent Development as well as the initiatives of other organizations, the report and meeting will take a broad view of adolescent health, taking into account the vital role of adolescents' behavior in determining health for a lifetime; and the role of society's institutions in shaping their behavior. The main focus will be on the fundamental elements of successful and promising approaches to promoting health and preventing serious problems during the critical adolescent years. We will consider how major institutions of American society--schools, health care systems, families, community and youth organizations, and the media--can integrate these key elements into their own activities and thus reinforce each other's efforts.

The meeting will begin late in the afternoon on Sunday, April 12, and adjourn at midday on Tuesday, April 14. A preliminary agenda for the meeting is enclosed. If requested, Carnegie Corporation will support your coach travel and hotel expenses related to the meeting. If you have questions about this invitation or the conference itself, please do not hesitate to call me at (212) 371-3200, or the executive director of the Council, Dr. Ruby Takanishi at (202) 429-7979.

We are very fortunate to have Ms. Nidia Marti as conference coordinator for this event. At your earliest opportunity, we would appreciate your letting her know whether you will be able to attend the meeting by returning the enclosed response form or calling Ms. Marti at (212) 371-3200.

I earnestly hope that you can join us in focusing national attention on ways in which all sectors of our society can work together to help our young people live healthy, productive lives.

With best regards,

Sincerely,

CARNEGIE CORPORATION OF NEW YORK
CARNEGIE COUNCIL ON ADOLESCENT DEVELOPMENT

CROSSROADS: CRITICAL CHOICES IN ADOLESCENT HEALTH

A National Symposium on the Development of Healthy Adolescents
ANA/Westin Hotel, Washington, D.C.

April 12-14, 1992

Preliminary Agenda

Sunday, April 12, 1992

4:00 - 6:00 p.m. *REGISTRATION*

5:00 - 6:00 p.m. *RECEPTION*

6:00 - 7:15 p.m. *OPENING SESSION: A NATIONAL CRISIS IN ADOLESCENT HEALTH*

David A. Hamburg, President, Carnegie Corporation of New York
Chair, Carnegie Council on Adolescent Development

Louis W. Sullivan, U.S. Secretary of Health and Human Services
(Invited)

7:15 - 9:00 p.m. *DINNER*

9:00 - 9:30 p.m. *ADDRESS: FATEFUL CHOICES*

Fred M. Hechinger, Senior Adviser, Carnegie Corporation of New York
and Former Education Editor, New York Times

9:30 p.m. *ADJOURN*

Monday, April 13, 1992

8:00 - 9:00 a.m.

SUCCESSFUL APPROACHES TO PROMOTING ADOLESCENT HEALTH

Overview of essential elements in successful approaches to promoting adolescent health

Panelists:

David A. Hamburg, Chair

Richard H. Price, University of Michigan

Beatrix A. Hamburg, Mt. Sinai School of Medicine

H. Craig Heller, Stanford University

9:00 - 10:30 a.m.

WIDENING VIEWS OF HEALTH CARE

Broadening definitions of adolescent health and of appropriate health care systems to include schools and community organizations

Panelists:

Michael I. Cohen, Albert Einstein College of Medicine, Chair

M. Roy Schwarz, American Medical Association

Mary Ann Pentz, University of Southern California School of Medicine

Susan G. Millstein, University of California, San Francisco

10:30 - 11:00 a.m.

BREAK

11:00 a.m. - 12:30 p.m.

WIDENING VIEWS OF SCHOOLS

Why adolescents must be healthy to learn. Schools as sites for health services, education, and prevention.

Panelists:

Anthony W. Jackson, Carnegie Corporation of New York, Chair

Gordon M. Ambach, Council of Chief State School Officers

Deborah W. Meier, Central Park East Secondary School

Renee Jenkins, Howard University School of Medicine

Sonia Hernandez, Texas Department of Education

12:30 - 2:30 p.m.

LUNCHEON

John D. Rockefeller, IV, U.S. Senator (Invited)

2:30 - 4:00 p.m.

WIDENING VIEWS OF COMMUNITY AND YOUTH ORGANIZATIONS

How a variety of community and youth organizations can be support systems for adolescents and their families

Panelists:

Wilma Tisch, Philanthropist, Chair

James P. Comer, Yale University School of Medicine

Dagmar McGill, Big Brothers/Big Sisters of America

Kenneth B. Smith, Chicago Theological Seminary

4:00 - 5:30 p.m.

OPEN FORUM

Warren Christopher, O'Melveny & Myers, Chair

Opportunity for participants to respond to presentations.

5:30 p.m.

ADJOURN

Tuesday, April 14, 1992

8:00 - 9:30 a.m.

CONSTRUCTIVE POTENTIAL OF THE MEDIA

How various media (television, film, radio, music, print) and advertising can foster healthy adolescent development

Panelists:

Judy Woodruff, MacNeil-Lehrer Newshour, Chair (Invited)

Marcy Kelly, Woodbine Communications

John Farquhar, Stanford University

9:30 - 11:00 a.m.

DEVELOPING HEALTHY ADOLESCENTS FOR THE 21ST CENTURY

What powerful sectors can do to facilitate the healthy development of adolescents.

A panel of leaders from Congress, state government, business, and voluntary associations.

11:00 a.m. - 12:30 p.m.

OPEN FORUM

Opportunity for participants to share ideas about next steps.

Warren Christopher, O'Melveny & Myers, Chair

12:30 - 1:00 p.m.

Dear Dr. Bromley:

Thank you for agreeing to accept the award of the Council on Research Policy and Graduate Education at the National Association of State Universities and Land-Grant Colleges (NASULGC) Annual Meeting on Monday, November 11, 1991. The reception will begin at 6:30 p.m. The award will be presented immediately after dinner.

A meeting packet will be waiting for you at the NASULGC registration table, but if you prefer you can go directly to the Constitution D and E room of the Grand Hyatt Hotel.

Debra Stewart, North Carolina State University, will introduce you. K. Jack Yost, Pennsylvania State University, will present the award. We hope that you will make a few remarks and perhaps answer a few questions.

If you have any questions, please contact me at 202/778-0844.

Sincerely,

Jennifer Wingard

Dr. D. Allan Bromley, Assistant to President Bush
for Science and Technology
Old Executive Office Building
17th & Pennsylvania Avenue, NW, Suite 358
Washington, DC 20506

Dear Dr. Bromley:

We truly enjoyed having you with us in the Triangle last Tuesday.

The GIS Symposium in the afternoon was, from our point of view, an unusually good opportunity to dialogue between the Federal Government and the GIS community in general. We will be producing a summary of the major points to give you and the other participants.

The meeting of the NACo Focus Group was very useful to help us better understand the next steps required to move this project into its action phase.

Your remarks at our Annual Dinner were well received and of great interest to members of our scientific community as well as political leaders in the audience. We have received several requests for your remarks, so I hope you can send me a copy for distribution.

Again our sincere thanks to you for your commitment to spend time with people in local government and for moving along this vitally important matter of allowing as much technology as possible to become available for local government use.

Sincerely yours,

Herb Stout, Chairman
Triangle J Council of Governments
