The first new research facility constructed on the campus since 1974, the John D. Rockefeller Jr. and David Rockefeller Research Building adds 100,000 square feet of state-of-the-art laboratory space for investigators working at the frontiers of biomedical science.

Funded with major assistance from the Howard Hughes Medical Institute, the research tower will support studies in such fields as cell and molecular biology, immunology, chemistry and the neurosciences.

Dear Allan:

We are writing to invite you to be a member of the Editorial Advisory Board for the third book in the series of health policy annuals to be published by the Association of Academic Health Centers (AHC). This year the book will address health science policy and will be the product of the AHC Task Force on Science Policy. Volumes I and II were dedicated to health care delivery and health promotion and disease prevention respectively.

The book is designed to be a compilation of selected abstracts and excerpts of significant articles and reports that were published in 1991-1992 along with commentaries on specific issues. Articles will be selected from among these nominated by the task force and the Editorial Advisory Board. We do not aspire to identify the best 80-100 articles. We do wish to include those that have or will contribute significantly to the development of public policy for the biomedical sciences and health services research such that four years from now they would still be viewed as being the most influential policy pieces in this area. Articles that simply describe a scientific theory or breakthrough, without teasing out the policy implications, are not appropriate for this volume.

In addition to task force members, the Editorial Advisory Board will consist of a select group of individuals drawn from academe, government, other not-for-profit organizations, and research-related institutions. We would very much appreciate having you become a member of this board by helping to identify truly significant articles for possible inclusion in the annual.

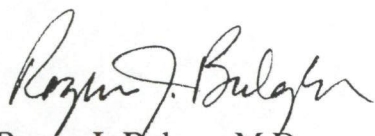

D. Allan Bromley
Page 2
September 1, 1992

Please send the full citations (or actual articles) for up to 10 articles or reports related to health science policy that were published in 1991 and 1992. Among the topic areas that we are sure to include in this volume are the roles and responsibilities for science, intellectual property, the NIH strategic plan, genetic engineering, funding for biomedical and health services research, ethical issues surrounding the conduct of science, university/industry roles and relationships, technology transfer, and international issues. Again, please do not include purely scientific or technical articles; we are interested only in relevant policy articles.

Those who respond to this request will be listed as members of the Editorial Advisory Board in the final publication and will be credited with having helped to identify articles for inclusion, but individual names will not be associated with particular articles. In selecting articles, please do not hesitate to nominate any you have written.

Thank you in advance for helping with this project. Please send all the citations for the articles and reports you wish to nominate to the AHC no later than October 1, 1992. Of course, if you participate we shall send you a book as soon as it is published early next summer. If you have any questions, please do not hesitate to call us.

Sincerely,

Roger J. Bulger, M.D.
President

Marian Osterweis, Ph.D.

LISA STEHLI KELLY

2681
3018 N Street, NW
Washington, DC 20007

August 31, 1992

The Honorable D. Allan Bromley
Assistant to the President for Science & Technology and
Director, Office of Science & Technology Policy
Room 358, Old Executive Office Building
Washington, DC 20500

Dear Dr. Bromley,

I am Mia Kelly's sister and a senior at that "other school" in Cambridge. I am writing my honors thesis on the way politics affect the course of cancer research through federal funding and political pressure. I am looking at cancer research from the 1971 National Cancer Act through the present, using breast cancer as a case study demonstrating the power of politics to affect the direction and intensity of the research effort.

I am interested in the your opinion of the appropriate roles for Congress and the Administration in directing cancer research policy. Do you believe the Administration's opinion of the course of cancer research has a direct effect on the proposed efforts for the following years? Should it?

I am interested in your opinion as Director of the Office of Science and Technology Policy, as a member of the President's Cancer Advisory Board, and as a Yale Professor. I would appreciate the opportunity to visit with you.

I will be in Washington until September 16 and occasionally throughout the fall. I will call your office to set up an appointment at the end of this week. I look forward to meeting you after hearing rave reviews from my parents in addition to those from Mia.

Thank You.

Sincerely,

Lisa S. Kelly

Dear Friends of
Professor Edward G. Bilpuch,

it is a great pleasure to invite you to participate in the ceremony and reception
at the occasion of awarding the

Doctor philosophiae Naturalis Honoris Causa

to Professor E. G. Bilpuch, in recognition of his outstanding work in nuclear
physics.

Enclosed please find the detailed program (in german). The academic ceremony
will take place at

**4.00 p.m. on Friday Oct. 30, 1992,
on the campus of Frankfurt University
in the main lecture hall (Aula).**

It will be followed by a reception and dinner party at Hotel Sonnenhof in
Königstein, a small city about 15 miles from Frankfurt. Transportation and
detailed information will be available.

I would be delighted if we could welcome you at this occasion and if you could
join with us in making this day a memorable one for our honorable colleague
and friend, **Edward Bilpuch**.

I am looking forward to your kind reply, and remain

sincerely yours

Dear Professor Kostelich:

Thank you for your letter of April 28 inviting me to address the Dynamics Days Arizona banquet. I apologize for the much belated response.

With the understanding that it is always possible that Presidential scheduling may force a change in my plans, I would be delighted to accept your invitation. I hope that all will go as planned.

As the time of the event approaches, my staff will contact you to work out the necessary details.

I look forward to the occasion.

Sincerely yours,

D. Allan Bromley
The Assistant to the President

Mr. D. Allan Bromley
The White House
Washington, DC

Dear Mr. Bromley:

I am writing to invite you to speak at an international workshop called Dynamics Days Arizona, which will be held in Tempe (a suburb of Phoenix) on Wednesday-Saturday, 6-9 January 1993.

The 1993 Dynamics Days workshop is the twelfth in a series of annual meetings on applications of nonlinear dynamical systems. Attendees include over 200 physicists, mathematicians, engineers, biologists, economists and others interested in chaotic behavior, fractals, fluid turbulence, pattern formation, and the like. Recent invited speakers have included Nobel Laureate Steven Weinberg, 1991 Japan Prize winner Gerhard Ertl, and Soviet Academy of Sciences member Roald Sagdeev, former science advisor to Mikhail Gorbachev.

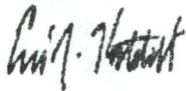

The invited speakers for the 1993 conference include researchers from IBM Corporation and Bell Laboratories as well as leading American and European universities. The research that will be presented has been funded from a variety of sources, including the National Science Foundation, DARPA, Department of Energy, and Air Force Office of Scientific Research, among others. Partial support for the Dynamics Days meeting itself has been provided by the Office of Naval Research for the past several years.

→ I am writing to ask whether you would like to be the featured speaker at the meeting banquet. The scope and topic of your talk (30-45 minutes in length) would be up to you. However, your views on the state of scientific research, funding and education in the U.S., as well as related subjects

like the tension between "big science" and "little science," would be of particular interest to this audience.

The Dynamics Days conference attracts a diverse, interdisciplinary audience whose interests encompass an unusually wide range of subjects. I certainly hope that you will be able to speak at the 1993 conference and look forward to hearing from you at your earliest convenience.

Sincerely,

Eric J. Kostelich

Dear Dr. Bromley:

Thank you very much for your letter of August 12. We are delighted that you have accepted our invitation to address the Dynamics Days conference and hope that all will go as planned.

Your talk is scheduled for Thursday evening, January 7, 1993, at 8 p.m. Please have your staff notify me of your travel plans as the date approaches.

I have enclosed a copy of the meeting announcement and related materials. As an invited speaker, all meeting registration fees are waived. In addition, the conference can pay for your airfare (Saturday night stayover rates) and hotel room if needed.

All of us look forward to meeting you. We hope that you will enjoy the conference and your stay in Arizona.

With best regards,

Eric J. Kostelich

DYNAMICS DAYS ARIZONA

Twelfth Annual International Conference: Wednesday–Saturday, January 6–9, 1993
Short course on Chaotic Dynamics: Tuesday, January 5, 1993
Tempe Mission Palms Hotel, Tempe, Arizona

INVITED SPEAKERS

- A. Bloch (Ohio State)
- D. Allan Bromley (Washington DC)
- D. Cannell (Santa Barbara)
- J. Carlson (Santa Barbara)
- S. Childress (NYU–Courant)
- I. Epstein (Brandeis)
- J. Franks (Northwestern)
- N. Gershenfeld (Harvard)
- C. Grebogi (Maryland)
- J. Guckenheimer (Cornell)
- S. Kauffman (Santa Fe Institute)
- P. Kolodner (Bell Labs)
- M. Luecke (Saarbrücken)
- A. Newell (Arizona)
- M. Roukes (Bellcore)
- R. Roy (Georgia Tech)
- M. Schatz (Texas–Austin)
- J. Socolar (IBM–Yorktown Hts.)
- K. Sreenivasan (Yale)
- A. Winfree (Arizona)
- J. Yorke (Maryland)

Contributed communications: Contributed oral and poster communications form a large part of the meeting. There will be about 25 oral communications (15 minutes each, including discussion) which will be selected from abstracts received by Dec. 1. The number of posters is unlimited. Posters will be on display from 8:00 a.m. to 10:00 p.m. daily; in addition, special poster sessions will be scheduled throughout the conference. Authors of abstracts selected for oral communications will be notified by December 14. Presentations requiring a video projector (VHS only) will be scheduled for Friday, January 8.

Subjects: Mathematical, numerical, and experimental aspects of nonlinear dynamics and chaos; pattern formation; turbulence; applications to the physical, chemical and biological sciences; and related topics. Participants include physicists, mathematicians, engineers and scientists from many other fields with interests in nonlinear dynamics.

Short course schedule: A one-day, six-lecture short course on chaos and nonlinear dynamics will be presented from 8:30 a.m. to 5:00 p.m. on Tuesday, January 5, by James A. Yorke and Celso Grebogi of the University of Maryland. The lectures are introductory in nature and are aimed at graduate students and nonspecialists. The topics include: Introduction and Basic Concepts, Strange Attractors, Bifurcations to Chaos, Fractal Basin Boundaries, Attractor Reconstruction (Time Series Analysis), Controlling Chaos.

Dynamics Days Schedule: The conference opens with an invited lecture on Wednesday, January 6, at 9:00 a.m. and will end by 5:00 p.m. Saturday, January 9. There will be a conference session on Wednesday evening and a banquet on Thursday evening (\$25 per person, cash bar). Dr. D. Allan Bromley, assistant to President Bush for Science and Technology, will be the banquet speaker. His talk will be open to all conference participants. Friday and Saturday evenings are free.

August 27, 1992

Dear Dr. Bromley:

It is my pleasure to invite you to participate at the Meeting of Universities and Research Centers of the Western Hemisphere that will be held in Punta del Este, Uruguay, from November 18 to 20, 1992. The purpose of this Meeting is to examine the functions, objectives, and mechanisms of the Common Market of Scientific and Technological Knowledge, in accordance with resolutions of the Inter-American Council for Education, Science, and Culture (CIECC) and of the General Assembly of the Organization of American States (OAS), [AG/RES.1151 (XXII-O-92) and CIECC 832/92].

Participating at the meeting will be officials of governments, universities, technological institutes, institutions that finance scientific and technological activities, multinational technical and financial cooperation organizations, and eminent personalities selected for their background in international cooperation in science and technology.

In addition, we would appreciate if you could designate a technical representative of your institution to take part in the next Preparatory Workshop on Cooperation that will be held in Montevideo from September 29 to 30, 1992, to integrate proposals concerning mechanisms and specific and multinational association initiatives, that are being prepared for the development of the Common Market. Participants at the workshop will be specialists and experts from technical and financial cooperation organizations that support scientific and technological activities in Latin America and the Caribbean countries.

Dr. Allan Bromley
Science Advisor to the President
Office of Science and Technology
Policy
Executive Office to the President
Washington, D.C. 20500

As you know, the decision of the OAS governing bodies to foster the development of the Common Market of Scientific and Technological Knowledge, was a response to an initiative of the President of Uruguay, Dr. Luis Alberto Lacalle. The initiative embraces a perception shared with other Heads of State on the need to integrate technical capabilities and efforts, as a means for improving participation on the part of the Latin American and Caribbean countries, in scientific and technological progress, increase the productive competitiveness in world markets, and help meet integrated development needs.

In preparation for the Meeting of Universities and Research Centers, the OAS convened a group of high-level experts that met in Punta del Este, Uruguay, in December 1991. On the basis of an independent analysis of the mechanisms for scientific and technological cooperation operating in the Hemisphere and in other regions of the world, the experts drew up a set of recommendations for developing the Common Market. The attached document contains their proposals and recommendations and will be used in the next Preparatory Workshop leading to the Meeting of Universities and Research Centers in November 1992.

In due course, we will forward to you the working documents that are being prepared by specialists of the region with experience in designing mechanisms and initiatives for multinational cooperation on science and technology, in each of the program areas defined at the preparatory meeting.

Sincerely yours,

João Clemente Baena Soares
Secretary General

DEPARTMENT OF SCIENTIFIC AND TECHNOLOGICAL AFFAIRS

**COMMON MARKET OF SCIENTIFIC AND
TECHNOLOGICAL KNOWLEDGE**

Summary

The President of Uruguay, Dr. Luis Alberto Lacalle, proposed to the General Assembly of the Organization of American States (OAS) in June 1990, the development of a common market of knowledge among OAS Member States. The proposal reflects a shared perception with other Heads of State on the need to integrate a common base of knowledge for the progress of Latin American and Caribbean countries, recognizing that the technical efforts of the size required by the pace of world progress cannot be developed separately.

The Member States endorsed the initiative and focused it on the exchange of scientific and technological knowledge, seeking to contribute to technical progress, productive competitiveness, and the social well being of the countries in the region. To examine the possibilities, objectives and mechanisms of the Common Market of scientific and technological knowledge, the Member States decided to organize a Meeting of Universities and Research Centers to be held in Punta del Este, Uruguay, in November 1992.

To prepare for the meeting, the OAS convened a group of high level experts in Uruguay in December 1991. Based on reports about the situation in the region and an analysis of experience worldwide in the field of scientific and technological cooperation prepared for the meeting, the experts determined that it was necessary to set up a Program Framework to promote the exchange of knowledge, mutual support, and joint action of the universities and research centers in the region. This would be designed to integrate the resources and efforts of those institutions in order to strengthen their capabilities to conduct research, transfer precompetitive technologies, and provide support services to the innovation processes taking place in the companies and entities of the government.^{1/}

The recommendations of the group of experts were submitted to the Inter-American Council for Education, Science and Culture (CIECC) for consideration in February 1992 and the OAS General Assembly in May 1992. Both CIECC and the General Assembly took note of the work done and reiterated their support for carrying out activities to develop this initiative.

^{1/} See "Recommendations" and "Basic Document for Discussion," Meeting of Experts, OAS Forum for the Exchange of Scientific and Technological Knowledge, Punta del Este, Uruguay, December 9-11, 1991; Department of Scientific and Technological Affairs, Executive Secretariat for Education, Science and Culture, OAS.

The experts consulted confirmed that there was successful experience in operating mechanisms to support the exchange of knowledge among the countries of Latin America and the Caribbean, and between them and the industrialized countries. They also noted that these mechanisms cover only some of the aspects and modalities of association required and viable in the present condition, and that they operate with limited resources on a scale that bears no relation to the magnitude of scientific and technological work, nor to the possibilities of technical exchange in the region, in the hemisphere or worldwide.

In view of this situation, the proposed Framework Program would contribute both to improving existing mechanisms and to supplement them with new modalities of exchange that will make it possible to make greater use of the opportunities arising from the accelerated technical progress worldwide. In both cases, it is proposed to utilize to the maximum the capabilities of existing institutions to reduce administrative costs.

Moreover, while most of the countries in the region have increased or are increasing substantially their investments in science and technology at the national level, resources allocated to the work of multinational scientific and technological exchange among the Member States has remained at a low level. Accordingly, the experts propose that the Program Framework be supported by a Fund to include new resources from international cooperation and support channeled by the countries from external financing for research and services to innovation, which would be used to cover the costs of their own participation. The support of the industrialized countries would help the more developed countries in the region to contribute also to the scientific and technological progress of the smaller economies in the area.

The Framework Program and the Fund for the Common Market of Scientific and Technological Knowledge are therefore profiled as a timely and viable hemisphere-wide response to the need for integrating knowledge, capabilities and efforts so that the countries of the region can participate in worldwide technical progress and compete in the expanded markets. In a situation where the industrialized countries and the large multinational corporations are joining together, this effort is being undertaken to be able to investigate and make innovations on a scale and at the pace required to compete worldwide.

In the period that has elapsed, experts have helped to identify the organizational, financial and technical feasibility of the initiatives proposed in the preparatory meeting. In the coming months, contributions will be solicited from regional experts with long experience in designing multinational mechanisms and initiatives in science and technology to propose organizational, financial and cooperation mechanisms to promote the exchange of experience, provide mutual support and joint action of the universities and research centers in the region in the action fields identified at the preparatory meeting. The specialists will also help to define proposed multinational activities for demonstration purposes which will employ the proposed mechanisms. The proposals will be submitted to the Meeting of Universities and Research Centers and will help to define a set of recommendations to be submitted to the governing bodies of the Organization for consideration.

ORGANIZATION OF AMERICAN STATES
EXECUTIVE SECRETARIAT FOR EDUCATION, SCIENCE AND CULTURE
DEPARTMENT OF SCIENTIFIC AND TECHNOLOGICAL AFFAIRS

**COMMON MARKET OF SCIENTIFIC AND
TECHNOLOGICAL KNOWLEDGE**

Background

The initiative proposed by the President of Uruguay and the OAS General Assembly reflects a shared desire of the Member States to integrate technical capabilities and efforts as a way to increase the participation of Latin American and Caribbean countries in worldwide scientific and technological progress, expand productive competitiveness in broadened markets and help satisfy social needs.

The search for new and better ways of multinational association for research and innovation emerges as an urgent requirement in the present international situation, which is characterized by the formation of multinational technical consortia that operate worldwide, but with a seat in regional market blocks.

Moreover, the first working papers for developing the initiative suggest that Latin American and Caribbean Countries are reviewing the role of the State in the development process and the restructuration of the productive system, which has been accompanied by restraints on fiscal financing for academic and technical institutions and a growing demand for technical knowledge and services from industries.

The initiative adopted by the OAS Member States is therefore proposed as a response to the new worldwide and regional scientific and technological situation. It is designed to perfect mechanisms to promote the exchange of precompetitive scientific and technological knowledge among scientists, technicians and administrators of science and technology working in the universities, institutes and technical service groups, as well as in the business and government sectors. Its immediate goal is to integrate the region's technical capabilities to strengthen its ability to participate in worldwide technical progress and contribute to the productive competitiveness and social well being of the countries in the region.

In endorsing the initiative to develop a Common Market of knowledge, the Member States decided to set up in the OAS a forum for the exchange of scientific and technological knowledge as a permanent instrument for promoting and conducting the exchange and dissemination of scientific and technological knowledge among the Organization's Member States.

The Forum provides a suitable arena for member country experts to identify needs and opportunities of common interest, analyze action alternatives in this area and propose the establishment of mechanisms and other initiatives for the exchange of experience, mutual support and joint action in science and technology. (See Appendix 1)

The first activity of the Forum will be the Meeting of Universities and Research Centers to be held in Punta del Este, Uruguay, in November 1992. The objective of the meeting is to propose guidelines and initiatives for developing the Common Market for the Exchange of Scientific and Technological Knowledge. To prepare that meeting, the OAS requested the assistance of specialists from the Western Hemisphere to make an independent analysis of science and technology cooperation mechanisms in use in Latin America, the Caribbean, North America and Europe. Later, the OAS convened a group of high level experts, which, based on the work done by the specialists, formulated a set of recommendations for developing the Common Market and the meeting. The group of experts met in Punta del Este in December 1991. The proposals and recommendations formulated by the specialists consulted are given below.

Sphere of Action of the Common Market

From the institutional standpoint, exchange of freely available scientific and technological knowledge is carried out in an institutional system that includes universities, technological institutes and technical services, as well as public and private research centers and public entities. Since each of these institutions performs various functions, the scope of action of the Common Market mechanisms must be defined with the dual purpose of concentrating efforts and avoiding duplications with other work under way.

In the case of universities and institutes of higher learning, the Common Market mechanisms would include those post graduate activities in which training is the direct result of research management and execution. In the case of research centers of corporations and public entities, the mechanisms would promote cooperation in generating and disseminating precompetitive knowledge, that is, technological knowledge of general application that is not protected as proprietary information or by intellectual property rights.

Common Market Participants

The Common Market includes as basic participants those responsible for management and execution of scientific and technological activities in universities, technology institutes, information and technical assistance services, and other entities that conduct research and provide technical services. It also includes scientists, technicians and administrators operating in the research centers of corporations and public entities cooperating with the foregoing in matters relating to freely available knowledge. Also participating are those responsible for formulating policies and administration of institutional, financial, cooperation and other instruments with which support policies for scientific research and transfer are implemented or precompetitive technology knowledge is generated.

Mechanisms for Developing the Common Market

The Common Market of Scientific and Technological Knowledge might be defined as the Common Market which promotes through exchange mechanisms the integration and strengthening of the base of scientific and technological knowledge, capabilities and activities of the Member States of the Organization of American States.

That Common Market has mechanisms that have been contributing to the exchange of knowledge among the Latin American and Caribbean countries and between them and the industrialized countries. Many of the mechanisms supported by the IDB, OAS, UNDP, UNIDO, UNESCO, COLCYT-SELA, EC, CYTED-D, IDRC, NSF, JETRO, JUNAC, SECAB, CINDA and other multilateral and bilateral cooperation entities demonstrate experience and very successful results. In the particular case of the OAS, the Regional Scientific and Technological Development Program, established by the American Heads of State Meeting in Punta del Este, Uruguay, in 1967, has been a pioneer program in horizontal cooperation among the countries of Latin America and the Caribbean, and as an important instrument for establishing inter-American cooperation relations.

However, the analysis made by the experts of the region shows that existing mechanisms as a whole cover only some of the aspects and modalities of association that are viable and necessary at the present time. Existing mechanisms operate on a reduced scale compared to the requirements of the new worldwide technical situation and by the exchange opportunities associated with the substantial increase in science and technology investments being made at the national level by the countries of the region. That is why the experts consulted consider that, along with strengthening existing mechanisms, other mechanisms must be established and staffed that will be able to contribute to making new forms of multinational association effective on a scale that is in keeping with the magnitude of scientific and technology activities existing in each country and worldwide.

The experience of Canada, the United States, Europe and other regions is an important source of ideas for improving existing mechanisms and for designing new ones. The programs of centers of excellence in Canada, research programs for innovation in small business of the United States, and the Framework Program of the European Community, including their specific programs ESPRIT, BRITE, BRIDGE, SCIENCE, SPRINT, MONITOR, VALUE, COMETT and STRIDE, are examples of how the industrialized countries are responding to the need for integration of technical capabilities and linking universities and research centers with business and government.

Consequently, the experts consulted feel that the initiative for developing the Common Market of Scientific and Technological Knowledge can help to improve and establish mechanisms, that taken as a whole and through simple reasonable cost operating schemes, will make it possible to provide a timely response to the technical exchange needs that are continually emerging in the evolution of science and technology worldwide. Doing so would make better use of the investments made and of the experience gained through existing mechanisms, both in Latin America and the Caribbean, as well as in other regions of the world.

Complementation with other initiatives

The experts feel that, in adopting measures and establishing mechanisms for developing the Common Market, it would be desirable to recognize the spheres of action and the contributions already made by the various public and private cooperation entities that have been supporting scientific and technological exchange, in order to ensure maximum use and proper complementation with existing work. The analysis made shows successful experience in the work of those entities, so that the experts recommend that the proposed Framework Program contribute both to strengthening the best of existing mechanisms and to complement them with new action modalities that will make it possible to utilize better the opportunities emerging from the accelerated technical progress worldwide.

Moreover, the central mission of the mechanisms for developing the Common Market would be to contribute to the association of universities, institutes and technology services with each other, seeking to strengthen their capabilities to conduct research and provide services to business and government. This complements and promotes the development of such initiatives as the Bolivar Program and the Technology Innovation Work of the CYTED-D Program which seek to promote the association of businesses with each other so that they strengthen the technology dynamics of the productive sector, and thereby, make better use of support services for innovation that can be provided by the universities and research centers.

Fund for financing the new mechanisms

Experience with multinational cooperation and integration in science and technology shows that this effort requires a political commitment at the highest level to promote the exchange of knowledge as an instrument for development and for allocating resources that support the mechanisms established for that purpose.

The OAS provides the institutional framework for establishing political agreements that may implement the new mechanisms of the Common Market of Scientific and Technology Knowledge, including the establishment of the general structure and policies to guide the work of the organizations directing the new mechanisms.

In resource allocation, while most of the countries of the region have already increased or are increasing substantially their investments in science and technology at the national level, the resources assigned to multinational science and technology exchange among Member States are still very limited.

The increased opportunities for exchange resulting from the speed up of worldwide technology progress and the larger national investments in science and technology, the importance of that exchange for development, and the shortage of resources now allocated to multinational activities in science and technology indicate that establishing new mechanisms and strengthening existing ones must be accompanied by the provision of new resources.

Accordingly, the experts propose that the Framework Program be supported by a Fund integrating resources channeled by the countries to exchange activities, provided from external financing, with contributions from international cooperation organizations. The Fund channeled by the countries to finance their participation in exchange activities, mutual support and joint action in science and technology can be set up with a fraction of the loans for research and innovation investment programs financed by international financial and technical cooperation agencies such as the IDB and the IBRD, or with other funds whose repayment would be in accord with the maturities of the initiatives to be financed with them. Added to these resources might be contributions from industrialized countries interested in contributing to the region's integration and development, which would make it possible to strengthen joint efforts of technical excellence or of particular relevance for the countries in the region that have the greatest science and technology needs.

It is estimated that in the first stage, the cost of organizing the new exchange activities would be primarily funded with contributions from the industrialized countries and that the countries of the region would mainly finance the costs of their own participation.

The contributions of the industrialized countries would also help the more developed countries of the region to contribute to offsetting the science and technology shortfalls of the smaller economies in the region. That combination of support might make feasible the domestic allocation of resources to multinational exchange programs and make it possible for external support to make an effective contribution to integrating the countries of the area.

The Framework Program and the Fund for the Common Market of Science and Technology Knowledge are seen by the experts as a suitable response to the need for integrating knowledge, capabilities and efforts so that the countries of the region can participate in worldwide technical progress and compete in the expanded markets. The industrialized countries and the large multinational corporations are joining together to investigate and make innovations on a scale and at the pace required to compete worldwide. The same requirements for technical and competitive updating have contributed to the fact that most of the countries in the region are conducting or plan to conduct major domestic investment projects in science and technology with the support of international financing agencies. What is required now is to expand the ways of integrating the efforts of the universities and research centers in the region.

Based on international experience, the experts feel that, in order for the new mechanisms to have a significant impact, they must be provided with at least the equivalent of 2% of the region's investment in science and technology. For Latin American and the Caribbean, that figure would be around 60 million dollars a year.

Organizational structure for operating the new mechanisms

The experts feel that the financial resources that might be raised to develop the Common Market for the Exchange of Science and Technology Knowledge should be administered by a Fund that is either a trust fund or a foundation.

The highest authority for utilizing the Fund's resources would be a standing committee set up under an agreement of the presidents of the region to ensure maximum representativeness and authority of it. The committee would be composed of scientific, technological and entrepreneurial figures of the highest standing.

The experts recommend that the committee have, as its first duty, defining the bylaws and procedures, including the institutional structure, of a Framework Program to ensure long-term continuity of the mechanisms for developing the Common Market for the Exchange of Science and Technology Knowledge and implementation of the overall policies that may be set by OAS member countries joining in the initiative.

The Framework Program for Cooperation would establish the financing modalities, competition procedures, and evaluation mechanisms to ensure the quality, excellence and pertinence of the projects. The projects would be evaluated by peers -- specialists of recognized international standing in the various areas. Resources would be allocated, whatever kind of organization might be adopted, entirely in terms of the intrinsic quality of the projects, their social relevance, and their contribution to inter-American cooperation.

For the purposes mentioned above, and to preserve the basic criteria of inter-American cooperation, the experts stressed, as an essential requirement, that applications for resources be funneled directly to the specialists of international standing for evaluation and that the funds be allocated to exchange activities and not to support activities that are primarily national in character.

The experts consider it to be of basic importance for the cooperation programs existing in other national, subregional or multilateral entities to be able to contribute resources, thus assuring adequate coordination and dissemination of those activities. In the long run, the Framework Program should promote the convergence of programs and projects for inter-American cooperation in science and technology.

Program content

The programs of greatest interest identified by the experts are the following: to provide guidance for them, the experts recommended conducting regional programs for evaluation and dissemination of information on worldwide trends in science and technology.

Regarding all of the programs, the experts proposed establishing action modalities to promote the participation of specialists of the smaller economies of the region in programs of particular importance for their development.

Research and graduate training

- * Conduct multinational research projects to support the exchange components. The research may be either basic or applied.
- * Support regional research and graduate networks.
- * Organize graduate courses for research in the region.

Regional Centers of Excellence

- * Conduct regional and subregional research projects in centers of excellence with an obligatory multinational exchange component.
- * Consolidate regional or subregional centers of excellence, if possible based on national centers.
- * Take advantage of high cost regional facilities and equipment.

Exchange and link up highly skilled human resources

- * Support the exchange of graduate students and established professionals to conduct research and provide services to support innovation.
- * Utilize the region's experts located abroad to support science and technology activities in institutions in the area.

Linkage of universities and research centers with the productive sector

- * Establish a regional network of units for dissemination and transfer of the research findings of universities and research centers to corporations.
- * Conduct demonstration pilot projects with a high impact in disseminating and transferring technologies of general application developed in the region.
- * Train technology entrepreneurs and establish incubators of technology based companies.

Information, intercommunication and dissemination

- * Establish a unified access to existing data bases and electronic mail.
- * Strengthen current networks of Latin American data and information bases.

Actions Under Way

In preparing for the Meeting of Universities and Research Centers, the General Secretariat, in cooperation with the Uruguayan Government, is supporting the development of proposed cooperation mechanisms that may be considered particularly viable from the institutional, financial and technical standpoint. In the coming months, support will also be sought for preparing multinational demonstration initiatives that will use the proposed mechanisms to promote the exchange of experiences, mutual support and joint action of the universities, institutes and technical services in the region.

To that end, a work plan is being developed that will include hiring experts experienced in conducting multinational cooperation mechanisms and initiatives in science and technology so that they can structure proposals in the fields of action selected by the experts at the preparatory meeting, conduct a technical coordination workshop to integrate their proposals, a coordination workshop with the participation of international technical and financial cooperation agencies, and a general coordination meeting with the participation of the National Commission of Uruguay and the Department of Scientific and Technological Affairs of the OAS. The results will be reviewed at the Meeting of Universities and Research Centers and will help to draft a set of proposals to be submitted to the governing bodies of the Organization for consideration.

To carry out that work program, and to initiate the activities that are considered to be most urgent, the OAS General Assembly approved US\$300,000 for the 1992-93 biennium. In addition, the Department of Scientific and Technological Affairs (DACYT) of the OAS Executive Secretariat for Education, Science and Culture is utilizing all of the activities it supports to gather suggestions, discuss possible initiatives, and contribute from the outset to refining the Common Market of Scientific and Technological Knowledge.

Moreover, in compliance with mandates of CIECC and the General Assembly, the OAS General Secretariat is conducting consultations on possible methods of technical and financial cooperation for conducting this initiative with the IDB, Programa Bolivar, UNDP, ECLA, UNESCO, UNIDI, ALADI, COLCYT-SELA, EC, CYTED-D, CTCAP, OUI, CINDA, IDRC, NSF, JETRO and other entities that are contributing or that might contribute to the scientific and technological integration of the Latin American and Caribbean countries.

APPENDIX 1

OAS FORUM FOR THE EXCHANGE OF SCIENTIFIC AND TECHNOLOGICAL KNOWLEDGE

The forum was set up in the OAS by the General Assembly as a permanent instrument to develop the Common Market of Scientific and Technological Knowledge in response to an initiative by the President of Uruguay, Dr. Luis Alberto Lacalle.

The Forum should provide a suitable arena for member country experts to identify needs and opportunities of common interest, review possible activities on this matter, and propose initiatives for the exchange of experience, initial support and joint action in science and technology.^{2/}

In that context, the most general objective of the forum is to propose measures to contribute to the development and integration of the base of knowledge, capabilities, and scientific and technological activities of the Member States of the Organization of American States, seeking to adapt them to new world situations, in order to improve their contribution to comprehensive development in all of its dimensions.

The specific objectives include:

1. Identify situations, needs, opportunities and policies in science and technology that are of common interest for the Member States.
2. Acquire knowledge, exchange experience, cooperate in developing and disseminating information on policy instruments and measures that may be adopted by the governments, the academic and technical institutions, and other organizations of the Member States, to support research and innovation.
3. Identify, establish and improve mechanisms for multinational cooperation and financing for mobilizing and developing human resources, organizational structures, information networks, research activities and services in the agencies participating in scientific and technological development in the region.
4. Promote joint activities to improve quality, reduce costs and shorten time frames for achieving results that demonstrate scientific and technological excellence and contribute to the economic and social development of the Member States.

^{2/} Proposal contained in document CEPCIECC/Doc. 1171/91 and approved by the Permanent Executive Commission of the Inter-American Council for Education, Science and Culture (CEPCIECC) at its XLII Regular Meeting, held in Washington, D.C., December 5-6, 1991.

POST
MAIL ROOM

The Honorable D. Allan Bromley
Assistant to the President for
Science and Technology
The White House
Washington, D.C. 20500

July 27, 1992

Dear Mr. Bromley:

Johnson Controls, Inc. and the United States Energy Association urge you to reserve the date of September 29, 1992, for one of the most important energy efficiency and conservation related events of the year: the Third Annual Energy Conservation Forum, to be held in Washington, D.C. at the National Press Club. With the rapidly growing interest in energy conservation and efficiency in the United States and abroad, the forum is designed to increase public and private sector awareness of the critical role that energy efficiency plays on both the national and international levels.

This invitation-only event will be attended by over 200 of the nation's top energy policy-makers involved in developing energy conservation policies in the United States, and will feature presentations by federal, state and industry representatives currently implementing energy efficiency and conservation programs. They will be joined by energy conservation and efficiency experts from developing countries, Eastern and Central Europe and the Newly Independent States of the Former Soviet Union, who are creating initiatives to increase energy efficiency in their countries. This unique mix of domestic and international energy efficiency leaders promises a sophisticated dialogue on the need for, benefits of, and obstacles to implementing energy efficiency programs and projects.

Johnson Controls, Inc.

I have enclosed a preliminary agenda for the forum. A more detailed forum program will be issued next month. In the interim, please mark your calendar for this important event, and, if you have any questions, do not hesitate to contact me.

Sincerely,

JOHNSON CONTROLS, INC.

(ccw)

Douglas A. Decker

Encl.

Johnson Controls, Inc. / United States Energy Association

Third Annual Energy Conservation Forum

Washington, D.C.

Tuesday
September 29, 1992

- 8:00 a. m. **White House Briefing/Breakfast** (J.W. Marriott)
A Senior Administration official discusses the U.S. post Earth Summit energy efficiency agenda.
- 9:45 a. m. **"Getting Down To Business"** (National Press Club)
Overview of USEA's report on energy efficiency and economic growth.
- 10:45 a. m. **Domestic Panel Discussion** (National Press Club)
Government and industry leaders discuss national energy policy.
- 12:30 p. m. **Luncheon** (National Press Club)
A Senior Administrator official reviews the National Energy Strategy and its energy conservation implications.
- 2:30 p. m. **International Perspectives** (National Press Club)
Foreign energy officials discuss their national energy efficiency initiatives.
- 3:30 p. m. **International Panel Discussion** (National Press Club)
Representatives from Congress, international organizations and industry discuss international energy efficiency issues and opportunities.
- 6:00 p. m. **Congressional Reception** (Hotel Washington)
- 7:00 p. m. **Energy Efficiency Awards/Dinner** (Hotel Washington)
Two awards will be presented to individuals who have made outstanding contributions in the energy efficiency field, domestically and internationally.

Honorable D. Allan Bromley
Assistant to the President
Office of Science and Technology Policy
Washington, DC 20506

Dear Dr. Bromley:

I am sure that you would agree the President's National Technology Initiative (NTI) continues to be a tremendous success. The NTI conferences are only the first of several phases of a long-term strategy of fostering creative technology partnerships with U.S. businesses. These partnerships, in turn, serve as the source of our nation's economic growth and job creation for the global marketplace of the 21st century.

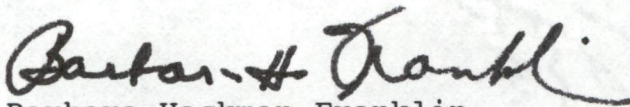

The remaining phases of the NTI include more focused efforts toward addressing specific issues brought forward at the conferences. Toward this end, I would like to invite you to participate in a briefing on NTI follow-up activities to the Cabinet Members of the NTI Interagency Coordinating Group on September 9th from 10:30 A.M. to 1:00 P.M. in the Secretary's Conference Room. The briefing will include a luncheon preceded by presentations on the following items:

- o The strategy and approach for the NTI follow-up activities;
- o A summary of NTI Interim Report to the President. Recall that this report will highlight the findings and accomplishments of the conferences;
- o The follow-up activities of the NTI sponsoring Agencies;
- o The fall series of NTI conferences.

The Administration must take full advantage of the excitement and visibility generated by our National Technology Initiative. I look forward to your participation in this important briefing, as well as your continued support of the important NTI follow-up activities designed to further leverage these new government-industry partnerships.

I ask that you bring only one staff person to this briefing.
Please have your staff contact my scheduler, Meghan McCaleb, to
confirm your participation in this briefing.

Sincerely,

Barbara Hackman Franklin

August 25, 1992

RECEIVED

92 SEP 1 11:43

Dr. Allan D. Bromley
Director
Office of Science and Technology Policy
Executive Office of the President
Washington, D.C. 20506

OSTP
MAIL ROOM

Dear Dr. Bromley:

On behalf of the Association of Research Libraries, I am writing to extend an invitation to you to speak at the membership meeting of the Association to be held October 22-23, 1992, in Arlington, Virginia. ARL is an organization of 120 of the largest research libraries in North America and research institutions are represented at our meetings by the director or dean of these libraries. The theme of the 121st meeting of the Association is "Charting the Future" and this presents an opportunity to examine a range of strategic issues facing research libraries as well as to celebrate ARL's 60th anniversary. Topics to be explored and discussed include intellectual property, organizational change, cultural diversity, and user requirements for multi-disciplinary research. I hope that you will be able to join us for some or all of the fall meeting.

We have set aside time on Thursday, October 22 between 12:00 noon - 1:30 p.m. if you are available to speak to our members at that time. A number of recent OSTP activities relate directly to research libraries. In particular, directors of ARL libraries would benefit from hearing your views on the role of universities and their research libraries in support of science and technology. ARL is currently working with the Association of American Universities to examine new options for the collection and dissemination of scientific and technical information, giving particular attention to the concept of a distributed national science and technology "virtual" library. Therefore we would also value your views on the future development of NREN.

Please let me know if you will be able to join us. If this time is not convenient, we would be happy to try and accommodate your schedule. Either myself or Prue Adler, ARL Assistant Executive Director (202/232-2466), are able to answer any questions that you may have concerning the fall session.

Thank you in advance for your consideration of this matter.

Sincerely,

Duane E. Webster
Executive Director

ASSOCIATION OF RESEARCH LIBRARIES

ARL FACT SHEET

Mission: The mission of ARL is to identify and influence forces affecting the future of research libraries in the process of scholarly communication. ARL comprises the libraries that serve major North American research institutions and operates as a forum for the exchange of ideas and an agent for collective action. ARL programs and services promote equitable access to, and effective use of recorded knowledge in support of teaching, research, scholarship, and community service. The Association articulates the concerns of research libraries and their institutions, forges coalitions for cooperative action, influences information policy development, and supports innovation and improvement in research library programs.

Membership: 120 research libraries in the United States and Canada; founded 1932.

President: Arthur Curley, Librarian, Boston Public Library (1992).

Staff: Duane E. Webster, Executive Director; 11 professional and 10 support staff.

ARL PROGRAMS AND CAPABILITIES:

- **Statistics:** The collection and distribution of quantifiable information describing research libraries. Annual publications include *ARL Statistics* and *ARL Annual Salary Survey*. Other projects are *Preservation Statistics*, and the datafile *Research Library Statistics 1907/08 through 1987/88*.
- **Communications:** Publishing, media relations, meetings and outreach to ARL members, the library profession, policy-makers and the higher education community. *ARL: A Bimonthly Newsletter of Research Library Issues and Actions* and other publications are available.
- **Federal Relations and Information Policy:** Activities to monitor legislative and governmental matters of concern to research libraries, analyze and respond to federal information policies, and develop ARL positions on these issues as they affect diverse constituencies within ARL.
- **Technology and Access:** Pursues the objective of enhancing access to scholarly information resources through telecommunications, collection development, preservation, and bibliographic control. Recent programs include the North American Collections Inventory Project (NCIP) and the National Register of Microform Masters (NRMM) Retrospective Conversion Project.
- **Office of Management Services:** OMS conducts research and provides consulting, information and training in the management of human and material resources in libraries. Major programs include the Academic Library Program and the Systems and Procedures Exchange Center (SPEC).
- **Office of Scientific and Academic Publishing:** Launched following the *Report of the ARL Serials Prices Project*, OSAP is designed to identify and influence the forces affecting the production, dissemination, and use of scholarly and scientific information.
- **Office of Research and Development:** Articulates the ARL research agenda through the development and administration of grant-supported projects in all of the above program areas. Coordinates the Visiting Program Officer program.
- **Coalition for Networked Information (CNI):** Formed by ARL, CAUSE, and EDUCOM in March 1990 to "advance scholarship and intellectual productivity" by promoting the provision of information resources on existing and future telecommunications networks, and the linkage of research libraries to these networks and to their respective constituencies.

PHILIP LADER

August 24, 1992

RECEIVED

Honorable A. Allen Bromley
Assistant to the President-Science/Tech.
Old Executive Office Building, Room 360
17th Street & Pennsylvania Avenue, N.W.
Washington, DC 20506

92 SEP 1 P 1:10

OSTP
MAIL ROOM

Dear Dr. Bromley:

Since 1981, a distinguished, diverse group of friends has welcomed the new year by reflecting together at a private gathering on Hilton Head Island. We again invite your family to join us, as our guests, December 30th - January 3rd, for "Renaissance Weekend."

This highly informal, non-partisan tradition is not, as *The Wall Street Journal* recently described us, a "policy institute" or golf-and-tennis outing:

- * Over meals, beach walks, panels, and sports, 200+ families make and renew acquaintance, discuss current issues, and relax "off-the-record." Two-thirds of the participants typically are previous guests, much like an "extended family reunion."
- * Some vignettes from last year: a U.S. Supreme Court Justice and former Republican National Chairman exchanging thoughts on Lincoln; the 1992 Democratic Presidential nominee, President Reagan's lead speech-writer, and JFK's top adviser pondering America's direction; Habitat for Humanity's founder and a former Miss America reflecting on bold career decisions; a Fortune 100 CEO and a Pulitzer Prize-winner expressing professional anxieties; adventurers reporting on their Greenland expedition and South Pacific travels; a former U.S. tax commissioner telling jokes on the IRS; a South African author sharing realities of his inter-racial marriage; and a 12-year-old correcting a Soviet historian from his firsthand observations of the Second Russian Revolution.

We shall be happy to provide your family's lodging, meals, golf, tennis, and bikes. Transportation and any other expenses will be your responsibility.

Please consider this occasion with your family (Children are very welcome!), and return the green Registration Form to our Atlanta office if you can be with us or would like to be invited next year.

Since my family is spending a few years in Australia, feel free to phone our Renaissance coordinators, Jackie Kiss and Alice Settles, in our Atlanta office (404-451-1992). They will answer your questions, arrange your lodging, and send you the specific program a few days before our time together.

We hope you will be with us at Renaissance Weekend!

Sincerely,

Phil

P.S. We'd SO much love to have you with us!

RENAISSANCE WEEKEND '93

Fact Sheet

New Year's
Hilton Head Island, South Carolina

December 30, 1992 -
January 3, 1993

Program & Activities: The Weekend consists of family recreation and informal, off-the-record presentations by the participants themselves. Simultaneous panels on various subjects, scheduled by the hosts, are listed on the Tentative Program mailed to registrants ten days before the Weekend. Times are set aside for recreation and meals "on-your-own," and participants "come-and-go" as they like. Palmetto Dunes Hyatt Regency Hotel will be the activities center.

Dress: "Resort casual"; "coat-and-tie" for dinners.

Schedule: Program begins 6 p.m., Wednesday, and ends 1 p.m., Sunday.

Sports: Four championship golf courses, 40 tennis courts, bike trails, three miles of beach, sailing, and deep-sea fishing. Special privileges will be extended to participants registered at Hyatt or Palmetto Dunes Villas.

Bikes: Palmetto Dunes Bike Shops at Hyatt or Fish Creek Landing (\$12 for the entire Weekend).

Hyatt Indoor Pool & Fitness Center: Complimentary to all Renaissance participants upon presenting nametags.

Tennis: Complimentary, including round-robin tournament, at Palmetto Dunes Racquet Club.

Golf: Complimentary (\$16/person cart rental charge) on four Palmetto Dunes courses. Tee times may be reserved 48 hours in advance by phoning (803) 785-1138 and identifying yourself as a Renaissance guest.

Lodging: Participants may choose from two principal alternatives. (All subject to 7% State tax.)

Hyatt Regency Hotel (800) 233-1234 or (803) 785-1234 (beachfront; indoor pool and fitness center; immediate access to golf, tennis, and bike paths; daily housekeeping service; site of all Renaissance functions)

All rooms	\$ 70/night
Suites	\$125-395/night

Palmetto Dunes Villas (800) 826-1649 or (803) 785-1181, Fax (803) 785-1194 (multi-story, fully-equipped condominiums within walking or biking distance of Hyatt, golf, tennis and beach; inquire for home rates)

	<u>Golf/Lagoon</u>	<u>Near-Ocean</u>	<u>Ocean View</u>
1 Bedroom	\$ 75/night	\$ 90/night	\$ 105/night
2 Bedroom	\$ 99/night	\$ 112/night	\$ 144/night
3 Bedroom	\$ 124/night	\$ 144/night	\$ 164/night (penthouse)
4 Bedroom	\$ 135/night	\$ 172/night	\$ 208/night

(Villamare, built in 1990 and adjacent to the Hyatt, contains oceanfront and near-ocean, multi-story villas. Barrington and Windsor, Bob Hope's favorite, are more up-scale, but are a 10-minute walk from the Hyatt.)

Reservations: Participants must request lodging directly by sending the Lodging Reservation Request and Lodging Deposit to either Hyatt or Palmetto Dunes Resort . . . in addition to returning the green Registration Form and Registration Deposit to Renaissance's Atlanta office. Lodging reservations will be confirmed by the resort. Rooms and villas will be held for participants until 30 days before the Weekend and then will be available only as resort lodging space permits.

(Reservations can also be made directly at Sea Pines Plantation, the Marriott, Holiday Inn, Hilton, or Days Inn, all approximately three miles from Palmetto Dunes.)

Cancellation: For full Lodging Deposit refund, changes or cancellation of reservations must be received (a) by Hyatt no later than 72 hours, or (b) by Palmetto Dunes (villas) seven days in advance of scheduled arrival.

(Please advise both the resort and the Renaissance Atlanta office if you must cancel.)

Check-in/Check-out: All Renaissance participants should **check in at the Hyatt or Palmetto Dunes Villa Rental Office**, based on their reservations, then immediately collect their Registration Packets at the Hyatt Renaissance Desk. Check-in times are 4 p.m.; check-out, 1 p.m. In most cases, rooms and villas become available earlier, and guests will be accommodated early on a space available basis. Late check-outs can be arranged upon request of the resorts.

Extended Stays: Participants are encouraged to come early or stay after the program. Informal meals will be scheduled for Tuesday dinner and Wednesday lunch. Stated room/villa rates and resort privileges will be available.

Payment: Lodging charges will be paid upon check-in. All questions must be referred to Hyatt or Palmetto Dunes.

Further Information: Please call Hyatt [(800) 233-1234 or (803) 785-1234] or Palmetto Dunes Villas [(800) 826-1649 or (803) 785-1181], and be sure to tell the reservations personnel that you are requesting "Renaissance Group Reservations."

Further Information and Changes in Plans (regarding program and special arrangements): Renaissance Coordinators Jackie Kiss and Alice Settles may be reached at Renaissance Weekend, 4340 Georgetown Square, Suite 608, Atlanta, GA 30338; Telephone (404) 451-1992; Fax (404) 451-6620. During Renaissance Weekends, the Laders may be reached, for emergencies, in the late evenings at (803) 671-4811 or (803) 671-3741.

-- Please register ASAP or before October 15th to avoid the Wait List!!! --

Renaissance Weekend '93: Fact Sheet

Transportation: Travel Agents International has arranged discount airfares with several carriers. For **reservations**, phone Ellie or Mary at (800) 673-6311 and refer to Renaissance. Commercial and charter flights are available from Charlotte and Raleigh direct to Hilton Head and also from Atlanta to Savannah (45 minutes drive). Car rentals and limo service, with advance reservations, are available at both airports. Although cars help visitors enjoy all of Hilton Head's facilities, Hyatt guests and participants staying in adjacent villas can easily walk to the meetings, Racquet Club, and beach. Limited van service within Palmetto Dunes will be available.

Meals and Beverages: To keep costs down, all registered adult participants must be charged for the full "Common Meals" package. Also, the "head count" must be personally guaranteed by the hosts. Please note your arrival and departure times on the green Registration Form so the hosts can determine how many participants will attend the "pre-Weekend" dinner and the final brunch.

"Common Meals" include Wednesday, Thursday, Saturday dinners; Thursday and Saturday breakfasts; Thursday lunch; Friday and Sunday brunches; and the New Year's Eve party. Friday dinner and Saturday lunch are "on-your-own."

\$ 240 per person ("package" charge to all adult participants)

\$ 100 per child (12-and-under) unless "no meals" specifically designated on green Registration Form
("Fast food" restaurants are near Palmetto Dunes' entry gate.)

Beverages: **Cash bars** will be provided at the parties (\$5-cocktail; \$4-beer or wine; \$1.75-soft drink or juice).

Cancellation: The hosts regret there can be no reductions for early departures, absence from meals, or cancellation after 3 p.m., Dec. 22. Please advise the Renaissance Atlanta office as well as the Hyatt or Palmetto Dunes Resort (whichever holds your reservation) by telephone and/or Fax if you must cancel.

Young People: Children and teens are most welcome at all functions!

Children's Program: Children's activities (e.g., indoor games & activities, films, clown, touch football, volleyball) will be organized each day during meeting functions, but there will not be the equivalent of full-time "day-care services." Because participants themselves, "au pairs," and Renaissance staff take turns supervising the children's programs, there will be only a \$40 per child charge for the entire Weekend for Children's Program participants, to be paid at the Children's Room door.

Baby-sitters: Participants are encouraged to arrange for small children and night baby-sitters. Baby-sitter lists are available from the Hyatt Concierge. Arrangements should be made by participants before arrival.

Teen Program: Some 75+ teens and college students attend each year, have their own "gathering place," organize their own activities or participate in any others, and develop their own discussions as part of the scheduled program.

(Participants are requested to indicate on the green Registration Form if they are willing to share talents or activities with the young people; e.g., guitar, folk-songs, gymnastics, story-telling, volleyball. Favorite videocassettes welcome.)

Charges: Bills for non-lodging charges will be sent a few days after the Weekend. Because Renaissance Weekend is a private gathering, the hosts must personally and immediately settle accounts with the resort. Your prompt payment would be appreciated!

Registration Fee: (paid by all participants to defray organizational, function, and common costs)

<u>Individuals</u>	<u>Couples</u>	<u>Couples</u>	<u>Additional Guests</u>
		(with children 25 or under)	(including children over 25)
\$ 250	\$ 300	\$ 325	\$125/guest

(No Deposit is required of New Participants. The Registration Fee will be included in their final bill.)

Lodging: Charges paid upon arrival. (Note Lodging Cancellation Policies overside.) Direct questions to the resorts.

Common Meals: A 15% service charge will be added to the Common Meals costs noted above. Please direct any questions to the Renaissance Atlanta office.

Registration Directions

Invitation Policy: The gathering is a private party, and invitations are issued only by the hosts.

Please return as soon as possible:

New Participants: (1) The green Registration Form to Renaissance Weekend, 4340 Georgetown Square, Suite 608, Atlanta, GA 30338 (No Deposit necessary.)

AND

(2) If lodging is requested, the Lodging Reservation Request, with Lodging Deposit, to the Hyatt Regency Hotel or Palmetto Dunes Resort (villas).

Past Participants: (1) The green Registration Form and \$ 300 Registration Deposit (regardless of the size of your party) — check payable to "Renaissance Weekend" — to Renaissance Weekend, 4340 Georgetown Square, Suite 608, Atlanta, Georgia 30338

(**Note:** Registration Deposits will be refunded only upon the Atlanta Renaissance Office's receipt of written cancellation prior to November 1st.)

AND

(2) If lodging is requested, the Lodging Reservation Request, with Lodging Deposit, to the Hyatt Regency Hotel or Palmetto Dunes Resort (villas).

So that final arrangements can be made, registration as soon as possible is requested. If the Weekend is oversubscribed, as likely, participants will be selected from the Wait List by lottery in early December. For the past five years, a Wait List was organized by October 15th.

A Composite of Renaissance Weekend Panels 1981-1992

Renaissance Weekend is a private "house party," hosted annually since 1981 by Philip and Linda Lader, at which some 200 families gather on Hilton Head Island, at their own expense, to share their experiences and views through informal panels, over meals, and on tennis courts, golf courses, bike paths, and the beach. The participants are leaders in business, education, government, law and medicine, sports, religion, the media, and the arts. Over the years, the group has become an "extended family": more than two-thirds of last year's guests were past participants. Their only common denominators are (1) innovative achievement on a national or regional scale, (2) a "renaissance" spirit and broad-ranging intellectual interests, and (3) personal qualities that allow them to enjoy an off-the-record, highly informal tradition.

"Something That's Been 'Bugging' Me Lately"

Art Buchwald (*Syndicated Columnist*)

Dr. D. Allan Bromley
Assistant to the President
for Science and Technology
The White House
Washington, DC

Dear Dr. Bromley:

Thank you very much for your letter of August 12. We are delighted that you have accepted our invitation to address the Dynamics Days conference and hope that all will go as planned.

Your talk is scheduled for Thursday evening, January 7, 1993, at 8 p.m. Please have your staff notify me of your travel plans as the date approaches.

I have enclosed a copy of the meeting announcement and related materials. As an invited speaker, all meeting registration fees are waived. In addition, the conference can pay for your airfare (Saturday night stayover rates) and hotel room if needed.

All of us look forward to meeting you. We hope that you will enjoy the conference and your stay in Arizona.

With best regards,

Eric J. Kostelich

DYNAMICS DAYS ARIZONA

Twelfth Annual International Conference: Wednesday–Saturday, January 6–9, 1993
Short course on Chaotic Dynamics: Tuesday, January 5, 1993
Tempe Mission Palms Hotel, Tempe, Arizona

INVITED SPEAKERS

- *A. Bloch (Ohio State)*
- *D. Allan Bromley (Washington DC)*
- *D. Cannell (Santa Barbara)*
- *J. Carlson (Santa Barbara)*
- *S. Childress (NYU–Courant)*
- *I. Epstein (Brandeis)*
- *J. Franks (Northwestern)*
- *N. Gershenfeld (Harvard)*
- *C. Grebogi (Maryland)*
- *J. Guckenheimer (Cornell)*
- *S. Kauffman (Santa Fe Institute)*
- *P. Kolodner (Bell Labs)*
- *M. Luecke (Saarbrücken)*
- *A. Newell (Arizona)*
- *M. Roukes (Bellcore)*
- *R. Roy (Georgia Tech)*
- *M. Schatz (Texas–Austin)*
- *J. Socolar (IBM–Yorktown Hts.)*
- *K. Sreenivasan (Yale)*
- *A. Winfree (Arizona)*
- *J. Yorke (Maryland)*

Contributed communications: Contributed oral and poster communications form a large part of the meeting. There will be about 25 oral communications (15 minutes each, including discussion) which will be selected from abstracts received by Dec. 1. The number of posters is unlimited. Posters will be on display from 8:00 a.m. to 10:00 p.m. daily; in addition, special poster sessions will be scheduled throughout the conference. Authors of abstracts selected for oral communications will be notified by December 14. Presentations requiring a video projector (VHS only) will be scheduled for Friday, January 8.

Subjects: Mathematical, numerical, and experimental aspects of nonlinear dynamics and chaos; pattern formation; turbulence; applications to the physical, chemical and biological sciences; and related topics. Participants include physicists, mathematicians, engineers and scientists from many other fields with interests in nonlinear dynamics.

Short course schedule: A one-day, six-lecture short course on chaos and nonlinear dynamics will be presented from 8:30 a.m. to 5:00 p.m. on Tuesday, January 5, by James A. Yorke and Celso Grebogi of the University of Maryland. The lectures are introductory in nature and are aimed at graduate students and nonspecialists. The topics include: Introduction and Basic Concepts, Strange Attractors, Bifurcations to Chaos, Fractal Basin Boundaries, Attractor Reconstruction (Time Series Analysis), Controlling Chaos.

Dynamics Days Schedule: The conference opens with an invited lecture on Wednesday, January 6, at 9:00 a.m. and will end by 5:00 p.m. Saturday, January 9. There will be a conference session on Wednesday evening and a banquet on Thursday evening (\$25 per person, cash bar). Dr. D. Allan Bromley, assistant to President Bush for Science and Technology, will be the banquet speaker. His talk will be open to all conference participants. Friday and Saturday evenings are free.

AIRLINES AND AUTOMOBILE RENTAL

Tempe is a suburb of Phoenix, which is served by all major airlines.

Special Meeting Saver Fares have been arranged through American Airlines. For complete details, call toll free (800) 433-1790 and ask for STAR SØ113Q2. International travelers should call their American Airlines reservations office and ask for the International Congress Desk for reservations and tariff details.

America West Airlines also is offering discounts up to 45 percent off regular fares for the Dynamics Days conference. See the enclosed flyer for details.

Special conference rates have been arranged with Alamo Rent-a-Car. Economy cars are available for as little as \$89 per week with unlimited mileage.

For additional information and reservations, call Collins Clare Travel of Phoenix at (800) 528-3669 or (602) 955-3000, Monday to Friday, 9 a.m. to 5 p.m. Mountain Standard Time.

ACCOMMODATIONS

All sessions will be held at the Mission Palms Hotel in downtown Tempe. Participants must make their own room reservations by mailing the enclosed reservation card or by calling (602) 894-1400. (The FAX number is (602) 968-7677.) Room rates are \$65 (one to four persons). You must make reservations NO LATER THAN December 15 in order to receive this special rate. Mention the Dynamics Days conference if you call the hotel to make reservations.

Tempe and Environs: The Mission Palms Hotel is located in Old Town Tempe, within walking distance to Arizona State University and many restaurants, shops, and nightclubs. The hotel is six miles from Sky Harbor (Phoenix) Airport; complimentary shuttle service from the airport to the Mission Palms Hotel is available by calling (602) 894-1400. The weather in January is generally sunny and mild. Daily temperatures average between 45° and 65° F (7° to 18° C).

Sightseeing: For information on day tours, contact Collins Clare Travel at (800) 528-3669. Additional information is available from the Arizona Office of Tourism, (602) 542-8687. Approximate driving times from Tempe to some popular destinations include: the Grand Canyon (4.5 hr); Sedona/Oak Creek Canyon (3 hr); Flagstaff/Snow Bowl ski area (3 hr); Tucson/University of Arizona (2 hr).

SUMMARY OF DEADLINES

- Dec. 1: last day for receipt of abstracts to be considered for oral presentations.
- Dec. 4: last day for early registration (\$20 late fee applied to registrations received after Dec. 4).
- Dec. 4: last day for applications for financial support (graduate students and postdocs only).
- Dec. 14: notifications sent out for abstracts selected for oral communications and for financial support.
- Dec. 15: last day for receipt of hotel reservations at the special conference rate.

Support from the following is gratefully acknowledged:

The Office of Naval Research
College of Liberal Arts and Sciences, Arizona State University
Office of the Vice President for Research, Arizona State University
The Center for Systems Science, Arizona State University
The Department of Mathematics, Arizona State University

Dear Dr. Bromley:

I am pleased to invite you to join us at a dinner honoring Dr. Samuel J. Fomon, Professor, Department of Pediatrics, University of Iowa College of Medicine, who has been selected to receive the twelfth annual Bristol-Myers Squibb/Mead Johnson Award for Distinguished Achievement in Nutrition Research. Dr. Fomon was selected for his major contributions to the field of nutrition for healthy full term infants. Dr. Fomon has provided scientific and clinical advances in the areas of normal infant growth, body composition, energy and protein requirements and the bioavailability of iron.

By now, you should have received the formal invitation to the dinner in Dr. Fomon's honor, seven p.m., October 15, 1992, at the Park Hyatt Hotel in Washington, D.C. I hope that you will be able to join us.

Sincerely,

Thomas D. McCann

MAIL ROOM

Dr. D. Allan Bromley
Assistant to the President for
Science and Technology
Old Executive Office Building, Room 360
17th Street and Pennsylvania Avenue, N.W.
Washington, DC 20500

Dear Dr. Bromley:

The Air Force will host a seminar for its top civilian scientists and technical specialists in Washington, D.C., 9-11 September 1992. These individuals, known as "STs", hold key positions of Senior Research Scientist, Chief Scientist, and Technical Advisor. The seminar is an opportunity for these individuals to meet with senior government leaders in a learning and discussion forum. One of the highlights of the program will be a dinner where they can meet with key members of the Air Force leadership community.

The dinner will be held at the Ritz-Carlton Hotel, Wednesday, 9 September 1992 at 1830. Dinner will be preceded by a cash bar at 1800. Mr. James J. Mattice, Special Assistant to the Secretary of the Air Force (Acquisition), is the guest speaker.

I hope you will be able to attend this dinner as our guest. Dress will be normal business attire. We would appreciate your response by 2 September 1992 (703-697-7842).

Sincerely,

George Abrahamson

MAIL ROOM

Dear Allan:

I was in your good offices last week for a wonderful catch-up session with Tom Ratchford. I had a tight schedule that day for returning to my son's summer baseball or I would have stopped by and said hello, hoping to catch you for a minute.

What prompts this note is to invite you to speak at a breakfast meeting of the Science Policy Association of the New York Academy of Sciences. If you're game, we would love to have you be one of early speakers this fall, say in September or October. If your schedule this fall is just impossible, it would be fine for you to come any time. And if you'd prefer to speak after the Presidential election, I will, of course, understand.

Tom and I talked a bit about what you might prefer to have as your theme. We concluded that you might be in mood to talk about "national technology policy." If this is a subject you would like to discuss, that would be great. There is much interest in the subject and in your balancing views on the unfolding federal outlook.

Our format is informal. I think it is best for speakers to talk for no more than twenty minutes, and leave another forty minutes for questions. Breakfast begins at 8:00 a.m., and the program runs from 8:30 - 9:30 a.m.

Please tell me if this is an agreeable prospect and we can compare notes on dates.

Before closing, I should say that I think your reports (dated March) about OSTP, and science and technology generally turned out quite well. I picked up a few extra copies from Ginny Rosell in Tom's office and I'm circulating them to a few key people in New York.

Warmest personal regards,

Sincerely,

Rodney W. Nichols

WASHINGTON

September 10, 1992

Dear Rod:

Thank you for your letter of August 7 inviting me to speak at a breakfast meeting of the Science Policy Association sometime in the near future. My apologies for the much belated response.

I would be delighted to address the Association with the understanding that it is always possible that Presidential scheduling may force a change in my plans. Please have your secretary contact Ralph Brescia, who may be reached at 202/456-7116, to arrange a mutually convenient time for me to come to New York.

I look forward to joining you.

Sincerely yours,

A handwritten signature in dark ink, reading "D. Allan Bromley". The signature is written in a cursive, flowing style. The "D" is large and loops around the first part of the name. The "Bromley" part is also cursive and ends with a long, sweeping tail that loops back under the name.

Dear President Diamandopoulos:

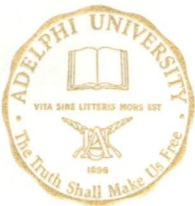

Many thanks for your letter of July 29, which arrived while I was out of the country, in which you invite me to join you for commencements ceremonies on Sunday, May 16, 1993, at 10:00a.m. I am delighted to reserve this time on my calendar and will look forward to the pleasure of receiving a doctor of science degree, honoris causa, from your university at that time.

I shall look forward to learning more of the details concerning your ceremonies as we come closer to the date in question.

Again, my sincere thanks for the honor that you do me and warmest best wishes,
Sincerely yours,

D. Allan Bromley

Dear Dr. Bromley:

In previous correspondence we have discussed the possibility of your accepting a Doctor of Science degree, honoris causa, from Adelphi University at our 1993 Commencement.

I am writing to confirm that Adelphi will, indeed, be pleased to confer this degree upon you during Commencement ceremonies to take place on Sunday, May 16, 1993 at 10:00 a.m. I trust that you will reserve this date on your calendar, with the understanding that final arrangements (including your possible attendance at the formal dinner the evening before) will be re-confirmed as the time approaches.

With continuing appreciation for the service you are rendering to President Bush, and our nation, I remain,

Cordially yours,

Peter Diamandopoulos
President

P.S. I am taking the liberty of enclosing a copy of our 1992 Commencement Program. P.D.
