The Hon. D. Allan Bromley
Assistant to the President
Office of Science and
Technology Policy
The White House
Washington, DC 20500

Dear Mr. Bromley:

I am pleased to invite you to Hudson Institute's third annual National Policy Forum on Friday, November 22 at the Omni Shoreham Hotel in Washington, D.C. In addition to the important morning and afternoon seminars described in the enclosed brochure, this year's Policy Forum luncheon will be highlighted by President Ronald Reagan's acceptance of Hudson's James H. Doolittle Award for outstanding contributions to the national security of the United States.

Hudson Institute, as you know, is a public policy research organization founded in 1961 by the late Herman Kahn, one of the most original thinkers of this century. Throughout its existence, Hudson has remained dedicated to the legacy of its founder: skepticism about conventional wisdom, optimism about solving problems, a steadfast commitment to free institutions and individual responsibilities, and a realistic view of threats to our national security.

This year's National Policy Forum carries forward that tradition. The critical global changes of the last twelve months, accentuated by the extraordinary events of recent weeks, have underscored the need for original thinking unfettered by whatever "wisdom of the moment" may prevail.

The seminars at this year's Hudson Policy Forum -- conducted by such outstanding speakers as Hudson Distinguished Fellow George A. Keyworth (former Science Advisor to President Reagan) and Alan Reynolds, Hudson Director of Economic Research -- will present that kind of thinking on critical national policy issues. We also think it is especially fitting (and a special honor and privilege for Hudson) that its James H. Doolittle Award will be accepted by President Reagan, to whom so much of the credit belongs for the anti-totalitarianism tide now sweeping the globe.

The Hon. D. Allan Bromley

Page Two

The 1991 National Policy Forum, chaired by Former Governor Pete du Pont, will also cap a year of significant accomplishment for Hudson Institute. Among the highlights is Hudson's work with the Baltic States. Last summer the Prime Ministers of Estonia, Latvia and Lithuania asked us to form an international commission of experts to work with Baltic counterparts to develop plans, policies, legislation, and institutions for building market economies in their republics. This effort (whose significance has now become even greater) is termed the "International Baltic Economic Commission" (IBEC), and reprises Hudson's earlier work in Hungary -- a project that has already yielded considerable success for both the Hungarian economy and our relationship with that country.

I sincerely hope you will join us in Washington on November 22. We believe Hudson has a proud heritage of solidly backed, common sense thinking on the key issues of our day. We also believe Hudson has much to offer to thoughtful Americans engaged in business, governmental, professional and other pursuits who care deeply about our Nation and take seriously the challenges that confront it.

Our National Policy Forum will be an informative and stimulating look at some of Washington's key problems from a non-Washington perspective. We will be honored to have you join this gathering as our guest and will appreciate your returning the enclosed response card as soon as possible.

Sincerely,

Leslie Lenkowsky
President

Third Annual NATIONAL POLICY FORUM

November 22, 1991
Washington, D. C.

Friday, November 22, 1991
Omni Shoreham Hotel
2500 Calvert Street, N. W.
Washington, D. C. 20008

Presentation of The James H. Doolittle Award
for outstanding contributions to the national security
of the United States
Recipient : **The Honorable Ronald Reagan**

2:30 p.m.
to
**BUSINESS AND THE SCHOOLS: WHY A DECADE OF
INTEREST HAS PRODUCED SUCH DISMAL RESULTS**
3:30 p.m.

Dennis P. Doyle - Senior Fellow, Hudson Institute, and coauthor,
Taking Charge: State Action on School Reform in the 1980s

Eight and one half years after the publication of *A Nation at Risk*, our schools are still at risk. Never before in the history of education have so much time and money been spent on so many students with so little success. What accounts for the slow pace of reform? One important culprit is the American business community, which has recognized the crisis in the education of the workforce, but which has nonetheless failed to use its clout effectively to encourage dramatic changes in the system.

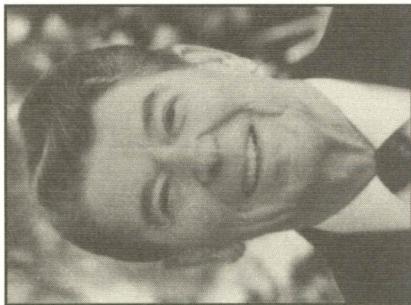

3:45 p.m.
to
**THE U.S. ECONOMY IN A GLOBAL CONTEXT:
FASHIONABLE ILLUSIONS AND DECEPTIONS**
4:45 p.m.

Alan Reynolds - Director of Economic Research, Hudson Institute

Americans have an insatiable appetite for dire economic warnings and dreary forecasts of impending doom. This is partly because groups seeking to change economic policy need to fabricate an unending series of "crises *du jour*" in order to grab the headlines or unseat the incumbent political party. The prolonged and powerful economic expansion of the 1980s should have vanquished most anxieties, as an awesome rebound in manufacturing output discredited the "deindustrialization" bogey, and an explosive rise in exports demonstrated our competitiveness. Yet a barrage of spurious complaints has left us with a national inferiority complex about our economy. In reality, the U.S. economy enters the 1990s in a much stronger position than it began the 1980s, both in an absolute and relative sense.

Third Annual Hudson Institute National Policy Forum

RONALD REAGAN

Former President of the United States

Mr. Reagan is the 1991 recipient of the **James H. Doolittle Award**, presented annually by Hudson Institute for outstanding contributions to the national security of the United States. The award, named in honor of aviator and wartime commander General Jimmy Doolittle, will be presented at the luncheon banquet as part of Hudson Institute's National Policy Forum.

Hudson Institute is a policy research organization founded in 1961 by the late Herman Kahn, who called the Institute "a lobby for the future." In this era of global change, Hudson's mission is to help the U.S. and other democracies emerge more secure in the areas of economic growth, cultural values, defense, and foreign policy.

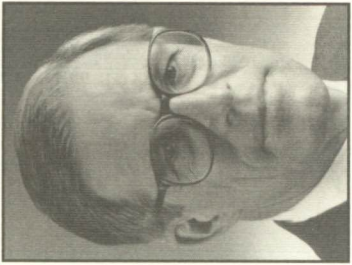

Hudson analysis and policy recommendations are never dictated by political or ideological tenets. However, our 30-year history of work on the greatest issues of the day has forged a viewpoint which frames our thinking. It embodies skepticism about conventional wisdom, optimism about solving problems, an appreciation of the crucial role of technology in policy issues, a steadfast commitment to free institutions and individual responsibility, and a realistic view of threats to national security.

During the past year, the pace of change around the world continued to quicken, suggesting both the dangers and the opportunities we face as we close out the century.

The rapid rate of change is requiring Washington to draw on much more than normal inside-the-beltway reactions. From the challenges of the new democracies of the former Soviet Empire to those of defense in a technological age, from American education reform to the economy, the problems facing America in both the foreign and domestic arenas demand approaches unconventional by Washington standards.

For nearly three decades, Hudson Institute has questioned the conventional wisdom of the moment by bringing together an appreciation of the past with a focus on the future. That approach continues with our 1991 National Policy Forum.

On November 22, Hudson will host a day of interesting discussions on national issues of great import. We hope you will attend. As you can see, the Forum will focus on four important national policy issues, with an emphasis on nontraditional approaches.

The day's events will include a luncheon banquet to present the James H. Doolittle Award for outstanding contributions to the national security of the United States. Former President Ronald Reagan has been selected as the 1991 recipient.

I hope that you will be able to join us on November 22 at the Omni Shoreham Hotel for a view of Washington's problems from a non-Washington perspective. Please use the enclosed response card to make your reservation. I look forward to seeing you at Hudson's National Policy Forum.

Sincerely,

Leslie Lenkowsky
President

Hudson Institute NATIONAL POLICY FORUM

8:30 a.m. INTRODUCTION

Dr. Leslie Lenkowsky - President of Hudson Institute

8:45 a.m. HUDSON INSTITUTE'S INTERNATIONAL BALTTIC
to ECONOMIC COMMISSION (IBEC)

10:00 a.m.

Richard W. Judy - Director of Hudson Institute Center for Soviet and Central European Studies
Dr. Frederick Starr - President, Oberlin College; Hudson Senior Fellow

When the dramatic changes began in Eastern Europe, the prime ministers of Estonia, Latvia, and Lithuania asked Hudson to form an international commission of experts to develop (in cooperation with Baltic counterparts) a plan for a market economy. IBEC operates through nine working groups focusing on issues such as privatization, monetary and fiscal reform, taxation policy, and integration into the world economy. Two of IBEC's directors will give an inside view of the remaking of the Baltic nations.

10:15 a.m.

to SDI, PHASE TWO: DISTRIBUTED SURVEILLANCE IN A

11:30 a.m. POLITICALLY FRAGMENTED WORLD

Dr. George A. Keyworth - Hudson Distinguished Fellow, and former Science Advisor to the President

In 1991, the cooling of the Cold War has relieved some of our concerns about nuclear instability, but it has exposed two new issues: The increased possibility of conventional war under a taller nuclear "umbrella," and the heightened danger from proliferation of weapons of mass destruction possessed by countries involved in regional conflicts. Just as SDI sought to prevent the use of superpower nuclear weapons, the technology of Distributed Surveillance offers a new means of protection against these threats of the 1990s.

OFFICE OF THE
DIRECTOR

28 October, 1991

Dear Dr. Bromley:

Professor J.H. Hamilton will be sixty years old on August 14, 1992. In his honor we are organizing a Nuclear Physics Symposium entitled "Nuclear Physics of Our Times". The symposium will be held at Sanibel Island November 18 - 21, 1992. You know Joe has contributed immensely to the development of Nuclear Physics at Vanderbilt and in the Southeastern Region of the United States.

We have already contacted several of Joe's colleagues and friends and they all have agreed to give an invited talk for thirty minutes followed by a five-minute discussion. We would much appreciate it if you would give a talk on the subject of broad interest. There might be some contributed papers. The symposium proceedings will be published by World Scientific, Inc. If you agree to our invitation, please fill out the enclosed card and mail it immediately so that we can publicize it. Since the symposium budget is very limited we can only offer you a waiver of the registration fee (which is \$100) and the cost of the conference banquet. There will be morning and late afternoon sessions with ample time for other activities. You will also receive a copy of the proceedings. We are expecting an attendance of 75 - 100 people.

Sanibel Island is located about sixteen miles from Fort Myers on the west coast of Florida. At SUNDIAL beach resort they have only one and two bedroom condominiums. The one bedroom condominium has a large bedroom, living room (with a sofa bed), kitchen, eating area and bath. It can easily accommodate two people or a family. The cost is \$115 per night. The two bedroom condominium has 2 baths and can easily accommodate three people. The cost is \$166 per night. This symposium offers you and your family an excellent opportunity to combine business and relaxation. SUNDIAL is located right on a beautiful beach and features many leisure time activities. There are five heated pools, tennis, fishing, canoeing and wind surfing. The weather in November will still be warm enough for swimming.

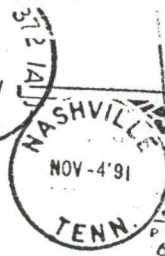

We hope you will accept our invitation and make the symposium a successful one.

Sincerely yours,

Professor A.V. Ramayya

Dear Dr. Johnson:

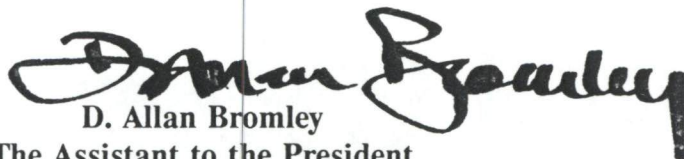

Thank you for your letter inviting me to attend a technology policy conference sponsored by the Institute for Public Policy. This event appears to be an excellent opportunity for an interesting and useful dialogue on such fascinating topic. I look forward to attending.

It is very encouraging to hear that your university is undertaking the challenge of understanding the relationship between science and technology and public policy. I hope this conference will further this understanding.

It is my impression that the date for the conference is subject to my availability. Therefore, I would appreciate the opportunity to schedule this event for February. It is also my understanding that Mark DeSantis of my staff will work directly with the staff of the Institute to arrange the details of the conference.

In the meantime, please feel free to contact me or Damar Hawkins (202) 456-6272 of my staff if you have any questions.

Sincerely,

D. Allan Bromley

Dear Dr. Bromley,

I am writing to you in the hope that you would be willing to participate in a seminar on science and technology at George Mason University. The intent of this seminar is to discuss issues associated with the formulation of technology policy. We expect between fifteen and twenty participants equally divided between George Mason University faculty and other people in the Washington area who have been working in the area of technology policy. I have attached a preliminary list of possible attendees.

We envision a seminar where you would launch the session with a presentation of the current standing of our nation regarding technology policy. Your views could form the basis for subsequent informal discussion. Possible topics might include the roles of effective governmental instruments or organizational arrangements in support of technology policy. It would be very fruitful if you could also reflect on your extensive international experience in the field of technology policy.

As you may be aware, our University, through the Institute of Public Policy, has one of the only Doctoral Programs in Public Policy with a separate track in Science and Technology Policy. In fact, it is my understanding that one of our best doctoral students, Mark DeSantis, is employed in your office. It is our intent to make this program one of the finest in the country, with our graduates serving as a core of professionals with a thorough understanding of the relationship between public policy and science and technology. Your participation in this seminar would add greatly to these efforts.

I am aware that you must have a very busy schedule and I therefore expect no more than two hours of your time to participate fully in this seminar. We expect the seminar will be held in early to mid-December. It is obviously our intent to have this seminar structured around your schedule and interests. Therefore, the exact date and time of day depend on your availability. Don Kash, the Hazel Chair of Public Policy at the Institute, will be contacting your office within a week of receipt of this letter to discuss this proposal.

Sincerely,

28 October 1991

OFFICE OF DIRECTOR

Dr. Allan Bromley
Assistant to the President for Science and Technology
The White House
Washington, DC 20500

Dear Dr. Bromley:

It is with great pleasure that I send you this invitation to participate in a Xerox Evening Dialogue at the Woodrow Wilson Center.

The Evening Dialogue will be devoted to the theme of aging. The main speaker will be Dr. Gene D. Cohen, Acting Director of the National Institute on Aging. Dr. Cohen's talk will be titled, "Insights on Aging: From Greek Mythology to Molecular Biology."

The problems associated with aging pose immense social, economic, medical and scientific challenges to our country. In addition, they affect families, and ultimately all of us, in deeply personal and often vexing ways. In his talk, Dr. Cohen will address these challenges and human dilemmas; discuss changing perceptions of the process of aging; and describe advances in research that are likely to affect profoundly how we understand aging and how we can respond to it as individuals and as a society.

Evening Dialogues at the Woodrow Wilson Center are made possible by the generosity of the Xerox Foundation. This Evening Dialogue will begin at 6:00 PM on November 21st with cocktails in the Center's Rotunda, on the third floor of the Smithsonian Institution's "Castle." Dr. Cohen's talk will begin at 7:00 PM, followed by commentaries, dinner and a general discussion. I anticipate that the evening dialogue will end at about 9:30 PM.

I believe that this Evening Dialogue will be an extraordinarily enlightening occasion. Please let me know whether or not you will be able to join us by returning the enclosed R.S.V.P. card.

Sincerely yours,

Charles Blitzer

1 OCT 28 AM 44

RECEIVED

About six hundred miles west of Ecuador in the Pacific Ocean are a collection of volcanic islands named the Galápagos. First discovered in 1535 by the Bishop of Panama, the islands are home to exotic animal and plant life found nowhere else. Ever since this discovery, scientists from all over the world have journeyed to the islands to study their unique species. Now, the Galápagos again become a center of scientific discovery as the site of the 1991 JASON Project. And we invite you to take part in the expedition.

Please join EDS for a live satellite broadcast from the Galápagos Islands. Our host, Dr. Robert Ballard, will take us from one environmental extreme to another, from high atop volcanoes to the depths of the ocean floor. We'll bring you face to face with giant land tortoises, marine iguanas, lava lizards, Galápagos penguins and other intriguing animal species.

It promises to be an evening of exploration. An evening of discovery. An evening like no other.

Wednesday, December 4, 1991

THE WHITE HOUSE
WASHINGTON

January 8, 1992

Dear Dr. Wilson:

Thank you for your letter of October 25 inviting me to participate in one of your seminars for the National Institute for Global Environmental Change scheduled for 1992. I apologize for the much belated response.

As much as I would like to participate in your seminar series, my schedule for the next few months is extremely busy so I must regretfully decline your invitation.

I appreciate your thinking of me and send best wishes.

Sincerely yours,

D. Allan Bromley

DEAR DR. D.A.BROMLEY,
ON BEHALF OF THE ORGANIZING COMMITTEE WE HAVE THE HONOUR TO INVITE YOU TO PARTICIPATE IN THE CONFERENCE OF SCIENTISTS OF ACADEMIC INSTITUTION WHICH IS TO TAKE PLACE IN MOSCOW (USSR) ON DECEMBER 10-12, 1991.
MEMBERS OF THE ACADEMY OF SCIENCES OF THE USSR, SCIENTIFIC WORKERS OF ACADEMIC INSTITUTIONS, POLICY-MAKERS OF RUSSIA AS WELL AS MEMBERS OF PUBLIC ORGANIZATIONS OF THE SCIENTIFIC COMMUNITY IN THIS COUNTRY ARE TO TAKE PART IN THE CONFERENCE.
THE PROGRAMME OF THE CONFERENCE DEALS WITH THE PROBLEMS OF ORGANIZATION AND LEGAL GUARANTEE OF BASIC SCIENCE IN RUSSIA UNDER EXISTING CONDITIONS, FORMING OF AN ECONOMY BASIS FOR FUNDAMENTAL RESEARCH, SOCIAL SECURITY OF SCIENTISTS AS WELL AS PROBLEMS OF THEIR PARTICIPATION IN THE INTERNATIONAL SCIENTIFIC COOPERATION. THE ORGANIZING COMMITTEE WOULD BE GLAD TO SEE YOU AS GUEST OF THE CONFERENCE AND TO COVER YOUR HOTEL EXPENSES AND PER BIEM IN THIS COUNTRY FROM 9 TO 13 DECEMBER. UNFORTUNATELY, WE ARE NOT ABLE TO PAY FOR YOUR TRAVEL.
WOULD APPRECIATE IF YOU LET US KNOW ABOUT YOUR INTENTION AS SOON AS IT IS POSSIBLE FOR YOU. IN POSITIVE, INDICATE YOUR BIRTH DATE AND PASSPORT N.

THE WHITE HOUSE
WASHINGTON

November 20, 1991

Dear Academician Velikhov:

Thank you very much for your invitation to attend the Conference of Scientists to be held in Moscow on December 10-12, 1991. Unfortunately, I must decline.

I very much appreciate your kind invitation. I recognize the importance of this conference for science in your country, and I am honored that you thought to invite me. Unfortunately, I must remain in Washington, D.C., during those dates in December to chair a meeting of the President's Council of Advisors on Science and Technology.

Best wishes for a successful conference. I would be most interested in receiving a report on the outcome, should a report become available.

Sincerely,

D. Allan Bromley

Dear Dr. Bromley:

Thank you for your willingness to give the Science Policy address at the Annual Meeting of the American Society for Cell Biology on Sunday, December 8, at the John B. Hynes Veterans Memorial Convention Center in Boston.

About 9,000 people are expected to attend this year's annual meeting, including 7,000 basic scientists from universities, industry and government from throughout the country and the world.

We have an unconfirmed indication that Governor William Weld of Massachusetts will greet attendees at 7:00 p.m. In this case, your talk will commence at 7:15 p.m., and will be followed by the science keynote address at 8:00 p.m., to be given by Dr. Henry Bourne of the University of California at San Francisco, entitled "G Proteins and GTPases-A Family Affair". Following Dr. Bourne's talk, there will be a reception for all attendees at 9:00 p.m.

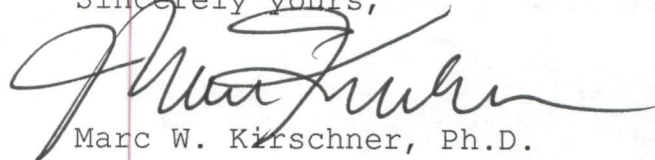

Prior to the initiation of the formal program, I will host a small, private dinner at 5:30 p.m. Among the eight or so invited guests are Governor Weld and Dr. Bourne. I would be very pleased if you and Dr. Henderson are able to join me for this occasion.

Dr. D. Allan Bromley
Page 2

Please have your staff advise me of your plans to attend the dinner on December 8. If you need further information about the Society or the activities of the evening of December 8, please have your staff contact me or Elizabeth Marincola, the Executive Director of the Society, at (301) 530-7153.

On behalf of the American Society for Cell Biology, thank you again for your participation in our thirty-first annual meeting.

Sincerely yours,

A handwritten signature in cursive script, appearing to read "Marc W. Kirschner".

October 22, 1991

The Honorable D. Alan Bromley, Ph.D.
Assistant To the President for
Science and Technology
White House Science Office
Pennsylvania Avenue
Washington, D.C. 20500

Dear Dr. Bromley,

Science Education and the preparation of scientists who will carry America into the 21st century are areas of mutual concern. As a young doctoral student in Science Education at Columbia University Teachers College, I was privileged to attend your keynote speech at the 1981 Chicago NSTA Convention. Your comments on the need for America's educational system to produce scientists who are both at the top of their fields and literate in other areas of human endeavor, especially writing, have remained with me over the years. Your address motivated the thousands of science educators in attendance.

This letter is a request for you, as one of the most motivating and influential leaders in America today, to impact upon a group of people who have the power and potential to implement the changes in American education that are necessary to attain America's goals for Science and Technology.

Through the efforts of Dr. Bob Smith, Superintendent of Wood-Ridge Public Schools, the Bergen County Association of School Administrators has agreed to focus, for their upcoming annual meeting, on Science for the 90's and Beyond.

Bergen County, New Jersey, includes 77 public school districts with a student population exceeding 100,000. This annual meeting of superintendents and other high level administrators provides an invaluable opportunity to implement science programs at the elementary level (where they are often lacking), in more comprehensive form through the middle grades (which is often deficient), and at the highest levels with greater rigor and substance (which is often not the case).

The Honorable D. Alan Bradley, Ph.D.
Assistant to the President for Science and Technology
October 21, 1991
Page -2-

I have been working toward this end with a team of my colleagues here for several years now. Our efforts have included bringing dynamic speakers to our various workshop sessions, among them Senator Bill Bradley and Nobel Laureate Rosalyn Yalow. This year, and for this particular group of educational professionals who have the potential to make a difference we need you to speak on America's need for Science and Technology Education during the 90's and beyond.

Bergen County prides itself on being an educational trendsetter. Your energy and motivation could inspire our superintendents to take a direction which will shape the future of our region, and possibly the nation.

I hope you will be able to honor this request among the many your must receive daily. We can accommodate your calendar for any week day in November or December.

Respectfully yours,

Edward B. Grossman, Ed.D.
River Dell Regional Schools
Liaison to Bergen County Superintendents

Dear Dr. D.A.Bromley,

On behalf of the Organizing Committee we have the honour to invite You to participate in the Conference of Scientists of Academic Institutions which is to take place in Moscow (USSR) on December 10-12, 1991.

Members of the Academy of Sciences of the USSR, scientific workers of academic institutions, policy-makers of Russia as well as members of public organizations of the scientific community in this country are to take part in the Conference.

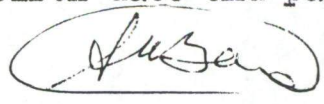

The Programme of the Conference deals with the problems of organization and legal guarantee of basic science in Russia under existing conditions, forming of an economy basis for fundamental research, social security of scientists as well as problems of their participation in the international scientific cooperation.

The Organizing Committee would be glad to see You as guest of the Conference and to cover Your hotel expenses and per diem in this country from 9 to 13 December. Unfortunately, we are not able to pay for Your travel.

Would appreciate if You let us know about Your intention as soon as it is possible for You. In positive, indicate Your birth date and passport N°

DIRECTOR

Dr. D. Allan Bromley
President's Science Advisor
Office of Science and Technology Policy
Executive Office of the President
Old Executive Office Building
Washington, DC 20506

Allan
Dear Dr. Bromley:

I am writing to invite you to a special conference entitled **The Future of the U.S. Academic Research Enterprise**, sponsored by the Government-University-Industry Research Roundtable, to be held December 9-10, 1991, in the Auditorium of the National Academy of Sciences, 2101 Constitution Avenue, N.W., Washington, D.C.

Difficult choices now confront all participants in academic research. The purpose of the conference will be to contribute to the discussions necessary for building consensus about both the nature of the choices ahead and ways to improve decision-making about those choices.

As background for the conference, the Roundtable Working Group on the Academic Research Enterprise has prepared a discussion paper presenting its views about the near-term decisions and longer-term issues that will affect the enterprise in the decades ahead, the difficult choices involved in facing up to these decisions and issues, and ways in which the enterprise might best meet the challenges of the future. We will be sending an advance copy of this paper to all conference participants in mid-November. Enclosed you will find a list of the Working Group members and a description of the Research Roundtable and the Working Group project.

A preliminary conference agenda is also enclosed. On December 9, the agenda will consist of a morning plenary session to hear the major themes and conclusions of the Working Group and responses of other members of the research community. Time will be allotted for discussion among panel members and other participants. During the afternoon, the participants will separate into several breakout sessions to explore ways in which the research community can address the difficult choices ahead. The session topics will be priority-setting; clarifying funding responsibilities; revitalizing the research workforce; balancing education and research missions; and strategic planning for the size and structure of the enterprise. On December 10, the agenda will consist of a plenary session to hear reports from each of the breakout sessions. The conference will conclude with a summary of common themes and suggestions for possible next steps.

We seek your active participation in these timely conference discussions. If you cannot attend, but wish to have an alternate attend in your place, please so indicate on the enclosed self-addressed response card. If you have any questions, please contact John Campbell, Senior Program Officer, at telephone (202)-334-3486 or FAX (202)-334-1639.

Sincerely,

James D. Ebert
Chairman

ENCLOSURES (3)

GOVERNMENT-UNIVERSITY-INDUSTRY RESEARCH ROUNDTABLE

The Future of the U.S. Academic Research Enterprise

DECEMBER 9-10, 1991
Auditorium, National Academy of Sciences
2101 Constitution Avenue, N.W.
Washington, D.C. 20418

PRELIMINARY AGENDA

DECEMBER 9, 1991

- 8:00 a.m. Continental breakfast [Great Hall]
- 8:30 a.m. Welcoming Remarks
JAMES D. EBERT, Chairman, Government-University-Industry Research Roundtable
- 8:45 a.m. "NEW REALITIES" and "A VISION OF THE FUTURE"
ERICH BLOCH, Distinguished Fellow, Council on Competitiveness
- 9:00 a.m. "NEAR-TERM DECISIONS"-- Panel Discussion
o Members of the Working Group on the Academic Research Enterprise
o Invited Discussants
o Open Discussion
- 10:30 a.m. Break [Great Hall]
- 11:00 a.m. "STRATEGIC OPTIONS"-- Panel Discussion
o Members of the Working Group on the Academic Research Enterprise
o Invited Discussants
o Open Discussion
- 12:30 p.m. "FATEFUL CHOICES" and "CHARTING A NEW COURSE"
WILLIAM H. DANFORTH, Chancellor, Washington University in St. Louis
- 1:00 p.m. Lunch
- 2:00 p.m. "NEW APPROACHES TO DECISIONMAKING" -- Discussion Groups [NAS Conference Rooms]
- I. PRIORITY-SETTING
- II. CLARIFYING FUNDING RESPONSIBILITIES
- III. REVITALIZING THE RESEARCH WORKFORCE
- IV. BALANCING EDUCATION AND RESEARCH MISSIONS
- V. STRATEGIC PLANNING FOR SIZE AND STRUCTURE OF THE RESEARCH ENTERPRISE

Charge to each discussion group:

1. With regard to the topic assigned, outline improvements that could be made in current decisionmaking mechanisms, or describe new types of mechanisms, incorporating the following characteristics:
 - o Consensus-building
 - o Joint-planning
 - o Inclusiveness of All Sectors of the Research Enterprise
 - o Broad-based Constituencies -- political, economic, public interest
 - o Preservation of Local Autonomy
2. During last hour of discussion session, consider the implications for topics addressed in other groups.

6:30 p.m. Reception-Buffer [Great Hall]

OVER

Preliminary Agenda (Cont.)

DECEMBER 10, 1991

Plenary Session [Auditorium]

- 8:30 a.m. Report of Group I: PRIORITY-SETTING
- 9:00 a.m. Report of Group II: CLARIFYING FUNDING RESPONSIBILITIES
- 9:30 a.m. Report of Group III: REVITALIZING THE RESEARCH WORKFORCE
- 10:00 a.m. Break [Great Hall]
- 10:30 a.m. Report of Group IV: BALANCING EDUCATION AND RESEARCH MISSIONS
- 11:00 a.m. Report of Group V: STRATEGIC PLANNING FOR THE SIZE AND STRUCTURE OF THE RESEARCH ENTERPRISE
- 11:45 a.m. COMMON THEMES AND NEXT STEPS
RICHARD F. CELESTE, Former Governor of Ohio;
Chairman-Designate, Government-University-Industry Research Roundtable
- 12:30 p.m. Adjourn

GOVERNMENT-UNIVERSITY-INDUSTRY RESEARCH ROUNDTABLE

The Future of the U.S. Academic Research Enterprise

DECEMBER 9-10, 1991
Auditorium, National Academy of Sciences
2101 Constitution Avenue, N.W.
Washington, D.C. 20418

BACKGROUND

Government-University-Industry Research Roundtable

The Government-University-Industry Research Roundtable, established in 1984, is a forum for discussion and debate among representatives of government, universities and industry. Discussions focus on issues related to research that challenge, confound and occasionally divide those in the U.S. research community. The Roundtable does not make recommendations regarding specific government policies or programs. Its purpose is to help all participants develop a better understanding of complex issues, to stimulate imaginative and creative thought and to provide a setting for seeking consensus. The Roundtable is jointly sponsored by the National Academy of Sciences, the National Academy of Engineering and the Institute of Medicine.

The Roundtable's agenda is set by a 25-member Council. The Council's membership is comprised of distinguished scientists, engineers, administrators and policymakers from government, universities and industry. The presidents of the Roundtable's three sponsoring institutions also hold seats on the Council. With the exception of the federal agency officials, who serve as long as they are in office, Council members are appointed to three-year terms.

Through all of its work, the Roundtable Council maintains working relationships with the vast array of parties with an interest in the conduct of research in the United States. These include professional associations, scientific societies, executive agencies, congressional offices, industries and state governments. Contact between the Roundtable and these groups takes place at various venues, including large symposia, workshops and smaller meetings.

Occasionally, working groups are appointed by the Council to examine selected topics in depth. Membership on the working groups is drawn from the Roundtable Council and includes other leading participants in the U.S. research system. The results of working group discussions are reported to the Council, where they receive critical review. Discussion papers, based on the working group deliberations, are disseminated to interested constituencies in the hope of stimulating a wider discussion of these issues.

Working Group on the Academic Research Enterprise

One of the major areas of interest for the Research Roundtable has been academic research in the United States. In 1987, the Roundtable Council assembled the Working Group on the Academic Research Enterprise to study this issue. Erich Bloch serves as chairman of this Group, with William Danforth as vice-chairman.

The charge to the Working Group was four-fold: to examine recent trends affecting academic research in the United States; to consider the impact of these trends on the current academic research enterprise; to identify the longer-term issues that will affect the enterprise in the decades ahead; and to explore ways in which the enterprise might best meet the challenges of the future.

OVER

The Working Group divided its work into two phases. During the first phase, the Group addressed the status of the current academic research enterprise, reviewed statistical evidence of recent trends, and identified pertinent issues for further consideration. A discussion paper was published in October 1989.¹

During the second phase, the Working Group conducted further analyses of issues identified in the October 1989 discussion paper, paying particular attention to their implications for the future of U.S. academic research. In addition to holding numerous meetings itself, the Working Group convened five special workshops focused on the phase-two objectives. The workshops, held from March through October 1990, addressed the following topics: the changing organization and management of universities; the future role of universities; the changing conduct of research and its implications for funding agencies; the future of scientific and engineering education; and the future funding of academic research. A second discussion paper will be published presenting the Working Group's thoughts from these deliberations and inquiries.² The Research Roundtable hopes this discussion paper will stimulate debate within the research community and the public at large about the future course of academic research in the United States.

For international perspectives on the issues being addressed, the Working Group benefited from two symposia co-sponsored by the Research Roundtable and the National Science Foundation: in March 1989, a symposium on the historical evolution of the research systems of six countries: the United States, Japan, the Soviet Union, the United Kingdom, Germany, and France³; in February 1991, a symposium on future national research policies, presented and discussed by senior government officials and leading scientists directly involved in formulating research and higher education policies in the United States, Japan, the Soviet Union, the United Kingdom, Germany, and the European Community⁴.

The current program of Working Group activities will culminate in a national conference on the future of the U.S. academic research enterprise, scheduled for December 9-10, 1991. Conference participants will be asked to assess the range of options identified by the Working Group and to explore the possibilities for national consensus on the future of the enterprise.

The Spirit of Haida Gwaii

The Government of Canada gratefully acknowledges the generosity of Nabisco Brands Ltd for its gift to the people of Canada of The Spirit of Haida Gwaii, by Bill Reid. ✦ The 11,000-pound canoe, cast in bronze and carrying thirteen intricately carved figures from Haida mythology, is the Haida artist's largest and most complex work of art. ✦ The Haida are one of Canada's First Nations — people living in North America before the days of Leif Ericsson, Christopher Columbus or Jacques Cartier. Their ancestral territory—shown on current maps as the Queen Charlotte Islands, off the coast of British Columbia — is known to most of those who live there now as the Islands of the People, Haida Gwaii.

Le gouvernement du Canada remercie sincèrement la société Nabisco Brands Ltée d'avoir généreusement fait don au peuple canadien de l'oeuvre de Bill Reid intitulée The Spirit of Haida Gwaii. ✦ L'énorme canoë en bronze de 11 000 livres est orné de treize figures de la mythologie haida gravées avec une grande minutie. Il s'agit de l'oeuvre la plus volumineuse et la plus complexe de cet artiste haida. ✦ Les Haidas comptent parmi les premières nations du Canada, peuples qui vivaient en Amérique du Nord avant l'arrivée de Leif Ericsson, de Christophe Colomb et de Jacques Cartier. Leur territoire ancestral, qui correspond aux îles-de-la-Reine-Charlotte, situées au large des côtes de la Colombie-Britannique, est appelé Haida Gwaii, les îles du Peuple, par la plupart de ses habitants actuels.

L'Ambassadeur du Canada aux États-Unis d'Amérique et Madame Derek H. Burney

Le Président-directeur général de Nabisco Brands Ltée et Madame Raymond J. Verdon

Legend, Memory, and the Great War in the Air contrasts the romantic myth of gallant combat in the sky with the reality faced by the aviators who fought and died during World War I. It provides an accurate picture of aviation's role in the war and examines the interplay between perception and reality in history.
