OFFICE OF THE
DIRECTOR

Honorable D. Allan Bromley
Assistant to the President for
Science and Technology
The White House
Washington, D.C. 20506

Dear Allan:

At a time when the need to improve U. S. science and technology capabilities is gaining much deserved national attention, the National Institute of Standards and Technology (NIST) is observing its 90th Anniversary and the 25th Anniversary of the Gaithersburg, Maryland site. To celebrate these anniversaries, we have planned a series of special events, including an Open House for industry and government leaders. You are cordially invited to join me along with Commerce Under Secretary for Technology Robert M. White at the event.

The Open House will be held on Monday, September 16, at the NIST site in Gaithersburg, beginning with a breakfast in the Administration Building at 8 a.m. We will provide a brief overview of NIST activities and opportunities for cooperative projects, and then take you on tours of our laboratories. Tours will be tailored to your special interests.

Throughout its 90-year history, the mission of NIST (formerly the National Bureau of Standards) has been to strengthen U. S. industry's competitiveness, advance science, and improve public health, safety, and the environment. This Open House will give you an opportunity to learn, first hand, about NIST research that directly affects you and your organization.

I hope you will be able to join us. An early response to the enclosed reply form will help us design a visit that meets your interests and needs. If you have any questions, please call Paula Fry on (301) 975-2772. I look forward to seeing you on September 16.

Sincerely,

John W. Lyons
Director

RECEIVED

91 JUL 29 P 3: 55

Dr. D. Allan Bromley, Director
Office of Science and Technology Policy
Executive Office of the President
Washington, DC 20506

Dear Dr. Bromley:

On pages ii and x of your Fiscal Year Research Plan for "Our Changing Planet", you and/or your committee of 16 or more federal officers have:

"The scientific objectives of the research plan are to observe, understand, and ultimately predict global change." (page ii, in ¶3)

"An improved predictive model of the integrated Earth system and better understanding of human interactions with this system will provide direct benefits by allowing anticipation of and a planning for impacts on commerce, agriculture, energy, resources utilization, and human safety.

Every once in a while I see your picture in various expert interviews in which you keep expressing great optimism about general progress. You seem to claim that so called "individual scientist" have complete equal opportunity, but you don't have any idea what goes on below your highest office of science & technology in this slowly retarding nation.

It certainly would be a pleasure to be wrong with the above pessimism, but you may never answer this note. You will also "wash your hands", if I asked you for any demonstration that could help us? How about lifting up the telephone yourself and obtain the earthquake data for the years 1978 through 1989, at least, for the Central California San Andreas Fault region, so that they are mailed direct to your office? Then you'll find out that these taxpayer paid for data are held secret by the U.S. Geological Survey of Menlo Park. We'll pay your office 5¢/sheet for these 12 or 13 years, plus the mailing costs from Washington. The President has signed a bill last year for about \$558 million for earthquake detection stations all across the nation with a stipulation that nothing is going to be possible for any research purposes. What good does it do for the persons gifted in telling everyone about the damages afterwards? Your National Geophysics Data Center in Boulder likes to see this Monday-Morning-Quarterbacking pulp to make its ends meet? Call them to ask how they are making out with such sales?

We would like to invite you to our presentation on Wednesday, Oct 9, 1991 in Anaheim at the Pacific Conference, "Statistics in Analytical Areas", but it appears that we'll not be able to have any extra hand-outs on earthquakes, asteroids, or other areas that are held up because of federal "red tape", only the old 1981 breakthrough theory and single work. But it's the first chance in over 10 years to present something that will allow the data themselves to predict the future or not predict, with the last as just as important because then things can be improved upon and to know to what degree or not to have federal and world waste, also important. The Congress, at the pressure of USA citizens cannot just "appropriate" and expect miracles to happen. But also, they can "appropriate" and feel very certain that simple, easy sciences is going to "bring home the bacon".

I don't wish to have to post this letter (a copy) in Anaheim because your federal system can't keep its promises? If I can get these data before the end of the month or the first week in August, we still have a chance. Please don't shift the buck downward, since there may not be anyone below who is willing to view the overall picture validly?

Sincerely,

Wilbur Slaughter

July 21, 1991

Dr. D. Allan Bromley
Director and Assistant to the President for Science and Technology
Executive Office of the President
Office of Science and Technology Policy
Washington, D.C. 20506

OFFICE OF THE
DIRECTOR

Dear Dr. Bromley:

On behalf of the Office for Information Technology, Harvard University, I would like to invite you to speak at a technology colloquium during the 1991-92 academic year. The Harvard community would benefit greatly from a lecture by you about technology's role in the national agenda for science.

Each academic year we sponsor a colloquium series focused on the impact of technology on higher education. Topics in the past have included converging technologies for research (the library and the computing center), supercomputing, instructional software and new technologies, using multimedia, managing technology in the university, and network management. We videotape these colloquia for later viewing.

Although the colloquium topic is at your discretion, we would be most interested in hearing about the role of technology in the national agenda for science. An alternative would be to have you talk about the Federal High Performance Computing Program, NREN and how these efforts can help the U.S. compete in the global information revolution. Your and Paul Huray's article, "The U.S. Government's High Performance Computing Program: How Much Will We Use It To Leverage America's Future?" in The Roll Call, which you sent in reply to OIT Director Stephen Hall's letter about the National Research and Education Network, was very informative. It could be the basis for a colloquium presentation, if you wish.

We are targeting our general educational events toward faculty this year, and I am certain that you would draw a large faculty audience. In the past, the colloquia have been attended by different groups, depending upon the topic. Computer center directors, technology support people, faculty, graduate students, and some administrators usually attend. We also publicize to the broader Boston community, universities, and private research organizations.

The colloquium date is open, but any time in February or March is preferable. I would appreciate hearing from you as soon as possible about your availability and some possible dates. If you have any further questions, I can be reached at 617/495-8863.

Sincerely,

Anne H. Knight

Science and Technology Policy Division
Office of Science and Technology Policy
Old Executive Office Building
17th Street & Pennsylvania Avenue, N.W.
Washington, D.C. 20506

OFFICE OF THE
DIRECTOR

Dear Mr. Bromley:

With its twice-yearly meetings between top Washington officials and distinguished leaders of the international business community, the Washington International Corporate Circle has been playing a vital role for the past five years in helping to facilitate the exchange of ideas on critical international policy issues. I write to cordially invite you to meet with the international top-management executives from SRI's Corporate Circle at our next meeting.

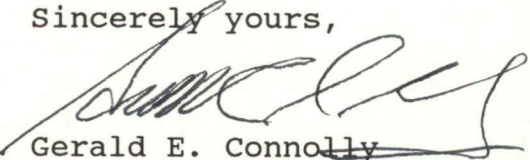

The meeting is scheduled for Thursday, September 12-Friday, September 13, and will be held at the Willard Inter-Continental Hotel in Washington.

We would like you to spend about an hour with the group in order to offer your thinking on some of the great challenges confronting the U.S. and our major economic partners over U.S. energy policy and the international energy situation.

SRI International, as you may know, is one of the world's largest not-for-profit research and consulting firms. The Corporate Circle regularly brings its European and Asian corporate participants to Washington for off-the-record discussion sessions on how U.S. policy affects the international economy. With members such as Credit Suisse, Mazda Motor Corporation, Philips, Norsk Hydro, and Fuji Bank, the Corporate Circle has met with a wide array of leaders from the Congress and the Administration, including George Bush, Thomas Foley, Robert Dole, Michael Boskin, Julius Katz, John Robson, Ernest Hollings, Bill Bradley, Donald Riegle, Les Aspin, and Paul Sarbanes.

We very much hope you will be able to be with us, and we will be in touch with your office to coordinate this.

Sincerely yours,

Gerald E. Connolly
Vice President

Representative Vic Fazio is in his seventh term representing the Fourth District of California. Throughout his years in elected office, Congressman Fazio has combined his personal interest in the arts with his role in public service. He has served as a champion of the arts of every discipline, and has helped to preserve and protect the environment in which the arts may thrive in our nation.

He is an ardent supporter of the National Endowment for the Arts and has been a dedicated member of the Congressional Arts Caucus for over a decade. His interest in arts preservation ranges from his legislative efforts to preserve a century-old historic opera house in Woodland, California which was in danger of being destroyed to securing appropriations to restore the U.S. Capitol and the Library of Congress, two of our country's most cherished buildings.

Congressman Fazio is the first recipient of the American Cultural Preservation Award. As demonstrated by his legislative career, he has distinguished himself as a dedicated advocate of the arts.

PACIFIC TELESIS GROUP
and

THE NATIONAL ARTS EDUCATION PROGRAM

cordially invite you to join
Members of the Congressional Arts Caucus
at a reception and dinner
honoring

The Honorable Vic Fazio
the first recipient of the annual

358 Old Executive Office Building
Washington, D.C. 20506

Dear Dr. Bromley:

Next week, Gennadi Kudriavtsev, the new Soviet Minister of Communications, will head an official five-member delegation to the United States.

U S WEST has an opportunity to host the group. On Wednesday evening, July 17, there will be a cocktail reception and dinner at the Sewall Belmont House, located at 144 Constitution Avenue, NE, next to the Hart Senate Office Building. We would be delighted to have you as our guest for cocktails and/or dinner. Cocktails begin at 7 p.m., with dinner to follow.

My assistant, Mary Jo Bull (202 429 3101) will follow up with your office by telephone to confirm your attendance.

Thank you in advance for your consideration.

Sincerely,

Laird Walker

Washington, DC 20506

Dear Dr. Bromley:

The purpose of this letter is to invite you to attend and participate in the meeting of Chairmen of Biochemistry Departments in U. S. Medical Schools. The meeting will be held January 16-19, 1992 at Frenchman's Reef in Saint Thomas, Virgin Islands. A policy session will be held on January 17 or 18 on the subject "Funding Research In The 90s".

You may recall that you accepted my invitation last year to attend the annual meeting held in Kona, Hawaii, and unfortunately, found it necessary to cancel prior to the meeting due to issues in Washington.

The Chairman's meeting is generally attended by 60-80 individuals who are major educators, researchers, and policy makers at our medical schools.

I am confident that the group will greatly appreciate your participation and presentation of views regarding this critical subject.

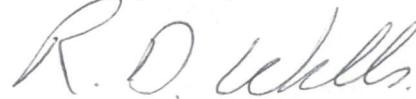

Dr. D. Allan Bromley

WASHINGTON

August 1, 1991

Dear Professor Wells:

Thank you for your letter of July 10 inviting me to join you and your colleagues for the meeting of Chairmen of Biochemistry Departments in U.S. Medical Schools scheduled for January 16-19, 1992. I apologize for the much belated response.

As much as I would like to join you, I must regretfully decline your kind invitation because that particular time is the period set aside for the release of the budget, and it is absolutely essential that I remain in Washington.

Again, I appreciate your thinking of me, and let me offer my best wishes for a successful and productive session.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "D. Allan Bromley". The signature is fluid and cursive, with a large initial "D" and a long, sweeping underline.

THE WHITE HOUSE
WASHINGTON

July 11, 1991

Dear Mr. Kondo,

I appreciate your kind invitation to the "IEA Conference on Technology Responses to Global Environmental Challenges - Energy Collaboration for the 21st Century." As you know, I am deeply interested in the questions of global change and believe that science and technology have an major role to play in both understanding global change and contributing to correct policy responses based on what we learn about global change.

I expect to be in Tokyo in October for the Joint High Level Meeting of the U.S.-Japan Science and Technology Agreement, which I will co-chair with Foreign Minister Nakayama. Unfortunately, I will be unable to return in November to participate in the Conference in Kyoto.

Best wishes for a successful conference.

Sincerely,

A handwritten signature in black ink, reading "D. Allan Bromley". The signature is written in a cursive, flowing style.

IEA International Conference on TECHNOLOGY RESPONSES TO GLOBAL ENVIRONMENTAL CHALLENGES

ENERGY COLLABORATION FOR THE 21ST CENTURY

November 6-8, 1991 Kyoto, Japan

91 JUN 23 14:17

June 24, 1991

OFFICE OF THE
DIRECTOR

Dr. D. Allan Bromley
Assistant to the President for
Science and Technology
The White House, Office
1600 Pennsylvania Avenue
N.W., Washington D.C. 20500
U.S.A.

Dear Dr. Bromley:

It is my great pleasure and honor, as the President of the Science Council of Japan and the Director-General of the Research Institute of Innovative Technology for the Earth (RITE), to announce that RITE, the International Energy Agency (IEA), the Government of Japan and the New Energy and Industrial Technology Development Organization (NEDO) will co-host "The IEA Conference on Technology Responses to Global Environmental Challenges - Energy Collaboration for the 21st Century". The Conference will be held on November 6-8, 1991, in Kyoto, Japan.

We would be most grateful if Your Excellency would honor us by participating in the proceedings as a member of the Sponsoring Committee and in the Conference itself. In view of the time constraints on the distinguished members of the Sponsoring Committee, the Sponsoring Committee will not meet in person, and will give advice through correspondence and other means of communication. RITE will be responsible for all costs pertaining to the participation of the members of the Sponsoring Committee in the Conference.

The details of the Conference are given in a separate brochure. Here, if I may, is a brief description of the objective and background. Further details of the Conference are given in a separate brochure.

OBJECTIVE

The major objective of the Conference is to develop proposals for enhanced international cooperation to support future national and international technological action programs and define R&D priorities to respond to the challenge of global warming.

BACKGROUND

Global environmental problems have come to the fore of the international agenda as the most serious long-term threat to humankind and the planet that gives sustenance to all life. They demand a concerted effort by the global community to lay the foundations for a world in which future generations can enjoy economic prosperity in a healthy environment.

Global warming is of particular concern. The potential seriousness of the consequences call for an international undertaking of an unprecedented magnitude. But greenhouse gas emissions, CO₂ in particular, are closely linked to all human activities through the use of fossil fuel and other natural resources. Thus, any response strategy for a lasting solution requires sustained efforts over the coming decades to develop innovative and advanced energy and other technologies to address global warming, enhanced through international R&D collaboration.

The Conference, which brings together leading energy and environmental policy makers and experts, heads of R&D centers and programs, energy industry and utility managers, and scientists and economists from all corners of the globe, should make an indelible contribution to the definition of the international agenda for these efforts.

I trust that the Conference will avail itself of Your Excellency's approval and participation, and look forward to a favorable reply.

Yours respectfully,

Jiro KONDO
President
Science Council of Japan
and
Director-General

June 13, 1991

OFFICE OF THE
DIRECTOR

Dr. Alan Bromley
Executive Office of the President
Office of Science and Technology Policy
Washington, D.C. 20506

Dear Dr. Bromley:

Please join us as a delegate in the World Congress on Technology, the first world conference of experts, scientists, educators, people with disabilities, and others to address issues on the development and use of technology in the workplace to advance the employment of people with disabilities. The Council on Accessible Technology, which I Chair, is co-sponsoring the World Congress with the U.S. General Services Administration, the U.S. Department of Education, and the Electronic Industries Association.

Please see the details on the World Congress in the information and registration packet, which is enclosed with this letter. In addition, Vice President Dan Quayle is the Honorary Chairman of the World Congress.

The Council on Accessible Technology (COAT) was established in 1984 as a consortium of United States Federal Government agencies in recognition that the rapid development of computers and related technology makes technology support of employees with disabilities both practical and economical. The goal of the Council has been to advance the management and use of information technology and communications, including their development, to promote the productivity and achievement of employees with disabilities.

One of the most important initiatives of the Council on Accessible Technology is the World Congress on Technology. The World Congress is an international scientific conference on technology for people with disabilities in the workplace. The conference is scheduled for December 1 through 5, 1991, at the Hyatt Regency Hotel in Crystal City, Virginia, USA, which is in the metropolitan area of Washington, DC.

This international conference, the first of its kind, will gather experts and scientists on computer and communication technology from around the world. The purpose is to address issues on state-of-the-art, developing, and future technologies, and their application, that benefit people with disabilities in the workplace. Conference delegates will address and discuss issues

relating to research and development of technology that will solve problems facing us today. An exhibition of state-of-the-art and developing technologies is included as a conference activity.

This conference presents the opportunity for interested persons to discover how technology makes employees with disabilities competitive, valuable, and highly productive workers, whether in the factory, the office, at home, or as professionals.

As you will see in the enclosed conference brochure, a first call for abstracts, papers, and participation has been announced.

We are now issuing our second call for conference delegates, abstracts, papers, and exhibits. Please study carefully the enclosed information and registration packet.

We invite your participation in this exciting and significant world event. Already, the response worldwide to the convening of the World Congress on Technology is outstanding.

I am looking forward to your response.

If you have any questions or inquiries about the World Congress on Technology, please contact me or Ms. Sue Mercado by telephone (202) 501-0720, by FAX (202) 501-3510, or by TDD (202) 501-2296. Also, a letter may be directed to me at the following address: Leonard J. Suchanek, Chief Judge and Chairman, Board of Contract Appeals, General Services Administration (G), Suite 7228, 18th and F Streets, NW, Washington, DC 20405, USA.

Sincerely,

LEONARD J. SUCHANEK
Chairman, Council on Accessible Technology
Chief Judge and Chairman,
Board of Contract Appeals

Enclosures

WORLD CONGRESS ON TECHNOLOGY

INFORMATION AND REGISTRATION PACKET

WORLD CONGRESS ON TECHNOLOGY

--The first international conference on information technology, computerization, and electronics in the workplace for people with disabilities.

WHEN AND WHERE:

December 1-5, 1991
Hyatt Regency Hotel
Arlington, Virginia, USA
(Washington, DC Metropolitan area)

HONORARY CONFERENCE CHAIRMAN: The Honorable Dan Quayle,
Vice President of the United States.

CONFERENCE CHAIRMAN: Leonard J. Suchanek, Chief Judge and
Chairman of the Board of Contract Appeals, U.S. General Services
Administration, and Chairman of the Council On Accessible
Technology (COAT).

SPONSORS: Council On Accessible Technology (COAT)
U.S. General Services Administration
U.S. Department of Education
Electronic Industries Association

WHY YOU SHOULD ATTEND THIS CONFERENCE

- * DISCOVER HOW HIGH/LOW TECHNOLOGY ALLOWS PEOPLE WITH DISABILITIES TO BE COMPETITIVE, VALUABLE, AND PRODUCTIVE WORKERS AND PROFESSIONALS**
- * NETWORK WITH RECOGNIZED EXPERTS, SCIENTISTS, AND END-USERS FROM THE WORLD COMMUNITY**
- * DISCOVER HOW NEW TECHNOLOGY WILL AFFECT EMPLOYMENT TRENDS IN THE 21ST CENTURY**
- * SEE AN EXHIBIT OF STATE-OF-THE-ART AND DEVELOPING TECHNOLOGIES FOR WORKERS WITH DISABILITIES**

Laws in many countries, including the USA, require employment by business and government of qualified people with disabilities. There will be opportunities for interested individuals and industry to discover how high/low technology makes people with disabilities valuable and highly productive workers, whether in the factory, the office, at home, or as professionals. This conference will provide information for developing and implementing cost-effective measures for employing and enhancing the professional development of people with disabilities. With the vast changes in world economic policies, this congress will also provide through networking opportunities and the dissemination and exchange of information among participants, the occasion to expand products and/or services into new markets.

CONFERENCE OBJECTIVES: The World Congress on Technology will gather experts from around the world to address issues on the current state of high/low technology and techniques for its successful application in the workplace. In addition, speakers and panelists will address and discuss issues relating to research and development of technology that will solve problems facing accessibility today and the application of prospective technologies in the workplace.

CONFERENCE AUDIENCE: Anticipated worldwide conference delegates include scientists, educators, experts, diplomats, international leaders, congressional leaders, workers and professionals, leaders in private industry, government employees, and interested persons. Delegates are those individuals who present papers, exhibit, and/or participate in conference activities.

INVITED NOTED SPEAKERS INCLUDE:

The Honorable Dan Quayle, Vice President of the United States;

Mr. Raymond C. Kurzweil, Chairman and Chief Executive Officer, Kurzweil Applied Intelligence, Waltham, Massachusetts;

Mr. Lars Augustsson, Chief Executive Officer, TeleNova, AB., Sweden;

Francois Destombes, Ph.D., IBM Scientific Center, Paris, France;

Mr. Justin Dart, Chairman, U.S. President's Committee on Employment of People with Disabilities, Washington, DC;

Dr. Thomas A. B. Wesley, University of Bradford, Yorkshire, England.

CONFERENCE PROVISIONAL PROGRAM:

The World Congress on Technology's provisional program includes, in addition to plenary and breakout sessions during the week, an exciting and informative opportunity on Sunday, December 1, 1991, at 1:00 p.m., for delegates to participate in panel discussions focusing on a variety of United States disability policies and practices.

Sessions on Sunday will include a presentation on the Americans with Disabilities Act (ADA); technology development and employer sensitivity/awareness in the workplace; success stories from employers who have hired people with disabilities; research and service delivery programs implemented by the U.S. Department of Education; and comments on the impact of the Technology Related Assistance for Individuals with Disabilities Act of 1988, which enables States to establish statewide systems of service delivery for persons with disabilities. Sunday's activities will end at 5:30 p.m. with a reception.

For Monday, Tuesday, and Wednesday the concurrent breakout sessions will integrate the theme of the day with each major disability group. For example, on Monday, there will be breakout sessions on state-of-the-art technology for the blind and visually impaired, and state-of-the-art technology for the deaf and hearing impaired, etc.

Sunday, December 1, 1991

8:45 a.m. to 12:00 p.m.
Plenary session

ADDITIONAL CONFERENCE SESSIONS

*** TIMES AND DATES TO BE ANNOUNCED ***

An additional session will include a presentation by a Braille Display Technology panel. Their discussion will address the present and future state of technology research for braille display systems.

Other sessions will be planned as abstracts and papers are received and approved.

SUBMISSION OF ABSTRACTS: Delegates may also participate in the conference by submitting an abstract. All abstracts should be one page, written in English, accompanied by a short biography of the author. The complete manuscript should not exceed 25 double-spaced typewritten pages. In addition to print copy, a diskette may be submitted (MS-DOS, 5.25", 360K, WordPerfect 5.0 or 5.1). Due date for abstracts has been extended to July 15, 1991, and notification of acceptance by August 1, 1991. Send abstracts to: Ms. Sue Mercado, General Services Administration (G), 18th & F Streets, NW, Suite 7228, Washington, DC 20405, USA. If you must submit an abstract after July 15, 1991, please contact Sue Mercado. Tel: 202-501-0720 FAX: 202-501-3510 TDD: 202-501-2296.

EXHIBITOR INFORMATION: Delegates may also participate as exhibitors. Exhibits will be open daily from 8:00 a.m. to 7:00 p.m. beginning Monday, December 2 and closing Wednesday, December 4. Exhibits will be open free of charge to the public on Wednesday. Exhibit space consists of one booth (8 X 10 feet/2.44 x 3.05 meters) for U.S. \$500. Price includes conference sessions, presentation of papers and all other activities for one company exhibitor. For two additional exhibitors from the same company who wish to participate in conference activities a fee of U.S. \$250 per person will be charged. If interested in participating as an exhibitor, send registration form (do not send exhibitor fee) to: Ms. Sue Mercado, General Services Administration (G) 18th & F Streets, NW, Suite 7228, Washington, DC 20405, USA.

CONFERENCE REGISTRATION FEES:

Participants - U.S. \$495

An accompanying person - U.S. \$250

Price includes all sessions, exhibit attendance, 4 continental breakfasts, 3 lunches, 4 receptions, 1 dinner, entertainment, registration package, conference program and conference proceedings. All meals and entertainment are funded by registration fees and EIA sponsorship. Limited scholarship funding will be made available.

CANCELLATION POLICY: If cancellation is received on or before October 31, delegates will receive a full refund. If cancellation is received after October 31, delegates will be charged a \$100 fee to cover administrative costs.

OFFICIAL LANGUAGE OF THE CONFERENCE: English

HOTEL ACCOMMODATIONS:

The Hyatt Regency Hotel in Crystal City, Arlington County, Virginia, is the official conference site. The Hyatt is an ultra-modern 18-story hotel built around a five-story open atrium with cascading greenery and the beautiful Washington skyline. Two restaurants, three lounges, and a health spa are available for your pleasure. The hotel is ideally situated right next to the Washington National Airport and only five minutes from Washington, DC.

The hotel offers complimentary shuttle bus service from Washington National Airport, pickup and transport to Crystal City Metrorail System and to local shopping centers. If you are arriving at Dulles International Airport, transportation via taxi is 40 minutes to the hotel. If you are using the Metrorail System, exit at the Crystal City Station. Transportation may be provided by the Congress for international delegates. The hotel's parking fees are U.S. \$4 per day.

All hotel reservations must be made directly with the hotel. Conference rate for single and double occupancy is U.S. \$87. All rates are subject to the prevailing state and local taxes at the time of arrival. Currently, there is a 9.5% sales tax. Special conference rates will apply three days before and after the official dates of the conference. This is based on the availability of group rooms during the requested dates.

Reservations must be made by November 1, 1991. Individuals will be responsible for payment of hotel bills prior to departure from the hotel. For your convenience, currency exchange can be made at the hotel.

To place your reservation contact: Hyatt Regency Crystal City Hotel, 2799 Jefferson Davis Highway, Arlington, VA 22202, USA. Telephone: 1-800-233-1234, FAX: 703-418-1289, TELEX: 901-943. The hotel provides Washington, DC city guides, information on local shopping centers, sightseeing tours, and information on surrounding hotels.

AIRLINE RESERVATION INFORMATION: The official airline for the Electronic Industries Association is American Airlines. Individual reservations may be booked through American Airlines Meeting Services Desk toll free number 1-800-433-1790. U.S. government employees are required to follow federal and individual agency travel regulations. When making reservations mention STAR #S01N1GW. Discount rates for domestic flights are 45% off full coach fares, 7 days advance purchase, and 40% off full coach fare for Canada, 7 days advance purchase.

THE WHITE HOUSE
WASHINGTON

July 24, 1991

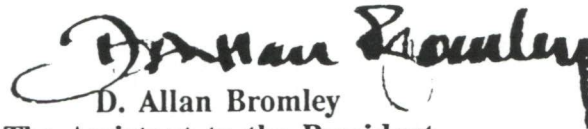

Dear Dr. Tibell:

Thank you for your letter of June 13 inviting me to speak at the Royal Swedish Academy on September 16. I apologize for the much belated response.

As much as I would like to join you, I must regretfully decline your kind invitation because that particular time is an extremely busy one on my calendar.

Thank you for thinking of me and let me offer my best wishes for success in the activities of the Academy.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "D. Allan Bromley". The signature is fluid and cursive, with the first name "D." being small and the last name "Bromley" being larger and more prominent.

OFFICE OF THE
DIRECTOR

Prof. D. Allan Bromley
Executive Office of the President
The White House
Washington, D.C. 20500
USA

Dear Professor Bromley,

During the last academic year a discussion has started in Sweden about Swedish physics and its profile as compared to that of other countries. The Swedish National Committee for Physics of the Royal Swedish Academy of Sciences is organizing a day of physics at the Academy on September 16 this year. The day will contain short presentations of Swedish physics, an invited lecture on physics from an international standpoint and a general discussion on Swedish physics in the 90's. We are confident that the program will attract many of the young active Swedish physicists and many members of the Academy along with at least a few politicians.

In the discussions about a suitable invited speaker, capable to give a bird's eye view of physics, with reference also to the profiles in different countries, your name immediately came to our minds. With reference not only to your present role, but also to the years spent as president of IUPAP, we feel strongly that you would be the best choice!

We thus cordially invite you to Stockholm to give, in the early afternoon of September 16, 1991, a 45 minute lecture on "Physics from an international standpoint". Please reply, if possible, to fax number +46-18-183833.

Sincerely yours,

Gunnar Tibell

Prof. of High-Energy Physics, Uppsala University
Chairman, Swedish National Committee for Physics
