1801 N. Beauregard Street, Alexandria, Virginia 22311-1772 • Telephone (703) 845-2000

2215

March 27, 1991

The Honorable D. Allan Bromley
Assistant to the President
for Science & Technology
Executive Office of The President
Washington, D.C. 20506

Dear Dr. Bromley:

I would like to introduce you to a program that has been in existence for the past six years at the Institute for Defense Analyses (IDA). The program is known as the Defense Science Study Group. It was designed to engender a long term interest in national defense issues among superior young scientists and engineers from academia in order to build a bridge of understanding between them and the national defense community. The attached will provide you with detailed information on this program.

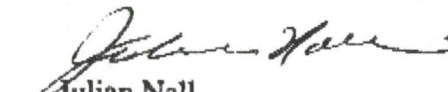

The participants have visited military installations, received briefings on various topics of current defense issues, and received an introductory session on defense technology issues as viewed by Congress. As you can see we are trying to broaden their knowledge to include defense and national security issues from different perspectives.

In this respect, I feel it is important for these young scientists and engineers to learn about OSTP. On my behalf, our mutual friend Will Happer called your office to ask that you meet with the group during their next visit to Washington. He talked with your secretary who suggested that a letter be sent to you by fax giving more information about the program. Specifically, the group members will be in town from May 28-31 for our first scheduled meeting this year. I would appreciate it very much if you would meet and talk with them at your convenience during this time period. I suggest that the group meet with you and your staff at the Old Executive Office Building. I have recently talked with Michelle Van Cleave who is interested in the program and would like to join you when you meet with the group.

A new group of participants will be formed for a session to begin in early 1992. We are already in the process of making selections and invite you to nominate young persons you believe would qualify and benefit from participation in the program. I would appreciate it if your ideas could be given to me within a month.

I trust that you will be able to accept our invitation and I believe you will find this to be an exciting group. The members of the group are interested and eager, and I am sure they will be some of our future leaders in the scientific and technical community.

Yours sincerely,

Julian Nall
DSSG Program Director

Prof. W. Happer

DEFENSE SCIENCE STUDY GROUP (DSSG)

The Defense Science Study Group (DSSG) is a program of education and study. It was established in October 1985 by the Institute for Defense Analyses (IDA) and supported by the Director of the Defense Advanced Research Projects Agency (DARPA). The goal of this program is to foster a long term interest in national defense issues among the future leaders of science and technology, which would lead to participation in various advisory groups and continuing involvement in programs of research of importance to the Department of Defense (DoD). The objectives of the program are to identify some of the most talented young scientists and engineers, primarily in academia, convey to them an understanding and appreciation for the technical complexities of national defense issues, and solicit from them new insights on select defense problems.

The DSSG is guided by a group of mentors who have had distinguished careers in defense, industry or academia. Mentors advise IDA and DARPA on the conduct of the program, suggest problems of importance to study, help identify candidates, and review the technical work accomplished.

Participants are generally faculty members in the physical sciences, engineering or mathematics. They commit at least 20 days per year to this two-year program of education and study, for which they are paid \$10,000 per year plus expenses. Since a security clearance is required, participants must be U.S. citizens.

The first year is devoted primarily to education. The participants are given a broad appreciation of national security issues, defense policy, advanced research, manufacturing technology, defense-related industrial R&D, and the systems, missions, operations and technical problems of the military services. An understanding of the defense environment is provided through visits to defense and industrial facilities and presentations given by DoD program managers, technical specialists, and defense and industrial authorities.

During the second year the educational part of the program continues but is augmented by individual or group study projects or preparation of "thought pieces" on important defense-related areas to which they have been exposed. In some cases a participant might serve on a panel, task force or study group of a DoD advisory group.

The DSSG participants receive briefings on such diverse topics as submarine laser communications, acoustic and nonacoustic ASW, IR detectors, space debris, verification and arms control, relocatable targets, and strategic bomber penetration. Visits are made to places such as, defense laboratories, the Strategic Air Command (SAC), the North American Aerospace Defense Command (NORAD), and bases responsible for satellite, missile, air defense, and submarine operations and training. Site visits also include industrial facilities to gain a perspective on design and manufacturing technology of current and future systems.

IDA conducts a rigorous process of nomination and referrals before selecting the participants. Candidates are identified from suggestions made by senior academics at major colleges and universities; by organizations such as DARPA; the National Science Foundation (NSF); the Office of Science and Technology Policy (OSTP); the Sloan Foundation; and by the DSSG alumni, current participants and mentors. The nominees are faculty members whose ages range from the late 20s to about 40. The selection of approximately 15 candidates who are invited to participate is made by IDA after an extensive reference process, and assuring candidate interest.

Since this program is an investment in the future, DARPA and IDA make every effort to assure that the alumni are offered opportunities for involvement in areas of their choosing. Opportunities for involvement would include serving as advisors, consultants or study group members to agencies, study boards or committees of the DoD associated with key technical problems of national level importance.

Dear Allan:

I would like to invite you to be our guest at a reception and dinner hosted by the 1991 Mass Media Science and Engineering Fellows Program of the American Association for the Advancement of Science (AAAS) on Wednesday, June 5. This event is held in recognition of the seventeen outstanding science and engineering graduate students selected to work as science journalists at host media sites for ten weeks this summer.

Our guest speaker for the evening will be Dr. W. French Anderson, a scientist specializing in Molecular Hematology who has made breakthroughs in human gene therapy. Dr. Anderson will address the need to improve the public's understanding of science and technology.

We will convene for the occasion at 6:00 p.m. at the National Press Club, 529 14th Street NW (14th and F Streets), Washington, DC. Both the reception and the dinner will be held in the Main Lounge on the 13th floor.

I hope that you will be able to join us for this special evening event in honor of our newest Mass Media Fellows. So that we are able to make the appropriate arrangements, please contact Ms. Donna Kepler at 202/326-6605 by Thursday, May 30, to indicate whether or not you plan to attend.

Sincerely,

Richard S. Nicholson

Dear Allan:

The COBIOTECH Conference: Biotechnology East and West

I write to you with a warm and pressing invitation to take part in the plenary session of a Conference on Biotechnology that is being arranged by ICSU's Committee on Biotechnology (COBIOTECH) to take place in Bratislava during November 3 -5 next.

I apologize for the late invitation and should explain that you were our alternate in this session where Federico Mayor, the Director-General of Unesco had been invited, but who has now had to decline because it clashes with the Unesco General Conference.

We hope very much that you will be able to join the distinguished assembly in Bratislava and honor us with your presence by addressing theme of the Conference, which is the prospect for new initiatives in biotechnology following the opening of the frontiers between East and West.

Attached is a copy of the program as at present and a copy of the first announcement. The program will soon go to press and great interest in the Conference has already been elicited by the initial announcements.

COBIOTECH would take of your expenses. We hope very much that you will be able to attend.

All good wishes.

FIRST ANNOUNCEMENT

THE COBIOTECH EAST-WEST CONFERENCE ON BIOTECHNOLOGY

Bratislava, Czech and Slovak Federal Republic
3-5 November 1991

COBIOTECH, the Scientific Committee on Biotechnology of the International Council of Scientific Unions (ICSU) announces that an international conference will take place on 3-5 November 1991 designed to discuss policy and promote new opportunities for collaboration in biotechnology between East and West.

Topics to be discussed are:

- Science and policy considerations
- East-West joint ventures
- Technology transfer
- Standardisation and regulation
- Financing
- Training and information exchange
- Technical, social and economic consequences

Attendance will be limited to 250 participants. Enquiries should be addressed to "COBIOTECH Conference" at:

CDR JOHN CHARLES ROACH, USN

CDR JOHN CHARLES ROACH, an Alexandria artist and Navy reservist, was recently activated from civilian pursuits to cover Operation Desert Shield and is currently painting the activities of the joint forces in Saudi Arabia. Eight days after Iraq's invasion of Kuwait, Roach asked to be activated to the Middle East. While in Saudi Arabia he sketched the ships in the Persian Gulf, the air bases near Riyadh and Dhahran and the desert fire bases south of the Iraqi border, chronicling the operations on land and at sea.

Commander Roach also served in Vietnam as an official Navy artist to document naval activities. These works are currently part of the Navy's permanent fine arts collection exhibited in the Pentagon and traveling public shows in major galleries and institutions throughout the country.

OFFICE OF THE
DIRECTOR

22 May 1991

Dear Mr. Bromley,

We are writing to you in connection with our former invitation for the roundtable on "The Essential Role of Science in Technological Progress and Economic Development", which was planned to take place on the 29,30 and 31 August 1991.

Upon the request of many colleagues, who wanted to attend the roundtable but were unable to come, we have decided to postpone it to next year. The roundtable will take place from the afternoon of the 22 April to the 24 April 1992, (after Easter).

We would therefore like to cordially invite you to this meeting in the hope that the dates will be more suitable to you for your participation. You will find herewith enclosed the background information, as well as the amended draft agenda.

As we previously mentioned your living expenses here in Trieste will be covered by The Third World Academy of Sciences (TWAS) and the International Centre for Theoretical Physics (ICTP). Furthermore, should you or your organisation be unable to cover your travel expenses, we will be happy to do so.

Looking forward to hearing from you soon.

With best regards.

Yours sincerely,

Abdus Salam

THE ESSENTIAL ROLE OF SCIENCE IN TECHNOLOGICAL PROGRESS AND ECONOMIC DEVELOPMENT

I) Objectives

The relationship between economic development and technological progress has been well researched by the economic profession and there is probably not much to add to this debate, except that access to technology, particularly high technology is more crucial than ever in order for countries and enterprises to have access to global markets. What is as yet less well understood, however, is the link between technology and science and hence between economic development and science.

The frequent lack of understanding, and hence co-operation, between scientists and economists is a problem which is often raised. This problem stems partly from the nature of the responsibilities of the two sides: whilst the economists, in particular those involved in governmental decision-making and operating in the business and financial world, live under the strong pressure of short-term, frequently crisis-wrought and profit-orientated conditions, the scientists are involved in more long term activities, frequently searching for solutions to fundamental problems of the world, sometimes with an unpredictable outcome. There has not been sufficient dialogue between economists and scientists and the result has been that scientists have become ivory tower academics and economists have to rediscover human development.

In order to initiate dialogue between scientists and economists, therefore, a meeting is planned, with the following major objectives, placing a special emphasis on the South in order to clarify:

1. The relationships between:
 - a) Technology and the national as well as global economy
 - b) Technology and the science base of a country
2. The role of and co-operation between scientists and economists
3. How developing countries can acquire a scientific and technological basis through centres of excellence, to further economic development and protect the human environment

All participants are expected to play an active role either by preparing papers or as discussants.

The Roundtable will place much emphasis on the role and cooperation between scientists and economists, drawing them all together in a common endeavour towards the development and well-being of the people.

Procedure

The meeting will take place in Trieste at the end of August 1991 for a period of two and a half to three days. It will be co-sponsored by the ICTP, TWAS and the OECD Development Centre in Paris.

The conference will be in the form of a roundtable, with not more than fifty participants, in order to secure an efficient, less formal exchange of views, favouring concrete dialogue rather than "political" speeches.

The composition of the participants may be as follows:

1. Academic economists
2. Applied economists
3. Academic scientists
4. Applied scientists
5. Captains of business (industry and banks)
6. Governmental managers
7. Participants from international organisations

**THE ESSENTIAL ROLE OF SCIENCE IN TECHNOLOGICAL
PROGRESS AND ECONOMICAL DEVELOPMENT**

PROGRAMME OUTLINE

DAY ONE

Wednesday, 22 April 1992

Afternoon opening session

Chair: L. Emmerij, who will give a five minutes opening speech.

Abdus Salam will give a 30 minutes presentation on the missing links between economists and scientists and between economics and science.

Most probably this will be a somewhat provocative statement and will therefore be followed by a series of spontaneous interventions.

At the end of this session two economists who have been warned in advance will sum-up the discussion in a more balanced fashion. This would also and quite neatly lead to the morning session of day 2.

DAY 2

Thursday 23 April 1992

Morning session

This session will be devoted to the topic Technology and Development. Here it will be primarily the economists who must give evidence on gaps and achievements with respect to clarifying the relation between technology and economic development.

Several economists will be asked in advance to introduce this topic. Quite a bit of work has been done in this area and the discussion must therefore be disciplined. This requires therefore an excellent Chairman.

Afternoon session

This will be devoted to the Role and Importance of a Science Base for increasing the technological autonomy of developing countries.

This session will lead us into the main theme of the conference. It should be introduced by two scientists who must be warned in advance.

This session must not only deal with setting out the reasons why a science base is important but must also discuss how such a base can be created.

DAY 3

Friday, 24 April 1992

Morning session

Since this is the last day of the conference, we must start bringing the different threads together. This session will therefore be devoted to the topic Science and Technology for Development to be introduced by one scientist, one economist and one businessman or banker.

On day two, the conference discussed technology and development on the one hand and the importance of a science base on the other. Here on day three we must bring these two discussions together by looking at the inter-relations between science, technology and economic development.

Afternoon session

This will be the concluding session with closing statements by Abdus Salam, an economist and a summary statement by L. Emmerij.

Dear Dr. Bromley:

The Province of Nova Scotia is proud to be hosting the 17th annual Marconi International Fellowship Award in Halifax, Nova Scotia, Canada, from June 18-21, 1991. The Award honours significant advances in communications science or technology and this year's recipient is American Paul Baran, generally credited as the "father of packet switching." The Young Scientist Award Selection Committee is now in the process of naming a Canadian recipient.

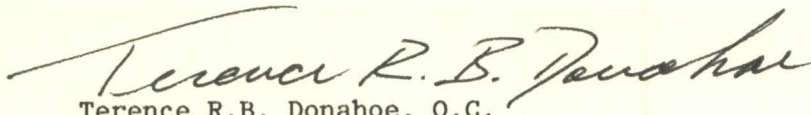

His Excellency, the Right Honourable Ramon J. Hnatyshyn, the Governor General of Canada, will present the Award in Halifax at the residence of the Lieutenant Governor of the Province of Nova Scotia. This will be followed by a black tie dinner at the Halifax Sheraton Hotel. Gioia Marconi Braga and her party will visit Nova Scotia from June 18 to 21, and we invite you to join them in Halifax during that time for the ceremonies and program.

Included in the four-day itinerary will be a day tour of historic Halifax, including a cruise on the second largest natural harbour in the world, visits with members of our scientific community, and a one-day excursion to the 300-year-old town of Lunenburg, famous for its seafood and shipbuilding. The Award ceremony will take place on Thursday, June 20, at 3:30 p.m.

.../2

I am writing to you in advance of the formal invitation to personally invite you and your guest to join us in Halifax for the Marconi Award presentations. Nova Scotia is a beautiful place to visit in June, and within easy travelling distance of many points in the United States and Canada. There are direct flights from London, Amsterdam, New York, Boston and most major Canadian cities. We are delighted that Nova Scotia has been selected to host this significant event, in honour of Marconi's scientific achievements made in our province at the turn of the century. I hope you will reserve this date on your calendar. Your presence here will be warmly welcomed.

Yours very truly,

THE WHITE HOUSE

WASHINGTON

June 4, 1991

Dear Mr. Minister:

Thank you for your letter of May 8, 1991, inviting me to join you in Halifax for the Marconi Award activities scheduled for June 18-21, 1991. I apologize for the much belated response.

Unfortunately, as much as I would like to join you and your colleagues on this special occasion, I find that my schedule is heavily committed during that period, so I must regretfully decline your invitation.

I appreciate your thinking of me and offer my best wishes for a most successful event.

Sincerely yours,

Washington, D.C. 20500

Dear Dr. Bromley:

The next meeting of the Ocean Principals Group will be held on Thursday, June 13, 1991, from 10 a.m. to 12 noon in room BA102C at the U.S. Geological Survey, National Center, 12201 Sunrise Valley Drive, Reston, Virginia. A location map is enclosed.

Agenda items for the meeting will include a review of the multiagency Farallones study off San Francisco, an update of our Exclusive Economic Zone mapping activities, and an update of multiagency coastal program activities such as Coastal America and Coastal Ocean Research. Additional items for the agenda should be communicated to Gail Hardin in our Office of Energy and Marine Geology. Mrs. Hardin can be reached at (703) 648-6473.

The Survey will be hosting a luncheon here at the National Center following the meeting, and I hope you will be able to join us. Please call Mrs. Hardin by June 3 to confirm your attendance at the meeting and luncheon.

I look forward to seeing you in June.

Sincerely yours,

Dallas L. Peck

LIST OF ATTENDEES FOR
OCEAN PRINCIPALS MEETING

10:00 a.m., June 13, 1991
U.S. Geological Survey, Reston, VA

Principals

- * Mr. Bud Ehler, NOAA
- * Dr. Edward Dickey, Army Corps of Engineers
- * Capt. Dennis Mandsager, USN, DAJAG (International Law)
- * RADM Phillip Coady, USN, OP-61
- * RADM Geof Chesborough, USN, Oceanographer of the Navy
- * Mr. John Dugger, Energy
- * Mr. John Sayre, Water and Science
- * Dr. Dallas Peck, USGS
 - Mr. Albert Modiano, MMS
 - Mrs. Maureen Walker, State
- * Mr. Robert Martinez, MARAD
 - RADM Gerald Woolever, USCG
 - Mrs. Sadie Barnes, OPG Exec Sec
- * Dr. Allan Bromley, OSTP (?)
 - Mr. Nicholas Rostow, NSC
- * Mr. Robert Wayland, EPA
- * Dr. Stan Wilson, NASA
- * Dr. Bob Corell, NSF
- * Mr. Christopher Koch, FMC

Others

- * Capt. Charles Martinek, USN, Office of the Oceanographer of the Navy
- * Ms. Linda Glover, Office of the Oceanographer of the Navy
 - Capt. John Collom, USCG
- * Mr. Doyle Frederick, USGS
- * Dr. Gary Hill, USGS
 - Dr. Bonnie McGregor, USGS
 - Dr. S. Jeffress Williams, USGS

- * Attendees staying for lunch

April 26, 1991

Dr. D. Allan Bromley
Office of Science and Technology Policy
Executive Office of the President
The White House
Washington, DC 20500

Dear Dr. Bromley:

This is to confirm that the Mathematical Association of America will be responsible for any administrative and support costs incurred specifically for the USAMO Olympiad Reception and Dinner that is to take place at the Department of State on Monday, June 10, 1991. The State Department will directly bill the MAA for any and all costs in connection with the dinner.

You are, naturally, invited to the Olympiad Reception and Dinner as you are acting as our official host at the Department of State. A formal invitation will be issued to you and a guest in early May. We would expect and warmly welcome your attendance at this event. It is an evening of celebration in recognition of the eight finalists of the Twentieth American Mathematics Competitions. The reception and dinner begins at 7:00 pm and concludes at 9:30 pm.

I invite you to join me at the beginning of the evening in the receiving line in the Adams Room and to conclude the evening by delivering a few brief congratulatory remarks to the winners of the Twentieth USA Mathematical Olympiad.

Thank you again for all of the time and effort that you have devoted to this event.

Sincerely,

Dr. Marcia P. Sward /lk

MEMORANDUM FOR D. ALLAN BROMLEY

THROUGH: J. THOMAS RATCHFORD

FROM: JANICE HOWELL *JH*

SUBJECT: APPROVAL OF THE INVITATION FOR THE USAMO
CEREMONIES

Attached is a draft of the invitation to the Olympiad Ceremonies to be held in one of the Diplomatic Reception Rooms at the Department of State (DOS) on June 10, 1991. The two sheets of the attached draft will form the front cover and the inside text of a single invitation. The Olympiad Committee is requesting your approval of the invitation.

In a discussion with Ms. Lisa Kolbe, she indicated that you will receive an invitation to attend, and perhaps, to make a few remarks, but the Olympiad Address will be given by Dr. Keith Devlin, professor of mathematics at Colby College, during the 5:30 PM program at the National Academy of Sciences prior to the reception and dinner at DOS.

Background: Also attached is a copy of your letter of January 18, 1991, to Mr. Jerome Tolson at DOS, indicating you would host this event and requesting use of the Diplomatic Reception Rooms for this purpose. Included is a copy of Mr. Tolson's positive response to your request. Although Mr. Tolson states that our office will be responsible for any administrative and support costs for this event, I have been verbally assured by Ms. Kolbe that, as before, these costs will be met by the Mathematical Association of America. She is sending a note confirming this.

THE WHITE HOUSE
WASHINGTON

January 18, 1991

Dear Mr. Tolson:

The President's Science Advisor would like to continue the tradition of hosting a reception and dinner in the Diplomatic Reception Rooms of the Department of State in honor of the winners of the USA Mathematical Olympiad (USAMO). I hereby request permission to host the 1991 USAMO reception and dinner at the State Department on Monday, June 10, 1991, beginning at 6:45 pm and lasting until 10 pm.

This year's event represents the Twentieth Awards Ceremony honoring the eight winners of the final stage of the USAMO. These eight winners form a pool from which a U.S. team is selected for participation in the International Mathematical Olympiad, which is to be held in Stockholm, Sweden. American teams have done well in these international competitions over the years, and have taken first place three times.

If you have any questions, please call Ms. Janice Howell of the Office of Science and Technology Policy (202 395-3662) or Ms. Lisa Kolbe of the Mathematical Association of America (202 293-1170) who is the organizer of the event.

Thank you for your assistance.

Sincerely,

D. Allan Bromley

Dear Mr. Bromley: 'OFFICE OF THE
DIRECTOR

Thank you for your letter of January 10, requesting the use of the Department's Diplomatic Reception Rooms for a dinner honoring the USA Mathematical Olympiad (USAMO).

As regulations require, we understand that you are the host and will be in attendance. We have therefore reserved the Benjamin Franklin Room on June 10 from 6:30 to 9:30 p.m. for the dinner. Enclosed is a copy of our Guidelines for use of the area. Your office will be responsible for any administrative and support costs incurred specifically for this event. Please have your coordinator contact Ms. Lee Henderson on 647-2275 to work out the details of this function.

Reservations for use of the Diplomatic Reception Rooms are made with the understanding that all functions are subject to preemption. We look forward to working with your staff on this event.

Sincerely,

Jerome F. Tolson, Jr.
Deputy Assistant Secretary
for Operations

The Honorable
D. Allan Bromley,
Assistant to the President for

Dear Dr. Bromley:

Thank you very much for agreeing to act as our official host at the reception and dinner at the Department of State on June 10, 1991. This is certainly a special occasion as it marks the Twentieth USA Mathematical Olympiad.

The official invitations will be sent in early May and I have asked Janice Howell to review them as you will be listed as the official host. I look forward to meeting you and again thank you for keeping the USAMO ceremonies a tradition that the mathematical community looks forward to each year.

Sincerely,

Dear Mr. Bromley:

On behalf of the officers and members of the National Petroleum Council, I extend to you a cordial invitation to an informal reception on Tuesday, June 4, 1991. The Council is hosting this reception in conjunction with its 98th meeting, which will be held the following morning at The Madison Hotel.

The reception will be held at White-Meyer House, 1624 Crescent Place, N.W., Washington, D.C., from 6:00 to 8:00 p.m. For your convenience, a map is enclosed showing the location of White-Meyer House.

I hope that your schedule will permit you to be with us the evening of June 4. Please advise Marshall Nichols, Executive Director of the Council, of your attendance plans.

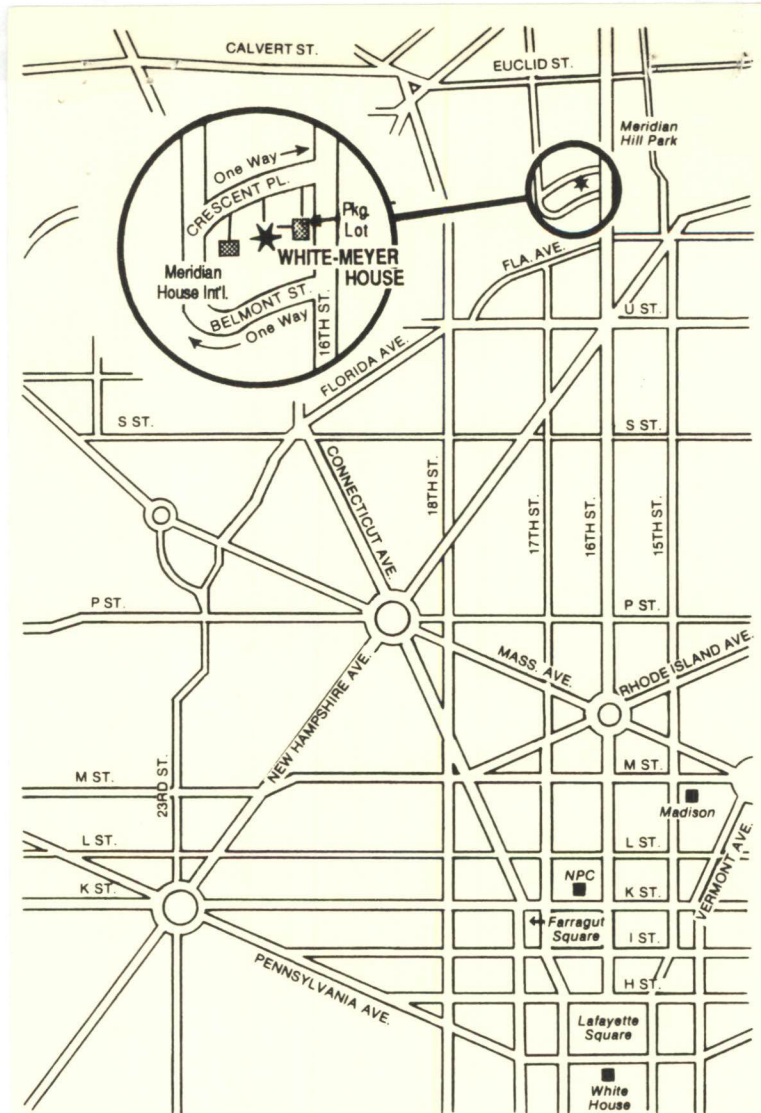

With best regards,

Sincerely,

Lodwick M. Cook
Chairman
