Honorable D. Allan Bromley, Director
Office of Science and Technology Policy
The White House
Washington, DC 20500

Dear Dr. Bromley:

On behalf of the U.S. Departments of Commerce, Energy, and Transportation and NASA, I am pleased to confirm your participation in the National Technology Initiative (NTI) conference on September 25, 1992, at the University of Chicago. As you know, this is the eleventh in a series of regional forums bringing together government, industry, and academia to discuss the technology challenges facing American companies today.

The purpose of the meeting is to establish a dialogue on creating government-industry-university partnerships to bring new technologies to market, the need for long-term investment and financing for technology, and making manufacturing excellence and quality a national commitment. A brochure, including a preliminary agenda, and an NTI fact sheet are attached for your information.

Because of your expertise, you have been asked to moderate the Plenary Theme Session on cooperative R&D, technology financing, and manufacturing excellence from 9:45 to 11:00 a.m. We are asking the speakers to limit their prepared remarks to 10 minutes each. Background information on your session is also enclosed.

The meeting will take place in Ida Noyes Hall on the University of Chicago campus in Chicago. Directions, a map, parking information, and other program and logistical details are included on the attached "Speaker/Moderator Information" sheet.

In addition, included in this packet is an invitation and further details regarding the reception 5:00-6:30 p.m. the evening of September 24th just prior to R&D Magazine's 30th Annual "R&D 100 Awards" Banquet at the Chicago Museum of Science and Industry.

Please fax to Mike Roberson in my office by September 15th a brief biographical sketch, an abstract of your presentation, and any audio/visual needs you may have (fax 202/377-0184; phone 202/377-0185). There will also be an exhibit area at the meeting, so feel free to make available copies of your presentation or related materials.

I look forward to your participation, and to seeing you at the National Technology Initiative.

Sincerely,

Deborah Wince-Smith

Deborah L. Wince-Smith

- (1) Brochure
- (2) NTI Purpose and Scope
- (3) NTI Schedule of Conferences
- (4) Detailed Preliminary Agenda
- (5) Speaker/Moderator Information and Map
- (6) Workshop Description
- (7) Agency Tech Transfer Contacts
- (8) Press Release
- (9) NTI Public Affairs Contacts
- (10) Audio-Visual Form
- (11) Evaluation Form
- (12) Speaker Addresses/Phones/Fax
- (13) Fact Sheet
- (14) Videotape Release Form
- (15) Reception Invitation

NATIONAL TECHNOLOGY INITIATIVE

PURPOSE AND SCOPE OF THE NATIONAL TECHNOLOGY INITIATIVE

- To promote U.S. industry's use of technology to strengthen the domestic economy and to compete in global markets, Federal agencies are joining together with the private sector in the National Technology Initiative (NTI).
- The Initiative promotes a better understanding of opportunities for industry to commercialize new technology advances. It highlights the Federal government's investment in science and technology, much of which may have commercial potential. The Initiative seeks business expansion through:
 - increased application of both Federally and privately supported technology,
 - the creation of more high value-added jobs for Americans, and
 - the establishment of new contacts for business cooperation.
- Conferences are being held in several regions. They parallel a successful 1991 series to promote exports.
- In conjunction with these conferences, Federal agencies are accelerating their efforts to make it easier for the private sector to commercialize technology advances.
- In recent years, government-business ties have improved dramatically in addressing key barriers to the private sector's commercialization of new technologies. For example:
 - Legislation and Presidential orders have made it easier for firms to cooperate on research and development (R&D).
 - Government and industry are co-funding and cooperating in R&D programs.
 - The Bush Administration has advanced a series of regulatory, tax and legal incentives to help firms develop and apply new technologies.

- The focus of each NTI conference is on:
 - raising industry awareness of government-sponsored programs, services and laboratories,
 - identifying ways in which government-industry and industry-industry cooperation can help the private sector to commercialize technology, and
 - providing feedback to Federal, state and local government officials on successes and difficulties in commercializing technology.
- Each meeting addresses manufacturing excellence, mechanisms for cooperative R&D and long-term investment and financing, and intellectual property. In addition, conferences target technologies of interest to each region's industry.
- Experts from business, academia and government agencies at all levels—including senior policy makers from the Departments of Commerce, Energy and Transportation and the National Aeronautics and Space Administration—explore with conference participants practical ways for making better use of our Nation's technological strengths. The conferences feature a discussion format.

NATIONAL TECHNOLOGY INITIATIVE

<u>LOCATION</u>	<u>DATE</u>	<u>TECHNOLOGY FOCUS *</u>
Cambridge, MA	2/12/92	Environment, Biotechnology
Austin, TX	3/4/92	Energy (Oil & Gas), Electronics
Orlando, FL	3/24/92	Aerospace, Food
Research Triangle, NC	4/9/92	Biotechnology, Environment
Cleveland, OH	4/23/92	Materials, Advanced Manufacturing
Seattle, WA	5/14/92	Transportation, Environment
Pasadena, CA	5/29/92	Aerospace, Biotechnology, Environment

Partners in Progress: A Dialogue

**Opportunities for Commercialization of Technologies
in the Chicago Area**

Objective: To have a candid dialogue among business, university, and government leaders to identify effective ways to translate new technologies into competitive goods and services.

Site: University of Chicago

Date: September 25, 1992

Format: A series of discussions among participants from business, universities, and government with a particular focus on emerging technological interests of the Chicago area.

PRELIMINARY AGENDA

7:45-8:45 Registration and Continental Breakfast

8:45-9:35 Conference Opening

Host Speaker: Edward O. Laumann, Provost,
University of Chicago

Introduction of Administration Officials:

Barbara H. Franklin, Secretary, U.S.
Department of Commerce

James D. Watkins, Secretary, U.S. Department
of Energy

Frank A. Bracken, Deputy Secretary, U.S.
Department of Interior

D. Allan Bromley, Assistant to the President
and Director, Office of Science and
Technology Policy, The White House

9:35-9:45 Break

9:45-11:00 **Plenary Theme Session on R&D Partnerships,
Technology Financing, and Manufacturing**

Moderator: D. Allan Bromley, Assistant to the
President and Director, Office of Science and
Technology Policy, The White House

Panelists:

Cooperative R&D

John P. McTague, Vice President for Technical Affairs, Ford Motor Company

Subrata Banerjee, Vice President for Research and Development, Magneco/Metrel, Inc.

Long-Term Investment and Financing of Technology

Francis I. Blair, President, IEG Venture Management, Inc.

Max L. Lake, President, Applied Sciences, Inc.

Manufacturing Excellence

TBD

11:00-11:15 Break (collection of written questions)

11:15-12:00 **Plenary Dialogue**

Moderator: Robert M. White, Under Secretary for Technology, U.S. Department of Commerce

12:00-1:30 **Luncheon**

Introduction of Speaker: David H. Cohen, Provost, Northwestern University

Keynote Speaker: TBD

1:30-1:45 **Summary and Charge to Workshops**

Speaker: Frank A. Bracken, Deputy Secretary, U.S. Department of Interior

1:45-5:00 Concurrent Workshops Series

1:45-3:15 WORKSHOP SERIES 1

Workshop 1a - Partnerships in Materials Science

Moderator: Alan Schriesheim, Director, Argonne National Laboratory

Panelists:

Frank Jelinek, Director, Advanced Materials Center
for the Commercial Development of Space, Battelle

Robert B. Troendly, President and CEO, Shaped
Wire, Inc.

Carl Rosner, President, Intermagnetics General
Corporation

Steve Wasko, Vice President of Operations,
Illinois Superconductor Corporation

Workshop 1b - Biotechnology Partnerships

Moderator: John H. Skinner, Deputy Assistant
Administrator for Research and Development, U.S.
Environmental Protection Agency

Panelists:

Per B. Christiansen, President and CEO, Nalco Fuel
Tech

Michael W. Morgan, President, Ability Engineering
Technology, Inc.

Joseph Endres, Director of Exploratory Research,
Central Soya Company, Inc.

Workshop 1c - Federal Technology Transfer

Moderator: William Happer, Science and Technology
Advisor, Office of the Secretary, U.S. Department
of Energy

Panelists:

Jon Paugh, Acting Director, Office of Technology
Commercialization, Technology Administration, U.S.
Department of Commerce

Joseph W. Ray, Director, NASA Mid-West Regional
Technology Transfer Center and Great Lakes
Industrial Technology Center

Nick Montanarelli, Director, Technology
Applications Program, Strategic Defense Initiative
Organization, U.S. Department of Defense

Ted Schoenborn, Technology Transfer Coordinator,
National Institute for Occupational Safety and
Health, U.S. Department of Health and Human
Services and Mid-West Deputy Regional Coordinator,
Federal Laboratory Consortium

3:15-3:30

Break

3:30-5:00

WORKSHOP SERIES 2

**Workshop 2a - Partnerships for Manufacturing
Excellence**

Moderator: Ambassador Henry F. Cooper, Director,
Strategic Defense Initiative Organization, U.S.
Department of Defense

Panelists:

Samuel Kramer, Deputy Director, National Institute
of Standards and Technology, Technology
Administration, U.S. Department of Commerce

Mark Roth, Director for Technology Development,
Allen-Bradley Company

Additional speaker TBD

**Workshop 2b - Protecting Intellectual Property
Rights and Technical Data in
Technology Commercialization
Partnerships**

Moderator: Dan Haendel, Senior Counsel, U.S.
Department of Commerce

Panelists:

Neil E. Wyant, Licensing Manager, ARCH Development
Corporation

Curtis P. Ribando, Senior Patent Advisor,
Agricultural Research Service, U.S. Department of
Agriculture

Ray Barnes, Technology Transfer Administrator,
Idaho National Engineering Laboratory, U.S.
Department of Energy

Robert L. Holman, President and CEO, NiOptics
Corporation

**Workshop 2c - Financing of Partnerships for
Technology Commercialization**

Moderator: John G. Mannix, Assistant
Administrator for Commercial Programs, NASA

Panelists:

John Moran, Partner, High Technology Practice,
KPMG Peat Marwick

Charles Rial, Managing Director, Shorebank
Advisory Services, Inc.

Rita Wain, President, P&R Precision, Inc.

5:00

Conference Adjourns

National Technology Initiative Speaker/Moderator Information

Chicago, Illinois

Thank you for joining us on the program; your participation is essential to the "dialogue" we are launching not only at this, our eleventh regional National Technology Initiative Conference, but all across the Nation.

We hope the following information will prove useful as you confirm your arrangements

★ Meeting Location

The University of Chicago's Ida Noyes Hall is located on the northeast corner of the intersection at 59th Street & Woodlawn Avenue. The building's main entrance is 1212 East 59th Street. A map of the campus is enclosed; directions to the campus and parking are below. The registration desk, located at the entrance of the Hall, will open at 7:45 a.m. Please check with Sally Rood upon your arrival at the registration desk. Your registration and lunch are, of course, complimentary.

Should you need to contact us on the morning of the conference or receive a message, the telephone number to the conference desk/message center is (312) 702-1386.

★ Housing

You are responsible for arranging your own accommodations. However, a block of rooms has been set aside for program participants and conference attendees at the rate of \$97 (\$87 government rate) at the Palmer House Hilton, 17 East Monroe Street, Chicago, Illinois 60603. **You must register by September 18 to get this rate.** The telephone number is (312) 726-7500. To reserve rooms, call the hotel directly and ask for the "University of Chicago Centennial" rate.

The hotel is located approximately 8 miles northwest of the University. The hotel will provide shuttle service to the University (see next page).

★ Transportation

For program participants arriving at O'Hare International Airport, Continental Transport buses provide transportation to Chicago area hotels. The Palmer House Hilton does not provide shuttle service from the airport.

To University of Chicago Via Lake Shore Drive, from the North: Take Lake Shore Drive south to the 53rd Street exit.

Proceed west to Woodlawn Avenue. Turn left on Woodlawn and proceed south to Woodlawn Avenue & 59th Street. **Alternatively, via Dan Ryan Expressway:** Exit at Garfield Blvd. (55th Street)

and proceed east through Washington Park. Bear right -- toward 59th Street -- ending at Midway Plaisance. Turn left onto the Midway and proceed east to Woodlawn Avenue. Turn left and proceed north to the second intersection, Woodlawn & 59th Street.

To University of Chicago Via Train: Take the Metra Electric train from the station at Michigan & Randolph or Michigan & Van Buren. Exit at 59th St. Walk through campus 5 blocks west to Woodlawn & 59th Street. The elevated train is not recommended.

To University of Chicago Via Bus: Board the southbound Jeffery Express bus (#6) on State Street at any stop between Lake Street and Van Buren. Get off at 59th Street. Walk or take a taxi cab six blocks west to Woodlawn and 59th Street.

★ Conference Parking & Shuttle Service

Transportation to the conference will be provided from the Palmer House Hilton at 7:30 and 8:00 a.m., returning to the hotel at the conclusion of the conference.

Complimentary parking will be available in the parking lot located on Kimbark Avenue between 60th and 61st Streets. At that point, Kimbark Avenue is a block-long dead-end street; to reach it, go south on Woodlawn Avenue, east on 60th, and south on Kimbark. To get to Ida Noyes Hall from the lot, walk west on 60th and north on Woodlawn to the Hall on 59th (see campus map, attached).

★ Meeting Format

Deborah Wince-Smith, Assistant Secretary for Technology Policy at the U.S. Department of Commerce, has prepared a detailed outline on the scope of discussion for each panel member. A copy is enclosed.

The day is divided into a Plenary Theme Session and Workshops. Each dais will have a standing lectern with microphone and panel table that will seat the panel members and the moderator.

If you are the moderator, you will briefly introduce the panel, give general opening remarks to set the tone and context of the discussion, and, most importantly, keep all speakers within their time allotment. At the conclusion, it is appropriate for the moderator to offer a brief recap based on the discussion.

Another important duty for the moderator is to direct the questions that have been gathered from the audience to the panel members. Question cards will be in the participant packages. The moderator will ask that questions be written down and passed to the card collectors. Please ask members of the audience to include their name and address on the card since any question not answered during the session will be answered by mail later. For the Plenary session, questions will be fielded during the one-hour Plenary Dialogue indicated on the Program. For the workshops, the last 20 minutes are reserved for answering questions. Moderators will be given further instructions on site. At the conclusion of the session, all questions will be given to the moderator's staff.

Both Plenary session panelists and Workshop panelists are expected to deliver a ten-minute presentation. Panelists will be asked to remain on stage during the question-and-answer periods to answer questions directed by the moderator.

If you are in the morning session, we ask that you arrive at the conference site at 8:00 a.m. so that you may meet as a panel. (We hope that the moderators and panelists will have discussed their sessions prior to this time. Included in the speaker packet is a list of names, addresses, and telephone numbers for the panel/workshop members.) If you are unable to arrive at the start of the conference, please check in 30 minutes before your panel.

★ Audio/Visual Requirements

Mike Roberson at the Department of Commerce will handle requests for audio/visual support (eg., slide, overhead, or videotape projectors). You can fax

to him the enclosed "Audiovisual Request Form" (fax 202/377-0184), or phone him with questions at (202) 377-0185.

Also, please fax your biography (if you have not already done so) to Mr. Roberson. See fax number, above.

★ **Press Availability**

We have not made specific arrangements for press availability for anyone other than the Cabinet principals. If you should be approached prior to the conference for a press statement, we would ask that you contact the Press Coordinator for the National Technology Initiative, Mat Heyman, at (301) 975-2762.

★ **All Other**

Enclosures to this packet including a number of background sheets are listed on the cover letter. Should you need additional information on the NTI or have questions about your participation, please call Sally Rood at the Technology Administration, U.S. Department of Commerce, (202) 377-0826.

We look forward to your participation and thank you for arranging your schedule so you can join us at the University of Chicago for the National Technology Initiative Conference.

PLENARY SESSION

INTEGRATING R&D PARTNERSHIPS, TECHNOLOGY FINANCING & MANUFACTURING

PURPOSE: Panelists will provide information and insight: on how businesses can link up with Federal labs and universities and otherwise cooperate with each other in innovation and its commercialization; accessing long term financing for technology development and business expansion; and the challenges in adopting modern manufacturing methods and technologies.

MODERATOR: Introduces panelists, describes context for discussion (strengthening U.S. competitiveness), and emphasizes need for business, academia, and government to build partnerships.
10 minutes)

Cooperative R&D

TWO PANELISTS
ONE FROM AN
R&D CON-
SORTIUM;
ONE FROM
INDUSTRY
FAMILIAR
WITH CRADA'S
(10 minutes
each)

- Discuss experiences of U.S. firms in inter-industry cooperative R&D agreements under the National Cooperative Research Act and other arrangements.
- Describe the various models of intra- and inter-industry cooperation.
- Discuss the nature of Cooperative Agreements with Federal agencies under the Technology Transfer Act, as amended, and ties to universities under the Bayh-Dole Act.
- Discuss the experiences of a U.S. firm successfully partnering with a Federal lab and/or university.

Technology Financing

TWO PANELISTS
ONE FROM A
FINANCING:
SOURCE; ONE
FROM INDUSTRY
(10 minutes
each)

- Describe the primary sources of funding that may be available from outside a company (e.g. banks, angels, other individuals, venture capital, pension funds, mutual funds, other companies, foreign sources), and how some long term company-investor relationships have achieved success.
- Describe, in case study form, how a company developed solutions to the technology financing challenge, including benefits of partnering with other companies.

PLENARY SESSION, continued

Manufacturing

TWO PANELISTS
FROM INDUSTRY
(10 minutes
each)

- Discuss how modern manufacturing technologies and methods (e.g. flexible manufacturing, TQM, JIT, concurrent engineering, closer producer-supplier relationships) represent a paradigm shift and meet the demand for high productivity, speed-to-market, and quality.
- Discuss the connection between introducing a new product and manufacturing flexibility, and management integration/teamsmanship.
- Discuss, from industry's standpoint, the favorable results achieved from conversion to modern manufacturing.

Plenary Dialogue
11:00-11:45 a.m.

CABINET OFFICERS JOIN INDUSTRY FOR NATIONAL TECHNOLOGY INITIATIVE IN CHICAGO

The Secretaries of Commerce and Energy and the President's Science Advisor will be among the speakers at the National Technology Initiative (NTI) conference Sept. 25 in Chicago aimed at strengthening America's competitiveness.

Secretary of Commerce Barbara Hackman Franklin, Secretary of Energy James D. Watkins and D. Allan Bromley, the President's Science Advisor, head the list of speakers at this 11th regional conference, hosted by the University of Chicago.

It is designed to promote better understanding of private sector opportunities to commercialize new technology advances. The first 10 NTI conferences drew more than 3,500 attendees.

President Bush has described the initiative as among:

"Steps we can take right now to guarantee progress and prosperity into the next American century. We get there by investing in the technologies of tomorrow, with federal support of R&D at record levels. We need to share the results, get the great ideas generated by public funds out into the private sector, off the drawing board and onto store shelves. Our National Technology Initiative will do just that...."

The Sept. 25 conference begins at 8:45 a.m. at the university's Ida Noyes Hall, 1212 East 59th Street. Sessions will focus on manufacturing excellence, financing technology, cooperative research and development opportunities, intellectual property rights, materials and biotechnology.

- more -

Sponsored by several federal agencies, the initiative illustrates the federal government's investment in technologies that should have commercial potential. It also stresses the private sector's role in commercializing technology. The NTI conferences have generated scores of new contacts and promoted more effective technology transfer.

The conference registration fee is \$95. Participants may register in advance by contacting the university's Office of Special Events, (312) 702-1386.

NTI conferences also are planned for Palo Alto, Calif. (Oct. 15); Pittsburgh, Pa. (Oct. 27); and Baltimore, Md. (Dec. 1). **For general information about NTI conferences, contact Jennifer Wright, National Institute of Standards and Technology, (301) 975-2170.**

EVALUATION FORM

Please complete this evaluation form using the back for any additional comments.
Your comments are extremely valuable and will be very useful in shaping future programs.

PLEASE CIRCLE THE APPROPRIATE RESPONSE.

5	4	3	2	1
Excellent	Very Good	Good	Satisfactory	Unsatisfactory

1. What is your overall evaluation of this conference? 5 4 3 2 1
2. How well did the program meet your expectations? 5 4 3 2 1
3. How did the speakers rate in terms of:
 - a. Preparation 5 4 3 2 1
 - b. Presentation 5 4 3 2 1
 - c. Content 5 4 3 2 1
4. Speakers' responses to questions 5 4 3 2 1
5. Relevance and quality of conference materials 5 4 3 2 1
6. Session length (5 - too long, 1 - too short)
 - a. Plenary 5 4 3 2 1
 - b. Workshops 5 4 3 2 1
7. Program content (5 - too advanced, 1 - too basic) 5 4 3 2 1
8. What did you learn at this conference that will be beneficial to your business?

9. What would you like to see changed in future programs?

10. What follow-up materials would you like to receive?

8 September 1992

Dear NTI Speaker:

You are cordially invited to attend a special reception for NTI Speakers and the winners of the 1992 R&D 100 Awards, to be held Thursday, September 24, from 5 p.m. to 6:30 p.m. at the Museum of Science & Industry, 57th Street and Lake Shore Drive, Chicago.

This year is the 30th Anniversary of the R&D 100 Awards, which are given to the 100 most technologically significant new products and inventions of the year.

The staff of R&D Magazine and Cahners Publishing Company look forward to meeting you in Chicago on September 24!

Sincerely,

A handwritten signature in cursive script that reads 'Robert Cassidy'.

Robert Cassidy, Chairman
R&D 100 Awards Program
Chief Editor, R&D Magazine

P.S. The Museum will be open from 9:30 a.m. to 5 p.m. on September 24; admission is free. If you would like to attend the R&D 100 Banquet, beginning at 6:30 p.m., there is a ticket price of \$135 per person. Please contact Tina Lentz at 708-390-2739 (fax: 708-390-2618) for tickets.

Cahners Publishing Co.
A member of the Reed International Group

GENERAL INFORMATION

SITE

The conference will be held at the University of Chicago in Ida Noyes Hall which is located at 1212 East 59th Street, at the intersection of 59th Street and Woodlawn Avenue. The main entrance is on 59th Street.

REGISTRATION INFORMATION

Advance registration must be received by September 21. Registration is not complete until we receive payment. Registration at the conference will be on a space available basis. The registration desk at Ida Noyes Hall will be open at 7:45 a.m., September 25. For further information, call Julianne Gorny or Niki Antonakos at 312/702-1386.

REFUND POLICY

In order to receive a refund (less a \$25 administrative fee), you must cancel your registration in writing by mail or fax (312/702-8173) by September 18.

HOTEL ACCOMMODATIONS

Registrants are responsible for arranging their own accommodations. A conference group rate of \$97 is available at the Palmer House Hilton, 17 East Monroe Street, Chicago, Illinois 60603. Please contact the hotel directly at 312/726-7500, identify yourself as a participant of the National Technology Initiative conference and ask for the "University of Chicago Centennial Rate." These special rates are based on space availability; early reservations are strongly recommended.

TRANSPORTATION

Shuttle service from O'Hare International Airport to the Palmer House Hilton is provided by Continental Transport Buses.

Shuttle buses will provide transportation from the Palmer House Hotel to the conference site in the morning and return to the hotel at the end of the conference. This service is available only to registered guests of the hotel.

Directions and parking information for registrants driving to the conference will be mailed with your confirmation letter.

WORKSHOP PREFERENCE FORM

National Technology Initiative

You are invited to take part in the Chicago conference of the . . .

September 25, 1992
University of Chicago
Chicago, Illinois

NATIONAL TECHNOLOGY INITIATIVE

A coast-to-coast series of conferences designed to bring together the critical elements for U.S. competitiveness:

★ Technology ★ Capital ★ Manufacturing ★

Workshops on . . .

Manufacturing Excellence

Representatives of industry and government will examine the changing manufacturing environment, successful management of change, adoption of advanced manufacturing equipment and methods, skills training, and lessons learned.

Federal Technology Transfer

Federal technology transfer officials will discuss mechanisms for forming effective partnerships between industry and government, such as consortia, cooperative research and development agreements (CRADAs) and patent licensing. Examples of successful partnerships will be highlighted.

Financing Technology

Technology financing executives and federal officials will examine a wide range of capital sources from the perspectives of both financiers and technologists. Topics will include venture capital, joint ventures, cost-shared development for technology commercialization, and the Small Business Innovation Research (SBIR) program.

Advanced Materials

Industry and federal government officials will discuss their experiences in developing advanced materials and processing; improving the reliability, cost and quality of materials; bridging the gap between innovation and the application of advanced materials technologies; and strengthening the federal, corporate and university cooperation in materials research and transfer.

Biotechnology

Representatives of Federal laboratories and the private sector will discuss challenges and opportunities in converting research in biotechnology into competitive products for the world market. Topics will include Federal and university technology transfer, how to identify promising commercial opportunities, and different approaches to commercialization and manufacturing scale-up.

"If America is to maintain and strengthen our competitive position, we must continue not only to create new technologies, but to more effectively translate those technologies into commercial products."

— President George Bush
*Presentation Ceremony of the National
Medals of Technology and Science
November 13, 1990*

The United States' dynamic culture of innovation is the envy of the world. The best scientists and engineers, world-class research facilities and long-term commitments have put us at the forefront in the creation of new technologies.

In recent years, however, we have lost market shares to foreign competition on key technologies and industries that we pioneered — for example, the transistor, VCR, color television, telephone and semiconductors.

The lesson is clear. Success in the laboratory does not necessarily translate into success in the marketplace. If we are to achieve the full economic benefits our superior technology can deliver, America must turn technology into high-quality products and services and bring them to the market ahead of the competition.

The **National Technology Initiative** conferences are designed to put together the critical elements for U.S. competitiveness: technology, capital and manufacturing. NTI fosters cooperation among industry, federal laboratories and universities — helping to strengthen the ties that underpin our free enterprise system and to forge partnerships that will create new jobs.

NTI showcases models of excellence in manufacturing and in the timely commercialization of federal technologies. The meetings help put technology-based businesses in touch with the financial community, and with federal and state business assistance.

In short, NTI helps forge new alliances that can integrate technology, capital and manufacturing into a competitive force, and help us to bring this nation's unparalleled resources fully to bear in meeting the challenges of global competition.

PARTNERSHIPS IN ADVANCED MATERIALS

Moderator:
Alan Schriesheim, Director, Argonne National Laboratory, U.S. Department of Energy

Panelists:

Frank Jelinek, Director, Advanced Materials Center for the Commercial Development of Space, Battelle
Robert B. Troendly, President and CEO, Shaped Wire, Inc.
Carl Rosner, President, Intermagnetics General Corporation
Steve Wasko, Vice President of Operations, Illinois Superconductor Corporation

PARTNERSHIPS IN BIOTECHNOLOGY

Moderator:
John H. Skinner, Deputy Assistant Administrator for Research and Development, U.S. Environmental Protection Agency

Panelists:

Per B. Christiansen, President and CEO, Nalco Fuel Tech
Michael W. Morgan, President, Ability Engineering Technology, Inc.
Joseph Endres, Director of Exploratory Research, Central Soya Company, Inc.

FEDERAL TECHNOLOGY TRANSFER

Moderator:
William Happer, Science and Technology Advisor, Office of the Secretary, U.S. Department of Energy

Panelists:

Jon Paugh, Acting Director, Office of Technology Commercialization, Technology Administration, U.S. Department of Commerce
Joseph W. Ray, Director, NASA Mid-West Regional Technology Transfer Center and Great Lakes Industrial Technology Center
Nick Montanarelli, Director, Technology Applications Program, Strategic Defense Initiative Organization, U.S. Department of Defense

Ted Schoenborn, Technology Transfer Coordinator, National Institute for Occupational Safety and Health, U.S. Department of Health and Human Services

PARTNERSHIPS FOR MANUFACTURING EXCELLENCE

Moderator:
Henry F. Cooper, Director, Strategic Defense Initiative Organization, U.S. Department of Defense

Panelists:

Samuel Kramer, Deputy Director, National Institute of Standards and Technology, Technology Administration, U.S. Department of Commerce
Mark Roth, Director for Technology Development, Allen-Bradley Company

PROTECTING INTELLECTUAL PROPERTY RIGHTS AND TECHNICAL DATA IN TECHNOLOGY COMMERCIALIZATION PARTNERSHIPS

Moderator:
Dan Haendel, Senior Counsel, U.S. Department of Commerce

Panelists:

Neil E. Wyant, Licensing Manager, ARCH Development Corporation
Curtis P. Ribando, Senior Patent Advisor, Agricultural Research Service, U.S. Department of Agriculture
Ray Barnes, Technology Transfer Administrator, Idaho National Engineering Laboratory, U.S. Department of Energy

Robert L. Holman, President & CEO, NiOptics Corporation
FINANCING OF PARTNERSHIPS FOR TECHNOLOGY COMMERCIALIZATION

Moderator:

THE WHITE HOUSE
WASHINGTON

August 10, 1992

Dear Dr. Abrahamson:

Thank you for your letter of July 29 inviting me to address a seminar for scientists and technical specialists scheduled on September 9-11, 1992.

With the understanding that it is always possible that Presidential scheduling may force a change in my plans, I would be delighted to accept your invitation for September 9. I will be out of town on September 10-11. I hope that you might be able to accommodate my schedule. As the time of the seminar approaches, my staff will contact you to work out details for the event.

I am pleased that you thought of me and look forward to the occasion.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "D. Allan Bromley". The signature is fluid and cursive, with the first name "D." and last name "Bromley" clearly distinguishable.

D. Allan Bromley

MAIL ROOM

Dr. D. Allan Bromley
Assistant to the President for
Science and Technology
Old Executive Office Building, Room 360
17th Street and Pennsylvania Avenue, N.W.
Washington, DC 20500

Dear Dr. Bromley:

The Air Force will host a seminar for its top civilian scientists and technical specialists in Washington, D.C., 9-11 September 1992. These individuals, known as "STs", hold key positions of Senior Research Scientist, Chief Scientist, and Technical Advisor. The seminar is an opportunity for these individuals to meet with senior government leaders in a learning and discussion forum. We anticipate an agenda that emphasizes topics and developments of current interest to the science and technology community. A list of invited participants is attached.

If your schedule permits, we would appreciate your addressing the group for approximately 30 minutes, followed by questions. I will call you to see if your schedule will permit you to participate and to answer questions.

I hope you will be able to join us.

Sincerely,

GEORGE R. ABRAHAMSON
Chief Scientist

THE WHITE HOUSE
WASHINGTON

September 29, 1992

Dear Mses. Woo and O'Connell:

Thank you for your letter of September 8, inviting me to present a lecture at the Annual Meeting of the AAAS next year scheduled to be held in Boston on February 11-16. I apologize for the much belated response.

I am happy to accept your invitation but must caution you that occasionally I have to cancel engagements at the last moment due to Presidential requests. I sincerely hope that this does not happen.

As the time of the meeting approaches, my staff will contact you to work out details for the event.

I am looking forward to the occasion.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "D. Allan Bromley", written in a cursive style.

Fax: (202) 289-4021

September 8, 1992

D. Allan Bromley
Office of Science & Technology Policy
Washington, DC 20500

Dear Dr. Bromley:

On behalf of AAAS President F. Sherwood Rowland, we are honored to invite you to present a topical lecture at AAAS*93, the Annual Meeting of the American Association for the Advancement of Science, which will be held in Boston at the Hynes Convention Center and Sheraton Boston, February 11-16, 1993.

As you would expect from a meeting of the world's leading general scientific society, AAAS*93 will cover the spectrum of the physical, life, and social sciences, attracting thousands of registrants and reaching millions more through extensive press coverage by several hundred journalists from around the world.

At AAAS*93, twenty-two tracks of related symposia will create meetings within our meeting and address exciting topics throughout the realm of science. AAAS*93 will offer sessions for working scientists seeking specific information within- and beyond- their field, sessions that focus on the fun side of science, sessions that address crises that the scientific community can help resolve, and sessions to advance the scientific education of students of all ages.

We envision your role as a topical lecturer to have many dimensions: highlighting a hot issue, linking symposia within a track, holding the audience within the track, and particularly emphasizing the interdisciplinary nature of the AAAS Annual Meeting by offering attendees whose main interest lies outside the subject area an opportunity to sample a one-hour discussion rather than attend a three-hour symposium. The one-hour slot permits more in-depth treatment of a single topic than that provided by a regular symposium speaker.

Your participation would be scheduled as part of the track on "Science, Ethics, and the Law". Your talk on "The Theory and Practice of Science Advising: In the U.S.A. and Abroad" is scheduled on Monday, February 15, from 1:15-2:15 pm.

September 8, 1992

In past years, speakers paid the regular meeting registration fee to attend sessions other than the one in which they spoke. We want to encourage you to attend more of AAAS*93, both for your own enjoyment and edification and also to give attendees -- particularly young scientists -- the opportunity to speak with you. Therefore, we have established a special speaker registration fee of only \$50 for the complete five-day meeting. Proceeds from this nominal charge will cover costs and support an award fund to honor the best student contributed papers presented at the meeting.

As a nonprofit organization, AAAS cannot usually provide funds for speaker travel to the meeting. If you absolutely cannot attend without financial assistance, you must let us know before 30 September and we will try to help.

Enclosed are a lecturer response form and an abstract form. Please follow the instructions re: response date and submission procedures. Confirmed speakers will be mailed registration, hotel, and A-V equipment forms in October.

Please notify our office immediately if your plans should change at any time. Do not hesitate to call Sue O'Connell at (202) 326-6714 with any questions. We look forward to seeing you in Boston!

Sincerely yours,

Robin Yeaton Woo

you as a speaker.*

AAAS☆93 Topical Lecturer Response Form

Please provide all information as you would like it to appear in the Meeting Program.

Deadline: 30 September

☐ I accept the invitation to speak at the 1993 AAAS Annual Meeting.

☐ I decline the invitation.

Name _____

Institutional affiliation _____

Department _____

Address _____

City/state/zip/country _____

Phone _____ Fax _____

Talk title (10-word maximum) _____

Please fax or mail to Cynthia Heasley, AAAS Meetings Office, 1333 H Street, NW, Washington, DC 20005; fax 202-289-4021.

Note: So that we may list you as a confirmed speaker in promotional materials, please respond as soon as possible!
Thank you.

AAAS☆93 Topical Lecturer Abstract Form

Please provide a typed, double-spaced, 200-word abstract of your presentation for publication in the Meeting Program. Because the book will be produced using scanning technology, you need to submit an unfolded original copy (no faxes).

Deadline: 12 October.

Your name _____

Talk title (10-word maximum) _____

Abstract:

Please mail to Cynthia Heasley, AAAS Meetings Office, 1333 H Street, NW, Washington, DC 20005. If you have questions, call Sue O'Connell at 202-326-6714.

RE: Forms for Permission to Publish

DATE: August 19, 1992

In order for us to print your presentation at the Seventeen Annual AAAS Colloquium on Science and Technology Policy in the upcoming AAAS Science and Technology Policy Yearbook, 1992, we need to have the permission-to-publish form on file.

Enclosed are two copies of the form for your signature. Please return one to our office; the other is a duplicate original for your files.

We have had virtually uniform positive feedback on the Colloquium, and I want to thank you once again for your high quality contribution to the meeting.

American Association for the Advancement of Science

PERMISSION TO PUBLISH ARTICLE

TO: _____
(hereafter called the Author)

The AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE (AAAS) is pleased to have permission to publish your article entitled _____

(hereafter called the Work)

(coauthors) _____

In a volume entitled

AAAS Science and Technology Policy Yearbook 1992
(hereafter called the Volume)

Edited by Kathleen M. Gramp, Stephen D. Nelson and Albert H. Teich

The following are the terms of publication:

In order to publish and distribute this Volume, AAAS must secure and hold copyright to the Volume. To this end, we must ask you to grant us publication rights for your part(s) of the Work and of the Volume. Note that you retain the right to publish the same information in other print or nonprint media, even though AAAS holds the copyright to this Volume.

1. Consent. Whereas the AAAS is undertaking to publish the Work named above, of which the undersigned is Author, the Author transfers to AAAS the right to publish the Work in the Volume, to distribute the Volume throughout the United States and/or the world, to translate the Work into any language, to reprint the Work, to keep the Work in print by conversion to microform or machine-readable form, or to let the Work go out of print at such time as in the sole judgment of AAAS such should occur. The Author agrees to secure permission from and give proper credit to AAAS in any subsequent publications of the information included in the Work and agrees not to authorize direct reprinting of the Work in the AAAS-copyrighted form without the written permission of AAAS.

2. Right to Publish. The Author guarantees that the material furnished (the Work) has not been previously published elsewhere and that he/she has the right to publish the material, or that if it has been previously published in whole or in part, permission has been obtained by the Author for publication by AAAS. The Author will submit such permissions with the signed copy of this document. The Author assumes complete responsibility for any infringement of the rights of others by material included in the original manuscript. The Publisher assumes complete responsibility for such infringements by supplementary material provided by the Publisher.

3. Compensation. The Author shall receive one (1) free copy of the volume upon its publication and may purchase others at the standard author's discount of 50 percent of the list price. In order to disseminate information more effectively, AAAS prices books as low as possible. Income from book sales generally covers little more than the cost of production; therefore, royalties are not given.

Please sign and date two (2) copies of this agreement, returning one (1) to AAAS and retaining the other copy for your files. Note that publication of the Volume cannot be completed until this document is signed and returned, along with any required permissions.

Address to which free copy should be sent:

THE WHITE HOUSE
WASHINGTON

September 10, 1992

Dear Dr. Olsen:

Thank you for your letter of July 23, inviting me to visit the University of Notre Dame. I apologize for the much belated response.

I would, indeed, be interested in visiting Notre Dame and presenting a lecture on the "National Needs for R&D." I would suggest the late November-December time period. Please contact Ralph Brescia at 202/456-7116 to arrange a mutually convenient time.

I look forward to joining you.

Sincerely yours,

A handwritten signature in dark ink, reading "D. Allan Bromley". The signature is fluid and cursive, with the first name "D. Allan" and last name "Bromley" clearly legible.

Washington, DC 20500

Dear Dr Bromley;

A few years ago I attended your lecture to the new crop of Air Force "STs", the federal government's scientific equivalent to the Senior Executive Service (SES). The purpose of this letter is to determine if you might be interested in presenting another lecture on "The National Needs for R&D" to the faculty and students of the University of Notre Dame.

At the time I first heard you I was the newly appointed Chief Scientist in the Air Force's Flight Dynamics Laboratory, the federal R&D laboratory that specializes in the science and technology related to the next generation military aircraft (fluid dynamics, aeronautical structures, structural dynamics, active control systems ... etc).

After a few years in that position as a leader of R&D, I have decided to return to "the bench", and the Air Force is helping me to make the transition by allowing me to take a "sabbatical" at the University of Notre Dame. I'll try to clear the cobwebs out of the research side of my brain and will be teaching "Aeronautical Dynamics and Aeroelasticity".

I'll be teaching in the University's Department of Mechanical - Aerospace Engineering. It's an excellent Department, particularly in the aspects of experiments and their integration with theory and computation. I'm sure that you would be very interested in their facilities and programs. For their part, the faculty and students are vitally interested in the directions that their research should take.

At this point I have no official capacity with the University, and when I do it will be merely as a Visiting Professor in the "Melchor Chair". Therefore, I have to "weasel-word" my invitation to merely inquire if you might be interested. Of course, I'm quite positive that the University would jump at the opportunity to hear your views.

If you might be interested, from mid-August through mid-January you can reach me at:

Dr James J. Olsen
Dept of Aerospace and Mechanical Engineering
The University of Notre Dame

August 21, 1992

Mr. Ralph Brescia
Special Assistant
Old Executive Office Building
17th Street and Pennsylvania Avenue NW
Washington DC 20500

Dear Mr. Brescia:

Per our discussion earlier today, I would like to invite Dr. Alan Bromley to serve as the keynote speaker on Thursday morning, October 15, 1992, at a joint plenary session of the national NSF EPSCoR and the annual Nevada Industry, Science, Engineering, and Technology (NISET) meetings.

For the NSF EPSCoR meeting, eight representatives, either scientists or legislators from each of the EPSCoR states, a large contingent from the state of Nevada, and representatives from NSF and other federal agencies, will be present to learn and share insights into the enterprise of building good science and engineering in the EPSCoR states.

NISET, as you may recall, is a state-wide organization that includes the private sector, the University of Nevada system, and state government. Its primary goal is the development and diversification of Nevada's science, engineering, and technology industry. A principal objective of this year's meeting will be to learn of the engineering, science, and technology successes in other states as presented by their legislators and to discuss how Nevada's legislature can be encouraged to provide for research stimulation. Attendance at each meeting is expected to be in the order of 250 to 300 people. We would, therefore, expect at the meeting somewhere between 500 and 600 total individuals with interest in science, engineering, and technology development.

I hope that you will be successful in engaging Dr. Bromley for this address. I look forward to hearing from you.

Sincerely,

A handwritten signature in dark ink, appearing to read 'D. McNelis'.

THE WHITE HOUSE

On Friday, October 16, Yale is holding a symposium in honor of Prof William Lutzon who originally hired me at Yale and I have been asked to give one of the major speeches. I will go again Thursday afternoon and back late

on Friday AM. There are, I believe direct flights via flighted from Dallas to New Haven.

Noted.
We should be able to get DAB to Yale on 10/15.

THE WHITE HOUSE
WASHINGTON

September 4, 1992

Dear Dr. McNelis:

Thank you for your letter of August 21, inviting me to address the NSF EPSCOR NISSET joint session scheduled for October 15, 1992, in Las Vegas.

I am happy to accept your invitation but must caution you that occasionally I have to cancel engagements at the last moment due to Presidential requests. I sincerely hope that this does not happen.

As the time of the seminar approaches, my staff will contact you to work out details for the event.

I am looking forward to meeting with you.

Sincerely yours,

A handwritten signature in dark ink, reading "D. Allan Bromley". The signature is fluid and cursive, with the first name "D." and last name "Bromley" clearly legible.

Dear Dr. Bromley:

Inter American University of Puerto Rico, the largest private non-profit institution of higher learning on our beautiful island, has committed itself to increasing its involvement in Science and Technology. Among its many projects is the establishment of a new engineering school and the possibility of developing an Industrial Research Center. With over 43,000 students in 10 campuses, the University is currently a key player in the future growth and development of the people of Puerto Rico.

On Friday, October 16, 1992, Inter American University will be joining the Puerto Rico Scientific Community Council in their annual conference with the objective of continuing to promote the increase of Science and Technology activities in our local economy. The theme for this year's activity will be **The importance of Science and Technology in the development of a healthy economy.**

The conference will highlight a panel of distinguished local economists who will focus on the importance of Science and Technology from the Economists' point of view.

As President of Inter American University and member of the Puerto Rico Scientific Community Council and a recent appointee to President George Bush's Advisory Commission on Educational Excellence for Hispanic Americans, I would be honored if you could be our keynote speaker on this occasion. Your participation would be of significant value in helping enlighten the Scientific Community in Puerto Rico.

You may contact me at your convenience at (809) 763-4203 or FAX (809) 751-3375.

Sincerely,

José R. González

ELIZABETH RODRIGUEZ

Dr. Elizabeth Rodriguez was born and raised in San Benito, Texas. When she was fourteen, her family moved to Las Cruces, New Mexico. Upon graduating from Las Cruces High School she attended New Mexico State University earned her B. S. in Mathematics and her Masters and Ph.D. in Program Management and Development with a minor in Experimental Statistics. Her professional experience includes being a Mathematician with the Pacific Missile Test Center (PMTTC) at Point Mugu, California from October 1980 to October 1984. Her main responsibility was developing math models for tracking. From October 1984 to January 1986 she participated in the Office of Personnel Management's Women's Executive Leadership Program where she worked with the House side of the Committee on Science and Technology and the National Defense Department of the Office of Management and Budget among others. From January 1986 to January 1988, while still an employee at PMTTC, she worked as a Program Manager on space programs at the Strategic Defense Initiative Organization. From January 1988 to August 1990 she was the Suitability Staff Specialist with the Director of Operational Test and Evaluation. In this position she was responsible for ensuring suitability conformance of major defense systems to operational testing policies and procedures. From August 1990 to September 1991 she was a Senior Analyst, Technology Strategy Policy with the Office of the Director of Research and Engineering in the Plans and Resources Directorate. From September 1991 to March 1992 she was a Research Staff Specialist in the office of Basic Research and is also the OSD Hispanic Program Manager. Currently, she is a Senior Policy Analyst with the White House Office of Science and Technology Policy working on issues such as High Performance Computing and Communication and Global Change Research. She is the author of twenty-eight articles, technical notes, and a book entitled, "Engineering Test Principles for Operational Suitability." She also has twenty-four technical presentations within the United States and abroad.

Dear Dr. Bromley:

It gives me great personal pleasure to invite you, on behalf of the Board of Scientific Directors of the National Institutes of Health, to present one of our 1992-93 NIH Lectures. This NIH Lecture series is a very important part of the NIH tradition and is a highly respected part of our scientific and cultural program. I hope you will make every effort to accommodate this lecture in your busy schedule. Any subject of your choice drawn upon your broad range of interest and experience will, I know, be of great attraction and inspiration to all of us here at the NIH.

The NIH lectures are scheduled at 3:00 p.m., generally on a Tuesday, Wednesday, or Thursday and take place in our Warren Grant Magnuson Auditorium in the Clinical Center.

I look forward with anticipation to your acceptance. It will add excitement and prestige to our plans for the upcoming NIH Lecture series.

Sincerely yours,

Director, OSTP
Room 360
17th Street and Pennsylvania Avenue, NW
Washington, DC 20506

Dear Dr. Bromley:

I am delighted to learn that you will be coming to Monsanto on November 10 to deliver the major address to the Technical Community of Monsanto.

After the lecture, which is scheduled for 10:00 in the morning, I will accompany you to our world headquarters building where we will have some time to talk before lunch. Our guests at lunch will include members of our Executive Management Committee, scientists from our operating companies, Monsanto Corporate Research and the officers of the Technical Community of Monsanto. I hope that you will be willing to make some informal remarks to the group after lunch.

If your schedule permits, I hope you will have time to visit our Research Center in Chesterfield after lunch. Either Dr. Charles Pechmann or Dr. Virginia Weldon will be in touch with your office to make the arrangements for your visit to Monsanto.

With best wishes.

Sincerely,

Richard J. Mahoney

San Francisco Host Committee
for the Ninth General Meeting
of the Pacific Economic
Cooperation Council
September 23-25, 1992

June 30, 1992

Dr. D. Allan Bromley
Assistant to the President for Science and Technology
The White House
1600 Pennsylvania Avenue
Washington, D.C. 20036

Dear Dr. Bromley:

We are looking forward to your participation in the Concurrent Session "Science and Technology-Based Economic Growth" during the forthcoming PECC IX conference in San Francisco this September.

The Concurrent Sessions will be one of the most important elements of PECC IX and likely the most dynamic. All of the six sessions will be held on the morning of Thursday, September 24. Each session will be followed by a special luncheon sponsored by a PECC IX Patron. In most instances, the luncheon speaker will be the Chairman and CEO of the host corporation.

Your participation as a distinguished speaker and panel member will provide you an outstanding international forum to contribute to broadening the understanding of principles that guide science and technology policies both in the Pacific Rim and throughout the world. Specifically, you would address the session on the topic, "U.S. Science and Technology Policy in the 1990s."

We have received a commitment from Arthur Dunkel, Director General of GATT, to address the conference. We are awaiting responses from a number of heads of government in the PECC region, including President George Bush, Prime Minister Brian Mulroney and President Carlos Salinas de Gortari of Mexico.

The theme of PECC IX is "Open Regionalism: a Pacific Model for Global Economic Cooperation." Discussions will explore implications of the integration of the European Community in 1992, the North American Free Trade Area (NAFTA), the ASEAN Free Trade Area (AFTA) and the outcome of the GATT Uruguay Round talks. The conference will conclude with the presentation of the "San Francisco Declaration," a major policy statement on open regionalism.

PECC IX will be privately financed by American businesses and foundations, particularly those in the San Francisco Bay Area. Approximately 600 leaders from the 20 member nations and economies of the Pacific Rim are expected to attend. PECC's

unique tripartite membership (government, business and academia) will allow frank, open discussions on a range of economic, trade and investment issues. Of additional historical importance, the Russian Federation will be attending its first General Meeting as a member of PECC.

As you are aware, the Coordinator for your session is Alan Bickell, Vice President, Hewlett-Packard Company. All matters pertaining to your participation should be addressed to him at 415/857-4460 or 415/852-8352/fax.

We look forward to your participation in these important Concurrent Sessions.

Sincerely,

A handwritten signature in dark ink, appearing to read "Rud Zell". The signature is fluid and cursive, with the first name "Rud" and the last name "Zell" clearly distinguishable.

PECC IX CONCURRENT SESSION

SCIENCE AND TECHNOLOGY - BASED ECONOMIC GROWTH

I. Focus: Increasingly science and technology serve as an engine of economic growth and a key element in global industrial competitiveness. This session will examine the impact of science and technology policy and related human resource development issues through four policy reviews or case-studies. Japanese, Chinese, Mexican and U.S. policy strategies will be outlined and implementing programs will be discussed. The influence these strategies and programs may have on the Pacific region during the 1990s will be noted.

II. Issues

- the relationship of current and protected science and technology and human resource development in the 1990s
- possible shifts from defense and aerospace related investments toward industrial competitiveness, environment, quality of life and other national and regional objectives
- government's role as a sponsor of national/regional implications
- issues relating to the transition to more technology-driven economies

15:00 - 17:00

- Standing Committee Meeting
- PECC Task Force Meetings (optional)
- Closing Press Conference

Pacific Economic Cooperation Council (PECC)

- Purpose:** PECC set forth its purpose and principles in 1986 in what is now known as the Vancouver Statement. PECC's mission is "to promote the acceleration of economic growth, social progress and scientific and technological development in the region ... in the spirit of partnership, fairness and genuine cooperation."
- Structure:** PECC is a special tripartite organization of leaders from government, business and academia from 20 Pacific Rim nations and economies. The "unofficial" status of its participants provides a unique forum for frank exchanges on issues of trade, investment and development.
- History:** PECC was founded in 1980 at the instigation of Australian and Japanese governments. The U.S. National Committee for Pacific Economic Cooperation was announced by President Ronald Reagan and then Vice President George Bush at a White House ceremony in 1984. PECC provides information and analyses to the newly formed Asia Pacific Economic Cooperation (APEC) made up of foreign, economic and finance ministers from 15 Pacific Rim countries. The latest economy to be admitted as a member of PECC is Russia.
- General Meetings:** Every 18 months, PECC holds a general meeting of its members. At these meetings, top economic, finance, trade and investment policy leaders and planners met to discuss issues to advance cooperation and development. The next general meeting will be held in San Francisco from September 23-25, 1992.
- Task Forces and Working Groups:** Throughout the 18-month interim, issue-specific task forces and working groups meet to further economic cooperation. Current task forces include: Task Force on Agricultural Policy, Trade and Development; Task Force on Fisheries Development and Cooperation; Human Resources Development Task Force; Minerals and Energy Forum; Pacific Economic Outlook Project; Task Force on the Pacific Island Nations; Science and Technology Task Force; Trade Policy Forum; Task Force on Transportation, Telecommunications and Tourism; and, Task Force on Tropical Forest.

Members:

Australia, Brunei, Canada, Chile, People's Republic of China, Hong Kong, Indonesia, Japan, Korea, Malaysia, Mexico, New Zealand, Pacific Island Nations, Peru, Philippines, Russia, Singapore, Chinese Taipei, Thailand and the United States.

Leadership:

A Standing Committee made up of all PECC national committee chairs directs the activities of the organization. PECC's current chair is Richard Fairbanks, III, who is also the president of the U.S. National Committee for Pacific Economic Cooperation.

PECC's permanent Secretariat is located at 4 Nassim Road, Singapore 1025, telephone number (65)737-9823. Dr. Hank Lim is the director general of PECC Secretariat.

#

Ninth General Meeting of the Pacific Economic Cooperation Council (PECC IX)

- Purpose:** PECC IX is the ninth general meeting of the Pacific Economic Cooperation Council (PECC), a tripartite organization dedicated to promoting economic cooperation and development within the Asia-Pacific region. PECC IX offers the organization's 20 members the opportunity to discuss issues related to global capital markets; international finance, trade and investment policies; telecommunications, transportation and tourism; agricultural trade and development; and science and technology-based economic development.
- Date and Location:** PECC IX will be held at the Fairmont Hotel in San Francisco from September 23 through 25, 1992. It is the first general meeting of PECC ever held in the United States. PECC holds a general meeting every 18 months, with special task forces and working group meetings in the interim.
- Participants:** PECC IX will bring to San Francisco more than 500 of the top government, business and academic leaders from PECC's 20 member nations and economies.
- Focus:** PECC IX comes at time of great changes and progress in the world. Discussions on the emergence of regional economic groups, the future of GATT and the interdependence and integration of worldwide economies will be highlighted at PECC IX.
- Possible Speakers:** Arthur Dunkel, Director General of GATT is confirmed to speak and U.S. President George Bush has been invited to address PECC IX. Other heads of state are expected to make major policy statements at the conference.
- Economic Outlook Report:** PECC's annual *Pacific Economic Outlook*, the region's only multi-lateral forecast of trends and developments, will be discussed and updated at PECC IX.
- Organizing** Planning for PECC IX is being spearheaded by an organizing

Committee:

committee of Bay Area leaders. Kenneth Derr, chairman and CEO of Chevron Corporation, is chairing the PECC IX Organizing Committee. Former Secretary of State George Shultz and Walter Shorenstein, chairman of Shorenstein & Company, are honorary co-chairs.

Several Bay Area corporations are serving as financial sponsors of PECC IX. As of January 15, 1992, the following companies and firms are serving as PECC IX Patrons: Archer Daniels Midland, Atlantic Richfield Company, The Asia Foundation, Bank of America, Bechtel Foundation, Caltex Petroleum Corporation, Chevron Corporation, Citicorp/Citibank, Dresser Industries, Ernst & Young, Hewlett-Packard, Pillsbury, Madison & Sutro, Shorenstein & Company, PG&E, Pacific Telesis and Unocal.

PECC IX Secretariat is located at The PBN Company, Three Embarcadero Center, Suite 2210, San Francisco, California 94111. The telephone number is 1-415-989-0536. Peter B. Necarsulmer, president of The PBN Company, is serving as PECC IX's Executive Director.

History:

PECC's past general meetings have been held in Canberra, Australia (PECC I); Bangkok, Thailand (PECC II); Bali, Indonesia (PECC III); Seoul, Korea (PECC IV); Vancouver, Canada (PECC V); Osaka, Japan (PECC VI); Wellington, New Zealand (PECC VII); and, Singapore (PECC VIII).

About the Exhibition

Keith Haring, Andy Warhol, and Walt Disney

has been organized to chronicle three distinct yet related artistic voices which have had significant impact on the twentieth century's popular culture. The show includes seventy-two paintings and sculptures by Keith Haring (including well-known images such as "Free South Africa"), twenty-four Andy Warhol prints and photographs (including Marilyn Monroe prints and portraits of Grace Kelly, Mao Tse-tung, and James Dean) and over sixty original Walt Disney animator sketch drawings and production cels (colorful painted images of Disney characters on transparent sheets of celluloid) as well as original theatrical release posters from films such as *Fantasia*, *Snow White*, *Winnie-the-Pooh*, and *Pinocchio*. This exhibition places Haring in historical context with his heroes Andy Warhol and Walt Disney, encouraging the viewer to examine aesthetic parallels among the three.

Because of the nature of the exhibition's content, we anticipate that *Keith Haring, Andy Warhol, and Walt Disney* will have strong multi-generational appeal. Parents and children alike can respond to the timeless delights of Walt Disney's animation; youngsters especially will recognize Keith Haring's designs which have decorated a multitude of youth-oriented objects from Swatch watches to their skateboards. *Haring, Warhol, and Disney* will not only entertain visitors of all ages, but also provide a stimulating forum to observe the significant impact of such image-makers on today's popular culture.

Don't just sit there . . .

Have some fun . . .

Use the enclosed pens
(or any medium you wish)

and

*Create your own work of art
And enter it in the NYNEX Art Contest!*

Please use the enclosed paper (or canvas or your choice . . . no larger than 8 1/2" x 11") and make sure we receive your entry by June 18, in the enclosed envelope.

We'll frame it and exhibit it at the Corcoran during this special evening.

A contest will be held and awards will be presented with a special award for best rendition of a Disney character.

So get to work! . . . After all, how many people can say their work has been hung in the Corcoran?

We'll Make You Famous!
