Dr. Allan Bromley
Assistant to the President
for Science and Technology
Office of Science and Technology Policy
Old Executive Office Building
17th Street & Pennsylvania Avenue, N.W.
Washington, D.C. 20506

Dear Dr. Bromley:

On behalf of the National Coalition for Cancer Research (NCCR), I would like to invite you to have lunch with the Board of Directors of the NCCR on Wednesday, February 19, 1992 from 12:00 noon until 1:00 p.m. I regret the last minute request, but we have had a cancellation of one of our meeting speakers and hoped that if your schedule permitted we could impose upon you. Our purpose in inviting you is to gain some perspective regarding how the biological sciences are integrated into the Administration's science initiative.

The NCCR is a broad coalition of national scientific, professional and lay organizations that have come together to communicate the value of cancer research and support public health policies that will lead to the eradication of cancer. I have attached a copy of our membership directory for informational purposes.

The luncheon will be held at the Washington Court Hotel, 525 New Jersey Avenue, N.W., during our annual meeting. There will be approximately 25 directors present representing the leadership of the member organizations.

Once again, I apologize for the late nature of the invitation to you and hope that if you are unable to attend we can invite you to join us at a future date. Thank you for your time and consideration of this request.

Sincerely,

Marguerite Donoghue
Vice President, Research and
Regulatory Affairs

THE
NATIONAL
COALITION
FOR
CANCER
RESEARCH

The NCCR was founded in 1986 to support the purposes of the National Cancer Act. Today, the Coalition is comprised of nearly every organization in this country that is dedicated to the eradication of cancer.

The NCCR represents more than:

- 10,000 cancer survivors and their families
- 21,000 children with cancer as well as their parents, and brothers and sisters
- 65,000 cancer researchers, nurses, physicians and health care workers
- 76 cancer research centers

The watch words of the NCCR epitomize its mission—Research Cures Cancer. The collaborative actions of the key organizations in the cancer community are designed to:

- communicate the value of research to progress against cancer
- make clear the contributions which the National Cancer Program has made to the reduction of cancer morbidity and mortality as well as to the quality of life experienced by cancer patients and survivors
- ensure adequate funding for research which will improve cancer diagnosis, treatment and prevention
- cooperate with other organizations in support of public health policies that will lead to the eradication of cancer

This Directory identifies the organizations that have joined the Coalition in its quest.

The young child on the right has recovered from leukemia. Treatment consisted of high dose chemotherapy followed by transplantation of fetal blood cells from the umbilical cord of his newborn sister.

THE ALBERT AND MARY LASKER FOUNDATION

The Albert and Mary Lasker Foundation was incorporated in 1942. Its principle mission is to recognize and honor individuals who have made major contributions in both basic and clinical research that have improved the outlook for many millions of people throughout the world who suffer from disease and disability.

The Foundation annually recognizes outstanding biomedical scientists and clinical investigators through the presentation of The Albert Lasker Medical Research Award. The Winged Victory of Samothrace, the Foundation's traditional symbol of victory over premature death, disease and disability, has been presented along with its Award for 44 years. Forty-nine Albert Lasker Award winners have later received the Nobel Prize.

The Foundation also works with coalitions and non-profit organizations in order to:

- increase the public visibility of biomedical research;
- encourage adequate funding for biomedical research;
- recognize outstanding research accomplishments;
- educate policy leaders as to the value of biomedical research; and
- support public health programs designed to eradicate disease and disability.

The Foundation provided a special stimulus to the formation of The National Coalition for Cancer Research.

THE AMERICAN SOCIETY OF CLINICAL ONCOLOGY

The American Society of Clinical Oncology (ASCO) was founded in 1964. With some 8,500 members, it is the largest organization of physicians and allied health professionals who specialize in the care of patients with cancer and in clinical research. Its membership spans the several subspecialties of oncology including medical, surgical, radiation, pediatric and gynecologic oncology as well as those who provide supportive care and rehabilitation services to cancer patients and their families.

ASCO's purposes are multi-faceted:

- to promote the exchange and diffusion of information relating to human neoplastic diseases including biology, diagnosis, staging, treatment and psychosocial impact of cancer on patients and their families;
- to further the training of all individuals concerned with the conduct of clinical research and the total care of patients with neoplastic diseases;
- to encourage communication between the various specialties concerned with neoplastic diseases; and
- to facilitate the delivery of high quality health care.

ASCO sponsors an annual scientific meeting; the largest professional convention of its kind. ASCO also sponsors educational workshops in oncology for physicians and other healthcare professionals as well as a program of fellowship awards to aid young physicians in their preparation for careers in oncology.

To Contact the Society:

James B. Gantenberg, Executive Director
American Society of Clinical Oncology
435 North Michigan Avenue, Suite 1717
Chicago, IL 60611-6067

FAX: 202-778-2330

AMERICAN SOCIETY OF HEMATOLOGY

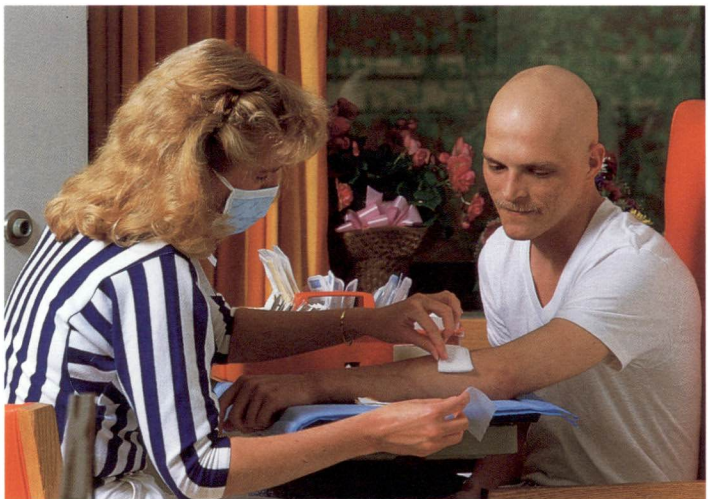

The American Society of Hematology (ASH) is a professional organization which devotes its efforts to research and information dissemination about the blood and blood-forming tissues frequently related to the development of or the treatment of cancer.

The Society directs its efforts to the following objectives:

- to promote and foster research and research collaboration; and
- to encourage investigation of hematologic matters.

To Contact the Society:

Michael Payne, Executive Director
American Society of Hematology
1101 Connecticut Avenue, NW
Suite 700
Washington, D.C. 20036
Telephone: 202-857-1174
FAX: 202-223-4579

The Oncology Nursing Society (ONS) is a national organization of more than 16,000 registered nurses dedicated to excellence in patient care, research and education in the field of oncology nursing. The ONS provides a network of peer support and exchange for oncology nurses on both the national and international level. There are more than 125 local chapters across the U.S. where ONS members can develop professionally by way of quality educational opportunities and collegial exchanges. ONS members represent a variety of professional positions, practice settings and functional practice areas, including staff nurses, clinical nurse specialists, research nurses and consultants.

The ONS achieves its mission by:

- promoting the highest professional standards of oncology nursing;
- research and information exchange, leading to improved oncology nursing;
- encouraging nurses to specialize in the practice of oncology nursing; and
- maintaining an organizational structure and function that is responsive to the changing needs of the membership.

To Contact the Society:

Pearl Moore, RN, MS, Executive Director
Oncology Nursing Society
1016 Greentree Road
Pittsburgh, Pennsylvania 15220-3125
Telephone: 412-921-7373
FAX: 412-921-6565

Cancer patients have a unique set of problems, emotional and medical, that require humanistic as well as technical excellence.

A nurturing environment is essential in caring for children with leukemia, a cancer that has been treated successfully with new methods of bone marrow transplants.

ASSOCIATION OF PEDIATRIC ONCOLOGY NURSES

The Association of Pediatric Oncology Nurses (APON), founded in 1976, has more than 1200 members including staff nurses, pediatric nurse practitioners, clinical nurse specialists, administrators, educators, and researchers. Twenty-two chapters are located across the United States, Canada and internationally. APON has a strong commitment to advancing knowledge in Pediatric Oncology through education, research and clinical practice. The ultimate goal is to improve the quality of care for children with cancer and their families.

APON strives to achieve its goal by:

- promoting excellence in the specialty of pediatric oncology nursing through quality educational programs and publications;
- providing opportunities for communication among all nurses who work with children and their families;
- planning national and regional workshops;
- encouraging and supporting research in nursing care of children with cancer; and
- providing liaison with other organizations whose membership may influence the care given to children with cancer.

To Contact the Association:

Carolyn Yowell
Executive Director
Association of Pediatric Oncology Nurses
11512 Allecingie Parkway
Richmond, VA 23235
Telephone: 804-379-9150
FAX: 804-379-1386

THE SOCIETY OF GYNECOLOGIC ONCOLOGISTS

The Society of Gynecologic Oncologists (SGO) currently has over 550 members who devote their professional research and clinical expertise to the cancers which affect the female reproductive organs. The SGO includes physicians from all over the United States and directs its efforts to the following objectives:

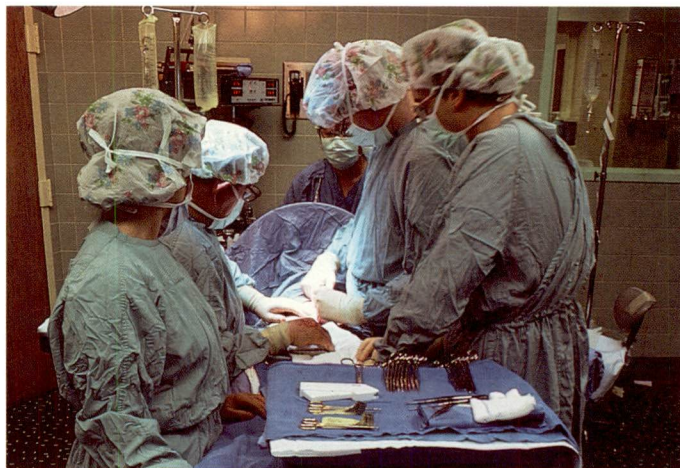

- to improve the care of patients with gynecologic cancer;
- to advance knowledge and raise standards of practice in gynecologic oncology;
- to encourage research in gynecologic oncology; and
- to cooperate with other individuals and organizations interested in oncology and related fields.

To Contact the Society:

Rosemary Zuern, Executive Director
The Society of Gynecologic Oncologists
410 N. Michigan Avenue
Chicago, Illinois 60611

Telephone: 312-644-6610

FAX: 312-527-6640

THE SOCIETY OF SURGICAL ONCOLOGY

The Society of Surgical Oncology (SSO) is comprised of over 900 physicians whose mission is to ensure the highest quality of comprehensive cancer care possible. To carry out this mission, the Society endorses and supports the following objectives:

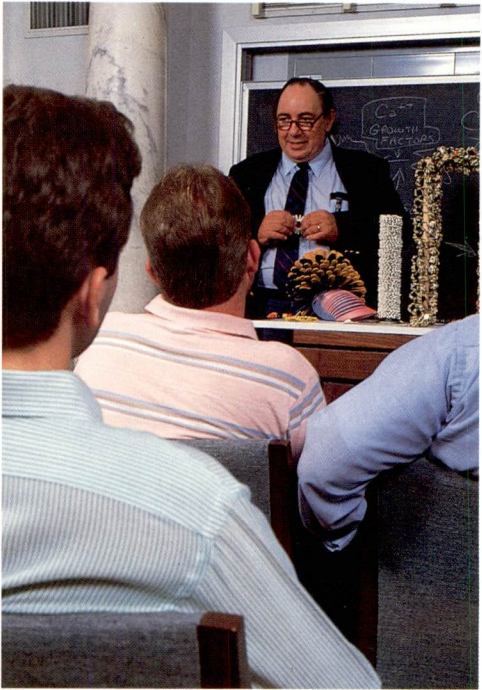

- to develop and disseminate optimal standards for multidisciplinary cancer care, including screening, skilled operative management, adjuvant therapies, rehabilitation and follow-up;
- to promote the specialty of surgical oncology through continuing education and the training of medical students, surgical residents and fellows; and
- to foster clinical and laboratory research and the dissemination of new information to its membership, the surgical and other professional cancer communities, and the public.

To Contact the Society:

ASSOCIATION OF AMERICAN CANCER INSTITUTES

The Association of American Cancer Institutes (AACI) was originally established in 1959 as the Association of Cancer Institute Directors. In 1973, the organization was incorporated as the AACI. Today, 71 cancer centers throughout the United States are members of the AACI; 5 cancer centers throughout the world are corresponding members.

The AACI provides an organizational structure to carry out the following objectives:

- to afford an opportunity for the leadership of cancer institutes and centers throughout the world to meet and discuss mutual problems;
- to foster collaboration via state, regional, national, and international programs for the control of cancer through research, education and service;
- to support investigations into the causes, nature, prevention and treatment of cancer and the rehabilitation of cancer patients by encouraging the exchange of ideas, information, personnel and the provision of special facilities and training opportunities;
- to foster educational and training opportunities in the related biomedical sciences; and
- to provide guidance to federal, state and local governments, private and civic organizations concerning cancer research, diagnosis, treatment and prevention and the rehabilitation of cancer patients.

To Contact the Association:

Edwin A. Mirand, PhD
Secretary-Treasurer
Association of American Cancer Institutes
c/o Roswell Park Cancer Institute
666 Elm Street
Buffalo, New York 14263

FAX: 716-845-8178

AMERICAN ASSOCIATION FOR CANCER RESEARCH

The American Association for Cancer Research (AACR) was founded in 1907, and is the oldest cancer research organization in the United States. The AACR presently has over 7,000 members in the U.S., Canada and more than 50 foreign countries. Its scientific membership reflects the diversity of disciplines committed to the conduct of basic and applied cancer research. These disciplines include molecular and cellular biology, immunology, biochemistry, endocrinology, clinical investigations, pharmacology, epidemiology and carcinogenesis. The AACR supports two juried journals: Cancer Research and Cell Growth and Differentiation. Soon it will launch a third devoted to cancer epidemiology, biomarkers and prevention.

On behalf of its membership, the AACR devotes its efforts toward:

- bringing together active investigators in cancer research for presentation and discussion of new observations;
- fostering research in cancer;
- increasing the participation of minority scientists in cancer research and cancer-related sciences;
- facilitating the role of women scientists, clinicians and administrators through the establishment of Women in Cancer Research; and
- facilitating the participation of medical and doctoral students in organizational activities.

To Contact the Association:

Ms. Margaret Foti, Executive Director
American Association for Cancer Research, Inc.
Public Ledger Building, Suite 816
Sixth and Chestnut Streets
Philadelphia, PA 19106
Telephone: 215-440-9300
FAX: 215-440-9313

The Radiation Research Society (RRS) is a professional organization comprised of basic and clinical researchers who have specialized expertise in the effects of environmental radiation exposure, including mutagenesis and oncogenesis. Research and clinical interests include the use of radiation in medicine and industry, mainly for the radiation therapy of cancer and for imaging in diagnostic tests.

The Radiation Research Society has set forth a number of objectives to meet the needs of its professional membership, such as:

- encouraging in the broadest manner possible the advancement of radiation research in all areas of the natural sciences;
- facilitating cooperative research between the disciplines of physics, chemistry, biology, and medicine in the study of the properties and effects of radiation; and
- promoting the dissemination of knowledge in these and related fields through publications, meetings and educational symposium.

AMERICAN SOCIETY FOR THERAPEUTIC RADIOLOGY AND ONCOLOGY

The American Society for Therapeutic Radiology and Oncology (ASTRO) is comprised of American Board of Radiology certified physicians, radiation therapists, and radiation biologists whose professional practice is therapeutic radiology. The objectives of the Society are:

- to extend the benefits of radiation therapy to cancer patients;
- to advance the scientific basis of radiation therapy; and
- to provide for the education and professional fellowship of its members.

To Contact the Society:

Lee Bechtel
Associate Director, Government Relations
American Society for Therapeutic Radiology and Oncology

Reston, Virginia 22092
Telephone: 703-648-3794
FAX: 703-648-9176

There are more than 7 million cancer survivors living in the United States today, thanks to the progress made through research. Many survivors are coming together to support patients currently receiving treatment and to inform government officials and the public at large of the special needs of cancer survivors.

NATIONAL COALITION FOR CANCER SURVIVORSHIP

The National Coalition for Cancer Survivorship (NCCS) represents grassroots organizations throughout the United States of over 10,000 cancer survivors. The NCCS was founded in 1986 by 24 cancer experts and Dr. Fitzhugh Mullan, a cancer survivor, to promote an understanding of cancer survivorship and provide advocacy to improve the quality of living for cancer survivors.

Through the national organization and a network of local organizations, the NCCS fosters the following goals:

- to promote programs which will empower survivors as informed consumers;
- to operate a clearinghouse which disseminates survivorship articles, literature and information on local and national survivorship activities and programs; and
- to act as a voice for cancer survivors to the media, medical establishment and government.

To Contact the Coalition:

Ellen Stovall, Vice President
National Coalition for Cancer Survivorship
11430 Flints Grove Lane
Gaithersburg, Maryland 20878
Telephone: 301-340-2127
FAX: 301-652-9051

The Susan G. Komen Foundation directs its national efforts to achieve higher recovery rates for breast cancer victims by advancing education, treatment and research. Members of the Foundation work to advance a national agenda which recognizes and addresses breast cancer as a critical health priority.

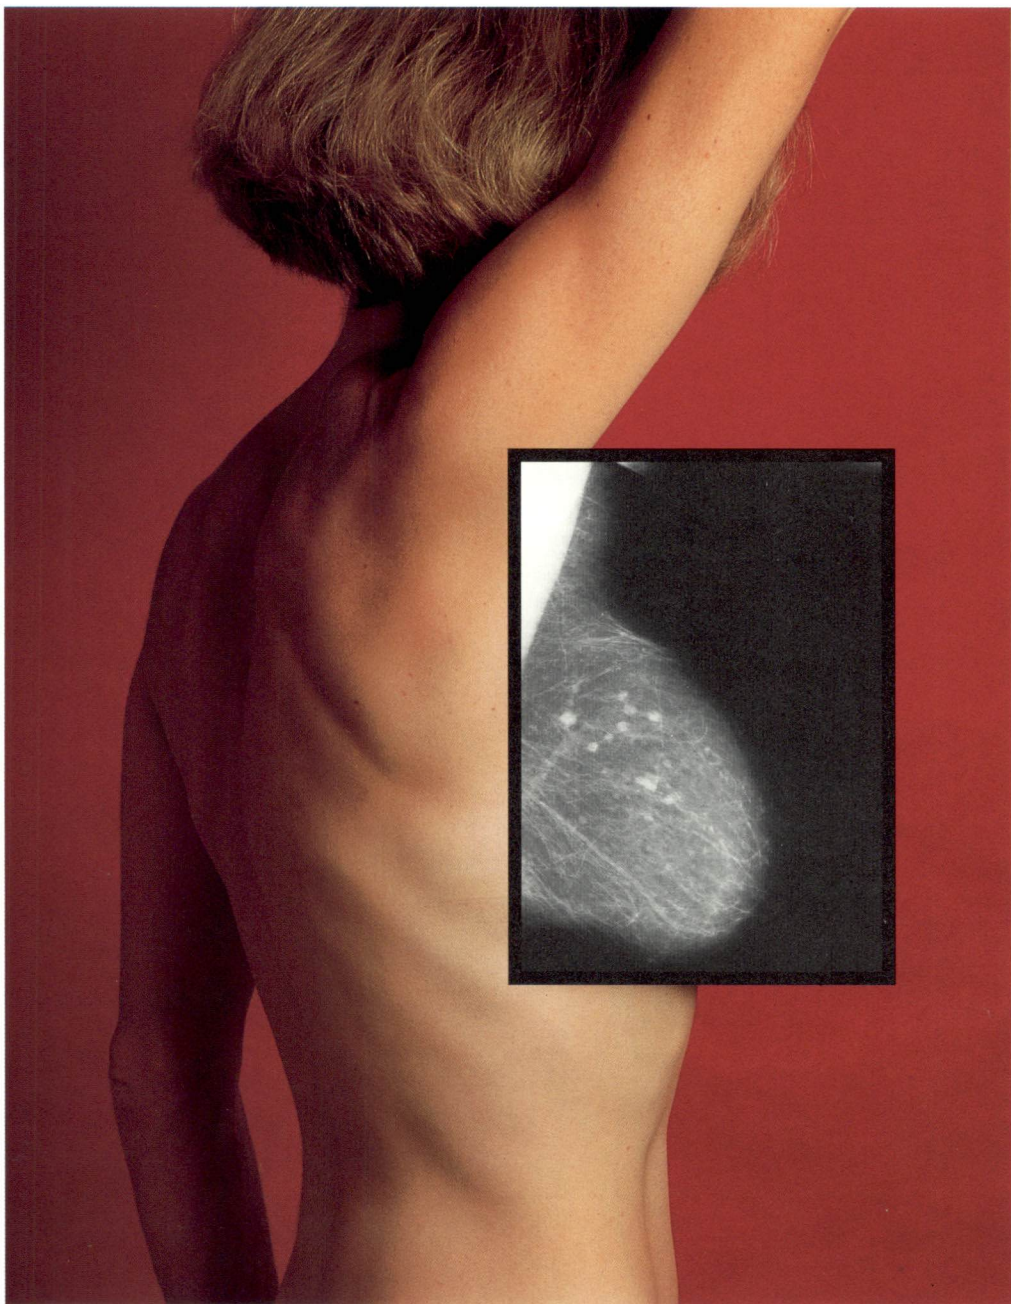

The Foundation's multi-faceted objectives include:

- the education of women about the importance of mammograms, regular breast self-exams, and yearly exams by a physician;
- providing access to affordable screening and information regarding appropriate treatment options; and
- increasing funding nationally from public and private sources for breast cancer research.

To Contact the Foundation:

Nancy Brinker, Founder and Chairman
The Susan G. Komen Foundation
5005 LBJ Freeway, Suite 730
Dallas, Texas 75244

Telephone: 214-450-1777

*S*creening by mammography is one of the main methods used to detect breast cancer in its early stages. Early detection leads to the best prognosis.

The Candlelighters Childhood Cancer Foundation represents over 21,000 children with cancer, their parents and the health professionals who care for them. Candlelighters is an international organization which has just celebrated its 20th Anniversary. The Candlelighters supports over 400 self-help groups throughout the country. Its dedicated purpose is to provide support, hope, advocacy and assistance to families and individuals whose lives have been touched by childhood cancer.

The Candlelighters focuses its advocacy efforts on the following issues:

- the insurance needs for children with cancer;
- employment opportunities for cancer survivors and overcoming the discrimination associated with cancer; and
- information dissemination regarding resources for children with cancer.

To Contact the Foundation:

Julia Sullivan, Executive Director
Candlelighters Childhood Cancer Foundation
1312 18th Street, N.W., Suite 200
Washington, D.C. 20036

THE
NATIONAL
COALITION
FOR
CANCER
RESEARCH

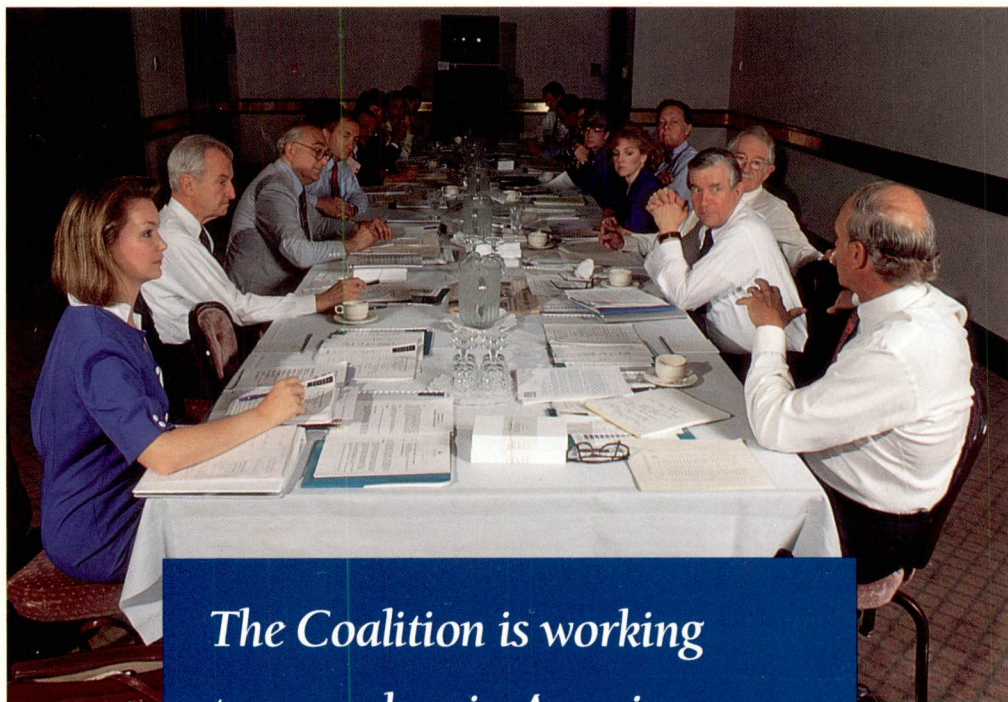

THE BY-PASS BUDGET

The National Cancer Act of 1971 ...
and its public defense.

The National Cancer Act of 1971 called upon the Director of the National Cancer Program to prepare a comprehensive budget request each year that would detail the funding requirements of the most promising research and training programs leading to the control and eradication of cancer. This document represents the collective advice and opinion of the nation's top experts. Therefore, the members of the Coalition feel a special responsibility for the formulation of the By-Pass Budget Request and its public defense.

In stark contrast to the needs of the public, federal funding for the National Cancer Institute (as measured in 1980 constant dollars) has decreased by more than 6 percent when adjusted for inflation. Funding for all other types of medical research has climbed by twenty-seven percent.

*The Coalition is working
to reawaken in America
the resolve to eradicate cancer.
We encourage your interest
and assistance.*

TREVOR O. JONES
Chairman of the Board

February 25, 1992

The Honorable D. Allan Bromley
Science Advisor to the President
The White House
1600 Pennsylvania Avenue NW
Washington, DC 20500

Dear Dr. Bromley:

It was a great pleasure meeting you at the Department of State last week on the occasion of the presentation of the National Academy of Engineering's Charles Stark Draper Prize to Dr. Hans J. P. von Ohain and Sir Frank Whittle.

Following the award ceremony, I invited you to be a Keynote Speaker at the CONVERGENCE 92 Conference on Transportation Electronics, and you asked that I provide you with additional information.

CONVERGENCE, attended by over 3,000 executives and engineering managers from the global automotive and electronics industries, is the world's leading automotive electronics conference. The conference is sponsored by the Convergence Education Foundation, the Society of Automotive Engineers and the Institute of Electrical and Electronic Engineers, and is held biannually in Detroit since 1974. The 1992 conference will be held on October 19-21 at the Hyatt Regency, Dearborn.

We would like to invite you to be the Keynote Speaker on October 21, 1992 at 1:30 p.m. Your keynote speech would be followed by an International Blue Ribbon Panel consisting of senior automotive executives shown in the attachment. The panel would be followed by a reception and a banquet at which Bob Stempel (Chairman of General Motors) will be the banquet speaker. We would be honored to have you attend the banquet, should your schedule permit.

In your speech, it would be most appropriate for you to summarize the major technological challenges and problems confronting the world, how transportation land vehicles are involved and the part that electronics plays in providing

PILKINGTON

The Honorable D. Allan Bromley

Page 2

solutions. We recognize that there is a long list of technological challenges, and would suggest you address those involving transportation such as global warming, environmental pollution, alternate fuels, alternate transportation modes, etc.

Enclosed is the CONVERGENCE 90 program, a collection of keynote addresses and Blue Ribbon Panel comments from CONVERGENCE 90. A review of these documents will indicate the outstanding quality of the speeches and the executive level of the speakers.

It would be greatly appreciated if you would be kind enough to confirm your acceptance to the above address at your earliest possible convenience. Should you have any questions, please do not hesitate to call me or Mr. O. B. Marx III, Vice President, Ford Motor Company, at (313)594-3515 or fax (313)390-4398. Mr. Marx is the General Chairman of CONVERGENCE 92.

Executive Office of the President
Washington, DC 20506

Dear Dr. ^{allan}Bromley:

On behalf of the Department of Nuclear Engineering and the Alpha Nu Sigma Honor Society it is my pleasure to invite you to present the 1992 David J. Rose Lecture in Nuclear Technology.

We would like to schedule the lecture for April 22, 1992 but we may be flexible with regards to other possibilities. I know that many of our senior faculty will be very interested in attending this event and we would like to coordinate the visit with the general spring term schedule. Professor Mujid S. Kazimi, head of our department of nuclear engineering, will be the coordinator for this lecture. Please follow up directly with him (telephone no. 617/253-4206; facsimile no. 617/258-7437).

This lecture is a highly significant event at MIT which also receives wide attention outside the Institute. The lectureship was established to honor the late Professor David J. Rose on the occasion of his retirement in December 1984. Professor Rose had spent most of his professional life at MIT dedicating his time to fusion technology, energy resources and impact on the environment, nuclear fuel cycle issues and the ethical questions arising from advances in science and technology. The inaugural lecture was given in 1985 by Dr. James R. Schlesinger, former U.S. Secretary of Energy and Defense. The second lecture was given in 1989 by Dr. Hans Blix, Director General of the International Atomic Energy Agency. A brochure and flyer announcing the second lectureship are attached.

We suggest that your talk cover the role of nuclear energy in meeting the future energy needs of the United States and/or the

Dr. D. Allan Bromley
February 6, 1992
page two

resolution of the waste management issues from the civilian and military nuclear enterprises. Of course, we are open to other suggestions.

The arrangements we suggest will involve the presentation of the lecture in the late afternoon followed by a reception which will be open to invited guests from the MIT community and the general public. A small dinner is planned following the reception and will be attended by members of Professor Rose's family, several faculty members, a few honor society student officers as well as members of the MIT senior administration.

We sincerely hope that you will honor us by accepting this invitation. We look forward to hearing from you shortly.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "Chuck", written in a cursive style.

Room 360
Washington, DC 20500

Dear Dr. Bromley:

On March 10 and 11, 1992, the Economic Strategy Institute will hold what I believe will be one of the most important public policy events of the year -- a conference on "Economics and Strategy: Rethinking America's Goals for the Post-Cold War Era." I am writing to invite you to participate.

With the end of the Cold War and the success of the Gulf War, the approach of the 1992 Presidential campaign, and the persistence of grave social and economic ills at home, Americans are increasingly demanding a new set of national priorities and new approaches to both domestic and foreign policy. This conference will be the centerpiece of ESI's ongoing effort to crystallize the new choices open to America's politicians, businessmen, and voters, and to outline a future-oriented, concrete program for change.

As you know, ESI was formed principally for this purpose. Our fundamental view is that a coordinated program addressing international competitiveness, trade, budget issues, technology, education, health care, etc... will be necessary to strengthen the long-term economic prospects and underlying fundamentals of the U.S.

At this conference, we will not only present our views based on ESI research already completed or underway, but will solicit the views and inputs of important opinion leaders like yourself. We would be honored if you would accept our invitation to speak on the subject of "The 'T' in Science and Technology Policy," in the session *The Critical Role of a National Technology Policy* on March 11.

ESI

Page 2

February 6, 1992

I have included the preliminary agenda listing the other subjects and invited speakers; the conference will be held in the Caucus Room of the Cannon House Office Building, and the Gold Room of the Longworth House Office Building. We are working with the Columbia Institute to put on the conference, and expect attendance to be 2-300.

I hope you can join us in March. Either Bob Cohen, ESI Fellow, or I will be calling you this week to provide you with any additional information you might need.

With best wishes,

A handwritten signature in blue ink, appearing to read "Erich Bloch".

February 4, 1992

The Honorable D. Allan Bromley
Assistant to the President for Science
and Technology
Old Executive Office Building, Room 358
17th Street and Pennsylvania Avenue, NW
Washington, DC 20506

OSTP
MAIL ROOM

Dear Dr. Bromley:

On August 9-12, 1992 the 35th Midwest Symposium on Circuits and Systems will take place here in Washington, DC. The symposium is a yearly conference devoted to recent research results in the general field of circuits and systems and is co-sponsored by the IEEE Circuits and Systems Society in cooperation with the IEEE Educational Society, Industrial Electronic Society, IEEE Signal Processing Society, IEEE Control System Society, IEEE Instrumentation and Measurement Society, and the IEEE Systems Man and Cybernetics Society. The conference will be devoted to all aspects of the theory and design of circuits and systems with particular emphasis on new technologies for the future. It is a well established meeting that is attended by engineers and scientists, primarily university researchers from the US and from all over the world.

On behalf of the organizers of the Symposium, I would like to extend an invitation to you to be our keynote speaker at the symposium. The keynote address is scheduled for Monday, August 10th during the luncheon for all attendees of the symposium at the Capitol Hilton Hotel.

The symposium attendees would be interested in future policies which affect their research activities. Especially in view of President Bush's emphasis on research, we feel your input would be extremely valuable.

I hope your schedule will permit you to be our keynote speaker. I have enclosed a copy of the "Call for Papers" for the symposium for your information. If you have any questions concerning the symposium, please feel free to contact me at (202) 994-3772.

Sincerely,

Mona E. Zaghloul

CALL FOR PAPERS

The 1992 Midwest Symposium is organized by the Department of Electrical Engineering and Computer Science, The George Washington University, Washington, DC. The Symposium will be held in Washington, DC. It is co-sponsored by the IEEE Circuits and Systems Society in cooperation with the IEEE Educational Society, the IEEE Industrial Electronics Society, the IEEE Acoustics, Speech and Signal Processing Society, the IEEE Control Systems Society, IEEE Instrumentation and Measurement Society and the IEEE Systems, Man and Cybernetics Society. The Symposium will be devoted to all aspects of the theory, design, and applications of circuits and systems. Topics may include, but are not limited to:

Analog and Digital Circuits
Digital Signal Processing
Control Systems and Robotics
Microwave Circuits
Nonlinear Circuits and Systems
SC and Digital Filters
VLSI Design
Power Electronics
Interconnection Networks
Image Processing

Large Scale Systems
Communications Circuits
Solid State Circuits
Computer Networks and Circuits
Expert and Intelligence Systems
Fault Analysis
Computer-Aided Design
Power Systems
Biomedical Systems
Neural Networks

Prospective authors are invited to send five copies of a 500-word summary with key words of the paper, headed by the title, author's name(s), address(es), affiliation(s), and the telephone number(s) along with a 50-word abstract for inclusion in the technical program if the paper is accepted, to the General Chairman, Dr. M. E. Zaghoul.

Author's Schedule:

Submission of Summaries:

March 1, 1992

Notification of Acceptance:

May 15, 1992

Proposal for special sessions may be submitted by
January 1, 1992, to Dr. Murray Loew

Dear Allan:

Thank you for the good conversation by telephone last Friday. The Department is involved in important issues and your advice is very welcomed.

On another note, I have been asked to put in a good word for the possibility of your coming to talk to the BNL Users Group. I enclose both the letter to me from Alex Dzierba, Chairman of the Users Group, and the letter I was supposed to give you during your visit. I know this is "just another speaking engagement" for you, but it is one which would be well appreciated by the BNL community. I hope you can make it.

One last thing - you are going to New Hampshire to judge a contest of engineering skills in the high schools (jointly with private industry). The reason I know about this is that my close friend Pat Taylor, president of Nypro Plastics molding company, will be there. If you meet him I hope you won't speak too ill of me. The project sounds like a lot of fun. I'm sure you will enjoy the visit.

Best regards,

Michael E. Zeller

Dear Mike:

As we discussed on the phone a few days ago, the Users Executive Committee would like to ask Alan Bromley to address the Annual Meeting of the Users group. Since you said that you would be meeting with him on 24 Jan, I am asking you to hand our letter of request (copy attached) to him personally. It is clear that you are pretty busy and that you really have your hands full now, so I appreciate your help in convincing Bromley to agree to speak. Thanks and I look forward to seeing you on the 25th.

Sincerely,

Dear Allan:

You are cordially invited to speak at a special Brookings seminar for 25 senior managers of research and development of the Italian holding company, Finmeccanica. These managers are participating in an international management program sponsored by STOA, an Italian-government sponsored post-graduate institution. They will spend several months in the U.S. studying management and technology issues. The Brookings program, scheduled from March 9-11, 1992, will focus on the role of government in science and technology policies and programs in the U.S.

We hope that you will be able to address the topic "The Bush Administration's S&T Strategy" on Monday, March 9, 1992 during the dinner session at 7:00 p.m. You are cordially invited to a reception at 6:00 p.m. and to dinner at 6:30 p.m. in Room 106 here at Brookings. We will follow our usual format of asking our guest to speak about 30 minutes, with the rest of the time for questions and discussion.

I hope very much that you will be able to join us, Allan, and I look forward to the chance of seeing you. Please call me on 797-6167 or Maxine Mennen on 797-6174 for any further details.

Sincerely yours,

Dear Allan:

I'm glad that you will be joining us on the evening of February 18 for the dinner presentation of the Charles Stark Draper Prize, and of course hope that President Bush will be able to present the prize to Dr. Hans von Ohain and Sir Frank Whittle.

In the event that he cannot do so, I am glad that you plan to join our chairman, Dick Morrow, in making the presentation. In addition to whatever statement you might convey from the President, we would welcome a few personal observations on the occasion. A few suggestions are enclosed, as is a script for the presentation ceremony and a few points that the President may wish to make in his statement.

Our staff is currently assembling remarks for Jack Kuehler, chairman of 1992 National Engineers Week; Lew Allen, chairman of the Charles Stark Draper Laboratory; Solomon Buchsbaum, chairman of the Draper Prize Committee; Dick Morrow; and me. We will send them to you when they are complete. In the meantime, Douglas Wolford, Public Awareness Officer, would be happy to work with you or your staff if you wish to prepare remarks ahead of time or if you have any questions on the enclosed material. He can be contacted on (202) 334-1562.

Best wishes.

Sincerely,

TOTAL 18.5 MINUTES			

***Talking Points:* CHARLES STARK DRAPER PRIZE for D. Allan Bromley**

- o I'm happy to be here tonight for this very special occasion. The presentation of the Charles Stark Draper Prize -- like National Engineers Week itself -- is an excellent opportunity for the entire engineering community to put the spotlight on the vitally important work of this country's two million engineers.
- o Of course, we in the Administration are interested in keeping that spotlight where it belongs all year long -- and in maintaining an open dialogue with the engineering community on issues of common interest and concern.
- o We explored a number of these last June, when some of my staff and I participated in the National Academy of Engineering's 7th Convocation of Professional Engineering Societies. This, too, was a valuable opportunity for both parties to discuss creative ways in which our Government can provide a climate in which science and technology can thrive.
- o Frankly, we'd like to do so because we'd like to replicate the jet engine story many times over. It's a story of technical genius and personal drive -- a combination of brilliance and tenacity that never fails to fascinate. But while we pause for a moment tonight to recognize these two remarkable recipients of the Draper Prize, let's also pause and consider how all of us might work together to bring about the next jet engine, and encourage the work of the next Hans von Ohain or Frank Whittle. Thank you. Dick? [AB and Dick Morrow make the presentation]

Background: *Charles Stark Draper Prize*

- o World's largest prize given exclusively for engineering achievement (\$375,000 honorarium and a gold medallion); open to any living person of any nationality
- o Given every two years for "outstanding achievement in engineering and technology contributing to the advancement of human welfare and freedom"
- o Recipients were announced publicly on October 2, 1991, at the NAE's Annual Meeting
- o First recipients (1989) Jack Kilby and Robert Noyce, coinventors of the integrated circuit (microchip)
- o For further information, call Douglas Wolford, NAE, (202) 334-1562

Suggested Points for Presidential Message

The Charles Stark Draper Prize, as the world's largest engineering award, puts a well-deserved spotlight on the outstanding achievements of engineers, and highlights the contributions of the engineering profession to the economic health of our nation and the world. I thank the National Academy of Engineering, one of this nation's great technical resources, for administering this great prize.

This year's honorees, Dr. Hans von Ohain and Sir Frank Whittle, have made an incalculable contribution to human welfare and freedom. Few in history have done so much to improve the quality of life for so many around the world. In this nation alone, the aircraft and engines industry provides jobs for hundreds of thousands of Americans, and we can point with pride to the strong worldwide demand for American aviation products and services.

In an ever more complex business environment, it is extremely important for the United States to foster and encourage the kind of creativity and innovation recognized by the Charles Stark Draper Prize. To a great degree, our way of life and standard of living depend upon the skill of America's engineers in transforming dreams into reality.

Barbara and I extend our very best wishes to Dr. von Ohain, Sir Frank, the National Academy of Engineering and its guests on this important occasion.

George Bush

THE WHITE HOUSE
WASHINGTON

February 7, 1992

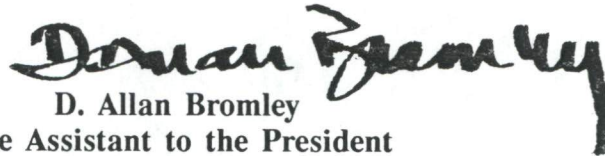

Dear Drs. Rosenshein and Zaporozec:

Thank you for your letter of January 29, inviting me to give the keynote address at the "Second USA/CIA Joint Conference on Environmental Hydrology and Hydrogeology" scheduled to be held on May 16-20, 1992, in Washington, D.C.

Because of this Administration's concern for the environment, I would have liked to contribute to your organization's efforts. However, I will away from Washington during that time period, so I must regretfully decline.

I appreciate your thinking of me and would like to offer my best wishes for you conference.

Sincerely yours,

D. Allan Bromley
The Assistant to the President

SECOND USA/USSR JOINT CONFERENCE ON ENVIRONMENTAL HYDROLOGY AND HYDROGEOLOGY

ORGANIZED BY

American Institute of Hydrology in cooperation with the U.S. Geological Survey and the U.S.S.R. Academy of Sciences and other key U.S. and U.S.S.R. water-related organizations.

DATE AND VENUE

The conference will take place in Washington D.C., U.S.A., from Sunday, May 16 to Thursday, May 20, 1993.

PRELIMINARY PROGRAM

Sunday	May 16, 1993	Registration Short Courses
Monday	May 17, 1993	Opening Ceremony Plenary Sessions
Tuesday	May 18, 1993	Plenary Sessions Technical Sessions
Wednesday	May 19, 1993	Technical Sessions Poster Sessions
Thursday	May 20, 1993	Closing Ceremony Excursions

COMMERCIAL EXHIBITION

An exhibition intended for the presentation of various equipment and technical services for hydrologic studies, publications, and software will be part of the conference. Exhibitors will be charged a fee. For more information please write to the conference Secretariat.

CULTURAL AND HISTORICAL PROGRAM

Various cultural and social activities are planned during the conference. In addition to these events, a sightseeing program will be provided for accompanying persons. Details of cultural programs will be published in the Third Circular.

BUSINESS AFFAIRS

An Annual Business Meeting of the American Institute of Hydrology will be held during the conference. Facilities will be available for meetings of the various AIH Committees.

CONFERENCE TOPICS

The following topics should be used as a guide to topics suitable for conference papers.

Industrial Impacts

- Effects of regional changes in industrial practices on the regional water cycle and on local hydrologic system function.
- Point sources of contamination - disposal of hazardous and radioactive wastes, leaks and spills of chemicals and hydrocarbons.
- Effects of management and maintenance practices on minimizing contamination.
- Contamination in mining regions.

Agricultural Impacts

- Effects of changes in agricultural use of land on the hydrologic systems.
- Agricultural contamination - point and non-point sources, handling and use of agricultural chemicals, animal waste storage and use.
- Effects of agricultural best management practices on minimizing contamination.
- Conflicts of land and water uses.

Impacts of Global Climate Changes

- Hydrologic impacts of global warming.
- Role of hydrology in earth systems.
- Hydrologic record of global changes.
- Paleohydrology

Assessment of Impacts

- Site-specific and regional studies.
- Documentation and monitoring of impacts.
- Techniques and remedial measures needed to alleviate impacts.
- Protection programs and legal constraints.
- Effects of infrastructure.

AMERICAN INSTITUTE OF HYDROLOGY

INVITES YOU TO ATTEND

SECOND USA/USSR JOINT CONFERENCE ON ENVIRONMENTAL HYDROLOGY AND HYDROGEOLOGY

INDUSTRIAL AND AGRICULTURAL IMPACTS ON THE HYDROLOGIC ENVIRONMENT

Washington D.C., U.S.A.

May 16-20, 1993

First Circular

Call for Papers

BACKGROUND

This conference is a continuation of joint meetings of the problems of environmental hydrology and hydrogeology in the U.S.A. and U.S.S.R. organized by the American Institute of Hydrology in cooperation with major governmental and scientific organizations in both countries.

The First Conference, organized by the American Institute of Hydrology, Leningrad Mining Institute, and U.S.S.R. Academy of Sciences, took place on June 18-21, 1990 in Leningrad, U.S.S.R. The conference was attended by 110 American hydrologists and hydrogeologists and 280 Soviet scientists. The conference was viewed by Soviet scientists as the most significant hydrologic meeting to take place in the U.S.S.R. in the last 70 years.

The U.S.S.R. and eastern Europe are faced with significant, hydrologic environmental problems. The U.S.S.R. has a rich literature in hydrology, theoretical development, and application to hydrologic field problems. Some of the problems being addressed by the U.S.S.R. hydrologic community are at a scale greater than those faced by most other nations.

By organizing the Second Conference, the American Institute of Hydrology would like to offer the U.S. hydrologists, hydrogeologists, and environmental scientists and their U.S.S.R. counterparts an exceptional opportunity for scientific and technical contact and exchange. The conference will help bridge the gap in scientific and governmental contacts of importance to the hydrologic and environmental communities of both countries.

MAIL ROOM

January 29, 1992

The Honorable Dr. D. Allan Bromley
Assistant to the President
for Science and Technology
Old Executive Office Bldg., Rm. 358
17th St. & Pennsylvania Ave.
Washington, DC 20506

Dear Sir:

The American Institute of Hydrology (AIH) is pleased to invite you to cooperate in the upcoming meeting, "Second USA/CIS Joint Conference on Environmental Hydrology and Hydrogeology," to be held on May 16-20, 1993, in Washington, D.C. The general theme of the conference is "Industrial and Agricultural Impacts on the Hydrologic Environment." For your information, enclosed is the first circular.

The first USA/USSR Joint Conference, organized by the American Institute of Hydrology, Leningrad Mining Institute, and USSR Academy of Sciences, was held in Leningrad in June 1990, and was very successful. It was attended by 110 American hydrologists and 280 Soviet scientists. The conference was viewed by Soviet scientists as the most significant hydrologic meeting to take place in the USSR in the last 70 years.

The Second Joint Conference is being organized by AIH in cooperation with the U.S. Geological Survey, other federal agencies, and the Russian Academy of Sciences. It has the strong support of many Russian and U.S. scientists, governmental agencies, and scientific and technical organizations. We expect the attendance to be at least double of that in Leningrad.

On behalf of the Organizing Committee, it is our pleasure to invite you to present a keynote address to the plenary session of the conference and also to participate as a Honorary Member of the conference.

Page 2

TO: The Honorable Dr. D. Allan Bromley

DATE: January 29, 1992

The Organizing Committee has as its objective to make the Second Joint Conference at least as successful and as important and memorable as the First Joint Conference. Therefore, we would appreciate your commitment to join us in this challenging task and accept our invitation.

We look forward to receiving your acceptance of our invitation to participate in this important conference and would appreciate receiving your reply by February 29, 1992.

Sincerely,

Joseph S. Rosenshein, Ph.D.

Alexander Zaporozec, Ph.D.

The Honorable D. Allan Bromley
Assistant to the President for
Science and Technology
Old Executive Office Building
17th Street and Pennsylvania Avenue, N.W.
Room 358
Washington, D.C. 20506

Dear Dr. Bromley:

The purpose of this letter is to invite you to speak at a key session of the 1992 AACSB Annual Meeting from 8:30 a.m. to 10:00 a.m. on Tuesday, April 14, at the Grand Hyatt Hotel in Washington. AACSB is the professional association and accrediting agency for business schools in the United States. Its 750 domestic members include universities ranging from Harvard, Stanford and Chicago, to schools with teaching missions serving local and regional constituencies. Many major employees such as AT&T, General Electric, IBM and Motorola also belong. Combined, these organizations provide education to approximately 800,000 business majors at the undergraduate, masters and doctoral levels, as well as non-degree training to thousands of practicing managers and executives.

The 1992 conference has as its theme "Public Priorities for Management Education." Our objective is to identify key issues on the national agenda that provide business schools with a significant opportunity to influence policy through teaching, research and outreach activities. Conference sessions will address various aspects of national economic competitiveness, encouraging equal economic opportunity, balancing economic growth objectives with environmental concerns, assisting new democracies in developing market economies, etc.

Clearly, the management and commercialization of technology is a critical national issue on which business schools have been conspicuous by their relative silence. At the Tuesday session, we would like you to identify what you believe to be "key technologies" necessary to maintain U. S. economic competitiveness, and summarize Bush administration policies to establish or maintain national preeminence in these areas. You may also wish to describe the economic consequences of our success or failure in doing so. At the close of your remarks, we will ask a business school dean or senior faculty member to outline the specific policy issues and

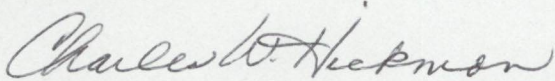

The Honorable D. Allan Bromley
Page 2
January 14, 1992

action steps related to business schools. Model "MOT" initiatives underway at some business schools will be showcased in subsequent workshop sessions. The Tuesday morning session is one of three "mini-plenaries" scheduled for this time period. Total conference attendance will be between 600 and 700 deans other senior business school administrators.

Many thanks for your consideration of this request. AACSB president Richard Lewis, business school dean at Michigan State University; 1992 conference chair Joseph Penbera, business school dean at California State University, Fresno; and Thomas Murrin, business school dean at Duquesne University, join in extending this invitation.

Please let me know if I can provide other information to you.

Sincerely,

Charles W. Hickman
Director of Projects and Services

Dear Allan:

Thank you for the good conversation by telephone last Friday. The Department is involved in important issues and your advice is very welcomed.

On another note, I have been asked to put in a good word for the possibility of your coming to talk to the BNL Users Group. I enclose both the letter to me from Alex Dzierba, Chairman of the Users Group, and the letter I was supposed to give you during your visit. I know this is "just another speaking engagement" for you, but it is one which would be well appreciated by the BNL community. I hope you can make it.

One last thing - you are going to New Hampshire to judge a contest of engineering skills in the high schools (jointly with private industry). The reason I know about this is that my close friend Pat Taylor, president of Nypro Plastics molding company, will be there. If you meet him I hope you won't speak too ill of me. The project sounds like a lot of fun. I'm sure you will enjoy the visit.

Best regards,

Michael E. Zeller

Dear Mike:

As we discussed on the phone a few days ago, the Users Executive Committee would like to ask Alan Bromley to address the Annual Meeting of the Users group. Since you said that you would be meeting with him on 24 Jan, I am asking you to hand our letter of request (copy attached) to him personally. It is clear that you are pretty busy and that you really have your hands full now, so I appreciate your help in convincing Bromley to agree to speak. Thanks and I look forward to seeing you on the 25th.

Sincerely,

WASHINGTON

February 21, 1992

Dear Professor Dzierba:

Many thanks for your invitation to address the 1992 Annual Meeting of the Brookhaven AGS Users Group scheduled for June 4 and 5 at the Brookhaven Laboratory. Unhappily these dates coincide precisely with the June meeting of the President's Council of Advisors on Science and Technology which I chair. This is a meeting with a very full agenda during which we will be meeting with the President and I regret that I cannot be absent from Washington.

It is a great pleasure for me to hear your plans to evolve your user group to include the forthcoming users of RHIC and I am delighted, after all these years, to see RHIC actually under construction.

With all best wishes,

Sincerely yours,

A handwritten signature in dark ink, appearing to read "D. Allan Bromley". The signature is fluid and cursive, with the first name "D. Allan" and the last name "Bromley" clearly distinguishable.

The Honorable D. Allan Bromley
Assistant to the President for Science and Technology
Executive Office of the President
Old Executive Office Building, Room 358
17th & Pennsylvania, N.W.
Washington, D.C. 20506

Dear Dr. Bromley:

I am writing to follow-up on the January 13, 1992 letter from USCEA President Phillip Bayne inviting you to speak at our Fuel Cycle '92 conference on the morning of March 23 in Charleston, South Carolina. I just wanted to let you know that we have received confirmations from other participants on that session including Chairman Ivan Selin of the U.S. Nuclear Regulatory Commission and David Kay, Secretary-General of the Uranium Institute. You may remember that Mr. Kay was formerly an IAEA Inspector in Iraq. Mr. Bayne will be chairing the session.

We hope that you will be able to accept our invitation to participate in what should be an extremely interesting conference session. I look forward to hearing from you in the near future. Should you have any questions, please do not hesitate to contact me.

Sincerely,

Marvin S. Fertel

cc: J.P. Bayne

March 25, 1992

Dear General Ferguson:

Thank you for your letter of January 20, 1992, inviting me to be principal speaker at the banquet scheduled for November 5, 1992, at the Air Force Museum on Wright Patterson Air Force Base in Dayton, Ohio. I apologize for the much belated response.

As much as I would like to join you, I must regretfully decline your kind invitation.

I appreciate your thinking of me and wish you a successful celebration.

Sincerely yours,

D. Allan Bromley

Honorable D. Allan Bromley
Science Advisor to the President
Office of Science and Technology Policy
Executive Office of the President
Washington DC 20506

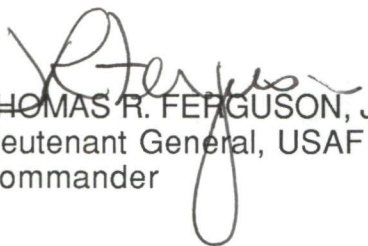

Dear Dr Bromley

In 1992 the Materials Directorate of our Wright Laboratory will celebrate the 75th Anniversary of its founding as the premier organization devoted to the development of advanced materials and processes for United States Air Force systems. This organization has a long history of distinguished accomplishments and an enviable reputation for excellence across the Department of Defense and the nation. I have attached a brief summary of some of their history.

I wish to invite you to participate in this celebration as principal speaker at the banquet which will be held on Thursday, 5 November 1992, at the Air Force Museum located on Wright Patterson Air Force Base in Dayton, Ohio. My office has been in contact with Dr Karl Erb to deal with arrangements.

We look forward very much to your participation and hope that you will be able to work it into your schedule. Thank you for your kind consideration.

Sincerely

THOMAS R. FERGUSON, JR
Lieutenant General, USAF
Commander

Washington, DC 20506

Dear Dr. Bromley:

Please allow me to once again thank you again for your kind consideration for encouraging President Bush to send a congratulatory message to the three Laureates of the Kyoto Prize. The two American Laureates were especially honored to receive a message from their President.

May I once again turn to your office for assistance?

One of our clients is the Convex Computer Corporation, headquartered in Dallas, Texas. As you know, they are one of the leading supercomputer manufacturers in the U.S. (only Cray's revenues exceed Convex's).

Convex continues to provide leadership in the supercomputing community in various areas and it includes championing and instituting an interoperability center (PEX Interoperability Center) to promote and establish standards and protocols for three dimensional graphics and other applications. The center has the active (financial and technical) support of eight other companies including Hewlett Packard, Sun Microsystems, Digital Equipment, and Tektronix. The center is located at the Convex headquarters, just North of Dallas.

The interoperability center will be formally dedicated and inaugurated on February 25, 1992 and Convex expects over 100 senior computer company executives and leading computer scientists to be present for the inaugural ceremonies.

Convex would very much welcome if you would consider being the keynote speaker at the dedication ceremonies. If you agree to participate, a 20-30 minute speech on your supercomputer initiative and the future of supercomputing would be appreciated.

Convex is, of course, prepared to bear the cost of travel and lodging to the degree allowed by U.S. law and White House policy.

Please do not hesitate to contact me if you have any questions regarding the interoperability center or the dedication ceremonies. Additional information can be easily supplied.

Thank you again for your consideration and, as always, best regards. I remain,

Very truly yours,

Dr. Bo Denysyk
Senior Vice President

Dear Dr. Bromley:

I would be delighted if you could speak at our 1992 Engineers' Day celebration during National Engineers' Week. We celebrate this day to recognize and thank our engineering staff for their outstanding efforts. The national theme is "Engineers: Turning Ideas Into Reality" but, we also encourage Pratt & Whitney engineers to develop a vision for the future.

Engineers' Day is a big event at Pratt & Whitney. To accommodate the 3000 engineering participants, we meet in a large tent in front of our engineering building. Our engineers have been privileged to hear from leaders and pioneers such as yourself over the past ten years. I have included a background fact sheet for your information.

Pratt engineers played a key role in the Desert Storm efforts where our newest production engine demonstrated an unheard of 99% combat readiness. As the largest private employer in Florida, our employees would welcome your perspectives.

We traditionally hold Engineers' Day activities the week of George Washington's birthday (17-21 February 1992), however, we are flexible and willing to move the activity to accommodate your schedule. Let us know what is convenient for you and your wife.

If you have any questions, please contact me, at (407) 796-5285, or my executive assistant, Stephen Jones, at (407) 796-4189.

We look forward to your participation and working with you to prepare for this event. We anticipate the 1992 Engineers' Day to be one of our best.

Sincerely,

Bernard L. Koff

ENGINEER'S WEEK BACKGROUND

National Engineer's Week was established by the National Society of Professional Engineers in 1951 and is observed throughout the United States. In 1992, it will be observed the Week of February 19th. It is always celebrated the week of George Washington's birthday because he was a military and agricultural engineer. He is also credited with establishing the first engineering school in the United States which later became the U.S. Military Academy at West Point, New York.

When Ben Koff came to Pratt & Whitney, he initiated the observation of this week of 1982. It has grown and evolved into a week of activities that recognize the technical accomplishments of the 3500 engineers and scientists who work at the three UTC business units located at our Florida facility. The highlight of the week is a formal ceremony held with a recognized leader in either an engineering related field, jet engine propulsion, or academia. Past speakers have been:

- 1982 - Dr. Robert Gaither, dean of engineering, University of Florida
- Commander Hank Kleeman, U.S. Navy (pilot credited with shooting down the two Libian fighters)
- 1983 - Dr. Russ Meyerand, Director of Research, UTRC
- 1984 - Col. Benjamin Zin, ace Israeli Air Force pilot attached to the Washington embassy
- Dr. Terry Shoup, dean of engineering, Florida Atlantic University
- 1985 - General Jack Merrell (USAF retired), one of the key decision makers in choosing the F100-PW-100 engine for the F-15 aircraft
- Col. Bob Stewart, NASA astronaut, the first astronaut to walk in space
- 1986 - Dr. George Keyworth, former scientific advisor to President Reagan
- 1987 - Ben Rich, vice president and general manager, Advanced Development Projects, Lockheed California Company
- 1988 - Dr. Hans von Ohain, retired chief scientist USAF at WPAFB, and father of the first jet powered aircraft
- 1989 - John Young, NASA astronaut, first astronaut to fly in space on six separate missions
- 1990 - A. Scott Crossfield, technical consultant to the U.S. House of Representatives Committee on Science, Space, and Technology, the first pilot to fly at Mach 2 and the first to flay at Mach 3 and live
- 1991 - Alexander Haig, president Worldwide Associates, Inc. former U.S. secretary of state, and supreme european allied commander
- Ben Rich, retired president Lockheed Advanced Development Company

-2-

The guest speakers have spoken on a subject of their choice and the topics have varied from: a pilot's perspective of what is desired from either a jet or rocket propulsion system; space flight; development of jet propulsion; or technical challenges for the future. From this list of past speakers and subjects, you can see why this annual event is anticipated by our employees, both young and more experienced.

March 18, 1992

Dear Dr. Lee:

Thank you for your letter of January 28, 1992, inviting me to be a speaker at your International Symposium on Physics and High Technology scheduled for October 22-12, 1992, in Seoul.

Unfortunately, those dates are not convenient for me to be away from Washington. As much as I would like to join you and your colleagues, I must regretfully decline your invitation.

I appreciate your thinking of me and would like to offer my best wishes for your symposium.

Sincerely yours,

A handwritten signature in black ink, appearing to read "D. Allan Bromley". The signature is stylized with a large, looped "D" and a long, sweeping underline that extends to the right.

MAIL ROOM

Dear Dr. Bromley,

Korean Physical Society is organizing the International Symposium on Physics and High Technology on October 22nd to 23rd, 1992 in Seoul, Korea to commemorate its 40th anniversary. This symposium will be followed by the annual fall meeting of the society on 24th and 25th of October 1992. The main purpose of the symposium is to enhance the collaborations among industries, universities, research institutes and government by exchanging ideas on the current research topics in the related fields. More informations on this symposium can be found in the enclosed "First Circular".

You are strongly recommended as an invited speaker on this symposium. Accordingly, I, on behalf of the Korean Physical Society, would like to invite you to the symposium as an invited speaker.

We will provide the round-trip expenses on first class from Washington, D.C. to Seoul by air and the accommodation while you are in Korea. The detailed schedule will be sent to you within few days.

We are expecting you to deliver a talk on the topics related to Policies for Science and Technology. The invited talk is for 30 minutes, plus 10 minutes for discussions. It will be our pleasure to make arrangement for you to visit and lecture at some of universities and institutes while you are in Korea, if you wish.

Dr. Bromley, please accept our gratitudes to you of considering our invitation. I am looking forward to your answer and seeing you at Seoul.

Sincerely yours,

Choochon Lee, Ph.D.
President

Enclosures: as above

International Symposium on

Physics and High Technology

on the Occasion of the 40th Anniversary of the Korean Physical Society

October 22-23, 1992, Seoul, Korea.

FIRST CIRCULAR

The international symposium on "Physics and High Technology" on the occasion of the 40th anniversary of the Korean Physical Society will be held in Seoul, Korea, from October 22 to 23 in 1992. This symposium will be followed by the annual fall meeting of the Korean Physical Society, from October 24 to 25 in 1992.

The main purpose of the symposium is to bring together physicists and engineers of various disciplines for the exchange of ideas on the current research topics in physics and technology, thereby enhancing closer contact and collaboration among industries, universities, research institutes and the Government. This symposium will thus provide with an international forum for methodology in the present high technology and related physics field. It will include reviews of recent progresses and panel discussions to extract common denominators.

The topics to be covered include

- 1) Semiconductors and Communications
- 2) Optical Technology
- 3) New Materials
- 4) Future Energy Resources
- 5) Policies for Science and Technology

The Symposium is being organized by the Korean Physical Society and has received the enthusiastic support from the Korean government as well as national foundations and private companies.

Symposium Site

The symposium will take place at the Cultural Center of the Seoul National University, Seoul, Korea. The weather in Seoul during the symposium is normally expected to be mild and nice.

Seoul: Seoul is the capital of Korea, well known as the host city of the 1988 Summer Olympic Games. With the population of eleven millions, it is a busy and dynamic city becoming the hub of the entire nation. Established a hundred years ago before Columbus discovered the America, Seoul has a rich history and heritage that has been woven into this fully modern metropolis. There are few cities in the world where the very new and the ancient exist side by side in perfect harmony. Charms of places with their classic architecture together with museums representing the colorful Korean history are mixed with modern high rise skylines of buildings and shopping centers. Through the center of the town the Han river flows peacefully and to the outskirt Seoul is surrounded by the mountains.

Symposium Language

The symposium language is English. Translation services will not be provided.

Contributions

The symposium will consist exclusively of the invited talks. The individual contributions are, however, encouraged for the Annual Meeting of the Korean Physical Society. They will be reviewed and selected as invited talks at the Annual Meeting by the Programme Committee. Prospective participants are invited to submit the enclosed form of expression of interest indicating the title of their contributions and any other suggestions they may have for the Symposium and the Annual Meeting.

Proceedings

The proceedings of the symposium, including invited talks at the symposium and selected contributions to the Annual Meeting, will be published.

Correspondence

All correspondence should be addressed to either

Korean Physical Society
635-4, Yuksam-Dong, KangNam-Ku
Seoul 135-703, Korea
