The Center for the Study of the Presidency is pleased to present its Distinguished Public Service Medal to General Colin Powell, Secretary Clayton Yeutter and Senator Charles Robb for their outstanding contributions and service to the office of the Presidency.

The Center's publications and programs focus primarily on the organization and operations of the American Presidency, its relations with the Congress and the Courts, and public policy issues, both foreign and domestic. The Center emphasizes the importance of an historical perspective on the office of the Presidency.

In 1974, the Center established its Distinguished Public Service Awards and designed a medal to be presented to each recipient. Previous honorees have included President Gerald Ford, James Baker III, Elizabeth Dole and Donald Regan.

This year's honorees are recognized for dedication and service in their respective roles to the office of the Presidency:

MEMORANDUM FOR D. ALLAN BROMLEY

FROM: JENNIFER SUE BOND *Jennifer*

SUBJECT: June 19 Invitation to a Buffet Lunch with the President of Brazil

BOTTOMLINE: On the occasion of his state visit, Fernando de Mello COLLOR, His Excellency The President of the Federative Republic of Brazil, has invited you to a buffet luncheon on June 19 at 12:30 PM. It will be held at the residence of the Brazilian Ambassador at 3000 Massachusetts Avenue.

BACKGROUND: The embassy has stated that the luncheon is an all male event (otherwise I would offer to accompany you since I lived and worked in Brazil for two years and speak Portuguese). Dress will be informal. We have not yet received confirmation that Jose Goldemberg will be there but it is very likely.

We have extended the Brazilian S&T agreement and have made important progress in ironing out our differences on the IPR language. We have tentatively scheduled an S&T Joint Commission meeting for July 29-31, 1991 and hope to have our IPR differences resolved before then.

ISSUE: This could be an occasion to note the importance of our S&T cooperation and your friendship and respect for José Goldemberg. You could also note that it is in the interest of both of our countries to protect intellectual property and that by law we need to have the IPR annex signed as part of our S&T agreement.

Dear Dr. Bromley:

Meeting the customer's definition of quality is a challenge we all must face and meet if America is to maintain its position as leader in the world economic market. Total Quality Management philosophies identify methods to improve the processes that enhance the quality of American products. The 3rd Annual Total Quality Management Conference and Exposition, (TQM '91), addresses this challenge and is organized according to the Malcolm Baldrige National Quality Award criteria.

To kick-off TQM '91, the Society of Manufacturing Engineers (SME) and the International Government Relations Committee of SME are sponsoring a special reception on Monday, July 15, 1991, at 6:00 p.m., at the Sheraton Washington Hotel, Washington, D.C. Dr. Laurie A. Broedling, Special Advisor on TQM, U.S. Department of Defense, will make a brief presentation on the importance of implementing TQM in the United States' competitive strategy.

The reception is an excellent opportunity for you to interact with leaders from Capitol Hill, the Departments of Defense and Commerce, and other agencies, as well as industry leaders from the Fortune 500. It will provide an environment for gaining a better understanding of TQM's role in the government procurement process and its importance to the overall improvement of quality and customer satisfaction.

On behalf of the Society of Manufacturing Engineers, I invite you to attend. It will be an excellent chance to learn more about the processes that will keep the U.S. competitive in the 21st century.

Sincerely,

OFFICE OF THE
DIRECTOR

Dear Dr. Bromley,

It is my privilege to extend a personal invitation for you to attend a reception and dinner marking the occasion of the 1991 Chapter Conference: Meeting the Challenges for the 21st Century of the Association for Women in Science (AWIS).

This reception and dinner will be held on Friday, June 7, 1991, with the reception beginning at 5:30 p.m. and dinner following at 7:00 p.m. in the Terrace and The University Club of George Washington University's Marvin Center, 800 21st Street, N.W., Washington, D.C.

From the 40 women who gathered at the first AWIS meeting in 1971, the organization has grown to more than 3500 members many of whom are involved in 38 regional chapters across the country who are represented at the conference. AWIS works to improve the educational and employment opportunities for women in science.

Recently, AWIS was the recipient of a \$400,000 grant from the Alfred P. Sloan Foundation to support a three-year program to increase mentor opportunities for women pursuing science careers.

The AWIS conference will launch our second year of the mentoring program designed to increase the number of women actively pursuing education and careers in the fields of science.

On behalf of myself and the Executive Board, I sincerely hope your schedule permits you to join us in June as AWIS celebrates its continued contribution towards promoting equal opportunities for women to enter the sciences and to achieve their career goals.

Sincerely,

Stephanie J. Bird

Dear Dr. Bromley:

We are pleased to invite you to celebrate with us the publication of the Project Kaleidoscope Report: "What Works: Building Natural Science Communities."

This reception will be on June 11th, from 5 - 7 p.m., at the American Institute of Architects Headquarters Building, 1735 New York Avenue, N.W. We would be especially pleased if you could make brief comments about the essential partnership between the federal government and the nation's liberal arts institutions in addressing the national crisis in science and mathematics education. Your colloquium presentation, a summary of which is included in the report, was a significant challenge to those assembled to take the lead in building such partnerships.

Members of the Project Kaleidoscope Executive and Advisory Committees, those-like you-who were involved in a leadership role at the Project Kaleidoscope National Colloquium, and others committed to strengthening undergraduate science and mathematics will be joining us at this celebration. Dr. Walter Massey and other staff from the National Science Foundation (which provided support for our efforts) will be with us also.

You will leave this celebration, not only with a copy of the report, but with a clear understanding of the critical contribution made by liberal arts colleges in addressing the challenges in science and mathematics facing this nation.

I will be in touch with Marion Nida to follow up on this invitation.

Cordially,

Jeanne L. Narum
Director
