OFFICE OF THE DIRECTOR

June 26, 1991

The Honorable Allan Bromley
Assistant to the President
for Science and Technology
OEOB Room 360
Washington, DC 20500

Dear Mr. Bromley,

My client, Thorne Auchter, Director of the Institute for Regulatory Policy (IRP), spoke with you at the National Safety Council's forum on risk assessment earlier this week. You may recall, from 1981-84 Thorne served as Assistant Secretary of Labor--Occupational Safety and Health Administration. At that time, Thorne became very interested in risk assessment and risk mangement. Thorne and I would like to request a brief meeting to discuss a major new project in this area.

The IRP is the newest public interest arrival in Washington and as its first project released the enclosed document, which includes a draft proposal for a Presidential Executive Order on risk assessment. Last Wednesday, Thorne and I met with Al Hubbard, Dave McIntosh and John Cohrssen of the Council on Competitiveness. Both the document and the proposal were well-received.

I hope you will be able to meet with Thorne and me on what I believe will be a very significant project, with far-reaching implications. I'll give you a call in the next few days to see if you might be available. Thank you for your courtesy and cooperation.

With best wishes,

Wayne Valis

July 2, 1991

The Honorable D. Allan Bromley
Assistant to the President
for Science and Technology
Old Executive Office Building
17th Street, & Pennsylvania Avenue, N.W.
Washington, D.C. 20506

Dear Dr. Bromley:

On behalf of the American Electronics Association, I would like to invite you to meet with the AEA Science and Technology Committee on Friday, July 26 at the Association's offices in Washington, D.C. The Committee would like to discuss working with OSTP to advance U.S. technology and manufacturing competitiveness.

The Committee, which is comprised of chief scientists and technologists from key electronics industry product areas, was created last year to guide AEA's science and technology public policy activities and provide policy makers with insights of senior electronics industry executives. AEA represents over 3300 U.S. electronics and information technology companies.

Members of the Science and Technology Committee are particularly interested in learning of your plans for coordinating and building upon the Administration's science and technology agenda, and the roles you envision for the National Critical Technologies Institute and the FCCSET Committees in these plans. We would like to discuss ways in which AEA can support OSTP's efforts and work with the Administration to advanced U.S. technology and manufacturing global leadership.

The Committee would like to meet with you for approximately one hour and our preference is for you join us at 8:30 a.m. The Committee's agenda is flexible, however, and we can accommodate your schedule anytime between 8:30 a.m. and 3:00 p.m. on July 26. AEA staff will contact your office to make the necessary arrangements.

We look forward to meeting you.

Sincerely,

Gilbert F. Decker
Chairman,
AEA Science and Technology Committee

Washington, D.C. 20506

Dear Dr. Bromley:

On July 10, 1991, Dale Miller, President of Sandoz Crop Protection Corporation, will be in Washington for a National Agricultural Chemicals Association Board Meeting. Although Sandoz produces many traditional crop protection chemicals, we are very much involved in the development of biotech crop protection products.

We would appreciate having an opportunity to meet with you to discuss biotechnology issues. We agree with the principles contained in the Council on Competitiveness' Report on National Biotechnology Policy. We do believe, however, that current guidelines followed by the agencies place unnecessary obstacles in the way of the products of biotechnology. If it is convenient, I would like to suggest that we meet at 4:00 p.m. in your office.

I look forward to hearing from you soon.

Sincerely,

Mike

Dear Allan,

I will be coming into the Washington area on August 25-27 for a meeting with DOE on a fusion contract we are working on. Would you be free any of those evenings for a purely social dinner to chat about old times and family etc.

I am still at Bechtel and expect to stay in California until next spring when we are planning to settle in Chapel Hill North Carolina closer to our children and grand children. All the details can wait until we get together.

Looking forward to seeing you.

Best regards,

Len

Len Goldman

THE WHITE HOUSE

WASHINGTON

July 9, 1991

Dear Len:

This is a belated reply to your letter of June 18 which arrived while I was prowling about the middle of Siberia.

It is unfortunate but I expect to be out of the country from the 16th of August through the 3rd of September. This is a time when government essentially shuts down and when everyone takes vacation. In my case, this will be somewhat unique because it will be the first time that both my children and their spouses, and children, will get together at our place up in Canada for two weeks. That being the case, I am afraid that I will not be available when you are in the Washington area and I very much regret that I will not be able to get together with you.

Our schedules are showing an alarming tendency to be orthogonal and I hope that we can do something about that on your next visit.

In the meantime, my very warmest best wishes to both you and Lee.

Sincerely yours,

Allan

OFFICE OF THE DIRECTOR

June 19, 1991

Dr. Richard A. Holmes
Director, Nuclear Medical Services
Harry S. Truman Memorial Veterans Hospital
800 Hospital Drive
Columbus, Missouri 65201

Dear Dr. Holmes:

I am concerned that NTRI's proposed plan to assist the Society of Nuclear Medicine and the Department of Energy in the solution of the nation's critical problem in isotope production, research, teaching, and training may have been misinterpreted. I am also disappointed that possible criticism by the community may have been expressed regarding the assistance provided by national laboratories, industries and government to NTRI in the preparation of our proposal.

Technology transfer to the public and private sector is a mandate of the national laboratories. Technical advice and market needs from industry and the medical community were considered in our studies. In the final case, the policies and actions of NTRI are the responsibility of the NTRI management. It is inappropriate to attribute NTRI's management decisions to its advisors and consultants. Several hundred thousand dollars have been expended in this effort, and will continue to be expended to further the development of an NTRI facility and assist the community to refine a solution to the national problem.

NTRI wholeheartedly supports the Society's request to Congress for $2 million of emergency funding to provide conceptual study to determine the immediate and longer-term needs in isotope production, research, training, and education to advance those disciplines that support nuclear medicine. NTRI will convey its support of the funding request to the Texas congressional delegation. We also believe that it may be appropriate to go beyond the current request for funding the study by also seeking interim appropriations to enhance the current isotope production capabilities at the seven existing facilities within the Department of Energy. A strengthening of existing DOE facilities would provide regional access and production redundancy to support the national facility when it comes on line. A national facility funded by Congress is still five to seven years in the future.

The U.S. Department of Commerce publication on Emerging Technologies, published in January 1991, indicates that the area of medical devices and diagnostics is one of the ten major emerging technologies. The DOC estimate that current annual U.S. sales will be approximately $8 billion by the year 2000, and $16 billion worldwide, further indicates that there will be rapidly increasing pressure on radioisotope production, research and development, and education and training. Strengthening existing regional facilities might lead in turn to future regional, dedicated isotope facilities that will help to supply the demands in production, education, and research.

Meanwhile, NTRI is working toward having its facility on-line in 30 to 36 months. At least 12 months prior to completion of the facility, NTRI plans to solicit proposals for use of the facility. It is proposed that members from the NBTF Task Force, government, industry, and the academic community would serve as a peer review program committee to assist in establishing priorities.

As we move toward completing our plans and financial arrangements, I would like to invite you, members of the NBTF Task Force, the Department of Energy, and others to meet with our Scientific Advisory Board at the NTRI facility site in the Dallas-Fort Worth-Denton Metroplex to discuss these plans and our proposed schedule. At this time, I anticipate a meeting in mid-July. I would appreciate an indication of your willingness to participate in this meeting.

I look forward to your early response.

Sincerely,

I. Lon Morgan

June 19, 1991

Dr. Allan Bromley
Assistant to the President
for Science and Technology.
Old Executive Office Building
Washington, D.C. 20506

Dear Allan:

On a along and delayed flight from Houston to Baltimore Washington International last evening, I finally had sufficiently plowed through the briefcase to take the time to pick up the recent special issue of *Fortune*, "The New Century: People, Ideas and Technologies Making the U.S. More Competitive Now -- and For the Year 2000."

I was particularly interested in the article "The Thaw in Washington," and the short report on you as one of the "25 People Who Help The U.S. Win." There was another interesting article, "High-Level Support," that made reference to the work that my good friend Mike Armacost is doing in Japan as a vigorous advocate of U.S. business there. Suzanne and I visited Mike and Bonnie just a year ago at this time -- my first trip to Japan. Mike has been a friend, going back to 1969-70, when we served as White Hose Fellows in the Nixon Administration, with he at State and yours truly at OMB.

Allan, I have certainly been very much aware of your real impact in Washington, particularly with reference to the Bush Administration's policies on technology. I certainly cannot vouch for the accuracy of what *Fortune* noted in its report on this subject, but certainly the process of using government to encourage targeted, competitive R&D by business, is absolutely essential for the U.S. to be competitive in the 1990s.

The issue of research and its essential definition for improving the American competitive position, may be as important a domestic <u>and</u> foreign policy issue that can be possibly conceived for the 1990s and the 21st century.

Concurrent with that broad perspective, it is essential that some sort of tax recognition, for rewarding companies that do increase their R&D component, be put on the books. The Congress simply <u>must</u> wake up and deal with this issue as I have heard you define it, going back to the days when we discussed this subject over dinner at Dan Colussy's UNC Board meetings

Allan, this letter may not get to your desk before you speak next Wednesday's (June 26) luncheon honoring Don Langenberg, the new Chancellor of the University of Maryland System. I will be one of the guests at that occasion, and have cleared my calendar because of your being the speaker. I hope that you will focus some of the points developed in the *Fortune* articles.

And, if you can take the time either before or after the luncheon, I will give you the background on the few minutes that I would like to have with you sometime this summer or early fall, to meet Michael Cromwell, President of ManTech Environmental Corporation. Mike is one of the brightest young CEOs in the country -- and his company is at the cutting edge of environmental technology and applied research. He has some perspectives that I believe fit right in to what you are talking about, and the gospel of this Administration, relative to American business R&D and getting the competitive edge that we must have if this country is going to remain the industrial and technological power that we may be in danger of losing. Inherent in much of what you are doing is the whole question of environmental technology and research -- someway in which the American technological experience and talent can be brought to bear on environmental issues beyond the too often used "easy way out" of more regulations.

I look forward to seeing you briefly next Wednesday and setting the stage for what I know will be an interesting and worthwhile, well-targeted session later this summer or early fall. All the best and congratulations on shaking up the federal bureaucracy. We are fortunate in having a President who seems to be willing to support your efforts in doing just that.

Sincerely,

George S. Wills

P.S.: It once again occurs to me that the policy issues for which you are taking this important leadership role are appropriate for the policy-level CEO roundtable format of the Aspen Institute. I recall that we discussed this, very briefly, as you began your new role with the Administration. The issue of American competitiveness, particularly as related to R&D, could well find the type of assessment and action-oriented process within the Aspen Institute that would be helpful. June 19, 1991

Dear Dr. Isaacs:

Thank you for your letter of June 12 requesting a meeting on national security concerns. I believe, as I'm sure you do, that the scientific community has a great deal to contribute to our nation's security and can take pride in those contributions.

As I am certain you can appreciate, my calendar is extremely full, so it is difficult to say when we might find a mutually convenient time to meet. However, I would welcome receiving your views and those of the Council as matters arise which you believe I might find of interest. Please feel free to write me here and to send us your publications.

Sincerely,

358 Old Executive Office Building
17th and Pennsylvania Avenue, NW
Washington, D.C. 20506

Dear Dr. Bromley:

Council for a Livable World Education Fund would like to request a meeting with you to discuss national security issues and the role that the scientific community can play in formulating U.S. positions on critical security questions.

While most of our Board members are in Boston, we would be glad to set a time at your convenience.

We would proposed that the following distinguished scientists attend the meeting:

Dr. Dudley Herschbach - Harvard University
Dr. Edward Purcell - Harvard University
Dr. Matthew Meselson - Harvard University
Dr. George Rathjens - MIT
Dr. Jerome Wiesner - Past President, MIT

Please call me at the Washington, D.C. office in order to work out the details.

Yours sincerely,

John Isaacs

Dr. Allen Bromley
President's Science Advisor
The White House
Washington, DC

Dear Dr. Bromley:

For the last eight years I have chaired the Los Alamos National Security Advisory Board. I would like to have a 10-minute appointment to discuss how Los Alamos National Laboratory might assist your office through providing highly qualified and objective analyses of such major but unresolved and contentious issues as (among many others)

- Global warming
- Ozone depletion
- Agricultural pesticides
- Acid rain
- Nuclear power
- The anti-drug war.

2:30 today

Unless technically sound perspectives on these issues are soon developed, special interest groups with the ear of Congress will establish programs and regulations that are both enormously expensive to the country's economy and largely ineffective.

I will be in Washington the afternoon of Thursday, 20 June and all day Friday, 21 June. Meanwhile I can be reached at ~~(213) 208-6543.~~ 703/ 521-0271 on June 21

The attached vita summarizes my credentials.

Sincerely,

Bill McMillan

OFFICE OF THE DIRECTOR

June 10, 1991

The Honorable Dr. Allan Bromley
Assistant to President for Science and Technology
Director
Office of Science and Technology Policy
OEOB Room 360
17th & Pennsylvania Ave., NW
Washington, DC 20506

Dear Dr. Bromley:

More than ever before, policymakers need easy access to reliable information as they deal with challenging environmental, resource and economic issues. Toward this end, the Council on Environmental Quality (CEQ) is convening the Interagency Committee on Environmental Trends and invites participation from your agency.

Our experience and continuing interest in this area stems from several sources. CEQ is required by the National Environmental Policy Act of 1969 to:

-- Document changes in the natural environment, and accumulate necessary information for a continuing analysis and interpretation of these changes or trends;

-- Assist the President in the preparation of an annual Environmental Quality Report which includes data on the status, condition, and trends in the environment;

-- Analyze and interpret such information for policy purposes and compile and submit to the President studies relating to such conditions and trends; and

-- Review and appraise the various environmental programs and activities of the Federal Government and make recommendations to the President with respect thereto.

Over the years, CEQ has performed these duties with interagency advice and assistance. Most recently, CEQ published its 21st Annual Report, which included 141 tables and graphs depicting environmental trends, all compiled or updated from an array of federal data sources.

Clearly, environmental decisions must be based on accurate and timely information. Moreover, given the President's direction that environmental and economic concerns be appropriately balanced, the need to integrate scientifically-sound environmental data with other types of data will continue to grow.

Recycled Paper

CEQ encourages your agency's participation on the Interagency Committee on Environmental Trends. The objectives are:

-- To assist in the assessment and reporting of the status and trends of the nation's environmental quality to support environmental policymaking;

-- To facilitate the coordination and integration of environmental data among the numerous agencies that collect and use such data; and

-- To develop recommendations to CEQ on ways to improve the adequacy, availability, analysis, and display of environmental data for policymaking.

We are planning a meeting of the interagency committee on Tuesday, July 9, 1991, from 9:00 a.m. to 11:00 in the CEQ Conference Room, 722 Jackson Place, NW. The meeting will include a brief review of past and ongoing environmental data activities and a discussion of the committee's procedures and agenda. Agency representatives will have an opportunity to propose issues for discussion at this or subsequent meetings.

For the initial formative sessions of this committee, it would be most helpful to have agency representatives who have a working knowledge of your data programs. For background information, I have enclosed the list of federal agencies that have cooperated with CEQ in the past on data issues, as well as others whom we have identified as potentially interested in the work of this interagency committee. An appropriate mechanism will be developed to ensure that any policy-level issues are brought to the attention of policy staff in your agency.

We look forward to a productive meeting on July 9. For further information and to designate a representative from your agency, please contact Mr. Dick Olson or Col. Frank Skidmore of my staff at 202-395-5750 (fax: 202-395-3744). We would appreciate a reply by June 25, 1991, and will send further information in preparation for the meeting.

Thank you for your interest and assistance.

Sincerely,

Michael R. Deland,
Chairman

1 This list of agencies was compiled from lists of individuals and organ-izations that have provided environmental data for CEQ reports or have participated in associated planning activities or have indicated an interest in participating on the Interagency Committee on Environmental Trends. The list will be updated as new groups are identified.

2 Active on 1989 Interagency Advisory Committee on Environmental Trends.

Recycled Paper

total coal production advanced from 25 percent at the beginning of the decade to 32 percent at the end. Low-sulfur subbituminous coal accounted for most of the output from this region.

We do not argue with the importance of developing improved technologies for using domestic, low-rank coal. However, we must point out that a basic premise of DOE's coal RD&D program is that the advanced technologies it supports be able to use the full spectrum of the nation's coal supplies.

The scale-up of the mild gasification coal refinery concept described on page 10 of this testimony is a good case-in-point. While the facility will be built in Illinois, during its 3-year test program coals from Illinois, Wyoming and West Virginia will be tested. Similarly, many other R&D projects, as well as those co-sponsored under the Clean Coal Technology Program, are intended to test a broad representation of both eastern and western coals during their operational phases.

While we do not object to the goal of expanding the use of low rank coals, we believe the most effective means for doing this is to pursue technologies like the above example that are sufficiently flexible to process all types of coal.

THE WHITE HOUSE

WASHINGTON

June 5, 1991

SCHEDULE PROPOSAL

TO: Dr. D. Allan Bromley
Assistant to the President for Science and Technology and Director of the Office of Science and Technology Policy

THROUGH: David F. Demarest, Jr.
Assistant to the President for Communications

Debra R. Anderson
Deputy Assistant to the President and Director of Intergovernmental Affairs

FROM: William J. Canary, Jr.
Special Assistant to the President for Intergovernmental Affairs

REQUEST: An appointment with Dr. Bromley, Assistant to the President for Science and Technology, to discuss concerns regarding technology transfer and data transfer from the federal level to the local governments.

PURPOSE: To continue the Administration's commitment to working directly with local government officials on issues facing the counties across America and to further strengthen the partnership between the two levels of government.

BACKGROUND: NACo is the only national association representing county government. Membership consists of more than 35,000 county officials from approximately 3,000 counties. NACo's purposes and objectives are:

* Serve as a liaison with other levels of government;

* Improve public understanding of counties;

* Act as a national advocate for counties;

* Help counties find innovate methods and solutions for meeting the challenges they face.

PREVIOUS PARTICIPATION: None

DATE AND TIME: June 18 or June 20

LOCATION: TBD

PARTICIPANTS: NACo has indicated that four of their members would like to attend the proposed meeting. Those individuals are:

Kaye Braaten
Commissioner
Richland County, North Dakota
and First Vice President of NACo

Herb Stout
Commissioner
Wake County, North Carolina

John Antennucci
President of Planned Graphics
Kentucky

Jim Golden
Director of Research
NACo

President's Science Advisor
Director, Office of Science
and Technology Policy
Executive Office of the President
Old Executive Office Building
Washington, D.C. 20506

Dear Allan:

Walter Massey and I have been discussing the growing concerns about the implications of recent events regarding indirect costs. I am writing to invite you to join us in an informal meeting and dinner on April 16, 1991, to discuss this issue. We will convene at 4:30 p.m. in Room 180 of the National Academy of Sciences Building, and continue with cocktails and dinner, beginning at 6:00 p.m. in the Executive Dining Room. Invitees to this meeting, sponsored by the Government-University-Industry Research Roundtable, include several university presidents and senior federal officials.

As we are all aware, the issue of university indirect costs is now receiving critical public attention. The purpose of our meeting will be to exchange views regarding the present controversy and then to lay out the larger, long-term budgetary and regulatory implications. We believe that a wide-ranging, informal discussion can be useful in generating ideas for resolving some of the underlying problems associated with federal funding of academic research.

I hope that you will be able to join us for this important meeting.

Sincerely,

Frank

OFFICE OF THE DIRECTOR

May 6, 1991

Dr. D. Allan Bromley
Executive Office of the President
Office of Science and Technology
Washington, DC 20500

Dear Dr. Bromley:

On behalf of the Board of Directors of the Council of Colleges of Arts and Sciences, I write to ask that you give my colleagues and me in the membership of the Board some time during the afternoon of Friday, May 31. We would like to spend an hour or so with you exploring your perceptions of the challenges and opportunities before those of us with administrative responsibiliy for Colleges of Arts and Sciences in this country's public and private universities and colleges. (The Council we serve represents about 60% of this country's four-year and above public institutions of higher education as well as a significant number of their private counterparts. I have enclosed membership and related descriptive material about the Council.)

We can arrange to come to your offices on Friday afternoon, or, if it is convenient for you, we would be very pleased to have you join us at the Holiday Inn Crowne Plaza at Metro Center, 775 12th Street, NW, where we will be meeting.

The Council's Executive Director, Dr. Richard Hopkins, or his assistant, Dr. Melinda Nelson, will call your offices soon to follow this letter with arrangements for the proposed meeting. I sincerely hope you will make time for us, as we would appreciate an opportunity to meet with you.

Cordially,

G. Micheal Riley, Secretary-Treasurer
and
Dean, College of Humanities
The Ohio State University

(614) 292-1882

Objectives and Eligibility

The Council of Colleges of Arts and Sciences (CCAS), founded in 1965, is a national association of baccalaureate degree-granting colleges and universities whose purpose is to sustain the arts and sciences as a leading influence in American higher education. The Council serves as a forum for the exchange of ideas and information among deans of arts and sciences representing the member institutions and as a representative of the liberal arts at a national policy-making level. The Council further seeks to support programs and activities to improve the intellectual stature and public understanding of the disciplines of the arts and sciences.

Arts and sciences colleges represent more than half of the undergraduate instruction offered at their institutions and are responsible for a wide spectrum of master's and doctoral degree programs. The CCAS members, therefore, represent the largest component of American higher education in publicly and privately supported universities and colleges; and the organization is concerned with the problems, possibilities, and interests of these colleges.

Accredited colleges and universities that grant baccalaureate degrees in the arts and sciences are eligible for membership. The dean of an arts and sciences unit at a member institution is the voting representative on the Council. Currently, the membership includes more than 530 deans of colleges of arts and sciences at some 368 institutions. The Council is made up of the majority of eligible public institutions in the United States. Private colleges and universities now are eligible for membership.

Policy is affirmed by the CCAS officers and board of directors, who are elected each year during the CCAS annual meeting. The nine board members serve staggered three-year terms.

CCAS By-Laws

ARTICLE I BOARD OF DIRECTORS

There shall be a Board of Directors consisting of nine persons elected from and by the representatives of the member institutions for three-year terms each plus four *ex officio* members as specified in Articles II, III, IV, and V. Board members shall be the administrative heads of those educational units eligible for membership or deans of Arts and Sciences.

Election to the Board shall take place at the Annual Meeting; a plurality of those present and voting shall be necessary for election.

Vacancies on the Board caused by resignations may be filled by appointment by the President in consultation with the Board, such appointees to hold office until the next Annual Meeting.

The Board shall establish its own procedures and rules of order for its meetings. It shall meet at the Annual Meeting and at other times at the direction of the President. It shall act for the organization on all matters not specifically delegated to the entire Council.

It is a responsibility of the Board to arrange for the Annual Meeting.

The newly elected members of the Board shall take office at the close of the Annual Meeting at which they were elected.

ARTICLE II PAST PRESIDENT

The Immediate Past President shall be an ex officio member of the Board. If he/she does not remain qualified to serve (e.g., if he/she leaves the position of Dean), the office will be vacant.

ARTICLE III PRESIDENT

The President shall be an ex officio member of the Board. He/she shall succeed from the position of President-Elect. The President shall preside at meetings of the Board and at business meetings of the Council. In the absence of the President, the President-Elect shall act in his/her stead. If the President does not remain qualified, the President-Elect shall succeed to the Presidency and there shall be a vacancy in that office.

The President shall take office at the close of the Annual Meeting and shall serve until the close of the next Annual Meeting.

ARTICLE IV PRESIDENT-ELECT

The President-Elect shall be an ex officio member of the Board. He/she shall be elected by the general membership at the Annual Meeting. The President-Elect shall serve as program chairman and shall perform the duties of the President in the absence of the latter.

The President-Elect shall take office at the close of the Annual Meeting at which he/she is elected and serve in that capacity until the close of the next Annual Meeting.

If the President-Elect becomes disqualified during his/her year in that office, the Nominating Committee shall reconvene and nominate candidates for his/her successor. Election shall be by mail ballot.

ARTICLE V SECRETARY-TREASURER

The Secretary-Treasurer shall be appointed by the Board and shall serve an unspecified term at the pleasure of the Board. He/she shall be an ex officio member of the Board and perform those duties prescribed by the Board.

ARTICLE VI EXECUTIVE DIRECTOR

The Executive Director shall be appointed by the Board and shall serve an unspecified term at the pleasure of the Board. The Executive Director shall conduct the customary operations of the Council on a day-to-day basis as directed by the President in consultation with the Board.

ARTICLE VII BUSINESS MEETINGS

At every Annual Meeting there shall be at least one scheduled Business Meeting and Robert's Rules of Order shall be the parliamentary guide.

ARTICLE VIII STANDING COMMITTEES

The President in consultation with the Board shall appoint the following standing committees from among the membership of the organization:

a. Membership. Among its functions shall be recommendations to the Board on criteria for membership in the Council;

b. Resolutions. Among its functions shall be the solicitation and formulation of draft resolutions for presentation to the Business Meeting of the Annual Meeting;

c. Nominating. Among its functions shall be the nomination of candidates from the membership for officers and members of the Board of Directors; this committee shall be chaired by the Immediate Past President, or, in the absence of an incumbent, by a former member of the Board designated by the President in consultation with the Board;

d. Program. Among its functions shall be planning the program for the Annual Meeting; this committee shall be chaired by the President-Elect.

Revised June 1988

Services and Activities

Major activities of the organization include annual meetings and seminars for academic deans during which deans and their staff meet to explore issues of special importance to their colleges. National leaders in government and higher education and member deans participate in discussions about matters such as faculty development, changes in liberal education, and cooperative efforts between colleges and secondary schools. Informal discussions with deans of other universities and colleges are especially valued by the CCAS members.

The Council holds its 4-day **Annual Meeting** in November, and it is open to all deans of member institutions and their staff. As many as 475 deans attend the annual meeting, whose program features a series of sessions that deal with timely academic issues. Social functions include a Presidential Luncheon, CCAS-hosted social hours, and tour program.

The **CCAS Deans' Seminars** are unique among offerings of professional associations as they explore issues of particular concern to the arts and sciences dean. The sessions are small, fostering direct exchanges of information and ideas, and discussion leaders develop the topics thoroughly and encourage group interaction. Special invitations are extended to associate and assistant deans to attend the seminars, which during 1990 met in Philadelphia, PA, and San Antonio, TX.

The CCAS also inaugurated a **Seminar for New Deans** in June 1988 at The College of William and Mary. The seminar provides a forum in which recently appointed deans interact closely with both other fledgeling and experienced deans in discussions of the fundamentals of college administration. This seminar will be offered again in June 1991 at the same location.

Members receive the ***CCAS Newsletter***, a bimonthly publication that keeps members up to date on important issues relevant to arts and sciences deans and that informs them about new programs and projects at member institutions, as well as the annual ***CCAS Membership Directory***.

Membership Dues Structure

Duly accredited, baccalaureate degree-granting colleges, schools, and divisions of arts and sciences are eligible for membership in the Council of Colleges of Arts and Sciences.

In the event the arts and sciences on a campus have been separated into two or more units, such as a College of Natural Sciences and a College of Humanities, combined membership may be elected. Each dean is accorded all privileges as institutional representative except for voting purposes. Because each institutional member has one vote, one dean should be selected as the voting representative.

Dues cover a fiscal year and are set by the Board of Directors in accordance with Article VII of the CCAS Constitution. The dues are based on the number of baccalaureate degrees awarded by the unit or units in the previous calendar year. The dues structure is as follows for the period from July 1, 1991 to June 30, 1992:

Yearly BA/BS Degrees	Membership Dues
1- 99	$100
100-299	$150
300-499	$200
500-749	$250
750+	$300

Non-member deans who wish to consider joining the Council are invited to attend the Annual Meeting to learn more about the organization and its services.

Inquiries concerning the Annual Meeting, the Deans' Seminars, the Seminar for New Deans, or CCAS membership should be addressed to:

Richard J. Hopkins
Executive Director

CCAS Constitution

Article I Name

This organization shall be called the Council of Colleges of Arts and Sciences.

Article II Purposes

This Council is established as a non-profit organization to provide its member institutions through their appropriate representatives: (1) a forum for discussing common problems of higher education as these relate to the Arts and Sciences; (2) an agency to encourage, initiate, and support programs and activities to improve the intellectual stature and the public understanding of the disciplines of the Arts and Sciences; (3) a medium for the dissemination of the results of Council deliberations and other information deemed essential to the continuing intellectual and educational strength of the Arts and Sciences. However, no substantial part of the activities of the Council shall be the carrying on of programs designed to influence legislation or the election of candidates known to be preferentially favorable to the Arts and Sciences.

Article III Membership

The eligible membership of this organization shall consist of the following: (1) duly accredited Colleges, Schools and Divisions of Arts and Sciences that grant the baccalaureate degree and (2) such institutions or organizations as may subsequently be admitted under the provisions of the By-Laws.

Article IV Voting Rights

Each institution that has paid its annual dues shall have one vote.

Article V Officers

The officers of this organization shall be a president, a president-elect, a secretary-treasurer, and a Board of Directors. The officers shall perform duties, serve terms and shall be elected as set forth in the By-Laws.

Article VI Meetings

An Annual Meeting shall be held at a time and place to be determined by the Board of Directors.

Article VII Dues

The annual dues of the organization shall be set by the Board of Directors, but may not be adjusted more frequently than once every three years, or by more than 15% in a single adjustment without ratification by two-thirds of the members responding on a mail ballot.

Article VIII Fiscal Policies

No part of the income of the Council shall inure to the benefit of or be distributable to its members, directors, officers, or other private persons, except that the Council may pay reasonable compensation for services rendered and make payments in the furtherance of the purposes set forth in Article II hereof. Upon the dissolution of the Council the Board of Directors shall, after providing for the payment of all liabilities of the Council, dispose of all assets of the Council exclusively for the purposes set forth in Article II hereof through an agency or agencies which shall at that time qualify as tax-exempt under appropriate sections of the Internal Revenue Code.

Article IX Amendments

Amendments to the Constitution can be adopted by a two-thirds majority of the total membership, either in a business session or by a mail ballot. Proposals to amend may be initiated by the Board of Directors or by a petition presented through the Board signed by at least ten members. Amendments shall be acted upon only after written notice of at least fourteen days.

Article X By-Laws

The Organization may adopt By-Laws for the conduct of its affairs that are consistent with this Constitution. Such By-Laws may be accepted, repealed or amended at any Annual Meeting by a two-thirds majority vote of those present and eligible to vote, or by mail ballot by a majority of eligible member institutions. Amendments shall be acted upon only after written notice of at least fourteen days.

CCAS

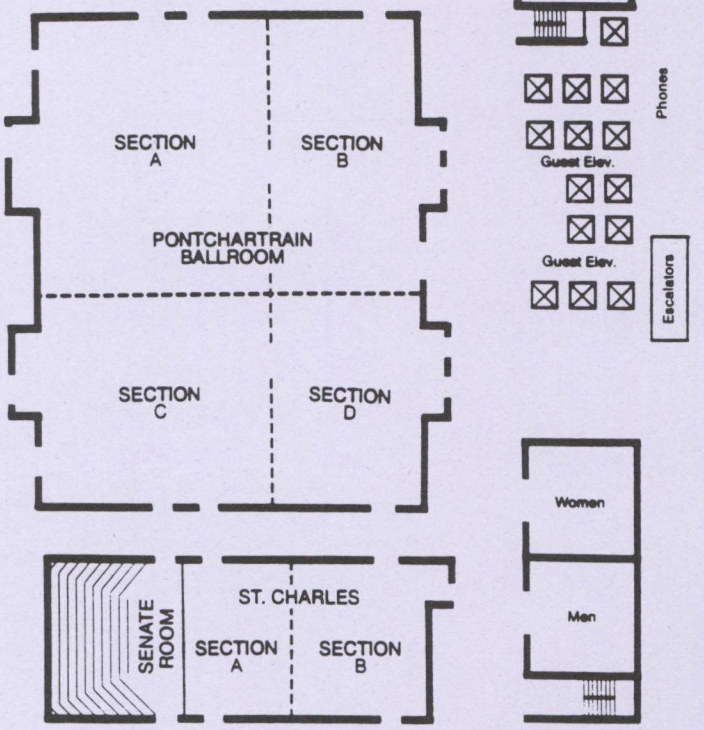
ANNUAL MEETING

November 14-17, 1990

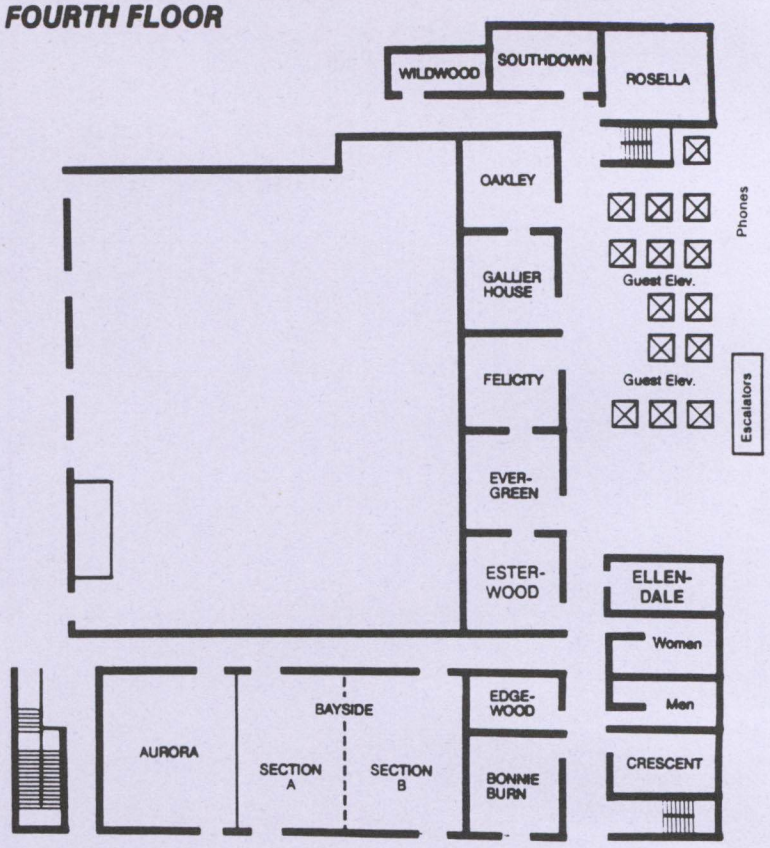
Sheraton New Orleans Hotel

Price $3.00

THIRD FLOOR

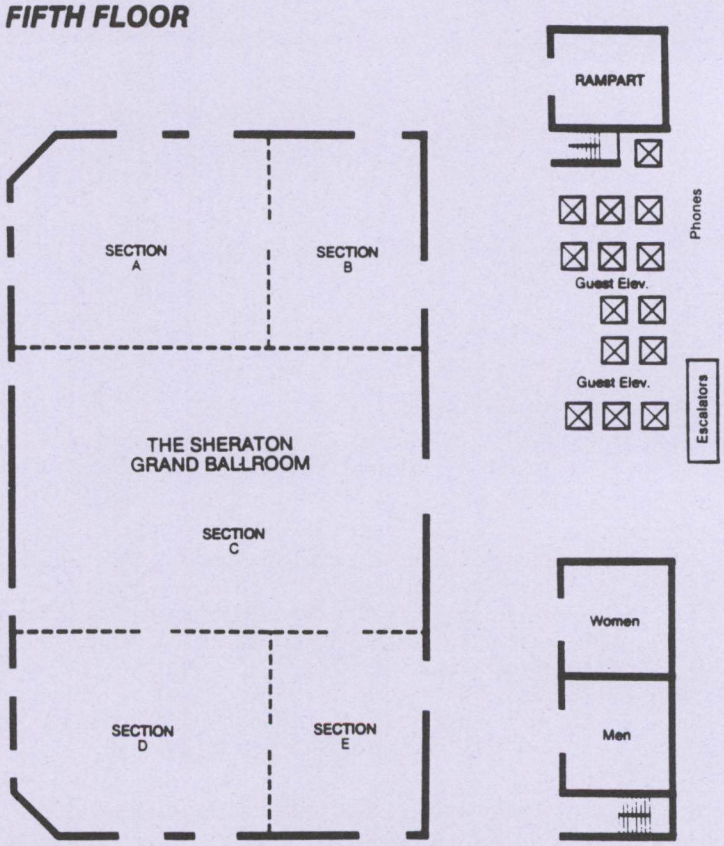


FOURTH FLOOR



Parlors will be located on the Guest Room Levels.

FIFTH FLOOR



Salons 808 820
812 821
816 824
817 828
are located on the eighth floor

THE REGISTRATION DESK, located in the Ponchartrain Ballroom C & D Foyer on the third floor of the Sheraton New Orleans Hotel, will be attended from 1:00 until 9:00 p.m. on Wednesday, November 14, and from 8:00 a.m. until 5:00 p.m. on Thursday, November 15. Please register for the meeting and pick up your tickets for meal functions.

In response to a request from the membership, the CCAS Board of Directors has agreed to ban smoking in all meeting sessions.

PROGRAM

Wednesday, November 14, 1990

1:00-9:00 p.m. **Registration:** Register for Annual Meeting; pick up tickets for meal functions.
Ponchartrain C&D Foyer

1:00-4:00 p.m. **Board of Directors Meeting**
Natchez 828

2:00-4:00 p.m. **Workshop for New Deans**
Bayside B

Presiding: Mary P. Richards, Auburn University
Panelists: Richard S. Millman, Wright State University
Carol McGinnis Kay, University of South Carolina
Aubrey M. Perry, Florida A&M University

The results of the survey of new deans conducted one year ago by Carol McGinnis Kay, Dean of Humanities and Social Sciences at the University of South Carolina, ended with the observation that new deans find the experiences of those who have served longer in their positions much more useful than any other source of information. The workshop for new deans will, therefore, feature a panel of three experienced deans addressing the topics of greatest concern to new deans as identified in the 1989 survey. These include such issues as how to deal with the crushing workload; how to shape the staff one has inherited; and how to establish credibility among the numerous constituencies to which a dean must relate.

Recommended reading prior to workshop: *The University: An Owner's Manual* by Henry Rosovsky.

4:00-5:30 p.m. **Case Study Leaders Meeting**
St. Charles A Presiding: Judy G. Hample, Indiana State University

4:00-5:30 p.m. **Learning to Love New Orleans: A User's Guide**
St. Charles B Presenter: Jack H. White, Mississippi State University

New Orleans is a world unto itself, a place outside America and, in many respects, outside time. Its fascinations are as diverse as those who offer them to explain New Orleans' reputation as a unique American city. One can easily succumb to the appeals of "the Big Easy" and explore both the best and the least known realms on short forays without having to forego conference sessions. This presentation will offer explicit guidance for discovering the city on such self-guided excursions by providing participants an abundance of printed and anecdotal information, maps and guides, and plans for timed explorations ranging from a half-hour to a day. Learn to love New Orleans, if you haven't already done so!

5:30-6:30 pm. **Reception for Registrants and Guests**
Ponchartrain C & D Hosts: Members of CCAS Board of Directors

Thursday, November 15, 1990

7:00-8:20 a.m.
St. Charles A

Breakfast for Northeastern Deans ***(Reservation Necessary.)***

Presiding: Joseph C. Deck, Southeastern Massachusetts University

Title: "Adversities/Opportunities Facing Higher Education in the Northeast"

Panelists: Dagmar Cronn, University of Maine
Alan Fiellin, City College of New York, CUNY
Murray M. Schwartz, University of Massachusetts at Amherst

7:00-8:20 a.m.
Bayside B

Breakfast for Southeastern Deans ***(Reservation Necessary.)***

Presiding: Charles O. Burgess, Old Dominion University

Speaker: Carol McGinnis Kay, University of South Carolina

Title: "Why I am *Not* Giving a Speech and Why It Is *Not* about Being a Woman Dean"

7:00-8:20 a.m.
Bayside A

Breakfast for Midwestern Deans ***(Reservation Necessary.)***

Presiding: James E. Bundschuh, Saint Louis University
E. Terrence Jones, University of Missouri-St. Louis

Group Discussion

7:00-8:20 a.m.
St. Charles B

Breakfast for Western Deans ***(Reservation Necessary.)***

Presiding: Betty Becker-Theye, Kearney State College

Speaker: Richard A. Cording, Sam Houston State University

Title: "Shattering the Myth of the Dean as Superchairperson"

7:00-8:20 a.m.
Rosella

Breakfast for Texas Deans ***(Reservation Necessary.)***

Presiding: Thomas E. Porter, University of Texas at Arlington

Group Discussion

7:00-8:20 a.m.
Grand Ballroom E

Breakfast for Associate and Assistant Deans ***(Reservation Necessary.)***

Presiding: David R. Hiley, Auburn University

Speakers: William E. (Jack) Carpenter, Memphis State University
Mary P. Richards, Auburn University

Title: "The Care and Feeding of Deans"

7:00-8:30 a.m.
Natchez 828

Get-Acquainted Breakfast for Spouses and Guests ***(Reservation Necessary.)***

Presiding: Charlie Gardiner, Ashburnham, Massachusetts

Speaker: Patricia H. Gay, Director, Preservation Resource Center of New Orleans

Thursday, November 15, 1990 *(Continued)*

7:00-8:30 a.m. **Get-Acquainted Breakfast for Spouses and Guests** *(Continued)*

Title: "Preservation of a 272-Year History"

This informal gathering gives spouses and guests an opportunity to see friends from previous meetings and to meet new participants. The speaker will provide a brief orientation to New Orleans and discuss what deserves special attention at several of the city's important landmarks, expanding upon the overview provided by the Wednesday afternoon "Learning to Love New Orleans" session.

8:00 a.m.-5:00 p.m. **Registration**
Ponchartrain C & D Foyer

8:30-10:00 a.m. **Welcome and Orientation**
Ponchartrain C & D

Presiding: Elaine Gardiner, Fitchburg State College
President of CCAS

Plenary Session

Presiding: Lois S. Cronholm, Temple University
President-elect of CCAS

Speaker: Henry Rosovsky, Acting Dean of the Faculty of Arts and Sciences
Harvard University

Title: "Academic Issues of the 1990s"

10:00-10:30 a.m. **Refreshments**
Ponchartrain D Foyer

10:30-12:00 NN **Case Study Sessions**

Organizer: Judy G. Hample, Indiana State University

An annual highlight of the CCAS meetings, case study sessions offer participants the opportunity to discuss difficult situations and consider various solutions. No "right" or "wrong" answer is expected: these are occasions when all participants have expertise that will make sharing experiences useful to everyone. Your registration packet will indicate which case study session you should attend.

Session	Room	Discussion Chair
1	Bayside A	Elizabeth Zoltan-Ford, Towson State University
2	Bayside B	Bobby Wixson, Clemson University
3	Gallier House	Friederike Wiedemann, University of Southern Colorado
4	Felicity	Judith A. Strong, Moorhead State University
5	Estherwood	Jennie Skerl, West Chester University
6	Rosella	Jacqueline Rowser, Kent State University
7	Evergreen	Remington Rose-Crossley, University of Guam
8	Oakley	Carol A. Pollis, University of Wisconsin, Green Bay
9	Grand A	J. G. Peters, University of Nebraska-Lincoln
10	Calcasieu 817	Bobby R. Patton, California State University, Los Angeles
11	Desoto 820	Virginia Lee Owen, Illinois State University
12	Evangeline 821	M. Janice Murphy, Spalding University
13	La Fourche 824	Charlene M. Lutes, Radford University
14	Maurepas 825	Gary S. Krahenbuhl, Arizona State University

10:30-12:00 NN **Case Study Sessions** *(Continued)*

Session	Room	Discussion Chair
15	Wildwood	John S. Jackson, Southern Illinois University at Carbondale
16	Edgewood	Burney J. Hollis, Morgan State University
17	Crescent	A. James Hicks, North Carolina A&T University
18	Natchez 828	Christine R. Grontkowski, Alfred University
19	St. Charles A	Patricia W. Cummins, SUNY College at Buffalo
20	St. Charles B	David F. Bright, Iowa State University
21	Parlour TBA	Aubrey W. Bonnett, California State University, San Bernardino
22	Red River 829	R. Bruce Bickley, Florida State University
23	Bonnie Burn	Howard Ball, University of Vermont

12:15-1:45 p.m. **Luncheon** ***(Reservation necessary.)***
Grand Ballroom D & E

Presiding: Elaine Gardiner, Fitchburg State College
President of CCAS

Speaker: Arthur J. Slavin, Justus Bier Distinguished Professor of Humanities
University of Louisville

Title: "Research in the Liberal Arts Curriculum: The Virtue Inherent in a Practice"

2:00-3:30 p.m. **Session A. Deans and the Law**
Ponchartrain C *(Non-repeated Session.)*

Presiding: Neil Hamburg, Associate General Counsel, University of Pennsylvania

Panelists: Michael Aiken, Provost, University of Pennsylvania
Barbara Lee, Associate Professor, Institute of Management and Labor Relations, Rutgers University

During its current session, the Supreme Court unanimously ruled that universities accused of discrimination in tenure cases must open personnel records to federal investigators. The case involved a University of Pennsylvania faculty member who filed a complaint with the Equal Employment Opportunity Commission when she was denied tenure. Will this decision have a profound effect on the ways we do business? Will this decision be interpreted narrowly, or will traditional notions of confidentiality be changed? What will be the effect on the peer review system? Will evaluations be less candid? One of the attorneys who argued the case for the University of Pennsylvania will head this panel discussion.

2:00-3:30 p.m. **Session B. The Role for the Arts and Sciences in Teacher Education**
St. Charles A *(Related Small Group Discussion. See Saturday, 9:00-11:00 a.m.)*

Presiding: Daniel Fallon, Texas A&M University

Panelists: Darryl J. Gless, University of North Carolina at Chapel Hill
Ellis Joseph, Dean of Education, University of Dayton
Ann I. Morey, Dean of Education, San Diego State University
Matthew Proctor, Jr., Dean of Education, Southern University at New Orleans

Project 30 was initiated by the CCAS in 1986 in response to an appeal from the membership and a directive from the Board of Directors. Generously funded by the Carnegie Corporation of New York, the project has stimulated and assisted 30 representative colleges and universities to rethink their education of prospective teachers. The project has identified the importance of pedagogical content knowledge (PCK). There is optimism that a new design for teacher education can be realized. Several Project 30 participants will discuss developments on their campuses, and prospects for the future will be considered.

2:00-3:30 p.m.
Bayside B

Session C. Faculty Development and the Professoriate
(Repeated Session. See Friday, 10:30-12:00 NN.)

Presiding: Virginia Warren, California State University, Long Beach

Panelists: Minna Doskow, Glassboro State College
James I. Hoffman, University of Wisconsin-Oshkosh
Richard L. McCormick, Rutgers University

Many factors point toward the need to focus on issues of faculty development for senior faculty. The intense competition for new junior faculty has resulted in salary compression, the concentration of equipment and renovation funds on newer faculty, and often in lower teaching loads for the newer faculty. Soon there will be no mandatory retirement. These recent issues combine with long-standing problems of "faculty burnout" to point to increasing problems in working with the senior professoriate. Given the anticipated future shortage of faculty, deans should be especially motivated to provide an environment for continuing faculty that will help ensure a more productive performance than might be forthcoming without intervention.

2:00-3:30 p.m.
St. Charles B

Session D. The Role of Dean in Unionized Colleges
(Non-repeated Session.)

Presiding: Dalmas A. Taylor, Wayne State University

Panelists: Carl E. Brunner, Kutztown University
Michael E. Connaughton, St. Cloud State University
Jon Laible, Eastern Illinois University

Faculty unions embrace the general philosophy of American unionism and often have their origins in disagreements in primarily four areas: (1) administration v. faculty authority; (2) financial matters; (3) prestige; and (4) communication. Elevating bargaining above the level of local unit administrators threatens to take the decision-making function away from the institution decision-makers and elevates it to a political body. Some argue that the bargaining arena tends to destroy the merit system of rewards and often encourages the use of rigid pay schedule plans. Bargaining in most cases tends to intrude on the flexibility of the administrator's decision-making and tends to structure the system. Bargaining usually attempts to secure equal treatment and tends to have a leveling influence that accommodates most people, but often at the expense of those few who excel. Additionally, equal treatment does not necessarily mean equitable treatment.

2:00-3:30 p.m.
Ponchartrain D

Session E. The Scope of Development Activities in Colleges
(Repeated Session. See Friday, 8:30-10:00 a.m..)

Presiding: Gerald E. Lang, West Virginia University

Panelists: Norman B. Council, University of Utah
Amy Nitsche, Arizona State University
Phillip Drennon Thomas, University of Kansas

The increasing focus on the role of deans in development activities requires planning beyond the direct solicitation of funds from targeted prospects and foundations. Dean's offices increasingly include college-level development officers, college advisory boards, and other personnel and structures established to enhance the college's ability to raise funds. What issues must be resolved between the college and central development offices to increase the productivity of these activities? What can and should a dean do to work most effectively with development officers, advisory boards, oversight committees, alumni boards, and other external constituencies?

3:30-4:00 p.m.
Ponchartrain D Foyer

Refreshments

4:00-5:30 p.m.
Bayside B

Session F. Frontiers of the Disciplines
(Repeated Session. See Friday, 2:00-3:30 p.m.)

Presiding: Nancy S. Dye, Vassar College

Panelists: Mark Andrews, Associate Professor of French, Vassar College
John Means, Director of Critical Languages and Professor of Portuguese, Temple University
Patricia Wetzel, Associate Professor of Japanese, Portland State University

This session will continue the series in which faculty from several disciplines describe current topics of significance in their specialties. These popular sessions help infuse the Annual Meetings with the academic values that are central to all of us and help deans understand where the disciplines are heading. This year we will focus on language studies.

4:00-5:30 p.m.
Ponchartrain D

Session G. Multicultural Environments: The Status of Programs Responding to Cultural Diversity
(Repeated Session. See Friday, 10:30-12:00 NN.)

Presiding: Herman Blake, Vice-Chancellor for Undergraduate Education, Indiana University-Purdue University at Indianapolis

Panelists: Richard W. Thies, Oregon State University
Annette M. Chappell, Towson State University
Francine Frank, State University of New York at Albany

Universities have led society in recognizing the unique needs of a country populated by persons of diverse cultural backgrounds. Initially this response was focused in student activities offices. Increasingly, the issues of multicultural societies have been reflected in the curriculum, often accompanied by vigorous debate over the demand to change many traditional programs. What is the current status of this debate on American campuses? Have we reached any common understanding on the appropriate role of curricular responses to the issues of multicultural societies?

4:00-5:30
Ponchartrain B

Session H. Faculty Recruitment for the 90s: The Real Costs
(Repeated Session. See Friday, 10:30-12:00 NN.)

Presiding: James H. Pickering, University of Houston

Panelists: Gary S. Krahenbuhl, Arizona State University
Lorman A. Ratner, University of Tennessee, Knoxville
Murray M. Schwartz, University of Massachusetts at Amhurst

The expected faculty shortages of the 90s are close at hand and in many disciplines already upon us. Rising salary expectations, reduced teaching loads, and demands for start-up funds and equipment are likely to impose costs on colleges and universities that only a few select institutions can afford, undercutting the expanded opportunities for high quality education for all segments of society that have characterized American higher education since the 1950s. What should be our posture and our response as arts and sciences deans?

4:00-5:30 p.m.
Ponchartrain C

Session I. Deanships and Beyond: Career Planning for Deans
(Repeated Session. See Friday, 2:00-3:30 p.m.)

Presiding: Richard Peck, President, University of New Mexico

Panelists: Joan Wadlow, Provost and Senior Vice President, University of Oklahoma
Stanley Paulson, Senior Consultant, Academic Search Consultation Service
Samuel A. Kirkpatrick, President, University of Texas at San Antonio

4:00-5:30 p.m. **Session I. Deanships and Beyond: Career Planning for Deans** *(Continued)*

Deans spend much of their time concerned with faculty development. Who is concerned with "decanal development"? What criteria should we apply to ourselves to determine our suitability for such positions as provostships, vice-presidencies, and presidencies? What considerations are there for returning to a faculty position? Should there be standards for contractual obligations to deans who want to return to the faculty? Are there signs to indicate when a deanship should end? How does one distinguish between "permanent burnout" and short-term stress responses?

4:00-5:30 p.m.
St. Charles B

Session J. Maintaining the Currency of Faculty in Times of Rapid Change
(Repeated Session. See Friday, 8:30-10:00 a.m.)

Presiding: Blanche Premo-Hopkins, University of South Carolina at Aiken

Panelists: Douglas Astolfi, Dean of the College, Clark University
Joan E. Ray, Director, Center for Arts and Humanities, University of Colorado at Colorado Springs
Rollin Richmond, University of South Florida

Even faculty who are active scholars face problems of remaining current in their disciplines. How do universities help their faculty maintain currency with technological changes and new developments in their fields? Are there mechanisms that could be developed for the rapid dissemination of information from universities with major resources? For instance, could universities with significant strength in international politics serve academic communities lacking that strength?

5:30-6:30 p.m. **Reception for Registrants and Guests**
Grand Ballroom D&E Hosts: Members of the CCAS Board of Directors

8:30-10:00 p.m.
St. Charles B

Special Session. Independence and Interdependence: Higher Education in Japan

Presiding: Iwao Iwamoto, Professor of American Literature and Former Director, Graduate School of Literature and Linguistics, Tsukuba University
William F. Halloran, University of Wisconsin-Milwaukee

Opening Remarks: "Knowing Across Cultures"
Ihab Hassan, Vilas Distinguished Professor of English and Comparative Literature, University of Wisconsin-Milwaukee

Panelists: Kenzo Miyagawa, Dean, School of Economics, and Professor of Economics, Kyushu University
Koichi Ito, Executive Director, Professor of Statistics, and Former Vice President, Nanzan University
Kiyohiko Tsuboi, Professor of American Literature and Former Dean, College of Letters, University of Okayama

Participating Japanese Guests:
Fujio Ikado, Professor of Religion, School of International Studies, Obirin University
Motoi Oda, Regent, College of Liberal Arts, and Professor of English Literature, Tohoku University
Atsushi Hirata, Librarian, Professor of English Philology, and Former Regent, University of Toyama
Tstsuo Inoue, Dean, First Cluster College (Humanities, Sciences, and Sociology), and Professor of History, University of Tsukuba
Toshio Yagi, Chair, International Exchange Programs, and Professor of American Literature, Seijo University

Thursday, November 15, 1990 *(Continued)*

8:30-10:00 p.m. **Special Session. Independence and Interdependence: Higher Education in Japan** *(Continued)*

This special evening session capitalizes on the presence of nine distinguished Japanese academics at the twenty-fifth anniversary meeting of the Council of Colleges of Arts and Sciences. Their participation has been made possible by a special grant to the Council from the Office of Private Sector Programs of the United States Information Agency. A Distinguished Professor of English and Comparative Literature and a frequent lecturer for the USIS in all parts of the world, Ihab Hassan will open the session with some suggestions about how higher education in Japan and the United States must adapt to a world that is increasingly interdependent, yet resolutely pluralistic. Three distinguished participants in and observers of higher education in Japan will, from their personal and institutional perspectives, comment on the current state of higher education in Japan and the changes they believe will occur in the next decade. There will be time for questions and observations from members of the audience.

Friday, November 16, 1990

7:00-8:20 a.m.
Aurora

Breakfast for Women Deans *(Reservation Necessary.)*

Presiding: Christine R. Grontkowski, Alfred University

Speaker: Ann Die, Dean of Sophie Newcomb College, Tulane University

Title: "Leading the Way: Professional Opportunities for Women in the 90s"

7:00-8:20 a.m.
Felicity

Breakfast for Past Presidents *(Reservation Necessary.)*

Presiding: William F. Halloran, University of Wisconsin-Milwaukee

8:30-10:00 a.m.
Ponchartrain B

Session K. Graduate Education and Academic Excellence
(Non-repeated Session.)

Presiding: Gillian T. Cell, University of North Carolina at Chapel Hill

Panelists: Trevor Chandler, Assistant Vice Chancellor for Campus Diversity, University of California, Davis
Joel Schwartz, Director, Center for Teaching and Learning, University of North Carolina at Chapel Hill
Gene L. Woodruff, Vice Provost and Dean of the Graduate School, University of Washington

The expanding academic market of the 1990s offers new opportunities for graduate education, but those coming out of graduate programs will face many different expectations than earlier graduates. To meet the mounting criticism that colleges and universities have sacrificed teaching to research, today's graduate degree recipients will need to be both good scholars and good teachers. To respond to the diversity of American society, they should reflect the ethnic mix of that society. To match the developments on the margins of disciplines and across disciplines, they will increasingly receive their degrees in interdisciplinary rather than traditional fields of study.

8:30-10:00 a.m.
Ponchartrain A

Session L. A Dean's Clinic: Human Values and Decision Strategies with Tough Cases
(Repeated Session. See Friday, 2:00-3:30 p.m.)

Presiding: Sharon K. Hahs, University of South Carolina at Spartanburg

Panelists: Phillip Drennon Thomas, Wichita State University
James L. Muyskens, University of Kansas

8:30-10:00 a.m. **Session L. A Dean's Clinic: Human Values and Decision Strategies with Tough Cases** *(Continued)*

This session will explore problems most deans confront that require values choices and present multiple-decision options in such areas as tenure, dismissal, conflict with supervisors, illness, confidentiality, and faculty quarrels. Topics differ at both sessions.

8:30-10:00 a.m.
Ponchartrain C

Session M. Core Curricula and Universities: Problems of Implementation
(Repeated Session. See Friday, 2:00-3:30 p.m.)

Presiding: Richard M. Freeland, University of Massachusetts at Boston

Panelists: Robert Griffith, University of Maryland
Sandra L. Kanter, Project Director, New England Resource Center for Higher Education, University of Massachusetts at Boston

Most discussions of core curricula rightly focus on questions of purpose and content. Equally important, ultimately, are matters of implementation. Once an institution has decided to introduce a core, what issues -- organizational, financial, academic -- arise? Have institutions encountered unanticipated effects in other parts of their programs as they have moved ahead with new cores? Have changes in external conditions or internal circumstances presented unforeseen difficulties? What approaches to these problems have proven effective or ineffective? This panel will consider these problems with particular reference to large universities, public and private. The discussion will include a report of an Exxon-sponsored survey of several institutions in the northeast that have recently introduced new or revised cores.

8:30-10:00 a.m.
Ponchartrain D

Session E. The Scope of Development Activities in Colleges
(Repeated Session. See Thursday, 2:00-3:30 p.m.)

8:30-10:00 a.m.
St. Charles B

Session I. Maintaining the Currency of Faculty in Times of Rapid Change
(Repeated Session. See Thursday, 4:00-5:30 p.m.)

10:00-10:30 a.m.
Ponchartrain D Foyer

Refreshments

10:30-12:00 NN
Ponchartrain C

Session N. Research Centers: Encouraging Scholarship
(Non-repeated Session.)

Presiding: Vijai Singh, Associate Provost and Director of Research Centers, University of Pittsburgh

Panelists: Donald W. Crawford, University of Wisconsin-Madison
Charles A. Johnson, Texas A&M University
Jerry Hirsch, Seton Hall University

Departments are the basic structural unit of most colleges, but Centers are becoming increasingly popular as a means of reducing barriers to interdisciplinary work and of overcoming departmental inertia. Can Centers become incorporated into Colleges without deteriorating departmentally based research? Should Centers report to deans or vice presidents? Should Centers be self-supporting through external funding and, if so, how can non-fundable interdisciplinary work be encouraged?

10:30-12:00 NN
Ponchartrain A

Session O. Repression of Speech v. Repressive Speech
(Non-repeated session.)

Presiding: Bethany Oberst, Southwest Missouri State University

Panelists: Aubrey M. Perry, Florida A&M University
Georgia Lesh-Laurie, Cleveland State University
Joseph Sheley, Chair of Sociology, Tulane University

10:30-12:00 NN **Session O. Repression of Speech v. Repressive Speech**
(Continued)

Universities are dedicated to academic freedom, which generally has been construed to mean that no ideas will be barred from discussion on campus. This principle has been invoked traditionally to protect faculty, but there are equally serious issues over the rights of "outsiders" to speak on campus. Should universities be open to representations regardless of their conflict with the values of the institution? What if such unfettered freedom of speech can be predicted to result in repressive activities of others? Should there be limits to who can say what on campus? Is there a growing trend for a conservative response to these questions from the groups that have most often been associated with liberalism?

10:30-12:00 NN **Session C. Faculty Development and the Professoriate**
Ponchartrain D *(Repeated Session. See Thursday, 2:00-3:30 p.m.)*

10:30-12:0 NN **Session G. Multicultural Environments: The Status of Programs Responding to**
Ponchartrain B **Cultural Diversity**
(Repeated Session. See Thursday, 4:00-5:30 p.m.)

10:30-12:00 NN **Session H. Faculty Recruitment for the 90s: The Real Costs**
St. Charles B *(Repeated Session. See Thursday, 4:00-5:30 p.m.)*

12:15-1:45 p.m. **Presidential Luncheon** ***(Reservation Necessary.)***
Grand Ballroom D & E

Presiding: Lois S. Cronholm, Temple University
President-elect of CCAS

Presidential Address:

"The CCAS Silver Anniversary Band: Tuning Up for the Millenium"
Elaine Gardiner, Fitchburg State College
President of CCAS

2:00-3:30 p.m. **Session F. Frontiers of the Disciplines**
Ponchartrain D *(Repeated Session. See Thursday, 4:00-5:30 p.m.)*

2:00-3:30 p.m. **Session I. Deanships and Beyond: Career Planning for Deans**
St. Charles B *(Repeated Session. See Thursday, 4:00-5:30 p.m.)*

2:00-3:30 p.m. **Session L. Dean's Clinic**
Ponchartrain C *(Repeated Session. See Friday, 8:30-10:00 a.m.)*

2:00-3:30 p.m. **Session M. The Core: Have We Got It Right Yet?**
Ponchartrain B *(Repeated Session. See Friday, 8:30-10:00 a.m.)*

2:00-3:30 p.m. **Session P. Professional Accreditation and the Arts and Sciences**
Ponchartrain A *(Non-repeated Session.)*

Presiding: John M. Ostheimer, East Tennessee State University

Panelists: Carol B. Gartner, Purdue University
Joseph B. Hill, Auburn University at Montgomery
The Reverend James Carter, President, Loyola University

Friday, November 16, 1990 *(Continued)*

2:00-3:30 p.m. **Session P. Professional Accreditation and the Arts and Sciences** *(Continued)*

At the 1989 CCAS Annual Meeting there was a provocative discussion about the impact of accreditation of professional programs on our colleges. There appears to be a strong sense of frustration on the part of arts and sciences deans that accreditation agencies serve as lobbying groups that divert resources to professional schools. There may be an equally strong sense of frustration by professional school deans that the role of accrediting agencies is misunderstood by the arts and sciences. Do we need to know more about the policies and practices of accreditation agencies if we are to participate in an informed discussion on our campuses? To what extent is the anecdotal evidence about professional accreditation based on reality?

3:30-4:00 p.m. **Refreshments**
Ponchartrain D Foyer

4:00-5:30 p.m. **Annual Business Meeting**
Grand Ballroom D

Presiding: Elaine Gardiner, Fitchburg State College
President of CCAS

5:30-6:30 p.m. **Reception for Registrants and Guests**
Ponchartrain A & B Hosts: Members of CCAS Board of Directors

Saturday, November 17, 1990

9:00-11:00 a.m. **Small Group Discussion: The Dean's Information Exchange**

Organizer: James E. Bundschuh, Saint Louis University

These discussions are designed to promote the informal exchange of ideas concerning major areas of interest to CCAS members. Each of the eight sessions is organized by a leader, but formal presentations will be kept to a minimum to provide the maximum opportunity for participation by everyone in attendance.

Bayside B **Session 1. Attracting Minorities into Pre-Professional Programs**

Leader: J. W. Carmichael, Professor of Chemistry and Co-Premedical Advisor, Xavier University of New Orleans

Xavier University of New Orleans has an outstanding record of successfully placing minority graduates in professional schools. This is a result of creatively planned pre-professional programs. Professor J. W. Carmichael will describe these programs and discuss with attendees strategies to increase minority participation in pre-professional programs at other institutions.

Bayside A **Session 2. Is There a Cure for Sick Departments?**

Leaders: Carol B. Gartner, Purdue University Calumet
Dwight Kirkpatrick, Professor of Psychology, Purdue University Calumet
Robert M. Smith, University of Tennessee at Martin

This session will explore the proposition that dysfunctional academic departments are similar in many respects to dysfunctional families. This thesis is supported by an empirical study of twelve academic departments at six universities. Drawing upon the administrative experience of the participants and techniques used by family therapists, the leaders will develop practical ways of changing the interpersonal systems of dysfunctional departments.

Oakley — **Session 3. Reform of Teacher Education**

Leaders: Daniel Fallon, Texas A&M University
Frank B. Murray, Dean of Education, University of Delaware

Deans interested in the arts and sciences component in the education of prospective teachers are cordially invited to join deans already engaged in Project 30 for a discussion of status and plans. Deans Fallon and Murray will report on prospects for continued support from Carnegie Corporation of New York and on other Project 30 matters. They will discuss strategies for building faculty teams to accomplish teacher education reform, breaking into small groups if appropriate. They also will consider development of a national association of persons interested in Project 30 reform.

Aurora — **Session 4. Research for Undergraduates**

Leaders: Nancy S. Dye, Vassar College
Edward C. Roy, Jr., Vice President for Academic Affairs, Trinity University

Undergraduate research is growing in quantity and quality at our colleges and universities. This session explores ways to establish and maintain successful programs for undergraduate research. Special emphasis will be placed on how to develop successful programs in the laboratory sciences and the humanities, how to involve faculty, and how to fund undergraduate research programs.

Calcasieu 817 — **Session 5. Private v. Public, Friends or Foes?**

Leaders: E. Terrence Jones, University of Missouri-St. Louis
James E. Bundschuh, Saint Louis University

Most urban areas are served by both private and public institutions of higher education. This session will address some of the difficulties encountered by a private university and a public university as they both attempt to serve the same community. The two deans will relate several success stories and discuss opportunities for meaningful cooperation.

Evangeline 821 — **Session 6. Supplies and Equipment Budgeting--Formula Funding**

Leaders: Thomas Kullgren, Saginaw Valley State University
William K. Barnett, Saginaw Valley State University

How does a dean go about establishing budgets for supplies, faculty travel, and equipment for the various departments under her/his jurisdiction? What is the cost differential between Biology and English, History and Music? The session leaders will present a formal process developed at Saginaw Valley, based on research from a national sample of colleges, and open the session to discussion.

Maurepas 825 — **Session 7. The Scholar-Teacher-Dean: An Impossible Dream?**

Leaders: Paul Gaston, University of Tennessee at Chattanooga
Clifford Lovin, Western Carolina University

This session will consider a central issue: whether or not the scholar-teacher-dean is any longer a realizable ideal or has become an impossible (and perhaps irresponsible) one.

Red River 829 — **Session 8. Development of College-Level Administrative Software: Filling the Gap Between PC's and Mainframes**

Leader: Ralph Jenkins, Temple University

College-level academic planning and management requires rapid access to specialized data and the ability to process information quickly. Standard commercial software is not always adequate. Course scheduling, faculty workload, space and facilities management, and personnel records are some of the areas where development of software may improve the dean's effectiveness. This session demonstrates some responses to these needs and explores the development of customized administrative software.

11:00 a.m.-2:00 p.m.
Natchez 828 — **Board of Directors Meeting**

FUTURE EVENTS

Annual Meetings

November 6-9, 1991	San Diego, California	Omni San Diego Hotel
November 11-14, 1992	Tampa, Florida	Hyatt Regency City Center
November 10-13, 1993	Cincinnati, Ohio *(tentative)*	
November 16-19, 1994	Portland, Oregon *(tentative)*	

1991 CCAS Deans' Seminars

The fourteenth annual CCAS Deans' Seminars are scheduled for March 14-15 at The Mayflower Hotel in Washington, DC, and April 18-19 at San Francisco's Holiday Inn Financial District. The CCAS office will issue additional information in the near future.

1991 Seminar for New Deans

The fourth Seminar for New Deans will be held June 12-16, 1991, at The College of William and Mary, Williamsburg, Virginia. Additional information will be available early in 1991.

The Honorable
Dr. David A. Bromley
Assistant to the President for Science
Office of Science and Technology Policy
Old Executive Office Building, Room 358
17th & Pennsylvania Ave., N.W.
Washington, D.C. 20506

Dear Dr. Bromley:

At the garden party of the National Academy of Science you indicated interest in meeting Dr. Rembser, BMFT, who would probably attend a U.S.-German workshop on social sciences and humanities early June in Washington, D.C. This workshop organized by the National Science Fondation and the Alexander von Humboldt-Stiftung will take place on June 7 and 8, 1991 and Dr. Rembser will be able to participate.

Dr. Rembser would be very interested in meeting with you to discuss

- recent developments in science and technology in USA and Germany
- new deliberations with respect to a U.S.-German Academy
- cooperation in science and technology.

Unfortunately the time window is extremely small. However, I would appreciate if you could find some time in the afternoon of June 7, to talk with Dr. Rembser.

Sincerely yours,

Dr. Klaus Schroeter
Science Counselor

Dr. D. Allan Bromley
Assistant to the President
for Science and Technology
Old Executive Office Building
Washington, DC 20506

Dear Dr. Bromley:

Mr. William J. Warwick, President of AT&T Microelectronics and I request an appointment with you on Wednesday, March 27, 1991, to discuss recent business developments in our semi-conductor business in Japan. We have experienced significant progress in our business relations with the Japanese due in part to the U.S./Japan semi-conductor trade agreement. With the trade agreement expiring this year, Mr. Warwick wants to share AT&T's perspective with you and your staff.

In a recent conversation with your office, I was told that your schedule is quite full on Wednesday, therefore we would keep our meeting to 30 minutes to conserve you time. If you are unable to arrange time for us on Wednesday, hopefully a senior member of your staff could be available to meet with us.

I look forward to meeting with you next week.

Sincerely,

R. C. Lumb

March 11, 1991

The Honorable Allen Bromley
Assistant to the President for Science and Technology
The White House
Washington, D.C. 20500

Dear Dr. Bromley:

The American Business Conference (ABC) will hold its Membership Meeting in Washington, D.C. on April 9 and 10. ABC members will meet in numerous working sessions with the nation's top policymakers to explore ways in which the business and policymaking communities can work together to promote fundamental economic growth. Our members are very in discussing with you technology policy. Thus, I would like to invite you to participate in an off-the-record policy discussion with some of our chief executive officers at lunch at noon on Tuesday, April 9, 1991. This session will last one hour and will be held at the Willard Inter-Continental Hotel (1401 Pennsylvania Avenue, N.W.).

This meeting is of special significance for ABC as it marks the tenth anniversary of our organization. We are endeavoring to put in place a program commensurate with the importance our members place upon marking ten years of service to the nation. To that end, we would especially appreciate your willingness to participate.

Founded in 1981 and comprising one hundred chief executives of fast-growing, mid-size companies, the American Business Conference (ABC) is the non-partisan voice of the high-growth, entrepreneurial sector of the economy. Jim Jones, chairman of the American Stock Exchange, is chairman of ABC, and included among our ranks are many of the nation's leading business executives: John Rollwagen of Cray Research, George Hatsopoulos of Thermo Electron, Josh Weston of Automatic Data Processing, Gloria Bohan of Omega Travel, Clark Johnson of Pier 1 Imports, and Roger Johnson of Western Digital.

We hope you will be able to participate in our meeting in April and look forward to hearing from you. If you or your staff need additional information, please call me or Fran Frazier at (202) 822-9300.

Sincerely,

Barry K Rogstad

NORTH CAROLINA GIRL WINS TOP AWARD IN WESTINGHOUSE SCIENCE TALENT SEARCH

WASHINGTON, March 4 -- A 17-year-old North Carolina girl who submitted a mathematics project in fractal geometry was named tonight as winner of the $40,000 first-place college scholarship in the Westinghouse Science Talent Search.

Ashley Reiter, of Charlotte, a senior at the North Carolina School of Science and Mathematics in Durham, was the top award winner from among 1,573 entrants in the 50th annual search, which is the nation's oldest high school science competition and offers the largest unrestricted science scholarships.

Second-place winner of $30,000 was Denis Lazarev, 17, of Fair Lawn, N.J., who came to the U.S. from his native Soviet Union in 1989. Denis entered a project in molecular genetics. He attends Elmwood Park Memorial High School in Elmwood Park, N.J.

Third-place winner of $20,000 was William Ching, 17, of New York City, who conducted neurobiological research on the optic nerve. William attends Riverdale Country School in the Bronx, N.Y.

- more -

The fourth- through tenth-place winners, and scholarship amounts, were, in order:

Dean Chung, 16, of Mountain Lakes, N.J., $15,000.

Ciamac Moallemi, 15, of Bayside, N.Y., $15,000.

Tessa Walters, 17, of San Dimas, Calif., $15,000.

Debby Lin, 17, of Elmhurst, N.Y., $10,000.

Yves Jeanty, 16, of South Ozone Park, N.Y., $10,000.

Jim Way Cheung, 17, of Jackson Heights, N.Y., $10,000.

Rageshree (Raga) Ramachandran, 15, of Fair Oaks, Calif., $10,000.

Selected as first and second alternates were Joel Moore, 17, of Chevy Chase, Md., a senior at St. Albans School in Washington, and Irwin Lee, 16, of Naperville North High School in Naperville, Ill.

The alternates and the 28 other national finalists were awarded $1,000 scholarships each, making the total value of the awards $205,000.

The winners were announced at an awards banquet at the Washington Hilton Hotel, at which President Bush was the featured speaker.

The awards were presented by Dr. J. Richard Gott, chairman of the board of judges and professor of astrophysical sciences at Princeton University.

Since its beginning in 1942, Westinghouse Electric Corporation has sponsored the competition and Science Service, a non-profit organization, has administered it.

The winners were selected by a panel of eight scientists following interviews designed to evaluate the students' scientific creativity and potential.

Of the 2,000 finalists in the Science Talent Search since its inception in 1942, five have won Nobel Prizes, two have won Fields Medals for distinguished work in mathematics, and eight have been awarded MacArthur Foundation Fellowships for research in the physical and life sciences. In addition, 28 former finalists have been elected to the National Academy of Sciences and three to the National Academy of Engineering.

For her winning project, Ashley Reiter determined the dimensions of fractals generated by Pascal's Triangle and its higher dimensional analogs, which have long fascinated mathematicians with their intriguing number patterns.

She began her project in her junior year and continued her work during the summer as an intern at the San Diego Supercomputer Center, where she did her own programming and numerics to carry out the necessary computer simulations.

The daughter of Dr. and Mrs. Harold Reiter, she plans to continue her study of mathematics at Rice University.

Second-place winner Denis Lazarev completed a project in molecular genetics in which he analyzed the effect of a recently discovered regulatory protein, called ASF, on RNA splicing. Denis, son of Mr. and Mrs. Alexander Lazarev, plans to pursue a research career at Johns Hopkins University.

Third-place winner William Ching conducted neurobiological research in which he discovered the presence of a chemical receptor for GABA-B in the optic nerve, providing a possible explanation of why a related chemical, baclofen, can be useful in the treatment of spinal cord injury and multiple sclerosis. Son of Mr. and Mrs. Kok Poi Ching, he plans to study at Yale University leading to a career in medical research.

Fourth-place winner Dean Chung, of Mountain Lakes High School, selected a math project involving the investigation of "graceful" and "non-graceful" geometric configurations. Dean, who will pursue pre-medical studies at Harvard College, is the son of Drs. Tsung-Jen and Fan-Rong K. Chung.

Fifth-place winner Ciamac Moallemi, at 15 the youngest of the top 40 STS finalists, was born in Iran. A student at Benjamin N. Cardozo High School, he developed a neural network-based computer system to enhance the diagnosis of bladder cancer. Son of Dr. M. Karim Moallemi and Dr. M. Azar Tadayyoni, he plans to attend Massachusetts Institute of Technology.

Sixth-place winner Tessa Walters, a senior at San Gabriel High School, studied and synthesized inhibitors of angiotensin I-converting enzyme and confirmed their activity. She is the daughter of Mr. and Mrs. George T. Walters and plans to attend Harvard.

Seventh-place winner Debby Lin, a student at Stuyvesant High School, performed a computer analysis of genetic sequences that showed significant similarity between tick Dhori and influenza viruses, indicating an evolutionary relationship between the two virus groups. Daughter of Tzu-Huei Lin and the late Marlene Lin, she will study biology at MIT.

Eighth-place winner Yves Jeanty, also a student at Stuyvesant High School, carried out experiments in cellular biology designed to discover proteins that could be used as indicators of a phenomenon known as contact inhibition of motility, which occurs when cells collide and then change direction and move away from the contact site. Yves, who plans to attend Cornell University leading to a career in medicine, is the son of Yves Jeanty and Chantal Edouard.

Ninth-place winner Jim Way Cheung, a student at Bronx High School of Science, selected a mathematics problem in classical number theory in which he investigated the properties of continued fractions over the system of Eisenstein integers. Son of Mr. and Mrs. John Ng Cheung, he plans to attend Harvard and pursue a career in scientific research.

Tenth-place winner Raga Ramachandran, a senior at Rio Americano High School in Sacramento, performed computer-intensive research on the adequacy of a proposed numerical model of the El Nino--Southern Oscillation, the Earth's most significant interannual climatic variation. Born in India, she is the daughter of Drs. Doraiswamy and Geetha Ramachandran and plans to study engineering biology at Princeton.

The 50th annual awards banquet was attended by 1,200 people, including about 300 former STS national finalists.

In addition to President Bush, speakers were Westinghouse Chairman Paul E. Lego, who congratulated the students on behalf of the corporation; Dr. Glenn T. Seaborg, a Nobel Laureate who is university professor of chemistry at the University of California at Berkeley, chairman of Science Service and a member of the board of STS judges; and E. G. Sherburne, Jr., president of Science Service.

Hon. D. Allan Bromley
Assistant to the President for Science and Technology
Executive Office of the President
Washington, DC 20500

Dear Dr. Bromley:

I am eager to try an innovative approach to stimulating revolutionary advances in science. The focus is major breakthrough, new paradigms. My conviction is that simple structured communications could greatly accelerate what is now a haphazard process.

My intent is to present the attached proposal to private philanthropic organizations for funding. However, before proceeding, I am looking for advice. I would appreciate any comments or criticisms that you may have. If you please I would enjoy meeting with you at your convenience.

Very truly yours,

Alex Pavlak

Dear Dr. Bromley:

On behalf of the 1991 AAAS Environmental Science and Engineering Fellowship Program, I want to thank you for agreeing to meet with them on Tuesday, June 4, at 11 a.m., at OSTP.

I also have invited Michael R. Deland and William K. Reilly to speak earlier that morning. With representatives of OSTP, CEQ and EPA, the Fellows will have a broad exposure to the executive branch view of environmental policy.

Enclosed is an invitation to a welcoming reception for the Fellows, scheduled Monday, June 3, 5-7 p.m., to which you are cordially invited.

Sincerely,

Claudia J. Sturges

Dear Dr. Bromley:

At the garden party of the National Academy of Science you indicated interest in meeting Dr. Rembser, BMFT, who would probably attend a U.S.-German workshop on social sciences and humanities early June in Washington, D.C. This workshop organized by the National Science Fondation and the Alexander von Humboldt-Stiftung will take place on June 7 and 8, 1991 and Dr. Rembser will be able to participate.

Dr. Rembser would be very interested in meeting with you to discuss

- recent developments in science and technology in USA and Germany
- new deliberations with respect to a U.S.-German Academy
- cooperation in science and technology.

Unfortunately the time window is extremely small. However, I would appreciate if you could find some time in the afternoon of June 7, to talk with Dr. Rembser.

Sincerely yours,

Klaus Schroeter

OFFICE OF THE DIRECTOR

May 9, 1991

D. Allan Bromley, Ph.D.
Assistant to the President
for Science and Technology
The White House
Washington, D.C.
FAX: (202) 395-3261

Dear Dr. Bromley:

I would like to familiarize you with a concept to produce a conference-exposition entitled **U.S.-Japan Environmental Technology Exposition: Strategic Opportunities for Survival.**

The origin of this project stems from my recent participation in a conference on U.S. Industry Access to Japanese Science and Technology held this past March and co-sponsored by, among others, the Department of Commerce. At that time, I had the opportunity to meet a number of senior Japanese and U.S. government/industry participants who encouraged me to go forward with the development of the above-mentioned concept.

I am hoping your calendar will permit me the opportunity to discuss your reactions to the enclosed concept outline and the specific role which we hope you might play in relation to this event. I plan to be in Washington on Monday, May 20 and would appreciate the chance to stop by your office to discuss this with you.

You should know that Japan External Trade Organization (JETRO) executives have been approached with a similar version of the attached concept. They have responded favorably. At this time, they are polling individual Japanese private-sector organizations engaged in environmental technology manufacturing and joint venture activity with U.S. firms to establish their participation and financial sponsorship.

Clearly, this will be a "by-invitation-only" event designed to attract an elite group of between 100-150 senior government and industry executives. Participants will be those interested in moving forward to engage in bi-lateral strategic alliances in environmental technology and case-study discussions concerning current and future innovative applications in that area.

I look forward to your reactions and thank you for your interest and consideration of the concept.

Sincerely yours,

Michael D. Erony, Ph.D.

For

The U.S. - Japan Environmental Technology Exposition:

S.O.S. - Strategic Opportunities for Survival

Presented By

Erony, McKibben & Associates

U.S. - Japan Environmental Technology Exposition: S.O.S. - Strategic Opportunities for Survival

[A] THE MISSION:

Erony, McKibben & Associates is a consulting group with over 60 years of accumulated expertise in the development and implementation of educational programs, seminars, conferences, public policy and government relations. Information technology management and business development project activity for the global communications industry have been the major thrust of our operations. It is for this purpose that we are pleased to submit a proposal to develop a U.S. - Japan Environmental Technology Exposition. The Exposition will have the following primary objectives:

[A.0] Develop the first in a series of regional events designed to promote the mutual sale of environmental technology to both U.S. and Japanese corporate executives and government officers.

[A.1] Stimulate marketing opportunities for U.S. and Japanese corporate/government participants in environmental technology by structuring opportunities for joint ventures, technology transfers, research and development and the import/export of products and services.

[A.2] Provide an on-going forum to inform high-level U.S./Japanese corporate and governmental decision makers of potential strategic alliances in a variety of environmental technologies.

[A.3] Promote U.S./Japanese corporate image-building by meeting the marketing goals and objectives of individual corporate conference participants.

[A.4] Contribute to fostering a more productive and effective U.S./Japanese trade relationship.

[A.5] Facilitate the implementation of previous public policy initiatives undertaken by U.S. and Japanese agencies and organizations through structured information exchange opportunities. (This could be accomplished through panels, roundtable discussions and business consultations.)

[A.6] Feature and incorporate state-of-the-art broadcast/long distance education technology to bring U.S./Japanese corporate and government conference activity to a broader professional and public audience.

[B] THE UNDERLYING LOGIC:

The U.S. and Japan have a tendency to look at economic, trade and global policy issues in terms of what divides us rather than to seek out common interests. The people of both countries have mutual global environmental concerns. The quality of life is in jeopardy and may be in significant decline due to inefficiencies and

waste in our use of resources, products and services. These factors offer a unique opportunity to emphasize the ties that bind, rather than irritants that divide.

The U.S. and Japan can respond constructively by developing an on-going series of conferences/expositions which bring together a select number of the key U.S./Japanese government decision makers. The focus would be to forge and implement strategic alliances. These can be accomplished through information exchange, joint ventures, research and development collaborations, partnering and equity investment in our bilateral environmental technologies.

The time is right for such exchanges as illustrated by two recent events. The first was a conference on U.S. industry access to Japanese science and technology which was jointly sponsored by the U.S. Department of Commerce's Technology Administration, the White House Office of Science and Technology Policy and the U.S. Department of State. Their motivation was Japan's growing role as innovator and manufacturer of new technologies. U.S. government policy is rapidly forcing change upon manufacturers in this country. It is now vital to their *very survival* for U.S. companies to monitor, understand and enlist Japanese scientific and technological developments in a range of industries, in general, and environmental technology, in particular.

The second event occurred in the global environmental policy arena. A meeting hosted by the International Chamber of Commerce, which was attended by 700 business leaders, convened in Rotterdam, Holland, in April of 1991. Forty-seven U.S. firms joined 103 other companies as signatories to an agreement to pursue sustained development and to make environmental management a high corporate priority. Notably absent, however, were the banks, which finance business investment, and insurance companies, which guarantee against financial loss from environmental disasters. These companies must be involved in the U.S./Japan Environmental Technology Exposition.

[C] THE CONFERENCE PARTICIPANTS:

The U.S./Japan Environmental Technology Exposition (**Strategic Opportunities for Survival or *S.O.S.***) will attract participants from among the elite U.S./Japanese senior executive corps. Senior executives would include Presidents/CEOs, Chief Financial Officers, Executive Vice Presidents, Directors of International Business Development, Corporate Strategists, Marketing and Sales Executives. A preliminary list of U.S. and Japanese-based government agencies and corporations follows:

Initial List of Japanese Government Agencies and Organizations

Consulate General of Japan
JETRO
MITI (AIST)
Indus. Pollution Control Assoc
NEC America, Inc.
Mitsubishi Corp. (Trading)
Toshiba
C. Itoh (Trading)
Tohoku Electric Power
Nissan Motor Co., USA
Mazda R&D of North America
Toyota Motor Co., USA
Fuji Electric Corp. of America
Japan Environmental Agency
NEDO
MITI (ANRE)
NEC - Tokyo
Japan Airlines
Mitsubishi Motors Co.
Fujita (construction)
Hitachi
Nissho-Iwai (trading)
Nissan R&D
Fuji Electric Corp.
Toyota Technical Center

Initial List of U.S. Government Agencies and Organizations

The White House

U.S. Department of Commerce (USDOC)

Environmental Protection Agency (EPA)

U.S. Department of State (USDS)

Southern California Air Quality Management District (SCAQMD)

California State Government agencies

Utility companies (Department of Water and Power, Southern California Edison, Southern California Gas)

Disaster Preparation Agencies

Corporate representatives from the banking, insurance, oil, chemical and telecommunications industries

U.S. organizations that are currently engaged in joint research and development and joint ventures with Japanese companies in the U.S.

[D] DESIRED WHITE HOUSE PARTICIPATION:

Erony, McKibben & Associates believes that your endorsement for the U.S. - Japan Environmental Technology Exposition: *S.O.S.* Project is essential. Specifically, we ask that you participate in the following ways:

[D.0] Provide a written letter of endorsement for the U.S./Japan Environmental Technology Exposition: SOS Project.

[D.1] Sponsor meetings with potentially-interested U.S. businesses as appropriate.

[D.2] Provide exposition production staff with personal introductions to U.S. corporations for individual presentations.

[D.3] Identify U.S. companies that are involved with or anticipating joint venture activity with Japanese corporations in the R&D, environmental projects areas. (i.e. Mitsubishi and American Capital Research, Fairfax, VA, a joint venture engaged in bidding for domestic/foreign contracts for the air pollution control program for Taiwan, Boston Harbor, etc.)

[E] THE CONFERENCE CONTENT:

[E.0] **Erony, McKibben & Associates** will organize and produce a two-day conference and exposition at a hotel/resort complex in a location to be determined. Exhibit space for U.S. and Japanese corporate/government exhibitors will be available.

[E.1] Conference organization will include two days of educational presentations, panel discussions, round-tables and exposition.

Pre-Activities: The evening prior to the event will feature an "Environmentally-Safe" Reception and Networking Session.

Day One: The first day will provide a plenary session in the morning, followed by luncheon with a keynote speaker. Exhibits will be open in the afternoon followed by breakout sessions featuring panel and roundtable discussions, workshops and debates. A dinner highlighting the new technologies discussed during the educational sessions will close out the day.

Day Two: Morning exhibits and demonstrations will be followed by a "Power Lunch" program to promote opportunities for business contacts and discussions. A plenary session with heavy-weight speakers will conclude the conference at 5:00 p.m.

A spouse program will be available.

[E.2] Conference Proceedings will be bound for distribution and will be available to all registrants. The contents will include all speaker presentations, papers and graphics.

[F] THE BENEFITS:

[F.0] Significant U.S./Japanese business activity in environmental technology will be generated by the event.

[F.1] The initial pilot conference will be repeated on a regional basis successively over a two-year time period.

[F.2] The U.S./Japanese sponsors will achieve a high-level, positive profile through a combination of media (radio/TV talk show activity, press interviews, cable/satellite coverage) and business consultations. It is our goal to help those sponsors to achieve their marketing goals in the U.S.

[F.3] New or consolidated bilateral environmental public policy structures, activities and linkages will result as an outgrowth of discussion held in the course of the exposition.

[G] THE CONFERENCE EVALUATION:

[G.0] A written evaluation will be completed by registrants during the conference.

[G.1] A tracking mechanism (questionnaire) will be developed and mailed to all registrants following the conference to assess the nature of business activities undertaken with U.S./Japanese companies.

[G.2] A conference report will be authored by Exposition Staff and the Conference Steering Committee summarizing all registrants' evaluations and returned questionnaires. The report will serve as a planning tool for future events and be presented to the Conference Sponsors for their information and follow-up.

[H] CONCLUSION:

It is our belief that the 1988 Science and Technology Agreement between the U.S. and Japan has not been utilized effectively. It is our purpose to provide a solid vehicle for the disbursement of information and business opportunities in the environmental arena between the two countries. In the process, we will also assist U.S./Japanese corporations to achieve their marketing goals. It is important to keep in mind that the evolving environmental mandates placed upon U.S. corporations by our government make the timing and need for such a conference even more critical.

Strategic Opportunities for Survival is distinctive in that it focuses on the Japanese experience in deploying environmental technology and provides a unique forum for promoting U.S./Japanese business alliances.

[F.3] New or consolidated bilateral environmental public policy structures, activities and linkages will result as an outgrowth of discussion held in the course of the exposition.

[G] THE CONFERENCE EVALUATION:

[G.0] A written evaluation will be completed by registrants during the conference.

[G.1] A tracking mechanism (questionnaire) will be developed and mailed to all registrants following the conference to assess the nature of business activities undertaken with U.S./Japanese companies.

[G.2] A conference report will be authored by Exposition Staff and the Conference Steering Committee summarizing all registrants' evaluations and returned questionnaires. The report will serve as a planning tool for future events and be presented to the Conference Sponsors for their information and follow-up.

[H] CONCLUSION:

It is our belief that the 1988 Science and Technology Agreement between the U.S. and Japan has not been utilized effectively. It is our purpose to provide a solid vehicle for the disbursement of information and business opportunities in the environmental arena between the two countries. In the process, we will also assist U.S./Japanese corporations to achieve their marketing goals. It is important to keep in mind that the evolving environmental mandates placed upon U.S. corporations by our government make the timing and need for such a conference even more critical.

Strategic Opportunities for Survival is distinctive in that it focuses on the Japanese experience in deploying environmental technology and provides a unique forum for promoting U.S./Japanese business alliances.
