WASHINGTON

Dear Dr. Bromley,

Dr. F.Kourilsky, the Director General of CNRS, told me that, when he met you last summer and informed you of the existence of our association, you expressed the wish of becoming a member. Of course this is quite possible as "membre associé", and it would be a great honor for us.

Please find enclosed a subscription form and some details about our association. In principle the subscription rate for associate members is determined by the council. This could be left to your appreciation, but in order to avoid difficulties in money transfer for such a small sum, the rate could be fixed symbolically at 1FF, paid by us.

As I know you as an eminent physicist, in addition to your present function, I personally will be very glad to see your name on the list of our members as "ami du CNRS".

Sincerely yours

P. Jacquinot
Président.

Madame, Mademoiselle, Monsieur,

Au moment où vous cessez vos fonctions au CNRS, je tiens à porter à votre connaissance l'existence d'une association, régie par la loi du 1er juillet 1901, dénommée "Rayonnement du CNRS Association des Anciens et des Amis du CNRS". Son siège social est 15 Quai Anatole France - 75700 Paris.

Elle a pour objet :

- de concourir, par tous moyens utiles, au rayonnement du CNRS et de la recherche scientifique ;
- de contribuer à renforcer les échanges et les liens entre les anciens et les amis du CNRS ;
- de participer à la défense des intérêts moraux de ses membres et du CNRS.

Elle est ouverte à tous ceux, salariés ou non, quelle que soit leur résidence, qui ont apporté leurs concours au CNRS à quelque titre que ce soit :

- chercheurs, ingénieurs, techniciens, administratifs qui ne sont plus actuellement en fonctions au CNRS mais continuent d'exercer leur activité à l'extérieur ou sont à la retraite ;
- présidents, directeurs et membres extérieurs des diverses instances de l'organisme.

Cette association se propose :

- d'organiser des rencontres entre ses membres ainsi que des conférences et visites de laboratoires ;
- de diffuser des informations relatives au CNRS ; en particulier chaque adhérent recevra gratuitement, s'il le désire, le journal du CNRS ainsi que la lettre du département scientifique de son choix (voir liste au verso) ;
- de créer un bulletin périodique de liaison qui sera adressé à tous les membres .

Le Conseil d'Administration et le bureau ont été mis en place lors de l'Assemblée Générale des membres, qui s'est tenue le 4 juin 1991.

Ils sont ainsi composés :

- CONSEIL D'ADMINISTRATION :

MM Pierre BAUCHET, Marcel BOUQUEREL, Evangelos BRICAS, Yves COPPENS, Claude FREJACQUES, Charles GABRIEL, Jean GLENISSON, Pierre JACQUINOT, Paul MANDEL, Gabriel PICARD, Mme Marie-Louise SAINSEVIN.

- BUREAU :

Président :	M. Pierre JACQUINOT : ancien directeur général du CNRS ;
Vice-Président :	M. Claude FREJACQUES , ancien président du CNRS ;
Secrétaire Général :	M. Charles GABRIEL, ancien directeur au CNRS ;
Trésorier :	M. Marcel BOUQUEREL, ancien sous-directeur administratif de l'INSU.

Si vous souhaitez adhérer à cette association, il vous suffit de remplir et de nous adresser le bulletin d'adhésion ci-joint accompagné du montant de votre cotisation. Vous pouvez, éventuellement, y formuler vos observations ou vos suggestions.

Je vous prie d'agréer, Madame, Mademoiselle, Monsieur, l'expression de ma considération distinguée.

Le Président de
"Rayonnement du CNRS",

Pierre JACQUINOT.

RAYONNEMENT DU CNRS

ASSOCIATION DES ANCIENS ET DES AMIS DU CNRS

- : -

S T A T U T S

- : -

I - FORMATION ET OBJET DE L'ASSOCIATION

Article 1er :

sous la dénomination de : "Rayonnement du CNRS - Association des Anciens et des Amis du CNRS", les soussignés, de nationalité française :

1°) M. Pierre JACQUINOT, demeurant à Orsay (91400) 19 chemin du merisier noir,

2°) M. Claude FREJACQUES, demeurant à Paris (75013) 10 rue Vendrezanne,

3°) M. Charles GABRIEL, demeurant à Paris (75017) 19 rue des moines,

et toutes autres personnes qui auront adhéré aux présents statuts, forment une association conformément à la loi du 1er juillet 1901.

Article 2 :

Cette association a pour objet :

- de concourir, par tous moyens utiles, au rayonnement du CNRS et de la recherche scientifique,
- de contribuer à renforcer les échanges et les liens entre les anciens et les amis du CNRS,
- de participer à la défense des intérêts moraux de ses membres et du CNRS.

Article 3 :

Son siège est à Paris. L'adresse est fixée par le Conseil d'Administration.

Article 4 :

La durée de l'association est illimitée.

Article 5 :

L'association comprend :

- 1°) des membres titulaires,
- 2°) des membres bienfaiteurs,
- 3°) des membres d'honneur,
- 4°) des membres associés.

Article 6 :

Pour être membre titulaire, il faut avoir exercé au cours de sa carrière, une activité, rémunérée ou non, au CNRS.

La demande d'adhésion est formulée par écrit et signée par celui qui désire être membre de l'association. Elle doit être acceptée par le Conseil d'Administration.

Tout membre titulaire doit verser une cotisation annuelle dont le montant minimum est fixé par le Conseil d'Administration.

Article 7 :

Les membres bienfaiteurs sont des membres titulaires ou associés qui versent une cotisation annuelle ou un rachat d'un montant minimum fixé par le Conseil d'Administration.

Article 8 :

Les membres d'honneur sont nommés par l'Assemblée Générale, sur proposition du Conseil d'Administration et choisis soit parmi les membres titulaires ayant rendu des services signalés à l'association soit en raison de l'appui moral qu'il peuvent apporter à l'association. Ils sont dispensés du versement d'une cotisation.

Article 9 :

D'éminentes personnalités scientifiques françaises ou étrangères ou des organismes publics ou privés ayant eu ou ayant encore des liens avec le CNRS, mais ne remplissant pas les conditions nécessaires pour être membres titulaires ou d'honneur, peuvent recevoir, par décision du Conseil d'Administration, le titre de membres associés. Leur cotisation est fixée par le Conseil d'Administration.

Article 10 :

La qualité de membre de l'association se perd :

- 1°) par la démission,
- 2°) par la radiation prononcée par le Conseil d'Administration soit pour non paiement de la cotisation soit pour infraction aux statuts, soit pour motifs graves,
- 3°) par le décès.

II - RESSOURCES DE L'ASSOCIATION**Article 11 :**

Les ressources de l'association se composent :

- 1°) des cotisations versées par ses membres,
- 2°) des subventions qui peuvent lui être accordées par l'Etat, les régions, les départements, les communes, et leurs établissements publics,
- 3°) des intérêts des biens et valeurs pouvant lui appartenir.

Article 12 :

Il est tenu, au jour le jour, une comptabilité deniers par recettes et dépenses et, s'il y a lieu, une comptabilité matières.

Les dépenses sont ordonnancées par le Président qui peut déléguer sa signature. Elles sont payées par le trésorier.

III - ADMINISTRATION DE L'ASSOCIATION**Article 13 :**

Le premier Conseil d'Administration, provisoire, est composé de :

- 1°) M. Pierre Bauchet, demeurant à Ivry (94204) 27 rue Paul Bert,
- 2°) M. Claude Fréjacques, demeurant à Paris (75013) 10 rue Vendrezanne,
- 3°) M. Charles Gabriel, demeurant à Paris (75017) 19 rue des moines,
- 4°) M. Pierre Jacquinot, demeurant à Orsay (91400) 19 chemin du merisier noir,
- 5°) M. Jean Lagasse, demeurant à Toulouse (31000) 16 rue Paul Vidal,
- 6°) M. Paul Mandel, demeurant à Strasbourg (67084) 5 rue Blaise Pascal,
- 7°) M. Roger Métivier, demeurant à Bourg la Reine (92340) 133 Av. du Gl Leclerc,
- 8°) M. Gabriel Picard, demeurant à Paris (75015) 133 rue de la Convention,
- 9°) M. Jean Pouilloux, demeurant à Condrieu (69420) Pimotin, Tupin-Semons.

Ce premier conseil assurera l'administration de l'association jusqu'à la réunion de l'Assemblée Générale qui aura lieu avant le 30 juin 1991.

Il élira, en son sein, un bureau provisoire.

La première Assemblée Générale renouvellera le Conseil d'Administration. Le Conseil se compose de 11 membres au minimum et de 24 membres au maximum, nommés pour 3 ans et rééligibles. Ce nombre est fixé par l'Assemblée Générale.

En cas de démission ou de décès de l'un de ses membres, le Conseil nomme le membre complémentaire jusqu'à la prochaine Assemblée Générale.

L'élection et le remplacement des membres du Conseil ont lieu au scrutin secret à la majorité absolue des membres présents ou représentés en Assemblée Générale.

Les membres du Conseil d'Administration, nommés par l'Assemblée Générale en remplacement d'un membre décédé ou démissionnaire ne restent en fonction que pendant le temps qui restait à courir par le membre décédé ou démissionnaire qu'ils remplacent.

Les membres du Conseil d'Administration doivent être de nationalité française.

Article 14 :

Le bureau du Conseil d'Administration se compose d'un Président, d'un Vice-Président, d'un Secrétaire Général et d'un Trésorier.

Ceux-ci sont nommés, en son sein, par le Conseil d'Administration, à la majorité absolue de ses membres en fonctions, pour une durée de trois ans, renouvelable.

Les mandats du Président et du Vice-Président ne sont renouvelables qu'une seule fois.

Article 15 :

Le Conseil d'Administration se réunit au moins une fois par trimestre ou sur la demande du tiers au moins de ses membres.

Les décisions sont prises à la majorité absolue des membres présents. En cas de partage, la voix du Président est prépondérante.

Article 16 :

Le Président convoque les Assemblées Générales et les réunions du Conseil d'Administration. Il les préside. En cas d'absence ou de maladie, il est remplacé par le Vice-Président et en cas d'absence ou de maladie de ce dernier par le Secrétaire Général.

Il représente l'association dans tous les actes de la vie civile et est investi de tous pouvoirs à cet effet. Il a notamment qualité pour ester en justice comme défendeur au nom de l'association et comme demandeur avec l'autorisation du Conseil d'Administration.

Il peut déléguer sa signature.

Article 17 :

Le Secrétaire Général est chargé d'assurer, sous l'autorité du Président, les tâches nécessaires à l'administration de l'association.

Article 18 :

Le Trésorier est chargé de tout ce qui concerne la gestion financière de l'association.

Il tient une comptabilité régulière de toutes les opérations tant en recettes qu'en dépenses. Il rend compte de sa gestion à l'Assemblée Générale qui l'approuve, s'il y a lieu.

Article 19 :

Le Conseil d'Administration surveille la gestion des membres du bureau et est investi des pouvoirs les plus étendus pour autoriser tous actes qui ne sont pas réservés à l'Assemblée Générale.

Il se prononce sur les admissions ou radiations des membres de l'association.

Il fixe les modalités de remboursement des frais qui peuvent être dus aux membres du bureau, sans que ces indemnités puissent avoir le caractère d'un traitement, toutes fonctions dans l'Association étant gratuites.

Article 20 :

L'Assemblée Générale se compose de tous les membres de l'association, à quelque titre que ce soit, à jour de leur cotisation.

Elle se réunit une fois par an et chaque fois qu'elle est convoquée par le Conseil d'Administration ou sur la demande du quart au moins des membres de l'association. Les convocations doivent être envoyées au moins quinze jours à l'avance et indiquer l'ordre du jour.

En outre des matières portées à l'ordre du jour par le Conseil d'Administration, toute proposition portant la signature de trente membres au minimum et déposée au Secrétariat Général au moins huit jours avant la réunion pourra être soumise à l'Assemblée.

Article 21 :

L'Assemblée Générale reçoit le compte-rendu des travaux du Conseil d'Administration (rapport moral) et les comptes du trésorier (rapport financier). Elle statue sur leur approbation et vote le budget de l'exercice suivant.

Elle délibère sur les questions mises à l'ordre du jour et pourvoit, s'il y a lieu, au renouvellement de membres du Conseil d'Administration.

Toutes les décisions de l'Assemblée Générale annuelle sont prises à main levée à la majorité absolue des membres présents ou représentés à l'exception de l'élection des membres du Conseil d'Administration qui fait l'objet d'un vote secret.

Le scrutin peut être également secret s'il est demandé par le Conseil d'Administration ou par au moins 10 % des membres présents ou représentés.

Article 22 :

Les délibérations du Conseil d'Administration et de l'Assemblée Générale sont consignées sur un registre par le Secrétaire Général et signées par lui et par le Président.

Article 23 :

Le présent statut pourra être modifié par une décision d'une Assemblée Générale extraordinaire, le vote intervenant à la majorité des 2/3 des membres de l'association. Les membres empêchés d'assister à l'Assemblée Générale extraordinaire pourront donner pouvoir écrit à un membre de l'association pour les représenter.

Article 24 :

La dissolution de l'association pourra éventuellement intervenir suivant la même procédure que celle prévue à l'article précédent par la modification des statuts. Dans ce cas l'assemblée extraordinaire statuera sur la dévolution de l'actif de l'association.

Article 25 :

Un règlement intérieur, approuvé par l'Assemblée Générale, détermine les modalités d'exécution des présents statuts.

Article 26 :

Le tribunal compétent pour toutes actions concernant l'association est celui de son siège.

Article 27 :

Le Président, au nom du Conseil d'Administration, est chargé de remplir toutes les formalités de déclaration et de publication prévues par la loi du 1er juillet 1901 et par les décrets pris pour son application.

Fait à Paris le 23 AVRIL 1990

THE WHITE HOUSE

WASHINGTON

December 4, 1991

Dear Dr. Jacquinot:

Many thanks for your kind letter of October 22 with which you enclose an application for membership in the Association of alumni and friends of CNRS. It is extremely kind of you to make the suggestion that we avoid the difficulties of monetary transfer and I would be delighted to accept your suggestion. I am submitting herewith the completed application form and have taken the liberty of sending it to your home address because I have not been able to find anywhere on the correspondence the appropriate business address for the Association.

As someone who has worked with and appreciated the activities of the CNRS for a great many years, I am delighted at the possibility of becoming formally associated with the CNRS in this fashion.

Please extend my thanks to Dr. Kourilsky, the Director General, as well.

With warmest best wishes,

Sincerely yours,

Dear Allan:

OFFICE OF THE
DIRECTOR
The informality, congeniality, and candid conversations at Friday night's dinner of the Carnegie Group were remarkable: a tribute to your organizing talent, keenness of inquiry and perception, and inspiration of trust.

I repeat, in writing, ^{my} the pledge of assured funding for the Carnegie Group's meeting expenses, along current lines, if and as needed for a period of five years. The Carnegie Commission will no longer be in existence but I assure you of the funding from another source.

With admiration and warm regards,

Sincerely,

Bill

Dr. D. Allan Bromley
Assistant to the President
for Science and Technology
the White House
Washington

Dear Dr. Bromley:

I am writing in response to your letter of Aug. 15, 1991 concerning the second meeting of the Carnegie Group on October 4-6, 1991.

After I received your letter, I have been studying issues which are appropriate for discussion at our coming meeting. I think it appropriate to discuss issues on scientific and technological cooperation with Eastern Europe and the Soviet Union which are in transition to market economy. I hope my suggestion is helpful to you.

I enclosed my curriculum vitae.

I am looking forward to seeing you in October.

Sincerely yours,

Wataru Mori

Wataru Mori

Council for Science and Technology

PRIME MINISTER'S
COUNCIL FOR SCIENCE AND TECHNOLOGY

Tokyo

WATARU MORI

Wataru Mori is a member of the Prime Minister's Council for Science and Technology (CST) which is chaired by Prime Minister himself and composed of 10 members; *ex officio* four Ministers concerned and President of Science Council of Japan, and other five distinguished expert members appointed by Prime Minister with the approval of the Diet. Wataru Mori, who is the senior of two full-time expert members of the Council, is appointed to the Chairman of the Committee on Policy Matters which functions actually as the Executive Board of the Council in order to ensure continuous, timely and flexible activity of the Council.

He is the Professor Emeritus and Ex-President of the University of Tokyo. He completed his four-year term as President of the University of Tokyo from 1985 to 1989. Before that, he had been the Professor and Chairman of the Department of Pathology and then the Dean of the Faculty of Medicine.

Born in Tokyo, Japan, he received the M.D. degree in 1951, and the Ph.D. degree (Doctor of Medical Science) in 1957, both from the University of Tokyo. He has experienced two studies abroad of rather long period, 2-1/2 years in Yale University, U.S.A., from 1956 to 1959, and exactly one year in University of Cambridge, U.K., from 1966 to 1967. His major field of study is pathology, human and experimental. His main interests in pathology were in liver diseases, originally, which later expanded widely to tumor pathology in general firstly intending to know the cause of primary liver cancer, and also to immunology mainly to investigate the cause of acute necrosis of the liver. The pineal hormone, melatonin, is another field of his study, partly as a hobby. He has published more than 500 papers in medical sciences.

He was actually the head (Secretary General) of the Japanese Pathological Society from 1983 to 1989, and played a major role in conducting the whole society during the time of large changes in concept, methodology, and application of pathology itself, and the surrounding world. His activities in science policy communities have been shown not only in the field of pathology but also in general medicine widely, e.g., serving as the Vice - President of the Japanese Association of Medical Science for six years up to the present. He is also playing some role internationally in this field, namely, is in the position of Vice-President of the International Council of Societies of Pathology. He was elected a foreign associate member of the Institute of Medicine, National Academy of Sciences, U.S.A., in 1990. According to the university law which forbids reappointment, Dr. Mori

served as the President of the University of Tokyo for only one term, four years. In this rather short period of time, however, he made a considerable contribution to his university; e.g., improved the environment of the campus cleaning away all the remnants of student riots which had been remaining for almost 15 years since early 70s, on the one hand, and started a unique system in his university placing greater importance on post-graduate courses, on the other. As the President of the Association of National Universities in Japan, at the same time, he got through many difficulties lying between universities and politicians as well as the general public, especially concerning the very hot issue of entrance examination to universities. He formerly served as a council member, and now is the Vice-President of International Association of Universities.

Prior to his present appointment, and also up to now, Dr. Mori has been serving as a member of more than several, important Committees of the Japanese Government, some examples are:

Chairman, The Medical Ethics Council (Ministry of Health and Welfare)

Vice-Chairman, Provisional Commission for the Study of Brain Death and Organ Transplantation

Member, The Science Council (Ministry of Education, Science and Culture)

Co-Chairman, U.S.-Japan Joint High Level Advisory Panel on Science and Technology

Member, U.S.-Japan Cooperative Medical Science Program

Dear Allan,

The enclosed letter is being sent to the Carnegie Group to confirm arrangements for the October meeting. We have been somewhat delayed in following up your letter of June 6, due to uncertainties in the availability of the Seven Springs Center (which have now been resolved).

We have not indicated the chairmanship nor invited proposals for agenda items, as in the case of the February meeting, in view of your June 6 letter. You may wish to send the participants a memo on these matters as the meeting date approaches.

Sincerely,

David Z. Beckler
Associate Director

Dear Dr. 3TM:

This will follow up Dr. Bromley's memorandum of June 6, 1991 concerning the arrangements for the second meeting of The Carnegie Group on October 4-6, 1991. We are pleased to inform you that the meeting will again be held at Seven Springs Center, Mount Kisco, New York, a one hour drive north of New York City. Enclosed are: list of expected attendees; meeting schedule; and a set of four brochures with information about the Center and travel directions.

To plan for your participation, we would appreciate if you will let us know the following:

- Do you have particular dietary or administrative needs?
- What are your arrival and departure plans? Please indicate flight numbers and flight departure and arrival times if you will be arriving and/or departing by air.
- Do you want us to arrange transportation for you to or from the Center? If so, from and to where, and at what times?
- The name of someone in your office whom you designate as a contact person and your telephone and FAX numbers.

The Carnegie Commission on Science, Technology, and Government will reimburse you for coach airfare and other reasonable costs of travel. Requests for travel and other expense reimbursements must be accompanied by original receipts for all expenses due to Internal Revenue Service regulations.

Please feel free to contact me or my administrative assistant, Dolores Locascio, regarding the above information or any other questions you may have. We look forward to seeing you at Seven Springs Center.

Cordially,

David Z. Beckler
Associate Director

The Honorable
Dr. David A. Bromley
Assistant to the President for Science
Office of Science and Technology Policy
Old Executive Office Building
17th & Constitution Ave., N.W.
Washington, D.C. 20506

Dear Dr. Bromley:

The German Federal Minister for Research and Technology, Dr. Heinz Riesenhuber, will be in Washington, D.C. from October 2 through October 4, 1991. On the weekend October 5 and 6 the Carnegie Group meeting will be held.

Preceding the group meeting he would like to meet with you to discuss most recent developments in the United States and Germany, in particular

- JESSI/SEMATECH
- information and communication technologies
and related matters e.g. HDTV
- Space Station
- Gentechnology
- Global Change

to exchange views and to explore possibilities to extend our cooperation.

The preferred date for an appointment would be

Wednesday, October 2, 1991, 9.00 to 10.00 a.m.

I think it would be a good idea to start his talks in Washington with meeting you.

Up to now, October 3, 1991 is not available for talks, because on October 3 the traditional German American Day as well as the day of German unification will be celebrated with some events, e.g. the ceremony in the Rose Garden, which are not scheduled yet in detail.

I would appreciate, if you could arrange this meeting.

Sincerely yours,

July 2, 1991

Dear Allan,

I am delighted that the Carnegie Commission has been generous enough to host the second meeting of G7 and Soviet science ministers and advisers in October. This should reinforce the group's future effectiveness.

We agreed at Mount Kisco in February that the location of future meetings should, in principle, rotate. As I mentioned to you recently, I would like to propose that the following meeting should take place in the United Kingdom at a mutually convenient time in 1992. Early summer, May or June, might be an agreeable period. Can you take this as an invitation to host the first post-October 1991 meeting in the UK. We could lay on a good show. We could of course discuss the precise timing.

With very best wishes.

*Yours aw
BWS.*

PROFESSOR WILLIAM D P STEWART

THE WHITE HOUSE

WASHINGTON

July 24, 1991

Dear Bill:

It is good to know that you will be attending the Mt. Kisco meeting in early October and Bill Golden has told me of his very pleasant and productive discussions with you.

I must say that I will be delighted to support your invitation that the next meeting of the group take place in the United Kingdom at a convenient time in 1992 and I agree that May or June would be entirely appropriate. This is something that I would assume the group would wish to decide in a collegial fashion but I am confident that the group will indeed be happy to accept your invitation.

I hope that all goes well with you and look forward to the possibility of seeing you in the not too distant future in London. I shall be in touch with your office as soon as my travel plans become a little more definite, but it now looks as though the first week in August is the target date for a quick visit to London, Paris, and Bonn.

One of the things that I would particularly like to discuss with you at that time would be topics which you feel appropriate for inclusion in the agenda of the October Mt. Kisco meeting.

With warmest best wishes,

Sincerely yours,

D. Allan Bromley

THE WHITE HOUSE
WASHINGTON

2811
July 9, 1991

Dear Bill:

It comes as no surprise whatsoever that your book **Worldwide Science and Technology Advice to the Highest Levels of Government** continues to gain rave reviews. As the Science review begins "This is not an ordinary book."

You have every reason to be proud of the contribution you have made to better understanding of this whole arcane subject over the years, and I most especially am indebted to you.

Things seem to be developing very well for our meeting October 4, 5 and 6 in Mt. Kisco but there is one small piece of disquieting information that I should pass on to you.

During our first meeting, we all agreed that the nature of the sessions would be totally changed and vastly less useful if everything said was to be made public, and so we had a gentlemen's agreement that the discussions would be completely confidential and could therefore be open, candid, and useful. This has been accepted, agreed to, by all the participants. Unfortunately, however, the French delegate, Hubert Curien, either did not fully understand the discussion, although I think his English is excellent, or perhaps had no intention of abiding by it from the very beginning because from the moment he left Mt. Kisco he has been talking quite freely about the discussion, attributing comments to various members of the group, and so on, in a way that, in some cases, has been embarrassing and in a way that will certainly limit the freedom of discussion in subsequent meetings unless this can be brought up and stopped.

Following up on this somewhat distressing behavior, just recently I have heard through the grapevine that Curien has been talking quite widely to people about what he views as three problems with the Carnegie Group meetings. Again, these seem to reflect a woeful lack of understanding of what actually is going on and of what we had agreed would be the case at the last meeting. I am beginning to suspect that either Curien's understanding of English is substantially inferior to what it appears to be, or that he is exercising the legendary French tendency to be difficult.

His three complaints are the following:

- 1) He, in discussions with Riesenhuber of Germany, has concluded that they are bothered by the fact that all members of the group do not share the same responsibilities. Presumably this is a way of stating that he and Riesenhuber have the designation "Minister," whereas Ossipyan, Stewart, Mori, and I are Science Advisors. It is not clear what Curien is really concerned about here other than the possibility of some kind of protocol dilution and I have seen no obvious resolution.
- 2) Curien is claiming that a meeting this autumn is too soon after the first meeting and that at least a year should elapse between them. This clearly represents either a misunderstanding or lack of communication because it was very clearly agreed by all those present at the first meeting that we would try if possible to have a meeting this autumn with subsequent meetings following at a more or less annual rate.
- 3) Curien is concerned because the second meeting is in the United States. Again, this represents a misunderstanding or lack of communication because, again, it was very clearly understood that we would approach you and your colleagues at the Carnegie Commission to ask you whether you would be willing to ask you whether you would be willing to support the second meeting at Mt. Kisco with the firm understanding that thereafter other countries would be welcome to invite the group to meet elsewhere and, indeed, Bill Stewart (whom I consider to be an excellent individual) has already issued such an invitation to hold the next meeting in the United Kingdom in late March or early April of 1992.

I am sure that these are matters that we can sort out rather quickly in October but I am somewhat distressed that one of our members has seen fit to behave as he has.

I have not heard anything further about the session of Latin American science advisors that Guillermo Soberon discussed with you some time ago. This, I think, is an excellent idea and over the past six months I have had an opportunity to talk at some length with the pertinent people in Venezuela, Brazil, Uruguay, Argentina, and Chile. During the week of July 15, I will be kicking off a meeting in Puerto Rico where we are acting as honest brokers to bring the environmental scientists of all the Latin American countries together with the hope that we can at least develop the foundations for a subsequent ministerial meeting at which we will formally establish a Western Hemisphere Environmental Institute somewhere outside the United States that can provide a general focus for such activity in the hemisphere. We already have the basis for a European-African activity of this sort in the revitalized IIASA in Vienna and I have talked at considerable length with representatives from Korea, Japan, Indonesia, Australia and New Zealand about developing a Western Pacific Rim Institute and network. Once we get the three longitudinal organizations set up and running, and I hope we can use the Western Hemisphere one as a model, then it will be very important to develop latitudinal ties so that we have a truly global network to

address what is surely a global problem in some coherent way. It is particularly important that we manage to obtain as global as possible a distribution of data and the ability to transfer large blocks of data quickly and conveniently among potential users wherever they may be situated. I would hope that this Environmental Initiative might provide some initial bonding that could be useful in the more general meetings that you and Soberon have been discussing.

With warmest best wishes,

Sincerely yours,

A handwritten signature in dark ink, appearing to read "Allan", with a stylized, cursive script.

William T. Golden

Please do not trouble to acknowledge

Book Reviews

Advisory Mechanisms

Worldwide Science and Technology Advice
to the Highest Levels of Governments.

WILLIAM T. GOLDEN, Ed. Pergamon, New York,
1991. xvi, 430 pp. \$59.50, paper, \$28.50.

This is not an ordinary book. Comprising over three dozen essays written by nearly three score authors, the book primarily aims to tell the reader how worldwide science and technology advice is shaped and rendered. The volume is edited by William T. Golden, a man of enormous experience and wisdom in the advisory corridors of our government. Only Golden could have persuaded so many distinguished individuals to prepare the essays that make up this volume.

At the heart of the book are descriptions of the science advisory mechanisms in some 35 countries, from Australia to Yugoslavia. (It is too bad that Zimbabwe was not included.) An unexpected fillip is an essay on activities of the Pontifical Academy of Sciences serving the Vatican, written by Maxine F. Singer, president of the Carnegie Institution of Washington and a member of that academy.

Each essay writer was asked by the editor to "(a) describe the science and technology advising organization to the highest levels of his or her government; and (b) comment on its effectiveness and how it actually influences policy formulation and action." The first request is handled reasonably well in most essays; the second issue is addressed less frequently and less effectively. This is not surprising, because it is a difficult one to address forthrightly and in any sort of depth in a short essay.

Nevertheless, the essays paint a fascinating panorama of the role science and technology play, or strive to play, in all these countries. The unity of science and technology notwithstanding, their role is different in each country. That's not surprising, because the needs for science and technology advice are different in, for example, Saudi Arabia and Sweden. Moreover, the centrally managed economies of Bulgaria and the People's Republic of China face problems that are unlike those of the developing economies of Egypt, India, or Indonesia. And even in the highly developed and technology-intensive Western European countries and Japan, the modalities of technical advice to the highest levels of government range widely for cultural and historical reasons. In our own United States, they change of

course from administration to administration.

Thus, the book is but a snapshot, albeit an engrossing snapshot, of technical advisory mechanisms as they functioned before the political upheavals in Eastern Europe, before the economic union of Western Europe scheduled for the end of 1992, and before the Persian Gulf conflict and its aftermaths.

At their best, the essays are insightful glimpses into a country's mechanism for providing its leaders with science and technology advice and into the associated science and technology issues—as well as into setting technical goals, targeting priority areas of effort, pursuing international cooperative approaches, and planning future directions. The occasional essay that misses this benchmark tends simply to outline the structure of a country's technical advisory organization.

Some issues addressed in the book are enduring and will be with us for decades. Global change, as well as public health and the quality of life, is admirably summed up in an introductory essay by D. Allan Bromley, the science and technology adviser to President Bush. The need for international cooperation in science, big and small, and the challenge "to identify the points of intersecting interests, and then construct frameworks for national cooperation pivoting on such interests" are stressed by Frank Press, president of the National Academy of Sciences. Curiously, not much is said anywhere in this volume about the need to deal with impacts of population growth across the globe or with the adequacy of food and energy supplies.

There are four overview essays: by Shalheveth Freier reporting on the International Forum on Science and Government held in Rehovot, Israel, in 1989; by Henry Dürand on "Building up a common European science and technology policy"; by Abdus Salam and Azim Kidwai on "A blueprint for science and technology in the developing world"; and by Thomas R. Odhiambo, on "Designing a science-led future for Africa: a suggested science and technology policy framework". They are interesting, but not compelling. Finally, David Z. Beckler has an admirable primer on the do's and don'ts of science advising. Every incoming president or prime minister should read it and heed it. But will they?

Overall, this unique book should be a valuable resource for students of the com-

plex issues growing out of the relationship between science and government. And that includes government officials, politicians, political scientists, the media, and the concerned public.

AT&T Bell Laboratories,
Holmdel, NJ 07733

Toxicological Concerns

An Environmental Odyssey. People, Pollution,
and Politics in the Life of a Practical Scientist.
MERRIL EISENBUD. University of Washington
Press, Seattle, 1991. xii, 264 pp. + plates. \$24.95.

This straightforward memoir of Merrill Eisenbud's professional life reflects a moderate and intelligent man, one who has spent more than 50 years investigating a daunting—if sometimes mundane—catalogue of what we have come to call "environmental" problems. Eisenbud began with industrial dust, went on to other problems in industrial toxicology during World War II (electrical insulating materials used in ships, zinc fumes, cashew nuts, mercury, noise), and landed after the war in the Atomic Energy Commission, where he made contributions on beryllium and uranium toxicity before becoming a leader in fallout studies, which eventually took him into more general environmental work. His is a world in which problems arise, solutions are sought, precision is cherished and excess avoided. It is not a cold or impersonal world. Although I have never met Eisenbud, I remember meeting people in remote parts of Brazil who praised him highly for his warmth, a quality that shines throughout this book. But Eisenbud's is a world in which professional discourse triumphs over irrational impulses and technicians enlighten businessmen and politicians.

To his credit, Eisenbud recognizes in the end that something is missing in his picture of the way the world works. Confronted with a mayor of New York City who has decided to appoint a politician (Kretschmer) rather than a professional as Environmental Protection Administrator, he writes, "I have never understood why Lindsay changed his mind. I have been told by others that Kretschmer was active in the liberal wing of the Democratic Party, and that Lindsay had incurred some obligations because of that faction's support for him during the recent election. I don't understand such things and still cannot believe they happen in real life." It will be hard for some to believe that Eisenbud, who spent many years working for the federal government as well as two in the Lindsay Administration in New York

12 June 1991

Dear Allan

CARNEGIE GROUP.

It was good to hear from you and I am looking forward to a continued and valuable exchange of views when we meet on 4 - 6 October. I had an enjoyable and profitable meeting with Bill Golden here in London a few weeks back and I will write to you shortly about possible topics and concerns for consideration when we meet.

I mentioned to Bill that the UK would like to host the following meeting of the Group - possibly in late May or June 1992. If you were content, I would probably need to talk to others in advance to gain some support and we might consider how best to achieve that. In any case - yes 4- 6 October and I look forward to seeing you then.

Dear Dr Bromley,

In reply to your memorandum of 25 April, to organize dates for the autumn meeting of the Carnegie Group, I am very much looking forward to this meeting, and offer the following dates which suit my planning.

October : First weekend : 4/5/6
Last weekend : 25/26/27

November : All four weekends : 8/9/10, 15/16/17,
22/23/24, 29/30/1

Yours sincerely,

Filippo Pandolfi

[Dictated May 22, 1991

En route London-New York]

Dear Allan:

Incident to the joint meeting here of the Royal Society and the American Philosophical Society, I had a long, discursive, and amiable lunch with Bill Stewart on Monday. He is looking forward to the October/November meeting of the "Carnegie Group."

He asked me to send you his greetings and to tell you that, for plausible reasons related to Europe '92, he very much hopes that the 1992 meeting of the group will be in the U.K. I suggested that he tell you this directly; and that, subject to that discussion, he might want to do some informal electioneering.

Bill Stewart comes across as a well educated, modest, thoughtful, responsible, straightforward fellow. I like him.

With warm regards,

Sincerely,

William T. Golden

Dear Allan,

Many thanks for the kind words you have been saying about the Commission and its role in the Science Summit. At our last meeting of the executive committee of the Commission, everyone expressed pleasure that the meeting was so successful, that a second meeting would occur, and that the group wanted to continue a "Carnegie" identification.

I would like to clarify the relationship between Carnegie Corporation of New York (the Corporation) and the Carnegie Commission on Science, Technology, and Government (the Commission). The Commission is an independent body, established and funded by the Corporation. Bill Golden co-chairs the Commission and is not involved with the Corporation. David Hamburg is President of the Corporation but is not formally a member of the Commission, although he is a member of its Executive Committee.

The Science Summit was funded by the Commission, and it is the Commission which is sponsoring the second meeting as well. It is the Executive Committee of the Commission, and not the Corporation, which approved with enthusiasm the sponsorship of the second meeting. The Board of the Corporation was in fact informed by David Hamburg at its April meeting about the Summit, its success, and the Commission sponsorship of a second meeting, and the members were pleased to hear about it.

It certainly isn't worth a correction in the material you have already sent. The distinctions are probably significant only to insiders, but I did want to take this opportunity to offer a clarification.

With all good wishes,

David Z. Robinson

Dear Dr. Bromley:

On behalf of the more than 100,000 members of the American Society of Civil Engineers (ASCE), I want to enthusiastically endorse Dr. William M. Sangster for nomination by President Bush to the National Science Board.

Dr. Sangster's brilliant career in academia speaks for itself. A renowned expert in hydraulics, fluid, and solid mechanics, William Sangster has served as Dean of the College of Engineering at Georgia Institute of Technology since 1974. Prior to his appointment as Dean, he served as Director and professor of civil engineering at Georgia Tech for seven years. Dr. Sangster was affiliated with the College of Engineering at the University of Missouri from 1948 to 1976. He has written or co-authored more than 20 publications.

An active member in many professional organizations, William Sangster served as President of the American Society of Civil Engineers from 1974 to 1975. In 1989, Dr. Sangster was elected Vice Chairman of the Engineering Manpower Commission of the American Association of Engineering Societies.

In recent years, as a result of his strong interest in international engineering and education activities, Dr. Sangster has led numerous travel missions overseas.

Mindful of the serious challenges facing the U.S. in the areas of education, research, and international competitiveness, I can think of no stronger candidate for nomination to the National Science Board than Dr. William Sangster. He has ASCE's highest recommendation.

Sincerely,

James E. Sawyer
President

THE WHITE HOUSE
WASHINGTON

January 30, 1991

Dear Dr. Sawyer:

Thank you for your letter of January 4 endorsing the nomination of Dr. William M. Sangster for membership on the National Science Board. The Society's recommendation is welcome and pertinent.

I shall be pleased to forward your letter of endorsement on Dr. Sangster to the Office of Presidential Personnel for review and recommendation to the President.

I appreciate your taking the time to bring Dr. Sangster to my attention.

Sincerely,

A handwritten signature in dark ink, appearing to read "D. Allan Bromley". The signature is fluid and cursive, with a prominent "B" and a trailing flourish.
