OFFICE OF THE
DIRECTOR

Dr. D. Allan Bromley
Assistant to the President for
Science and Technology
Old Executive Office Bldg. Room 358
725 17th St. N.W.
Washington, D.C. 20006

Dear Dr. Bromley:

We are pleased you will be able to address our clients at WRG's Annual International Symposium to be held October 23-25, 1991 at the Willard Inter-Continental Hotel located at 1401 Pennsylvania, N.W., Washington, D.C. 202/628-9100.

Your presentation, *The Technology Revolution and the U.S.*, should be approximately 45 minutes, including 15 minutes for Q&A.

You are scheduled to address the conference:

Date:	Oct. 25, 1991
Time:	10:00 a.m.
Room:	Ballroom

If you would like to provide handouts or if you require special audio/visual equipment for your presentation, please contact me at your earliest convenience.

Please find enclosed an agenda for the symposium; you are welcome to attend any session you may find of interest. We look forward to your speech as an important contribution to our conference.

Best regards,

Lydia B. Clark
Office Director

enclosure

Fall International Symposium

Three Influential Members of Congress Added to WRG Symposium

The agenda is virtually complete for The Washington Research Group's annual fall symposium, to be held on Oct. 23-25 at the Willard Hotel in Washington. We are delighted to announce that several distinguished speakers have agreed to participate in the conference.

These new additions include:

Sen. Pete Domenici (R-N.M.) from the Senate Budget Committee.

Sen. Richard Lugar (R-Ind.) from the Senate Foreign Relations Committee.

Gen. Alexander Haig, former Secretary of State.

Rep. Sam Gibbons (D-Fla.), Chairman of the House Ways and Means Subcommittee on Trade.

Robert Teeter, President Bush's chief political strategist and polltaker.

Richard Murphy, former Assistant Secretary of State for Mideast Policy.

Christopher Cviic, correspondent for The Economist who is one of the world's leading experts on Central European and Soviet economies.

James Balog, one of the country's leading experts on health care policy.

These speakers and the others previously announced give us one of our strongest lineups in the two decades of sponsoring such meetings in Washington. While there will be a major emphasis on policy after the breakup of Soviet Communism, we also will take a close look at the U.S. economy, banking, trade, the budget, politics, health care and emerging technologies.

We have a handful of rooms left at the Willard; if you would like to make a reservation, contact Stanna Hyde or Lydia Clark at (202)298-6226.

THE WHITE HOUSE
WASHINGTON

December 3, 1991

Dear Sherry:

I am, of course, delighted to learn that the Board of Trustees of your University has voted to confer the Doctor of Laws honoris causa on Saturday, May 30, at the Boston campus commencement. In your letter you mention that the exercises are on Saturday afternoon, but also that the degree aware will be at 11:00 a.m. and, at your convenience, I would appreciate learning which is, in fact, the case.

I am doubly honored by the fact that the recommendation for this award came from you and you have my warmest thanks for this recognition.

I remember with pleasure our interactions at Yale and I have been much impressed by all that you have accomplished in strengthening the activities of the University of Massachusetts at Boston.

Although my schedule, as you will appreciate, is always subject to last minute revision at the request of the President, I would certainly look forward to the possibility of joining you for the traditional commencement dinner to be held May 29 in Boston.

Although my office notified you on October 30 that I would be delighted to accept this honor, I regret that travel outside the U.S. has resulted in an appalling delay in your receiving my personal response and thanks.

I shall be honored to join the University of Massachusetts at Boston family and look forward to seeing you on May 29 if not before.

With warmest best wishes for a happy, successful and rewarding 1992,

Sincerely yours,

D. Allan Bromley

Office of Science & Technology Policy
Old Executive Office Building
Washington, D.C. 20506

Dear Allen:

It gives me great pleasure to inform you that the Board of Trustees of the University of Massachusetts voted at its October 1st meeting to confer upon you the degree of Doctor of Laws at the Boston Campus Commencement exercises on Saturday afternoon, May 30, 1992 at 11:00 A.M.

As Chancellor of the University of Massachusetts at Boston, it was my privilege to recommend you for this honorary degree after your nomination by members of the university community in recognition of your accomplishments in the field of nuclear physics, and particularly for your strong advocacy of the strengthening of science education in the United States.

Since working with you at Yale, I have been struck by your very firm commitment to engaging this country's resources to support an increased emphasis on science education and scientific literacy. Your efforts to improve the standing of the sciences in the United States resonates most strongly on our own campus. Last year, the University underwent an administrative reorganization and created a dean of the science faculty. The purpose of this change was to help focus our curriculum on emphasizing both the physical and biological sciences.

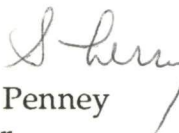

The move, which was welcomed by the scientists on campus, is our attempt to graduate students who understand the scientific and technological forces that are at work in modern society. We also implemented the reorganization to improve our capacity to pursue research in specific areas of concern to the Boston community, such as the environment. By recognizing you as a national leader in the movement to enhance the standing of the sciences in American life, we would be reaffirming at the same time our own efforts to promote scientific understanding at the University.

Dr. D. Allan Bromley
Office of Science & Technology Policy
October 16, 1991
Page Two

Since it is the policy of the Board of Trustees not to award honorary degrees in absentia, the trustees, faculty, and students hope that you can be present at the Boston campus on Commencement Day. Should your schedule permit, I would also like to invite you to join me for our traditional commencement dinner which will be held on the preceding Friday evening.

I do hope that you can fit our commencement celebration into your busy schedule. Please let me know at your earliest convenience if you will be able to accept this invitation to receive an honorary degree from the University of Massachusetts at Boston. I look forward to your sharing this most significant day with our students, faculty and other members of the community.

Most sincerely,

Sherry H. Penney
Chancellor

The Honorable
D. Allan Bromley
The White House
Washington, D.C. 20500

OFFICE OF THE
DIRECTOR

Dear Allan:

On behalf of the Secretary of State and Mrs. Baker, it is my pleasure to invite you to attend the 31st Annual United Nations Concert and Dinner honoring the Chiefs of Diplomatic Missions accredited to the United States and the Ambassadors accredited to the Organization of American States, on Saturday, October 26 in Washington, D.C.

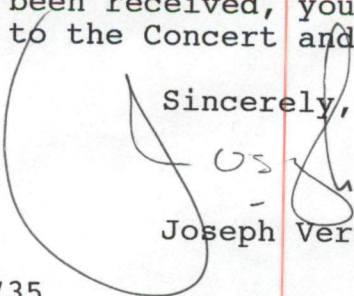

As you may know, the U.N. Concert and Dinner is one of Washington's most prestigious social and cultural events, held under the patronage of President and Mrs. Bush and Vice President and Mrs. Quayle, and co-hosted by Secretary and Mrs. Baker. This year's General Chairman is Edward L. Hennessy, Jr., Chairman of Allied-Signal, Inc. Alan S. Boyd, Chairman of Airbus Industrie of North America, serves as International Industry Chairman.

The evening will begin at 6:30 p.m. in the Concert Hall of the Kennedy Center with internationally acclaimed jazz singer Nancy Wilson. Immediately following the concert, approximately 1,200 corporate leaders, senior U.S. government officials, and diplomats will gather in the International Ballroom of the Washington Hilton and Towers for a black tie dinner-dance.

The importance of preserving our earth for the future is of great concern to us all. I know you will find particular interest in this year's special tribute to the U.N. Environment Program (UNEP), and its Executive Director, Dr. Mostafa Kamal Tolba. Conceived in 1972, and headquartered in Nairobi, Kenya, UNEP has been described as the environmental conscience of the U.N. system.

Secretary Baker and I hope you will join us as guests of honor for this important occasion. Please respond by no later than October 1. A formal invitation will be sent to you next week. After your affirmative reply has been received, you will be sent two complimentary tickets to the Concert and Dinner.

Sincerely,

Joseph Verner Reed

UNITED NATIONS CONCERT AND DINNER

We are pleased to enclose your tickets for the 31st Annual United Nations Concert and Dinner on October 26, 1991 in Washington, D.C. The Concert will begin at 6:30 p.m. in the Concert Hall of the John F. Kennedy Center. You are requested to be seated by 6:25 p.m.

Also enclosed are your admittance cards for the Dinner which follows in the International Ballroom of the Washington Hilton Hotel located at 1919 Connecticut Avenue, N.W.

The Concert and Dinner office in Washington is open from 9:00 a.m. to 5:30 p.m. Monday through Friday. On Saturday, the day of the Concert and Dinner, the office will be open until noon.

There will be a formal, printed seating list. **We would be grateful if you would notify us immediately of any changes in your guest list or if you do not plan to use these tickets.**

For further information please call Lansdale Associates at (202) 289-6131.

OFFICE OF THE DIRECTOR
October 13, 1991

Dr. D. Allan Bromley
Science Advisor to the President
The White House
Washington, D.C. 20506

Dear Dr. Bomley:

As we discussed during our meeting, U.S. FIRST will be launching a new and exciting effort to attract broad student interest to the wonderful world of science and technology. Using the expertise of Dr. Woodie Flowers, Professor of Innovative Teaching at MIT's School of Mechanical Engineering, the inaugural creative engineering challenge called **First Encounters** will take place on February 7, 1992 in Manchester, New Hampshire. We would like to extend an invitation to you, Tom Ratchford, John Sununu, and the President to attend.

Forty organizations will provide two person engineering teams that will be paired with high school students in the contest. The engineers will adopt a science class from their area to work with them in designing, building and testing the vehicle. On the day of the contest the teams will be allowed two hours to make last minute modifications and conduct trial runs. The student members of the teams will operate the vehicles during the competitions with the engineers serving the role of coaches. Our intent is to take this program across the country during 1992 and beyond. Enclosed is an overview of FIRST Encounters to provide more insight into the program and why it is needed. We also included a video on Dr. Flower's and his MIT course.

A nationally recognized board of judges will oversee the contest, while referees will keep things under control on the playing field. Cheering fans and cheerleaders will be part of the fun along with camera crews. Multiple playing surfaces will be used to keep things moving at a fast pace. Prizes and trophies will be awarded. The winning machine will gain entry into the U.S. FIRST Hall Of Fame for Science and Technology.

U.S. FIRST has been planning this event for some time as one of the many programs we intend to introduce to get kids excited about science and math. We sincerely hope that all of you can attend, since you and Tom have been working with us for over a year while John has helped Dean set up SEE as well as U.S. FIRST in a relationship that goes back to 1985. President Bush's interest in science, education, and sports has been well documented. **FIRST Encounters** combines science, education, and sports into one. One that we hope will help us lead America's youth to see science and related subjects as fun, exciting, and rewarding. What isn't well documented is the President's participation in the FIRST AID program that Dean created to help America fund the war effort against science illiteracy. Enclosed is a copy of the Union Leader article covering the kickoff of the foreign aid program two years ago. Thought you might enjoy it. I will call your office next week to follow-up.

Sincerely,

FOR INSPIRATION AND RECOGNITION OF SCIENCE AND TECHNOLOGY

FIRST Encounters

FIRST Encounters presents an entertaining and exciting look at the wonderful world of science and technology from a sporting perspective. Imagine a series of competitions around the country that showcase creative engineering in a fun filled, but competitive setting, embellished by referees, instant replays, cheering fans, camera crews, and captivating announcers. Since when is science and technology considered a sport one might ask?

Twenty years ago, Dr. Woodie Flowers, Professor of Innovative Teaching at MIT's School of Engineering linked sports and engineering by creating the MIT 2.70 design engineering course. It has become the most popular event on campus with over 1000 people packed into the stands to root the contestants on. The winners at MIT go overseas to compete against peers from Japan and Europe, where they are treated like true celebrities. The contest has been highlighted on the PBS series, Scientific American Frontiers. It consistently draws favorable reviews, albeit from a limited viewing audience. U.S. FIRST intends to expand the American audience in a very big way.

One of the reasons kids become so interested in sports is that they see adults playing the games, having fun, receiving recognition, and making money. Kids aspire to do adult things, especially if they view it as fun and rewarding. Equally important, sports provide individual role models the kids can easily identify with, and often idolize. In the world of technology, such role models are virtually non-existent, because it is typically the corporate entity that receives the recognition and rewards. If we want to inspire more interest in science, math, and technology among America's youth, we need to provide them with adult role models that have fun with technology and receive recognition and rewards for their skills. We need to show them that science and math are more than formulas on paper. We need to make engineering come alive in a way that kids can easily embrace.

Many experts cite professional sports as one of the primary forces distracting our youth away from education. Rather than complaining about something that will not go away, U.S. FIRST believes it is time to take a few pages from the playbook of professional sports. U.S. FIRST believes that sports also teach value lessons about teamwork and sportsmanship. Kids relate to the excitement of sports, the fast paced action. They relate to the ideas of winning and losing. They love games. Kids dream about doing adult things, especially if they see those activities as fun, exciting,

and rewarding. That is the precise package we intend to wrap up in FIRST Encounters.

Dr. Flowers is on the Board of Directors of U.S. FIRST. He will assist in the creation of a professional championship of creative engineering from the ranks of Corporate America. A series of local and regional competitions will culminate in a national extravaganza that will be packaged for television broadcast. There will be prizes and trophies. The winning vehicle will take its place in the U.S. FIRST Hall of Fame along with a picture of the winning contestants.

Concurrently, U.S. FIRST will orchestrate a national NCAA championship to stir broad interest on college campuses. In conjunction with the National Science Teachers Association, U.S. FIRST will also develop a series of downscaled contests that can be used on an intra or inter school basis for primary and secondary schools. They can also be used in external organizations within the community. In total, U.S. FIRST intends to build a technology oriented sport that will span from the "Major Leagues to Little League", because the world series of technology leadership is one competition America must win.

Dumpling Bonds Boost Science Education Center

Kamen Kingdom Pledges Aid to Needy Neighbor (U.S.)

By NANCY MEERSMAN
Union Leader Staff

Manchester stockbroker Cal Cramer was seen entering the North Dumpling Embassy, 340 Commercial St., last Friday to corner a share of the newly issued "North Dumpling foreign aid bonds."

There's been a run on the dumpling bonds ever since Dean Kamen, a highly imaginative inventor-entrepreneur, came up with the idea.

The "bonds," on high grade paper with a gold seal, can only be redeemed for "dumplings," the official currency of the small island Kamen owns in Long Island Sound.

You could probably buy some ice cream on North Dumpling Island with the dumpling notes and little else. So why would heads of international companies, high government officials and commoners alike be buying them up? Do they know something we don't?

Kamen, or Lord Dumpling as he is also known, is the ruler of North Dumpling Island. The tiny nation has its own government and its own bank, the First and Only National Bank of North Dumpling Island.

For the first time, the Dumpling bank has issued its own bonds — actually "foreign aid national treasury bonds" — to aid the island's distressed neighbor nation, the United States.

Dollars raised by the sale of dumpling bonds will help to keep the U.S. States from becoming a third-rate technological power.

"The bond is a joke, but the message is serious," said Kamen.

The funds don't go directly to the United States. That would be risky. They go to the Foundation for Inspiration and Recognition of Science and Technology (FIRST), which will spend the money to let children know how exciting the world of science can be for them.

Kamen has enlisted some of the nation's marketing and scientific brains to sell young people the idea that being smart is cool and that excelling in school brings real payoffs.

Kamen says the same advertising geniuses who have glorified sports figures and made "heroes out of inarticulate thugs," are equally capable of putting a different message in the national consciousness.

DUMPLING BOOSTER — Not even President George Bush, during his fall visit to Manchester, could resist Queen City inventor Dean Kamen's innovative "North Dumpling" bond campaign to fund his science education center.

"The guys that made the Super Bowl something everybody cares about could make the superconductor something everybody cares about."

Kamen has had promises and encouragement from a major soft drink manufacturer and hopes to soon have a fast food giant on line to participate in FIRST.

Instead of a plastic trinket with your hamburger and soda, maybe you'll get a science puzzle to solve.

Kamen envisions distributing S&H Green Stamp type booklets in schools, and teachers awarding points to children for academic accomplishments. When they fill up their books they'll get real rewards — not just a gold star on their forehead — but a red Corvette or a plane ticket to Disney World, Kamen suggests.

And they'll win something even better, the admiration of their classmates. "They'll learn that kids can be smart and not be antisocial, lonely nerds," he said.

Kamen wants FIRST game

kiosks in all the malls in the country. When kids buy a pair of jeans, a sweater or tapes at the mall, they'll get a ticket to put in the machine so they can play a scientific game and win a prize.

Kamen says all the "gizmos" for FIRST will be produced right in Manchester, in the Pandora building — since the city last night acquired it from May Gruber, philanthropist and founder of the sweater empire, who offered the building to the city.

So Kamen hopes people buy a lot of dumpling bonds, which can be had in units of \$25 and up. "Everybody buys a \$25 gift for someone you don't know what to buy for. This is a lot more fun than the pet rock, and it's tax deductible," said Kamen.

"It will be the first time in history that the United States has received foreign aid for science and technology, and God knows the U.S. needs it," he said.

While they last, the bonds may be purchased from FIRST, 340 Commercial St., Manchester 03101, telephone 669-9000.

THE WHITE HOUSE
WASHINGTON

November 8, 1991

Dear Ingo:

Many thanks for your letter of October 15 in which you tell me of the celebration that you plan to honor Eugen Baumgartner on his 65th birthday.

I would very much like to have been able to be present on December 5, but unfortunately, I am already committed to giving a major talk elsewhere on that date and, in consequence, simply am unable to be in Switzerland at that time.

Please convey my warmest best wishes to Eugen and Iris with the hope that they will continue to share a long, happy, healthy, and rewarding time together. I know that Eugen will never actually retire as far as physics is concerned, and I wish him every satisfaction in his continuing research activities as well.

With warmest personal regards,

Sincerely yours,

D. Allan Bromley
The Assistant to the President
for
Science and Technology

P.S. I am enclosing herewith a letter addressed to Eugen that you might wish to pass on to him at whatever time seems appropriate.

Professor Ingo Sick
The University of Basel
Klingelbergstrasse 82
CH 4056 Basel
Switzerland

THE WHITE HOUSE
WASHINGTON

November 8, 1991

Dear Eugen:

Just yesterday I paid a brief visit to the University of Rochester and it seems difficult indeed to adjust to the fact that it has been some 40 years since Pat and I met you and Iris at the railway station in Rochester at the beginning of your fellowship year there.

It seems equally difficult to admit to the fact that you are considering anything vaguely resembling retirement or that both of us have reached the age of 65.

I wish that our scientific paths had crossed more frequently and I want to take this occasion to congratulate you for the very effective leadership that you have provided for your area of physics at the University of Basel, and for your many contributions to the world of physics generally.

I deeply regret that I cannot be present on December 5 to convey these congratulations and my warmest best wishes for the future in person but, unfortunately, I have a long-standing commitment for a major talk elsewhere on that date.

Let me simply wish you and Iris a very long, healthy and happy life together with every success and satisfaction in whatever activities you choose to undertake.

With warmest best wishes,

Sincerely yours,

D. Allan Bromley

Liebe Freunde von Eugen Baumgartner

Mit diesem Brief möchten wir Ihnen eine wesentliche Änderung am Institut für Physik ankünden. Eugen Baumgartner tritt auf Oktober 1991, nach hervorragendem Wirken als Forscher, Lehrer, Leiter und Berater, in seiner Funktion als o.Professor zurück. Mit Erreichen des 65. Altersjahres möchte sich Eugen seinen physikalischen Interessen vermehrt als Hobby widmen, und die Erledigung der Routinegeschäfte in die Hände eines Nachfolgers legen.

Die Gruppe von Eugen Baumgartner am Institut wird auf den 5. Dezember 1991 ein Fest organisieren, um dieses Ereignis in angemessener Form zu würdigen. Nähere Auskunft kann bei Frau E.Meyer oder bei mir eingeholt werden.

*Inform Frau Meyer

Hemispheric Launch

CARING FOR THE EARTH:
A Strategy for Sustainable Living

On October 21, 1991, the publication, Caring for the Earth will be launched in 80 countries around the World. The Organization of American States will be the site of the launching for this Hemisphere. This document, published jointly by IUCN-The World Conservation Union, UNEP-United Nations Environment Programme and WWF-World Wide Fund for Nature, defines a strategy and plan of action which look toward a sustainable world society.

Caring for the Earth is dedicated to the entire world community and, in particular, to the world's leaders, non-governmental groups, professionals and educators who will meet at the United Nations Conference on Environment and Development in June of 1992 in Brazil.

The first World Conservation Strategy was presented in the Hall of the Americas of the Organization of American States ten years ago. This document has inspired the formulation of National Conservation Strategies in over fifty countries. With Caring for the Earth, our need to understand the mutual interdependence among the human populations of the globe and between ourselves and the other inhabitants of the planet is further amplified and defined.

Program

Hall of the Americas
October 21, 1991

11:00 a.m. Ceremony for the launch of Caring for the Earth.

Opening: Kirk P. Rodgers, Director of the Department of Regional Development and Environment, Organization of American States.

Presentation: Sir Shridath Ramphal, President of the World Conservation Union.

Acceptance: Ambassador Joao Clemente Baena Soares, Secretary General of the Organization of American States.

Remarks: Ambassador Heraldo Munoz, Permanent Representative of Chile to the Organization of American States, and Chairman of the Committee to Propose a Policy for the Organization in Matters of the Environment.

11:25 a.m. Questions and Answers by the Press and Public to a Panel of Distinguished Guests.

Ms. Joan Martin-Brown, Special Advisor to the Executive Director, Chief Washington Office, United Nations Environment Programme.

Ms. Diane Wood, Vice-President for Latin America, World Wide Fund for Nature.

Mr. Byron Swift, United States Representative, The World Conservation Union.

12:00 p.m. Reception. Hall of Heroes.

Dear Dr. Bromley:

This will confirm plans to have you visit this Region on October 29.

In the afternoon, beginning at 1:00 PM we have planned sessions with national leaders in geographic information systems and the National Association of Counties Research and Technology Focus Group, which I chair.

In the evening after a brief reception you will be the featured speaker at the Triangle J Council of Governments Annual Awards Banquet. Dr. Earl Mac Cormac, Governor Martin's Science Advisor, will introduce you.

The Banquet is attended by the leaders of the academic, business and government community.

Please advise us at your earliest convenience if this program is agreeable with you. We will be pleased to adjust the schedule if you think it appropriate.

Sincerely yours,

G. Herbert Stout

(Volunteer of Year, Triangle Development Awards and
Triangle Land Conservancy Award)

GIS SYMPOSIUM
BUILDING BRIDGES BETWEEN TECHNOLOGY AND DECISIONS

Tuesday 29 October 1991, 1:00-3:00Pm
MCNC, Research Triangle Park, North Carolina

As we move from the 20th into the 21st century, county and city governments throughout the United States will need the very best technologies if they are to be more responsive to increasing demands by citizens for better and more efficient services. Geographic information systems (GIS) is one of the technologies that has been acquired by government agencies, universities and others during the last decade, carrying the promise of vastly improved spatial data management, analysis and support for decision-making. However, there remain numerous technical and policy challenges that must be met if this promise is to be truly fulfilled. The GIS Symposium provides an opportunity for a selected group of individuals representing federal, state and local governments, the industry, and universities to come together for a focused discussion on how these organizations can cooperatively work together to fulfill and expand the promise of GIS in ways that will benefit everyone.

TENATIVE AGENDA

1:00 - 1:10PM	Welcome and Introductions Kaye Braaten
1:10 - 1:30PM	Challenge to Symposium Participants Herb Stout Jack Dangermond (invited)
1:30 - 2:45PM	Discussion Dr. David Cowen, Moderator
2:45 - 3:00PM	Summary and Wrap-up Herb Stout

Dear Allan:

This is to reconfirm the date of the conferral of the Center's highest award, its Distinguished Public Service Award Medal, on you. This will be on Thursday, June 25, 1992 at the J.W. Marriott in Washington, D.C. with the reception beginning at 6:30 p.m. and the dinner following.

The Chairman for this 27th Annual Awards Dinner is Kenneth Derr, Chairman of Chevron Corporation. He joins with me in saying how very much he looks forward to having you with us on this occasion.

Kindly reconfirm.

Warm regards.

Sincerely yours,

R. Gordon Hoxie

DEAN FOR NATURAL SCIENCES

October 9, 1991

91 OCT 15 AM 11:32

Dr. D. Allan Bromley
Science Advisor to the President
Director, Office of Science and Technology Policy
Old Executive Office Building
Washington, DC 20585

Dear Dr. Bromley:

As you are already aware, the Council for Advancement and Support of Education (CASE) has named Dr. Harvey D. Blankespoor, Professor of Biology at Hope College, as its 1991 Professor of the Year. I am exceptionally excited about this honor for my colleague because it not only verifies what I already know about him (that he is an exceptional teacher-scholar in every sense), but also because it recognizes good science education. In an era when science and mathematics education in the United States comes under fire from a number of different directions, it is particularly pleasing to know that Dr. Blankespoor's achievements are recognized as exceptional by CASE.

On Wednesday, October 16, 1991, Dr. Blankespoor will be in Washington, D.C. to receive his award and present a lecture entitled "**Snails, Streams, Swamps, and Scourges.**" The lecture will be at **7:00 p.m.** in the **Education Center Auditorium** (in the Education Building) at the **National Zoo**. The Education Building of the National Zoo is located at 3001 Connecticut Ave., NW between Woodley and Cleveland Park metro stops. At **6:00 p.m.**, immediately prior to Dr. Blankespoor's lecture, there will be a Hope College reception on his behalf in the Education Building. I would like to personally invite you to attend both the reception and Dr. Blankespoor's lecture. I know you will find Dr. Blankespoor's lecture interesting and informative and your presence at the reception and lecture will underscore the importance of recognizing excellence in science and mathematics education.

I hope you can clear your busy schedule to attend the reception and lecture next Wednesday evening. I look forward very much to seeing you there.

Sincerely,

James M. Gentile, Ph.D.

Dean for the Natural Sciences and
The Kenneth G. Herrick Professor of Biology

The World Food Prize is the foremost international award recognizing outstanding individual achievement in improving the quality, quantity, or availability of food in the world.

The prize emphasizes the importance of a nutritious and sustainable food supply for all people. By honoring those who have worked successfully toward this goal, the prize calls attention to what has been done to improve the world food supply, and to what can be accomplished in the future.

The World Food Prize is sponsored by The World Food Prize Foundation, established by John Ruan, and is located in Des Moines, Iowa.

International nutritionist Dr. Nevin S. Scrimshaw of the United States is the 1991 laureate of The World Food Prize.

Dr. Scrimshaw is being honored for his lifelong dedication to alleviating hunger and malnutrition in developing nations. His revolutionary accomplishments over five decades have made a substantial improvement in the lives of millions of people — in dozens of countries around the globe.

OFFICE OF THE
 DIRECTOR

October 7, 1991

D. Allan Bromley, Ph.D.
 Assistant to the President for Science and Technology
 Policy
 Old Executive Office Building
 17th and Pennsylvania Avenue, N.W.
 Washington, DC 20506

Dear Dr. Bromley:

This letter is a formal invitation to participate in the forthcoming conference on "Assessing Learning and Educational Achievement," jointly sponsored by the American Psychological Association (APA) and the Mid-continent Regional Educational Laboratory (McREL) of Denver, Colorado. The conference will bring together psychologists, educators, and state and national policymakers to review learner-centered assessment alternatives and strategies in an effort to bring clarity to issues related to educational assessment. The conference is supported by the Johnson Foundation and will be held at the Wingspread Conference Center in Racine, Wisconsin, November 8-10, 1991.

In this unprecedented time of educational restructuring and reform, the President and the Governors have given their highest priority to developing appropriate standards and assessment approaches that will give meaningful direction to educators and policymakers. Your expertise, leadership and participation as a resource person in this effort will be an important contribution to education reform, and to making recommendations for the important decade ahead.

The following topics have been identified by the APA President's Task Force on Psychology in Education as the major conference themes: 1) The Role of Goals, Standards and Competencies in the Assessment of Educational Achievement"; 2) "Learner and Instructional Perspectives in Educational Assessment"; and 3) "Design of Assessment Systems: Integration of Standards and the Needs of the Learner."

The conference will convene at 6:00 p.m. on Friday, November 8 and adjourn after lunch on Sunday, November 10. Each of the three 1/2 day sessions will include a plenary session with four presenters, group discussions, and finally, reports from groups.

The Johnson Foundation will provide meals and hospitality. Lodging reservations will be made for you at the Sheraton Racine Hotel for the nights of November 8 and 9. For your information, the most convenient airport to the center is Mitchell International Airport in Milwaukee. Transportation to and from Mitchell Airport will be provided by the Johnson Foundation. We regret, however, that we cannot pay for lodging and transportation costs, or provide an honorarium for participants. Further travel and conference information will be available from the Johnson Foundation should you decide to attend the conference.

We very much look forward to this exciting conference and to working with you. Please let us know by October 15 if you are planning to attend the conference by calling Dr. Cynthia Baum, APA Director of Education Programs, or Sonja Schmieder, APA Education Programs Officer (202-955-7717).

Sincerely,

Charles D. Spielberger, Ph.D., APA President

JOHNSON
CONTROLS

OFFICE OF THE
DIRECTOR

The Honorable D. Allan Bromley
Assistant to the President for
Science and Technology
The White House
Washington, D.C. 20500

October 4, 1991

Dear Mr. Bromley:

As you know, energy conservation is receiving increased attention in the federal government. The enactment of the Executive Order on Federal Energy Management (Executive Order No. 12759) provides an excellent example of good government.

Johnson Controls, Inc., with 37,000 employees nationwide, is actively encouraging greater energy conservation in the federal government. As a demonstration of our commitment to the issue, we are sponsoring our Second Annual Energy Conservation Forum in Washington, D.C. on Monday, October 28, 1991.

The theme of this year's forum is "Implementing the Executive Order - Strategies and Funding." The program will include a luncheon featuring former Energy Secretary Dr. James R. Schlesinger as keynote speaker. After the luncheon, a panel discussion by Congressional members and Administration officials will address the forum theme. A Congressional reception will be held that evening on Capitol Hill.

We hope you can set aside October 28 to attend all, or part, of the day's activities. An official invitation and additional details will soon be arriving in the mail.

We look forward to seeing you on the 28th. If you have any questions, please contact our Milwaukee office (800-727-6660).

Sincerely,

JOHNSON CONTROLS, INC.

James H. Keyes, President
and Chief Executive Officer

Encl.

JOHNSON CONTROLS, INC.
SECOND ANNUAL ENERGY CONSERVATION FORUM
Washington, DC

October 28, 1991

Program Objective:

To discuss strategies for implementing a viable Federal Energy Conservation Program.

1. Event: *VIP Reception with Dr. James Schlesinger* - 11:30 a.m. - 12:30 p.m.

National Press Club
The Zenger Room
14th and F Streets, N.W.
Washington, D.C.

2. Event: *Luncheon and Panel Discussion* - 12:30 p.m - 3:30 p.m.

National Press Club
The Main Lounge
14th and F Streets, N.W.
Washington, D.C.

Luncheon
Keynote Speaker: Dr. James Schlesinger,
Former Secretary of Energy
12:30 p.m. - 2:00 p.m.

Panel Discussion: "Funding and Implementation of
the Executive Order on Federal
Energy Management"
2:30 p.m. - 3:30 p.m.

3. Event: *Congressional Reception* - 5:30 p.m. - 7:30 p.m.

Rayburn House Office Building
Room 2118 - Independence Avenue
and South Capitol Street, S.W.
Washington, D.C.

NANCY DOMENICI

Dear Mr Bromley

Pete and I have worked with this organization - The National Alliance for the Mentally Ill for several years. They do a great job! Family members are in over 1000 affiliates groups in cities throughout the U.S. Know this invitation is late arriving but

would be honored if you could
attend. The public needs to know
these disorders are real, have a
neurobiological basis - and can
be treated (maybe someday even better).
Events like this help folks learn and
lower the stigma

Also know your energetic and dynamic
friend, Eric Pischel.

Sincerely,
Nancy Dornenice

Charles E. Cobb, Jr.
Ambassador of the United States of America

Reykjavik, Iceland

91 OCT 9 P 1: 01 October 3, 1991

OFFICE OF THE
DIRECTOR

Dr. D. Alan Bromley
Assistant to the President for Science and Technology
Old Executive Office Building
17th & Pennsylvania Ave. NW
Washington, DC, 20506

Dear Dr. Bromley:

I am writing to inform you of an upcoming event in Reykjavik which may be of interest to you or members of your organization. During September 2-4, 1991, the Federation of Icelandic Industries will be sponsoring an International Conference on the Industrial Uses of Geothermal Energy. As you may be aware, Iceland is a leader in the use of geothermal energy for home and greenhouse heating, and electric power generation, but so far has not seriously explored industrial applications of geothermal steam. This conference is a first step in that direction.

My top priority as Ambassador in Reykjavik has been to increase the number of linkages between the U.S. and Iceland. I think the field of geothermal energy has excellent possibilities for mutually beneficial cooperation. There are things we can learn from the Icelanders in this area, as well as things we can teach them. In addition, I hope that when Iceland starts to exploit its geothermal resources for industrial uses U.S. firms will be involved as foreign investors. One of the best ways to insure that is to have active participation by Americans at this early stage, when Iceland is just starting to consider its options. That is why I would like to encourage you to send one or more members of your staff to this conference.

Attached for your information is a preliminary announcement which the Federation of Industries is releasing about the conference. Should you or any member of your staff have questions about the event, please feel free to contact me here at the Embassy, or to write to the Federation directly at the address on the pamphlet. I hope the U.S. Department of Energy will be able to take an active role in this conference.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "A. C. Lebb". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.

BACKGROUND INFORMATION

Whereas geothermal energy has been utilized for domestic heating, electric power production, and greenhouse farming, it has only been utilized in industry to a minor extent.

To explore further possibilities for the industrial exploitation of this relatively clean and inexpensive energy source the Federation of Icelandic Industries, together with other sponsors, is planning an international conference on the industrial uses of geothermal energy, to be held in Reykjavik, Iceland in September 1992.

SCOPE OF THE CONFERENCE

The conference will touch upon all aspects of geothermal resources pertaining to their industrial use, but the focus will be upon the technical and economic aspects of using geothermal steam in industrial manufacturing processes.

PARTICIPANTS

The conference is primarily aimed at technical and management personnel in energy intensive industries, as well as academic people, but anyone with a general interest in geothermal energy is encouraged to attend.

MAIN TOPICS

TECHNICAL CHARACTERISTICS OF GEOTHERMAL RESOURCES

Occurrence of geothermal fields. Physical and chemical properties of geothermal fluids in situ and during field exploitation. Production characteristics of geothermal wells. Drilling costs. Field management and long term behaviour of geothermal wells under exploitation. Characteristics of geothermal fluids.

ENVIRONMENTAL ASPECTS

Chemical and thermal pollution from high temperature fields, comparison with other energy sources. Local vs. global considerations. Waste water disposal. Reinjection of geothermal fluids.

GEOTHERMAL ENERGY UTILIZATION IN INDUSTRY

Processes where geothermal energy and brines can be used. Temperature of heat sources vs. requirements. Modifications of standard process design for geothermal exploitation. Heat exchange considerations. Cases of present industrial use of geothermal heat will be reported as well as cases of extraction of geothermal minerals.

ECONOMICS OF GEOTHERMAL ENERGY

Heat costs vs. fluid temperature. Cost optimization in process design. Production cost of geothermal heat. Cost of transportation of geothermal fluids.

THE FUTURE POSSIBILITIES OF INDUSTRIAL USES

In drying applications. In mining and related operations. Mineral recovery from brines. Sugar processing and distillations. Alumina production and related applications. Potential uses of geothermal heat in the chemical process industries.

PRELIMINARY REGISTRATION FORM AND CALL FOR PAPERS

Dear Dr. ^{allan}Bromley:

I write to tell you about an important conference, entitled Teaching Within a Research University, to be held at MIT on Wednesday, October 9, 1991. The conference includes a plenary session followed by smaller discussion meetings and will address MIT's institutional mission for the future.

People from all walks of academic life - faculty, research and administrative staff, graduate and undergraduate students - will actively take part. If you cannot attend, I urge you to send a staff representative for this important MIT event.

For your information I enclose a copy of the detailed announcement of the conference. If you would like additional information, please contact Jack Crowley, Director of MIT's Washington Office, at (202) 789-1828.

Sincerely yours,

A handwritten signature in cursive script that reads "Chuck".

617-253-0148

September 19, 1991

Dear Member of the MIT Community,

I write to ask that you join me for an event of particular importance to everyone at the Institute. On Wednesday, October 9, there will be an MIT Colloquium on *Teaching Within a Research University*. This is the concluding feature of the Inaugural Year. The topic is a crucial one that should draw the entire community into productive discourse as we work to build consensus about the shape of MIT's institutional mission for the future. I hope that people from all walks of our academic life — faculty, research and administrative staff, graduate and undergraduate students — will actively take part.

As in previous MIT Colloquia, this one will occur in two stages: convergence for a plenary session in Kresge Auditorium (4:00 to 5:30 PM), followed by dispersal into smaller discussion meetings, with food (6:00 to 8:00 PM).

For the large Kresge gathering, the Colloquium Committee has devised an unusual format. A panel of the following MIT people, whom I'll introduce, will start the conversation:

Robert J. Birgeneau, Dean of the School of Science

Yonald Chery, 6/G

Woodie C. Flowers, Professor of Mechanical Engineering

J. David Litster, Vice President and Associate Provost for Research;
Director, Francis Bitter National Magnet Laboratory

Joel Moses, Dean of the School of Engineering

J. Mark Davidson Schuster, Associate Professor of Urban Studies
and Planning

Colleen M. Schwingel, 15/4

Robert J. Silbey, Head, Department of Chemistry

Irene Tayler, Professor of Literature

Jacquelyn Ciel Yanch, Class of '58 Assistant Professor,
Nuclear Engineering and Whitaker College;
Biomedical Imaging and Computation Lab

Members of the panel will address what we are calling a Challenge Resolution:

MIT faculty are both teachers and researchers. At their best these two roles are mutually reinforcing, and their fusion uniquely strengthens the Institute as a place for learning. In practice, however, they sometimes fall out of balance or even into conflict. To enrich undergraduate and graduate education, MIT should find specific ways to make teaching and research more closely complementary in the professional lives of all faculty members.

The panelists will be prompted to specificity and candor by a non-MIT interlocutor familiar with the topic and skilled at asking tough questions: Michael S. Dukakis, Visiting Distinguished Professor of Political Science at Northeastern University and former Governor of Massachusetts. He will proactively elicit response to a range of relevant questions and sub-issues, including but not limited to these:

- Should the criterion of balance between teaching and research apply to any academic department as a whole and/or to all individual faculty within it?
- What are the existing reciprocities between teaching and research, and how can they be extended/strengthened? Can we imagine (and implement) others?
- How does the spirit of this resolution apply to MIT's many research laboratories and centers, where many nontenure-line staff and graduate students join faculty in the educational enterprise?
- Should peer review of teaching effectiveness be undertaken as systematically as peer review of research in promotion and tenure cases, and given equal weight in decisions? How?
- UROP is maybe our strongest suit in teaching and research complementarity. How can we have more of it and encourage earlier involvement for undergraduates?
- For many Institute faculty, teaching excellence means mainly lecture hall performance. Do we need more attention to interactive teaching modes, discussion methods, and the dynamics of learning in very small groups?
- Is it true that for graduate students, research assistantships carry more prestige than teaching assistantships? If so, why? Should this value system change?
- How can students — graduate and undergraduate alike — be given the most effective voice in the assessment and reward of good teaching?

To the MIT Community
September 19, 1991
Page three

- The quest for research grant funding becomes increasingly arduous and time-consuming. How does this affect teaching quality, including personal accessibility of faculty to students? Should MIT readjust its expectations about how much of their own compensation faculty members should raise?
- Do we have enough support services and instructional resources to help faculty members develop their teaching skills?
- Do multiple educational demands on faculty time molest research efforts?
- How do grant funding sources affect MIT's educational agenda and programs?
- What's our working definition of a research university?

Provost Mark Wrighton will sum up the afternoon's proceedings.

Since the practical implications of the topic are specific to particular disciplines, the dinner discussions will be hosted by academic departments rather than by living groups. Each Course will structure a meeting in its own way, although most will involve a mingling of faculty, research and administrative staff, graduate students, and undergraduates (freshmen will be allowed to choose from among the various departmental sessions). You should be hearing soon from the coordinator in your department (or in the case of freshmen, from the UASO) about the evening session and how to sign up for it. If you are not affiliated with an academic department, you may contact the UASO for a list of departmental coordinators.

In the interest of lending substance to community-wide discussion of the Colloquium topic, the organizing Committee is soliciting focused opinion pieces from all members of the academic/research community. These will be gathered into a retrospective publication of record, which will also include a summary of the Kresge proceedings and notes derived from the various departmental discussions. If you would like to contribute something succinct (no more than 750 words, please), deliver hard copy and a disk to Donna Friedman, MIT Colloquium Committee, Room 7-104, by October 1, so that your views — subject to some editing, of course — can be made available to the panelists and the interlocutor before the event itself.

I hope you will mark your calendars for the period between 4:00 and 8:00 PM on Wednesday, October 9, and, in the meanwhile, do some thinking (and maybe writing) about the issues. I look forward to seeing you there.

Sincerely yours,

Charles M. Vest

Dear Dr. Bromley:

To honor you for your distinguished record of support for scientific research especially your role in supporting university research, the Council of Research Policy and Graduate Education (CRPGE) of the National Association of State Universities and Land-Grant Colleges (NASULGC) would like to present you an award at our annual national meeting. It will be accompanied by a banquet in your honor Monday evening, November 11, 1991 at the Grand Hyatt Hotel in Washington, D.C.

CRPGE consists of chief research administrators and graduate deans of the 148 NASULGC member universities. These officers have responsibilities for research and graduate education at their respective institutions.

The reception preceding the banquet is scheduled to begin at 6:30 p.m. on November 11, 1991. After recognition of your role in promoting scientific research, we hope you would speak to the assembled group of about 100 - 150 people for 15 - 20 minutes and perhaps answer a few questions. We hope that you will be able to accept this award and join us at the banquet. A modest honorarium accompanies the award.

We have asked Jennifer Wingard, NASULGC staff, to serve as the point of contact on this matter. She will be in contact with your office.

For your information, I attach the program for our 103rd annual meeting that is devoted to "Integrity, Accountability and the Future of the University".

Sincerely,

Bob Clodius

VÁCLAV HAVEL

President of the Czech and Slovak Federal Republic

An articulate and insistent fighter for human rights, he withstood the bitter oppression of a political system that banned his writings and three times imprisoned him; he became the rallying point of a growing moral force that in November 1989 brought about the now historic Velvet Revolution. Elected president of Czechoslovakia's new democratic government, he holds a place of distinction among world leaders, esteemed for his intellect, his integrity, and his devotion to the best aspirations of a free society.

Old Executive Office Building, Room 358
17th Street & Pennsylvania Avenue, NW
Washington, DC 20500

I appreciate, Allan . . .

. . . the opportunity to meet with you during my visit to Washington last week.

I sincerely hope you will consider visiting Alaska and the U.S. Arctic, and I am pleased to extend an invitation for you to do so in the summer of 1992. A visit at that time would be appropriate as a complement to your forthcoming visit to Antarctica, and as a follow-up to the recent visit by Walter Massey.

Please let me know how I can help you to plan such a trip. I assure you it will be a memorable visit as well as an important endeavor to understand the role of the Arctic in the global earth system.

Again, thank you for your time and courtesy.

With every good wish,

Sincerely,

The Honorable Allan Bromley
Assistant to the President for
Science & Technology
Director
Office of Science & Technology
Old Executive Office Building
17th Street & Pennsylvania Avenue, N.W.
Washington, D.C. 20500

Dear Dr. Bromley:

You are cordially invited to be our guest at the Civil Engineering Research Foundation (CERF) Corporate Advisory Board (CAB) meeting and dinner:

WHEN: Dinner** Sunday, October 20, 1991; 7:30 - 9:30 pm
Meeting Monday, October 21, 1991; 8:00 am - 6:00 pm
WHERE: Orlando, Florida Buena Vista Palace Hotel

Big Lead!
For the first time ever, we've opened this meeting to outside guests such as yourself, to allow you the chance to observe the dynamics of this influential group and learn how we positively impact research in our industry. We'll also tell you how you can participate as a member of the Corporate Advisory Board.

Our meeting is scheduled in conjunction with the American Society of Civil Engineers (ASCE) annual convention. In addition to attending the dinner and meeting, you are invited to join us for lunch on Monday where three of our distinguished Board members: Lt. General Hatch, U.S. Army Corps of Engineers; Major General Ahearn, U.S. Air Force; and Rear Admiral Bottorff, Civil Engineer Corps, U.S. Navy, will be giving the keynote address to the entire ASCE convention. Their topic will be, "Civil Engineering aspects of Operation Desert Storm," a unique presentation that you won't want to miss.

Please RSVP to CERF headquarters by October 11, 1991 by calling (202) 842-0555.

We look forward to your participation and the opportunity to meet.

Sincerely,

Delon Hampton
Chairman, Corporate Advisory Board

Harvey M. Bernstein
President, CERF

**Dinner will be a special joint function of ASCE past and present officers and CERF's CAB members & guests. Dress is black tie and spouses are invited. A formal invitation from ASCE Executive Director Ed Pfrang is attached.

September 25, 1991

TO: INVITED GUESTS OF CERF'S CORPORATE ADVISORY BOARD MEMBERS

Ladies/Gentlemen:

It is my pleasure to call your attention to the 1991 Dinner of the Past Active Officers Association of ASCE and to express the hope that each of you will attend. The dinner will be held, starting with cocktails, at 6:30 p.m. on Sunday, October 20, in the Ireland Room of the Buena Vista Palace Hotel, Orlando, Florida.

Having enjoyed these dinners in the past, the program of the annual affair is arranged to continue the friendships made during service to the profession and to welcome new officers. In this connection, you may be interested to know that this function was first held in 1916 and has since been a feature of the Annual Convention.

To assure proper arrangements and accommodations, will you please contact the CERF office by October 9th at (202) 842-0555, as previously requested, to signify your acceptance. Dinner jackets, with black ties, and cocktail dresses will be the popular choice of those attending.

Sincerely,

A handwritten signature in black ink, appearing to read "E. O. Pfrang", written over a horizontal line.

Edward O. Pfrang
Executive Director

Dear Dr. Bromley:

We look forward to seeing you at the second Ceres Conference at Williamsburg in late October. In order to give you a better idea of what will take place there, I thought you might like to have the book emanating from the first Ceres Conference which was published this week by John Wiley and Company.

When the preliminary materials for Ceres II are printed later, you will also receive background papers prepared in anticipation of the first three panels. They will provide a clearer scope of the second Ceres Conference, which we intend to be more focused and action-oriented.

Yours sincerely,

Gerald E. Gaull, M.D.

September 27, 1991

The Honorable Allan Bromley
Advisor to the President for
Science and Technology
Old Executive Office Building
17th & Pennsylvania Avenue, NW
Washington, DC 20506

Dear Dr. Bromley:

I am pleased to invite you to attend the National Forum on Ocean Conservation, to be held November 19-21, 1991, at the Smithsonian Institution, in Washington, D.C.

The Forum will launch a multi-year program designed to focus attention on environmental issues that affect the oceans. Following the Forum, the Smithsonian plans to host smaller briefings and produce publications and other media programs. In addition, a major traveling exhibition on ocean conservation is slated to open in 1994, in the National Museum of Natural History.

I am delighted to announce the addition of two distinguished speakers to the Forum program since the printing of the enclosed Forum brochure. Discussing the development of an ocean ethic will be author Peter Matthiessen in his keynote speech opening the Forum at 7:00 p.m. on Tuesday, November 19. Elliot Richardson, whose career includes serving as Special Representative of the President to the Law of the Sea Conference, will close the Forum with a summary of global ocean conservation efforts within the context of the Law of the Sea treaty.

If you are interested in attending the Forum, please return the enclosed registration materials, or call the Office of Environmental Awareness at 202/357-4797. We anticipate a full auditorium, and I would encourage you to respond before October 30, 1991 if you would like to attend.

Sincerely,

Thomas Lovejoy
Assistant Secretary for
External Affairs

The world's oceans shape our weather, recycle chemical elements, and provide resources that sustain human life and the amenities of civilization. Yet, our needs and our growing numbers are creating problems. Exploitation, pollution and changing climate pose serious threats to oceans and life on earth.

The National Forum on Ocean Conservation will highlight environmental issues affecting open oceans, coasts, and the interface of land and sea. The Forum is sponsored by the Smithsonian Institution and the National Oceanic and Atmospheric Administration (NOAA) of the Department of Commerce. Additional funding was provided by The Lucille and David Packard Foundation, Swim Environmental Awareness Organization, the W. Alton Jones Foundation, The Stroud Foundation and the National Fish and Wildlife Foundation.

For further information about registration, please contact: Office of Conference Services, Smithsonian Institution, 202 357-4789, FAX 202 786-2557. For further program information, contact Beth Nalker, Office of Environmental Awareness, Smithsonian Institution, 202 357-4797, FAX 202 786-2557.

The world's oceans shape our weather, recycle chemical elements, and provide resources that sustain human life and the amenities of civilization. Yet, our needs and our growing numbers are creating problems. Exploitation, pollution and changing climate pose serious threats to oceans and life on earth.

The National Forum on Ocean Conservation will highlight environmental issues affecting open oceans, coasts, and the interface of land and sea. The Forum is sponsored by the Smithsonian Institution and the National Oceanic and Atmospheric Administration (NOAA) of the Department of Commerce. Additional funding was provided by The Lucille and David Packard Foundation, Swim Environmental Awareness Organization, the W. Alton Jones Foundation, The Stroud Foundation and the National Fish and Wildlife Foundation.

DEFENSE SCIENCE
BOARD

September 26, 1991

Honorable D. Allan Bromley
Assistant to the President for
Science and Technology
Office of Science and
Technology Policy
OEOB, Room 360
Washington, DC 20506

Dear Dr. Bromley:

The Defense Science Board will have its Fall dinner meeting on Wednesday, October 9, 1991 at The Army and Navy Club, 901 Seventeenth Street, NW, Washington, DC (on Farragut Square). There will be a social hour at 1900 hours, followed by dinner at 2000.

If your busy schedule permits you to attend, please forward your check for \$42.00 per person made payable to "Defense Science Board," to Mrs. Diane L.H. Evans, Defense Science Board, OUSD(A), Room 3D865, The Pentagon, Washington, DC 20301-3140. Or, call the DSB Secretariat at (703) 695-4157 to RSVP. This amount covers the dinner, tax, and gratuity. A cash bar will be available before dinner. The reservation deadline is October 4, 1991.

Sincerely,

for 
John S. Foster, Jr.
Chairman
