THE WHITE HOUSE
WASHINGTON

October 23, 1989

Dear Professor Altman:

I extend my warmest congratulations to you on the award of the 1989 Nobel Prize in Chemistry.

Your work and that of Dr. Cech on the catalytic properties of RNA and its role in the basic processes of life are extremely important and will, I fervently hope, lead not only to more fundamental biological knowledge but also to the development of new treatments for some of the viral diseases. Speaking for myself and for the entire nation, I want you to know how immensely proud of you and Dr. Cech we are, and how grateful we are for your outstanding contributions to the welfare of mankind.

I wish you continued success and satisfaction in your endeavors.

Sincerely,

With profound respect

Professor Sidney Altman
Yale University
Post Office Box 6666
New Haven, Connecticut 06511

Dear Dr. Varmus:

I extend my warmest congratulations to you on the award of the 1989 Nobel Prize in Physiology or Medicine.

Your work in collaboration with Dr. Bishop on the discovery of oncogenes and their role in the development of cancer is extremely important and will, I fervently hope, lead to more effective methods for treating and preventing this dread disease. Speaking for myself and for the entire nation, I want you to know how immensely proud of you and Dr. Bishop we are, and how grateful we are for your outstanding contributions to the welfare of mankind.

I wish you continued success and satisfaction in your endeavors.

Sincerely,

With Great Respect

Dr. Harold E. Varmus
University of California
Medical Center

Dear Professor Dehmelt:

I extend my warmest congratulations to you on the award of the 1989 Nobel Prize in Physics.

Your work on the ion trap technique for isolating and studying single electrons and ions is extremely important and will, I fervently hope, lead not only to more basic understanding of matter but also to practical applications in industry. Speaking for myself and for the entire nation, I want you to know how immensely proud of you we are, and how grateful we are for your outstanding contributions to the welfare of mankind.

I wish you continued success and satisfaction in your endeavors.

Sincerely,

With True Respect

Professor Hans Dehmelt

THE WHITE HOUSE

WASHINGTON

October 23, 1989

Dear Professor Ramsey:

I extend my warmest congratulations to you on the award of the 1989 Nobel Prize in Physics.

Your work on the methods that have led to extremely precise atomic clocks is very important and will, I fervently hope, lead not only to more basic understanding of matter but also to practical applications in industry and in our space endeavors. Speaking for myself and for the entire nation, I want you to know how immensely proud of you we are, and how grateful we are for your outstanding contributions to the welfare of mankind.

I wish you continued success and satisfaction in your endeavors.

Sincerely,

Professor Norman F. Ramsey
Lyman Physics Laboratory
Harvard University
Cambridge, Massachusetts 02138

✓ Bromley

THE WHITE HOUSE
WASHINGTON

October 12, 1989

Dear Dr. Bishop:

I was extremely pleased to hear that you and Dr. Varmus had won the 1989 Nobel Prize in Physiology or Medicine.

Your work is a striking example -- one I've often cited myself -- of the potential for fundamental scientific research to have profound effects throughout society. Your investigation of oncogenes has brought us much closer to the day when we thoroughly understand the nature of cancer and can fashion treatments accordingly. Your hard work and vision have conferred great honor on the University of California at San Francisco and on American science in general.

My congratulations and warmest best wishes,

Sincerely yours,

A handwritten signature in dark ink, reading "D. Allan Bromley". The signature is fluid and cursive, with the first name "D." and last name "Bromley" clearly legible.

D. Allan Bromley
Assistant to the President
for
Science and Technology

Dr. J. Michael Bishop
