Executive Office of the President
Washington, DC 20506

Dear Allan:

On behalf of Brian Rushton, President of the Industrial Research Institute, I am pleased to invite you to present the keynote address at an IRI roundtable discussion on R&D issues involved in the current GATT negotiations.

Because of the potential impact of future GATT-related regulations on the growing interaction between the industrial research community and federal R&D agencies, and the growing pressures for closure of the "Uruguay round", we want to schedule a half-day session here at IRI headquarters at the earliest possible time. The dates of July 22, 27, 28, or August 4 are suggested.

The roundtable discussion will involve representatives from the USTR, the Department of Commerce Technology Administration, and the Interagency Committee on Federal Laboratory Technology Transfer, as well as the chief technical officers from several IRI member companies whose CEO's are members of the two USTR industry advisory committees.

We look forward to your assistance in helping us to ensure the timely and effective review of this important issue.

Very best regards.

Sincerely,

Charles F. Larson
Executive Director

MAIL ROOM

Dr. D. Allan Bromley
Assistant to the President
for Science and Technology
Room 358
17th and Pennsylvania Ave., N.W.
Washington, D.C. 20500

Dear Dr. Bromley:

Thanks again for agreeing to participate in our second annual Business Leaders' Symposium on the Presidency, scheduled for 3:30pm (we hope you can arrive as close to 2:30pm as possible to meet briefly with the other panelists), June 25th, at the National Press Club. We are in the final stages of preparing for the PBS television special that will be taped at that event, "Keeping America #1: Business and Presidential Leadership." This letter provides more specifics about your role in the program and how it will unfold.

First, a brief reminder on structure. Our discussion of U.S. competitiveness and how it can be strengthened will be divided into two one-hour panels. You are invited to participate in the first, which will focus on international issues: trade policy and the debate over an American industrial/technology policy.

After brief introductions by moderators Marshall Loeb and Linda O'Bryon, a two-minute, pre-produced video report will set up the discussion. Copies of these video openings will be in your hands by Monday, June 22.

To establish a business perspective, after the set-up Linda or Marshall will then pose questions our five CEO panelists: John Sculley of Apple Computer, Harold Poling of Ford Motor Company, Dwayne Andreas of A-D-M, Theodore Cooper of Upjohn, and Paul O'Neill of Alcoa.

After the CEOs have expressed their views, we will introduce you-- along with Senator Bentsen and Jerry Jasinowski of the National Association of Manufacturers-- and ask you to join the debate by either commenting on what you've heard or by posing a question to the CEOs. We hope you will participate vigorously through the end of the segment.

Here are sample questions that will likely be raised in the panel discussion:

Should the U.S. move away from its traditional postwar support for a relatively free international trading regime to seek more managed trade deals, in which specific bilateral targets are set for trade balances, market shares, and the like? If so, should this be a general strategy or limited to specific products? Why? If you disagree with the need to move toward managed trade, what **should** the U.S. be doing in the trade arena? Be as specific as possible.

How important is the current GATT round to the U.S.? What will be the impact and what is the importance of the North American Free Trade Agreement? Is the world moving toward a system of three trading blocs dominated by Japan, the EC, and the U.S.? If so, will this be good or bad for U.S. industry on balance?

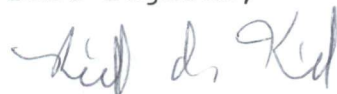

On foreign aid, should the U.S. do as other countries do and tie its foreign aid to purchases of American products? How important is it for the U.S. to help the former Soviet Union reform and revive its economy? What should the U.S. role (and American business's role) in that daunting project be?

The Europeans and Japanese are spending huge sums on projects designed to boost their strength in new technologies (fiber optics, HDTV, the ESPRIT and RACE programs in the EC, etc.). How should the U.S. respond? Is its current technology policy working? If not, how should it change? Do we need more government spending on R&D? If so, where specifically should this investment go? Now that defense spending is on the decline, is there a role for government in helping defense industries shift to commercial markets? Does the U.S. need a civilian DARPA? Does the U.S. need a more coherent industrial policy/strategy? What is the proper role for government in your view? Should the U.S. imitate other countries and allow banks to invest in industries/Do we need to further liberalize our anti-trust laws?

If you have any further questions about the program, you or a member of your staff should call me at (212) 522-4706.

All of us at FORTUNE, the Center for the Study of the Presidency, and the Nightly Business Report are enthusiastically looking forward to this program. We know that, with your help, it will be a great success.

Best regards,

Richard I. Kirkland

THE WHITE HOUSE
WASHINGTON

July 6, 1992

Dear Mr. Poree:

Thank you for your kind invitation to be your guest and participant in the "Journess de l'ANVAR" ~~scheduled for December 10 and 11, 1992, in Nantes.~~

I am happy to accept your invitation but must caution you that occasionally I have to cancel engagements at the last moment due to Presidential scheduling that requires my presence. I sincerely hope this does not happen.

As the time of the forum approaches, my staff will contact you to work out details for the event. The date is on my calendar and I hope that I will be available to be with you and your colleagues during this special occasion.

I am pleased that you thought of me and look forward to the occasion.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "D. Allan Bromley". The signature is fluid and cursive, with the first name "D. Allan" and the last name "Bromley" clearly distinguishable.

Washington, June 16th, 1992

Dr. Allan BROMLEY
Science Advisor to the President
Office of Science and Technology Policy
Old Executive Office Building, Room 360
Washington, DC 20506

Dear Dr. Bromley,

ANVAR, the French government agency for the development of industrial innovation within S.M.E is providing financial support to industrial firms for their technology based development of new product or process, with an annual budget of \$ 283 Millions.

As every two or three years, ANVAR is organizing its national forum, the "Journées de l'ANVAR" which gather industrial leaders, high level scientists, policy makers in order to look at the changing environment in their business.

In 1989 in Strasbourg, the European dimension was the main theme. In 1992, in Nantes, the subject is "Industrial Strategy and Technology Forecasting."

The Forum will be a place where exchanges will take place through general sessions and interactive seminars for S.M.Es on French industrial and economic development within a free trade worldwide market, on major technological developments and on the elements of a growth policy for the next ten years.

This Forum is also a place where business will develop through a Financial Forum for technology based companies, a Technology Exchange Forum, a brokerage event, a European Forum devoted to an economic presentation of member countries of the Eurêka program.

It will be a place of formal and informal contact for industry CEOs, scientists and providers of consulting services. During these 10 and 11 of December, we expect approximately 2000 participants with a strong European presence at the new convention center in Nantes.

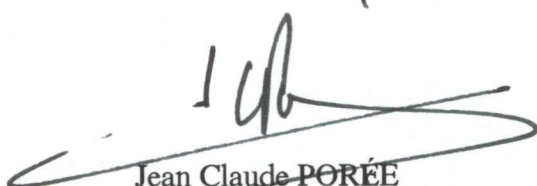

On behalf of Dr. Henri Guillaume, ANVAR's CEO, we would be honored to have you as our guest and participate in the "Journées de l'ANVAR" particularly at the closing plenary session on December 11th together with Hubert Curien, the Minister of Research and Space, Pierre Gilles de Gennes, 1991 Nobel prize winner, and a top European industry executive to discuss issues in the management of technology at a national level in a worldwide context for industry economic growth.

After our meeting today with Dr. Eugene Wong, I am convinced of the positive attention you will give to that proposition.

I am looking forward to hearing from you soon.

Sincerely yours,

Jean Claude PORÉE
Director of International Affairs

Dear Dr. Bromley:

We look forward to your participation this Thursday in Washington in the symposium, "Keeping America Number One: Business and Presidential Leadership," being held at the National Press Club.

Each half of the symposium will begin with a short video background report on the subject to be discussed. The subject of the first half is trade and other international issues; the second half concerns domestic issues that impact U.S. competitiveness -- such as education, the problems of the inner cities and the budget deficit.

Enclosed you will find a VHS tape with these two reports. Their combined time is about five minutes. If at all possible, we encourage you to view them prior to the symposium, as they will set the scene for the discussion that follows.

Thanks for your cooperation, and looking forward to seeing you on Thursday.

Sincerely,

Jack Kahn

Dr. Allen Bromley
Assistant to the President for
Science and Technology
Office of Science & Technology Policy
Old Executive Office Building, Room 360
17th Street & Pennsylvania Avenue, N.W.
Washington, D.C. 20506

Dear Dr. Bromley:

The Los Angeles Department of Water & Power (LADWP), the Potomac Electric Power Company (PEPCO) and the Electric Transportation Coalition (ETC) are sponsoring "ride & drives" of electric vehicles on June 17 & 18, 1992. The Coalition invites you to join us for this unique opportunity to drive (or take a test ride in) this environmentally important "new" technology. Participants will include Members of Congress and their staffs, Administration officials and invited guests.

The Los Angeles Department of Water & Power will showcase the CleanAir LA301 electric powered passenger car at an RFK Stadium parking lot on June 17 & 18. The LA301 is the first production-ready electric vehicle to be developed under the Los Angeles Electric Vehicle Initiative which calls for the introduction of 10,000 electric vehicles onto the streets of Los Angeles by 1995. PEPCO will make its electric commuting car, the Solectria Force available for test drives, as well. In addition, PEPCO will provide an electrically powered van to shuttle participants to and from designated pick-up points.

With the Congress soon to consider the Comprehensive National Energy Policy Act (H.R. 776) which includes important provisions for electric vehicles, and with the present consideration of fiscal year 1993 funds for electric vehicles and electric vehicle-related programs, this planned event, we think, is very timely.

We hope that your schedule will permit you to join us for this unique opportunity. If you or a member of your staff are able to participate on June 17 or 18, would you please contact Emily Voorhees at (202) 298-1813 to schedule a time.

Sincerely,

Kateri Callahan
Associate Director

INVITATION TO SPEAK AT THE INEL COMPUTING SYMPOSIUM - TLW-76-92

Dear Dr. Bromley,

I would like to extend an invitation to you to present the Keynote Address at the Sixth Annual Idaho National Engineering Laboratory (INEL) Computing Symposium at 10:00 a.m on September 22, 1992. The Symposium will be held at the Shilo Inn Convention Center in Idaho Falls, Idaho, September 22 through 24, 1992.

If your schedule permits you to speak at our event, we will be happy to sponsor your travel and per diem costs.

There is a high level of interest at the INEL concerning the High Performance Computing and Communications (HPCC) initiatives. Consequently, we would be honored hear your views on this subject as well as your opinions on the state of science and technology within the United States and what other key initiatives are needed to remain competitive with the rest of the world.

The theme for this year's symposium is "Evolutions in Technology". The symposium will focus on current and future computer and communications technologies. The intent of the INEL Computing Symposium is to insure that our scientists, engineers and administrators keep abreast of new developments that relate to their specific areas of expertise. The majority of the attendees will be from the INEL, other DOE laboratories (Los Alamos, Lawrence Livermore, Argonne National Laboratory, etc.), other government agencies, universities, and private enterprise. The attendance at the last symposium exceeded 1000 professionals.

The INEL is a Department of Energy research laboratory that is a leading center for nuclear safety research, defense programs, nuclear waste technology, and developing advanced energy concepts. Over 13,000 professionals are employed at the INEL. Our laboratory is recognized world wide for it's development of nuclear engineering software to support sophisticated nuclear reactor safety analysis, neutronics, and computational fluid dynamics. We are currently using

supercomputing technology to advance a broad range of government sponsored scientific programs. The enclosed brochures include additional information on the INEL and the area here in Idaho. I have also enclosed the program from the last symposium to give you an idea of the scope of this event.

We are very hopeful that you will participate in our symposium. If you decide to do so, I am confident that you will find it extremely worth your time and effort. Your consideration of this request is very much appreciated.

Thank you.

Sincerely,

Teri Williams, Chair
INEL Computing Symposium

July 6, 1992

Dear Mr. Barron:

Thank you for your invitation of June 8 to attend the Convergence Conference scheduled to be held October 19 through 21, 1992, in Dearborn.

I am happy to accept your invitation for the 21st but cannot attend the VIP reception and dinner on ~~October 19~~. However, I must caution you that occasionally I have to cancel engagements at the last moment due to Presidential scheduling that requires my presence. I sincerely hope this does not happen.

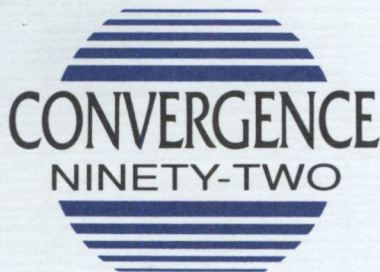

As the time of the banquet approaches, my staff will contact you to work out details for the event. The date is on my calendar and I look forward to the occasion.

Sincerely yours,

D. Allan Bromley

Subject: Convergence-92 Conference

Dear Dr. Bromley,

This is an invitation for you to attend several events at the Convergence Conference in October, 1992. First, and most important, is for you to attend a luncheon at noon on Wednesday, October 21 in O. B. Marx's suite at the Hyatt Regency in Dearborn. You will be advised of the specific location of that suite a few weeks prior to the Conference. Planning discussions for the Wednesday afternoon session will be held during the luncheon so it is important that you attend if at all possible.

You are also invited to attend a VIP reception and dinner at 6 p.m. on Monday, October 19 in the penthouse dining room of the Ford World Headquarters. In addition, you are invited to attend a VIP reception and Conference Banquet starting at 6 p.m. on Wednesday, October 21 at the Fairlane Manor in Dearborn.

Please let me know your plans for attending the above events. I will assume that you will attend the Wednesday luncheon unless I hear otherwise.

For your information, I am enclosing a copy of the preliminary Conference brochure. I look forward to an exciting and informative session Wednesday afternoon.

Sincerely yours,

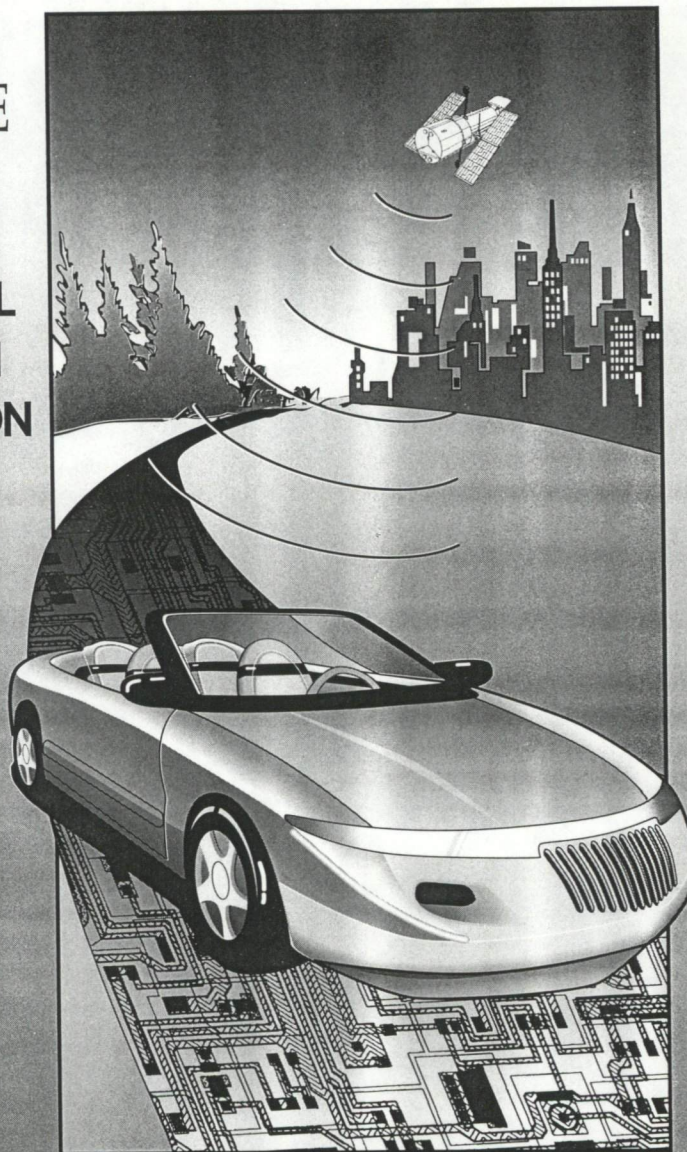

Mark B. Barron

Dr. Allan D. Bromley
Science Adviser to the
President of the United States
The White House
Washington, D.C. 20500
USA

Dear Dr. Bromley,

The Earth Space Institute (ESI) is a new, non-profit organization aiming to become the major focus of dialogue within the space community. The quarterly magazine *Earth Space Review* is published on its behalf. In the pursuit of fostering discussions, ESI is planning to host a number of symposia addressing topics of importance to the future of space activities. The first of these was held in Villars, Switzerland, at the end of March, and addressed the topic: "Role of Space Data in Environmental Monitoring". This conference was successful and a synopsis of the conclusions will appear in the forthcoming issue of *Earth Space Review*.

The second symposium is entitled "A Realistic Approach to International Collaboration in Space". Hosted by ESI, this symposium will be held at Airlie House conference center (brochure enclosed), located in Virginia hunt countryside (about an hour outside of Washington, D.C.), on 27-29 August 1992, prior to the Washington conference sponsored by the IAF and COSPAR. We would very much appreciate it if you could join us for this unique event.

Some of the best and most experienced people working for space agencies, governments, international organizations interested in space and industry are among those invited. Total attendance will be limited to about 40 participants (the press will not be invited). We believe that inviting this small a number of people provides opportunities to share views by promoting dialogue.

Enclosed is a fact sheet providing you with specific information about the agenda, a partial list of people invited, including those asked to come and address us at either lunch or dinner, and other necessary information. Please note that Gordon and Breach, the publishers of *Earth Space Review*, have generously offered to offset half of the meeting costs for invited participants. While some cost remains, we are sure you will agree that it is minimal, considering the importance of the meeting and the beauty of its surroundings.

If you have prepared any papers on this topic in the past and/or you would like to prepare a position paper for this meeting, please send us a copy by 31 July 1992. As part of the meeting package, we will be happy to distribute copies to participants at the beginning of the symposium.

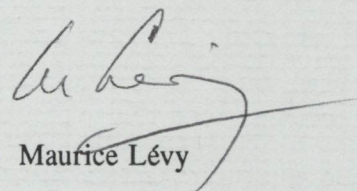

If you are planning to attend the World Space Conference in Washington at the end of August, and have a strong interest in this important topic, we invite you to join us earlier, in the cool and restful countryside, for what should be a fascinating few days.

We look forward to seeing you at the end of August.

Yours sincerely,

Roy Gibson

Maurice Lévy

AN "ISLAND OF THOUGHT"

Established in 1959, Airlie Conference Center was designed as an "Island of Thought," and as a forum for the exchange of ideas in the public interest.

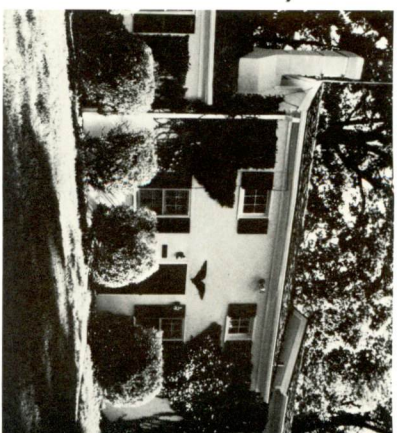

This internationally-known conference center caters to the special needs of a number of outstanding groups, including scientists, students, diplomats, academicians, government officials, and leaders of

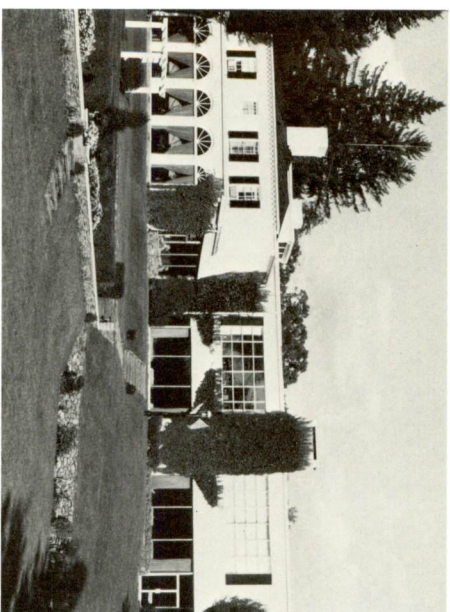

Airlie Foundation

Overnight accommodations are located in the restored cottages and buildings adjacent to Airlie House. And, our 154 guest rooms on campus can be supplemented with the ample accommodations to be found in nearby hotels.

The experienced and friendly staff at Airlie possesses a wealth of expertise in providing the necessary elements for serious and successful confer-

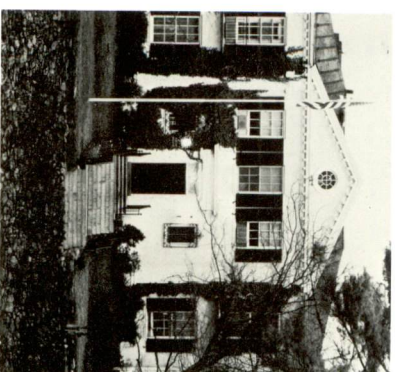

An "Island of Thought"

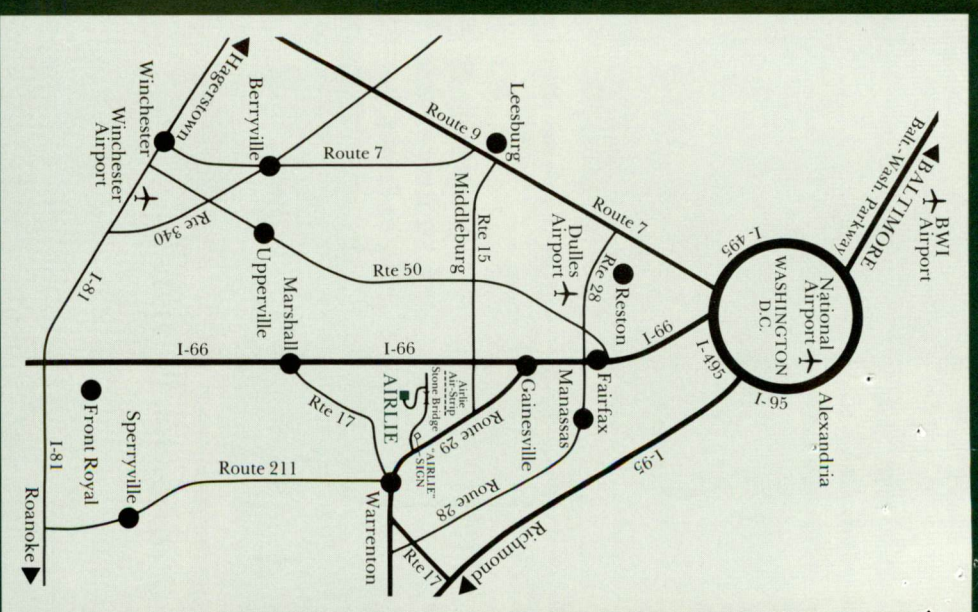

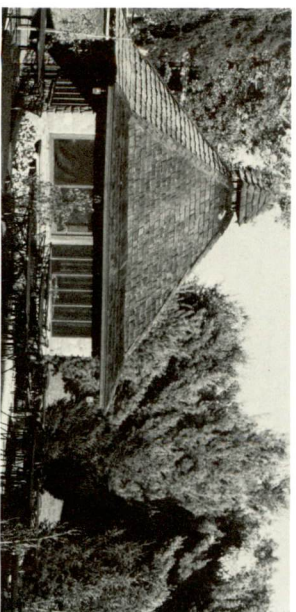

AIRLIE HOUSE

This restored, Georgian-style manor house can provide meeting and dining services for as many as 250 individuals in the largest rooms. A number of

smaller conference rooms assures that groups of all sizes can meet simultaneously—in privacy, and without interruptions.

ences. We suggest that conference directors take the time to visit our campus, for advance planning and scheduling.

TRANSPORTATION

Our campus is located 45 miles west of Washington, D.C., and three miles north of Warrenton, Virginia. Airlie is accessible via Interstate and State highways, as well as from Dulles, National and BWI airports.

Both heliport and private airstrip are available on the campus. By automobile, Airlie is about one hour from Washington, and 45 minutes from Dulles Airport.

Limousine service and chartered buses can be arranged easily for our guests.

EARTH SPACE INSTITUTE – 2ND INTERNATIONAL SYMPOSIUM

A REALISTIC APPROACH TO INTERNATIONAL COLLABORATION IN SPACE

27 – 29 August 1992
Airlie, Virginia, USA

Chairman : **Roy Gibson**

The repercussions of radical economic and political changes over the past two to three years continue throughout the space community worldwide. Notions of international collaboration and cooperation need to be reviewed and perhaps revised.

Invited mealtime speakers: **H. Curien, D. Goldin, N. Jasentuliyana, J.-M. Luton**

PROGRAM OUTLINE

Wednesday, 26 August 1992

- 20.00 • Cocktails and buffet dinner with guest speaker

Thursday, 27 August 1992

- 09.00 – 12.00 • Role of the UN and other international organizations
12.00 – 15.00 • Buffet lunch with guest speaker
15.00 – 18.00 • Cooperation with the Commonwealth of Independent States and East European nations
• Cooperation among space agencies
20.00 • Cocktails followed by the symposium dinner with guest speaker

Friday, 28 August 1992

- 09.00 – 12.00 • Industrial competition and cooperation
12.00 – 14.00 • Buffet lunch with guest speaker
14.00 – 17.00 • Role of developing countries in future international cooperation
• Concluding session
18.00 • Shuttle leaves for Washington

Saturday, 29 August 1992

- 10.00 – 12.00 • Business meeting of the ESI board of directors

VENUE

Airlie House Conference Center

Dear Dr. Bromley:

The Mathematical Association of America greatly appreciated and felt it an honor that you were, once again, the host at the ceremony celebrating the eight winners of the Twenty-first USA Mathematical Olympiad. The reception and dinner at the Department of State was a magnificent culmination of the events honoring these outstanding young people.

Team members for the International Olympiad competition have been chosen and they are the top six, with one alternate, all of whom were honored here in Washington. (Michail Sunitsky chose not to join since traveling to Russia for him was not possible.) They have finished participating in the training session held at the US Naval Academy for the past several weeks. The team will be departing for Moscow this week and will return on July 21. I will inform you of the results as soon as they are available.

On behalf of the mathematical community, I would like to thank you again for assisting in recognizing these talented individuals, who are representing this country, and who will ultimately be this country's strength and future resource.

Sincerely,

Marcia P. Sward
Executive Director

Dear Allen:

On June 10, 1992, at 1:00 p.m., there will be a groundbreaking ceremony for the second permanent laboratory building of the National Renewable Energy Laboratory (NREL) in Golden, Colorado. I hope you will be able to join me, Federal, State and local officials from Colorado, members of the Colorado business community, and others involved in the energy field for this occasion.

This event marks a major milestone for two important reasons. First, it highlights this Administration's record of support for renewable energy -- from conferring National Laboratory status on this facility to the emphasis given renewable energy in the National Energy Strategy. Second, NREL has been a leader in securing private industry partners for the commercialization of technologies developed in our National Laboratories. At this event, we will be announcing Cooperative Research and Development Agreements with Amoco, Coors, the U.S. Advanced Battery Consortium, and Brush-Wellman, which represent over \$35 million in public/private partnerships to advance American industrial competitiveness.

Please confirm your attendance to Ms. Syl Morgan-Smith, NREL Manager of Public Affairs, at (303) 231-7683 or 231-1329 [Fax: (303) 231-1448]. She will be able to provide you with transportation and logistical assistance.

I hope you can attend and look forward to seeing you on June 10th.

Sincerely,

James D. Watkins

Dear Dr. Bromley:

On June 17 & 18, 1992, the Los Angeles Department of Water & Power (LADWP), the Potomac Electric Power Company (PEPCO) and the Electric Transportation Coalition (ETC) are sponsoring "ride & drives" of electric vehicles. The Coalition invites you to join us for this unique opportunity to drive (or take a test ride in) this environmentally important "new" technology. Participants will include Members of Congress and their staffs, Administration officials and invited guests.

The Los Angeles Department of Water & Power will showcase the CleanAir LA301 electric powered passenger car at RFK Stadium parking lot on June 17 & 18. The LA301 is the first production-ready electric vehicle that was developed under the Los Angeles Electric Vehicle Initiative which calls for the introduction of 10,000 electric vehicles onto the streets of Los Angeles by 1995. (Please see enclosed brochure for more information on the LA301 and the City of Los Angeles' plans for "going electric").

PEPCO will make its electric commuting car, the Solectria Force available for test drives. In addition, PEPCO will provide an electrically powered van to shuttle participants from the designated pick-up points to the Stadium for the rides. (Please see PEPCO's enclosed brochure describing electric vehicles).

With the recent passage of the Comprehensive National Energy Policy Act (H.R. 776) by the House of Representatives, which includes important provisions for electric vehicles, and with the present consideration of fiscal year 1993 funds for electric vehicles and electric vehicle-related programs, the planned event is very timely.

We are scheduled to meet at the Department of Energy's Forrestal Building (1001 Independence Avenue) between 9:00 a.m. and 12:00 noon on June 17, to be transported to the Stadium. Shuttles will depart on the hour, 9:00 a.m. being the first trip and 12:00 noon, the last trip. If you or a member of your staff wish to participate, please contact Emily Voorhees at (202) 298-1813 to schedule a time. We hope that your schedule will permit you to join us for this unique opportunity.

Sincerely,

Kateri Callahan

PEPCO has established an electric vehicle program to foster greater public awareness of electric vehicles. This brochure answers some of the most commonly asked questions about the electric vehicle:

Q How does an electric vehicle differ from a gasoline-powered vehicle?

A An electric vehicle is powered by an electric motor instead of an internal combustion engine. The electric motor uses electricity stored in a battery pack in the vehicle.

Q What are the advantages of an electric vehicle?

A Electric vehicles produce almost no emissions. Even when emissions from power plants that generate electricity used to power electric vehicles are factored in, there is still a significant reduction in emissions when compared with gasoline-powered vehicles.

Q Are there any initiatives underway to stimulate electric vehicle development?

A The 1990 Clean Air Act Amendments require our local region to take significant steps to reduce ozone levels over the next 10 to 15 years. One alternative for ozone reduction currently being considered by local governments is the adoption of the California tailpipe-emissions standards. States adopting these standards have a mandatory requirement that 2% of an automaker's vehicles sold in the state by 1998 and 10% by 2003 have no emissions. As many as 500,000 electric vehicles a year could be sold by the middle of the next decade if the Northeast and Mid-Atlantic states, which have significant ozone problems, join California in adopting the tailpipe-emissions standards.

Q Do electric vehicles perform as well as gasoline-powered vehicles?

A Significant developments have been made in electric vehicle technology in recent years. Prototype electric vehicles can compete with many sports cars in acceleration tests. Electric vehicles currently have a range of approximately 60 miles before requiring an eight-hour recharge, making them a good option for running errands or in-town commuting. Further improvements in range and time between recharges will be seen as battery technology advances.

Q What is being done to improve electric vehicle battery technology?

A In January 1991, the nation's Big 3 automakers, the U.S. Department of Energy and a number of electric utilities, including Pepco, through their participation in the Electric Power Research Institute (EPRI), formed the Advanced Battery Consortium to develop new electric vehicle battery technology. The Consortium plans to spend up to \$1 billion over the next 10 years to develop an improved battery for electric vehicles.

Q Is anyone manufacturing an electric vehicle today?

A Almost every major automobile manufacturing company in the world has developed at least a working prototype of an electric vehicle. However, of the major auto manufacturers, only General Motors has announced plans to produce an all-electric vehicle for full-scale production, beginning in 1995. At this time, the only electric vehicles that are widely available are those that have been converted from conventional gasoline-powered vehicles.

Q How do the costs of electric and gasoline-powered vehicles compare?

A Electric vehicles are not currently mass-produced and therefore are not yet competitively priced. Energy costs for electric vehicles are currently lower than for gasoline-powered vehicles. Based on the latest efficiency projections for electric vehicles to be produced by the end of the decade, an electric vehicle driven 10,000 miles a year and charged on the Pepco system will require about \$100 worth of electricity. This is roughly the same yearly amount required to run a refrigerator. Maintenance costs will also be less than for a gasoline-powered vehicle because electric vehicles have fewer moving parts. Electric vehicles will require battery replacement every two to three years.

Q Does Pepco use electric vehicles?

A Pepco is using an electric van on a pilot basis as part of its regularly-scheduled mail delivery between company job sites, and has acquired other electric passenger vehicles that will be used for demonstrations.

**It's clean . . .
It's quiet . . .
IT'S ELECTRIC!**

To schedule an electric vehicle demonstration or a Pepco speaker to talk to your group about our electric vehicle program, please contact Pepco's Electric Vehicle Program at (202) 872-4640.

Los Angeles  Department of Water and Power

Los Angeles is 'going electric' – Turning to electric vehicles (EVs) as a means to clean up the air, reduce noise and decrease dependence on foreign oil.

Los Angeles is both a powerful economic centre with numerous industries and a culturally diverse metropolis of 3.5 million residents.

On any given day, residents and visitors alike can attend premier performances of opera or live theater; shop in the opulent stores on Beverly Hills' Rodeo Drive; gaze at the stars – movie stars – in Hollywood; and watch championship-caliber baseball, football and basketball teams in action.

The city also boasts a diverse topography, which includes desert regions, mountain ranges and 72 miles of resort-like beaches. For the recreation-minded, popular pursuits include surfing, sailing, water skiing, tennis and even snow skiing – the snow is as close as an hours' drive by car.

The car is another LA trademark. With no extensive mass transit system in place, residents rely on their vehicles to see the sights the city offers, and to travel the daily commute to work. Unfortunately LA's dependence on the automobile has also made it known as a city filled with traffic congestion and smog.

Motor vehicles contribute about two thirds of all the pollutants in the Los Angeles Basin. And unless something is done soon, the situation is not going to improve. Projections indicate that the number of vehicle miles travelled in the Basin will increase from an already astounding 275 million per day to 400 million in the year 2010.

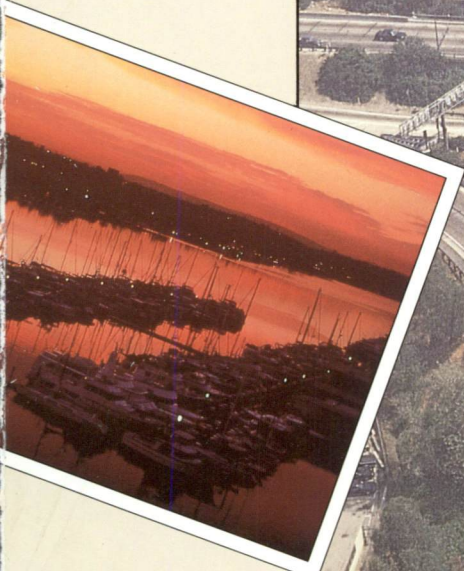

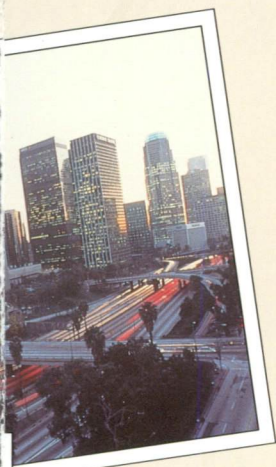

The solution for Los Angeles, and other industrial cities committed to cleaning up the air, is the electric vehicle.

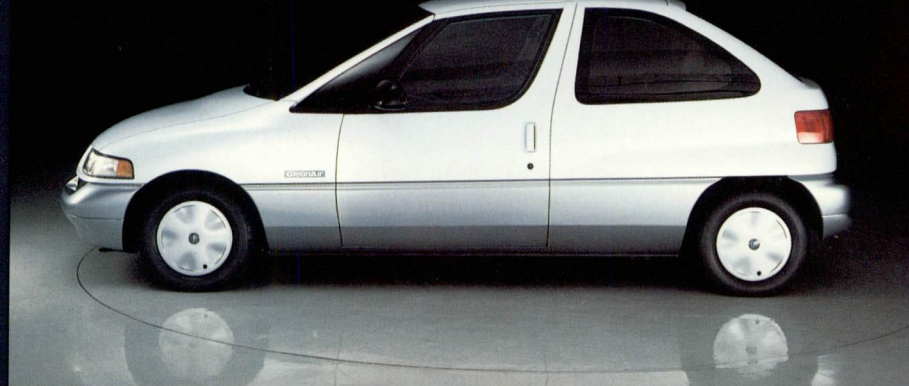

Electric vehicles are 97 per cent less polluting than gasoline-powered cars per mile travelled, even accounting for emissions from power plants due to recharging electric batteries. They can help alleviate the problem of air pollution through advanced, emissions-free propulsion systems. The electricity used by electric vehicles can be generated with minimal environmental impacts, compared to the impact of conventional automobile emissions.

Los Angeles is on the cutting-edge of a developing technology with the potential to improve air quality and energy efficiency. The city's municipal utility, the Los Angeles Department of Water and Power, is taking the lead in an aggressive initiative to bring 10,000 electric vehicles into Los Angeles by 1995. The Los Angeles Electric Vehicle Initiative, as it is called, began in January 1989 with an international call for proposals by a Los Angeles councilman. Over 200 companies and agencies worldwide responded.

From these, a Swedish-based company, CleanAir, was selected to produce an all new electric powered passenger car, the LA301.

LA301 Electric Passenger Car

The LA301 is a new electric car with advanced environmental performance especially designed for the Los Angeles Initiative program. The CleanAir LA301 is a spacious four-seater powered by clean, quiet electrical energy giving acceleration, range and speed adequate for city and freeway driving in Southern California.

Very low emissions are achieved through high energy efficiency. Every possible design aspect of this new car – aerodynamic body styling, especially developed low rolling resistance tires, a high efficiency, two-speed automatic transmission and an advanced electronic powertrain management system are aimed at maximum energy efficiency.

Battery electric power can be used for all short trips. In fact statistics show that 90 per cent of all trips in Los Angeles are under 40 miles (65 Km). Extended driving range is available for longer journeys through the use of a gasoline auxiliary engine.

Washington, DC 20506

Dear Dr. Bromley:

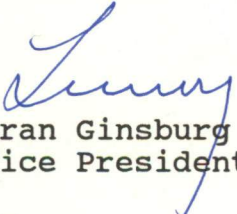

Please join us at the annual Weizmann National Gala on Sunday, October 25th, at the Waldorf-Astoria Hotel in New York City. We sincerely hope that you will participate as an honored guest as we come together to celebrate the vitality and achievements of the Weizmann Institute of Science. The focus of the Gala is environmental research at the Institute.

Gershon Kekst, former President and Chairman of the American Committee for the Weizmann Institute of Science, will be honored for his continuing commitment and inspirational leadership. This exciting evening will bring together outstanding scientists, sparkling entertainment, and approximately one thousand supporters of the Weizmann Institute. Your presence is very important to us.

We will be pleased to reimburse the cost of travel for one person and hotel room for two people for the night of October 25th. Please mark the date and return the enclosed card as soon as possible, so that we can make appropriate arrangements for you.

I look forward to greeting you on October 25th.

Cordially,

Fran Ginsburg
Vice President

Old Executive Office Building
Suite 358
17th and Pennsylvania Ave., NW
Washington, DC 20506

Dear Dr. Bromley:

A symposium entitled "The Earth, the Heavens, and the Carnegie Institution of Washington: Historical Perspectives After Ninety Years" will be held on June 15-17, 1992 at the Institution's Administration Building at 1530 P Street, NW. For three days, current and retired staff scientists, as well as historians of science, will discuss some of the most significant contributions that the Institution has made to the Earth Sciences and Space Sciences. We hope you will be able to attend at least part of the program.

You are especially invited to join the symposium attendees at a reception on Monday evening, June 15, from 5:30-7:30 p.m., on the Terrace at the Broad Branch Road Campus, one block south of Military Road at 32nd Street, N.W. The exact address is 5241-51 Broad Branch Road. Should you have any questions or need additional information, please phone Susan Vasquez at (202) 387-6403.

Yours truly,

Dr. Gregory A. Good

HISTORY OF SCIENCE SYMPOSIUM, 15-17 JUNE 1992

"The Earth, the Heavens, and the Carnegie Institution of Washington"

Tentative program, still subject to change:

Monday Morning:

8:30 A.M. Registration, CIW administration building

9:00 A.M. Maxine Singer, president, CIW

I. Early Years: Founding the CIW and Defining Geophysics

9:30 A.M. "Charles Doolittle Walcott, Andrew Carnegie, and the Founding of the CIW," Ellis L. Yochelson (Smithsonian Institution)

10:00 A.M. "Development and Promotion of the Initial Scientific Program for the Geophysical Lab," Hatten S. Yoder, Jr. (Geophysical Laboratory)

10:30 A.M. "A Separate Realm: Terrestrial Magnetism in 1900 and the Founding of the DTM," Gregory A. Good (West Virginia University)

11:00 A.M. "Vilhelm Bjerknes's Duty to Produce Something Clear and Real in Meteorological Science," Ralph Jewell (University of Bergen, Norway)

Commentary: Nathan Reingold (Smithsonian Institution)

Monday Afternoon:

II. In the Field: The CIW and Expeditions

1:00 P.M. "The Breadth, Height, and Depth of Geoscience at the CIW," Gregory A. Good (West Virginia University)

1:30 P.M. "Climate and History: Raphael Pumpelly's Geoarchaeological Expeditions to Russian Turkestan, Peggy Champlin

2:00 P.M. "The S-21 Submarine Expedition: Collaboration Across the Oceans--and Under Them," Naomi Oreskes (Dartmouth College)

2:30 P.M. "Amundsen and Edmonds (DTM): Entrepreneurial and Institutional Exploration," Sam Silverman (Boston College) and Marion Edmonds Smith (Stanford University)

Commentary: Ronald Doel (American Institute of Physics)

Tuesday Morning:

III. The Heavens: Mount Wilson

9:00 A.M. "Sharing a Mountaintop: George Ellery Hale and Charles Greeley Abbot's Solar-terrestrial Research," Ronald Brashear (Huntington Library)

9:30 A.M. "A Fox Raiding the Hedgehogs: Henry Norris Russell's Summer Appointments at Mount Wilson," David DeVorkin (Smithsonian Institution)

10:00 A.M. "Converting an Hypothesis into a Research Program: T.C. Chamberlin,

his Planetsimal Hypothesis, and its Effect on Research at the Mount Wilson Observatory," Norriss Hetherington (Berkeley)

10:30 A.M. "Women and Women's Work at Mount Wilson Observatory to 1940," John Lankford (West Virginia University)

Commentary: Owen Gingerich (Harvard University)

11:30 A.M. "Archival Sources for the History of the Geosciences," Deborah Day (archivist, Scripps Institution)

Tuesday Afternoon:

IV. Sounding the Ionosphere

1:00 P.M. "The Big Story: Tuve, Breit, and Ionospheric Sounding, 1923-1927," C. Stewart Gillmor (Wesleyan University)

1:30 P.M. "Building a Washington Network for Atmospheric Research," Bruce Hevly (University of Washington)

2:00 "Lloyd Berkner, Ionospheric Research, and the Cooperative Ideal: DTM, 1933-1939," Alan Needell (Smithsonian Institution)

2:30 P.M. Panel Discussion by Presenters

V. The DTM Cosmophysical Observatories: Huancayo and Watheroo

3:15 P.M. Video: "Field Station: The Watheroo Magnetic Observatory"

3:30 P.M. "Rise and Fall of the Watheroo Magnetic Observatory," W.D. Parkinson (University of Hobart)

4:00 P.M. "The Huancayo Transfer and Geophysics in Peru," Alberto Giesecke (CERESIS, Peru)

4:30 P.M. "Early International Cooperative Geophysical research in Peru," Mateo Casaverde (former president, Instituto Geofisico)

Wednesday Morning:

VI. Post-War Geophysics at the DTM

9:00 A.M. "Chopping and Changing at the DTM: M.A. Tuve, Rock Magnetism, Isotope Dating, and the Direction of Scientific Research," Homer Le Grand (University of Melbourne)

9:30 A.M. "Merle A. Tuve's Post-War Geophysics: Early Explosion Seismology," Thomas Cornell (Rochester Institute of Technology)

10:00 A.M. "A Canadian Life with Geomagnetism: The Research of Frank T. Davies," W.O. Kupsch and J.E. Kennedy (University of Saskatchewan)

10:30 A.M. "Early Isotope Geology: Dating the Earth," Thomas Aldrich (DTM)

Wednesday Afternoon:

VII. Early Super Pressure Research

12:30 P.M. "The Road to Super Pressure Research at the Geophysical Lab," Robert Hazen (Geophysical Laboratory)

Commentary: Hatten S. Yoder, Jr., and F.R. Boyd, Jr.

(continued)

VIII. History of the Geosciences

2:00 P.M. panel discussion: Nathan Reingold (Smithsonian Institution), Spencer Weart (Center for History of Physics, American Institute of Physics), M. Charles Gilbert (History of Geophysics Committee, American Geophysical Union)

Psychology is about all of us.

Over 30 exhibits and activities, on view at the Smithsonian Institution Experimental Gallery from May 18-September 9, 1992, invite visitors to explore psychology in action:

- ▼ thinking
- ▼ remembering & forgetting
- ▼ problem solving
- ▼ feeling
- ▼ getting along with each other
- ▼ growing up and growing older

Visit these special areas of the exhibition:

Playspace. Discover the joys of play in this enclosed area specially designed for children four and under and their adult companions.

Discovery & Browsing Area. Explore psychology through enjoyable activities and puzzles and browse through books in this quiet sit-down area.

The Experimental Gallery is a Smithsonian Institution space for exhibit-makers to create, explore, innovate, and experiment with exhibitions. The psychology exhibition is experimental because it invites people of all ages to experience, touch, and examine psychology in a museum environment.

Join us on June 23!
