Dr. D. Allan Bromley
Science Advisor to the President
Executive Office Building
Washington, D.C. 20500

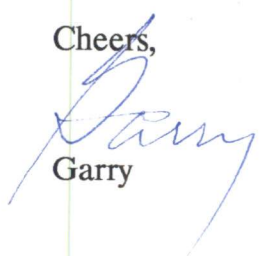

Dear Allan,

Is it Hamlet or the Keystone Kops? Benno's incredible leave taking must rank as one of the all-time, most pathetically disingenuous contrivances of all time. Selling Whittle's snake oil indeed! The best that Mike Levine, SOM's ham-handed dean, could do is bail out to be vice president for marketing with a third-rate airline--Northwest. The good news there is that he is gone forever from Yale. The bad news is that Detroit is a major Northwest hub. I can hardly wait for the disasters he will bring to us poor, humble scholars from the Midwest. His dismal record at Continental and New York Air speaks for itself. Own Northwest stock? Sell short.

Now that everyone has jumped ship, good riddance. The only question that matters is whether the hulk can be salvaged and towed back to dry dock for repairs. Picking a decent interim president, and pronto, will be the key to the damage control operation. Finding anyone courageous enough to try steering the University back on course to some interesting destination will be the Yale Corporation's ultimate challenge. I'm not terribly optimistic, since they haven't done very well of late.

On that topic: How does one make contact with that star-crossed body? I've been so deeply involved and cared so much about all this, for so many years, there must be some constructive assistance I can offer worth their time and attention. Are they consulting you? If they aren't, that would be a strong and unfortunate reconfirmation of their ineptitude. Lord only knows there are too many others.

Cheers,

Garry

Dear Dr. Bromley:

I am delighted that schedules worked out and you were able to join us for this year's Commencement ceremony. The enthusiasm of our graduates seemed to offset the chilly day.

I hope the enclosed Commencement mementos encourage you to remember your Fordham visit.

Again, congratulations.

Sincerely,

Joseph A. O'Hare, S.J.

Mr. D. Allan Bromley
Assistant to the President
for Science and Technology
The White House
Washington, D.C. 20500

Dear Mr. Bromley:

Your letter of June 8, addressed to President Stephen Trachtenberg, arrived while he is out of the country on a brief business trip. I am taking the liberty of acknowledging your correspondence in his absence and will be sure to bring it to the President's attention when he returns to the office.

After reading your letter, it occurred to me that it might be helpful to share your correspondence with Dr. Roderick S. French, Vice President for Academic Affairs, as faculty issues fall under his jurisdiction. I am sure that Dr. French will be pleased to bring your letter to the attention of the faculty and student governing body as you requested.

Cordially,

Judith M. Rye
Administrative Assistant

Dr. D. Allan Bromley
Assistant to the President for
Science & Technology & Director
Old Executive Office Bldg.
17th St. & Pennsylvania Ave., N.W. Rm. 358
Washington, D.C. 20506

Dear Dr. Bromley:

Race relations is not an issue exclusive to urban unrest and the recent conflicts in Los Angeles and other major cities. It's part of a larger issue of diversity in the nation, especially in the U.S. workforce with today's issues of race, culture, gender, and being foreign- or native-born.

Solutions to diversity in the workplace may very well point to long-term solutions for society at large--where people who can work together can live and prosper together.

You may find IEEE Spectrum's special report on "Diversity in the High-Tech Workplace" informative. It addresses the impact of diversity on the U.S. engineering and scientific community: the societal implications and the challenge to maintain technical leadership.

For example, since the mid-1970s, new hires in U.S. R&D laboratories have changed from being almost exclusively U.S.-born men to including more women, minorities, and foreign-born. And an exclusive survey in this report shows that work experience and expectations of white U.S. males and others are startlingly different. This report examines the changing makeup of the U.S. technical workforce, with examples of what industry is doing to adapt to the change.

Please let us know if you would like additional copies of this special report for your associates, or simply send us their names and addresses and we will mail their copies promptly. We would appreciate your comments on the topic of diversity and our coverage.

RECEIVED

Dear Allan:

It was so nice to see you again this time in Leeds Castle. Thanks to your warm and thoughtful considerations, I really had a nice time there, and of course, the meeting was very much meaningful for me. I realized, further, that the future cooperation in Science and Technology between our countries will be quite important.

I am enclosing some pictures which were taken at that time. I would be glad if you could enjoy them. Concerning "Family picture", I am now thinking how to handle. Anyway, it will follow.

Sincerely yours,

Wataru

Wataru Mori

THE WHITE HOUSE

WASHINGTON

July 15, 1992

Dear Wataru:

Many thanks for all the wonderful pictures from our Leed's Castle meeting. It was good to have an opportunity to talk with you at the time of that meeting about a number of issues and I particularly want to mention the Superconducting Supercollider. The negative vote in the House of Representatives concerning continuing support for the SSC came as a major surprise to all of us here and, at least in part, reflected a number of extraneous forces. In particular, the Congressman from the SSC district in Texas had previously been the person responsible for presenting a balanced budget amendment in the House. A number of members did not feel comfortable voting against that amendment despite the fact that they were opposed to it and so took the opportunity of the SSC vote to register their negative feelings.

I remain optimistic that we can turn this question around in the Senate where Senator Johnston is a very strong supporter and Chairman of the Appropriations Committee but I am concerned that the House action may have an unduly negative psychological impact on your committee during its deliberations. I would ask only that you keep an open mind until the congressional process has been completed and I can assure you that the SSC remains a very high priority for President Bush and one that he discussed at some length with Prime Minister Miyazawa during his recent visit.

I look forward to seeing you at the next meeting of the Carnegie Group and, in the meantime, hope that you have a very happy and healthy summer.

With all best wishes,

Sincerely yours,

D. Allan Bromley

D. Allan Bromley, Ph.D.
Science Advisor to the President
The White House
Washington, D.C. 20500

Dear Doctor Bromley:

Craig Shergold is a seven year old who is suffering from terminal cancer. It is his ambition to be included in the GUINNESS BOOK OF RECORDS as the person who has collected the largest number of business cards.

Craig would be grateful if you would send one of your business cards to him at the address below:

Craig Shergold
c/o Children's Make a Wish Foundation
32 Perimeter Center East
Atlanta, Ga. 30346

In addition, Dr. Bromley, if your office could send the enclosed lists, including one of your own and a letter such as this one to ten other people or companies. As you know, time will be a pressing factor. Thanks for your help.

Sincerely,

Benjamin I. Lee, M.D.

MAIL ROOM

Dr. D. Allan Bromley
Office of Science and Technology Policy
Old Executive Office Building, Room 358
Washington, D. C. 20506

Dear Dr. Bromley:

I am writing you at the recommendation of Mr. George Butler, Executive Director of McDonnell Douglas Space Systems Division in California.

Currently, I am in the process of looking for a new career opportunity that will allow me to use my skills in research and technology analysis; issues management; government, industry, and education liaison; communications and media relations; seminar development; marketing and management. It is my intention to identify where my background and experience would best fit into an organization and also satisfy my career and personal goals.

Please understand, Dr. Bromley, I know about the government crunch on positions, and therefore, I do not expect you to have a position nor do I expect you to know of any openings. What I seek is information as to where my skills and expertise will best fit.

Enclosed is a copy of my profile for your review. When we meet you may have suggestions as to where my experience may best fit to meet the needs of an organization. My search is for an interesting, challenging, and rewarding career while using my skills and talents in the field of science and technology. I have also enclosed a tentative agenda of specific questions and concerns that I would like to discuss with you.

Again, Dr. Bromley, I am merely seeking information that will help me determine where my best career fit lies. I will call you on Wednesday, April 29th, to schedule a brief meeting at a time that is mutually convenient.

Sincerely,

Lindy J. Perkes

Enclosures

Tentative Agenda

- Objectives and goals of Office
- Future growth potential
- Is the OSTP office able to expedite the transfer of government technology domestically and internationally?
- How can the U.S. share advanced technologies in cooperative agreements with our foreign partners and still maintain technological "leadership?"
- Are "technological leadership" and "economic regeneration" compatible driving forces?
- Where could my background and experience significantly assist an organization?
- What service could my experience provide?
- Would my aerospace, marketing, and educational development experience offer a significant contribution?
- Recommendations

Please accept my thanks, in advance, for your assistance. I, sincerely, am looking for the critical eye of an expert to offer suggestions for my future growth.

THE WHITE HOUSE
WASHINGTON

April 30, 1992

Dear Ms. Perkes:

I have had an opportunity to review the copy of your resume.

Unfortunately, at the present time we do not have any positions for a person with your particular background and expertise. This is a small office and our budget does not permit the luxury of expertise in every discipline--thus the reality of fiscal constraint.

I have, however, taken the liberty of sharing the information you provided with members of my senior staff and, if an opportunity presents itself, I have asked them to keep you in mind.

I wish you every success in your search for an appropriate position.

Sincerely yours,

A handwritten signature in dark ink, reading "D. Allan Bromley". The signature is fluid and cursive, with a long horizontal stroke at the end.

D. Allan Bromley
The Assistant to the President
for
Science and Technology

ALEXANDER VON HUMBOLDT FOUNDATION

North American Office

Washington, April 7, 1992

To
Dr. D. Allan Bromley
Science Advisor to the President
The White House
Washington, DC 20500

Dear Dr. Bromley,

Thank you very much for the interesting and enlightening meeting this morning.

Herewith, I am sending you the letter we have sent out to all Humboldtians who took the care to answer us after having received Dr. Pfeiffer's first letter. I sincerely apologize that you did not receive it the first time. It seems that it was indeed our fault, as we had addressed it to "The Old Executive Building" instead of "The White House". As you can see, we corrected the flaw.

I am looking forward to the results of your deliberations with Professor Lüst and Minister Riesenhuber. I consider the establishment of a German/American Council on Cooperation in the Sciences and the Humanities a fascinating project beyond the present semantical disagreements.

Sincerely yours,

Dr. Jan Keppler
Director

ALEXANDER VON HUMBOLDT FOUNDATION

North American Office

March 16, 1992

Dr. D. Allan Bromley
The White House
Washington, DC 20500

Dear Dr. Bromley,

Thank you very much for responding to our letter. We at the North American Office of the Alexander von Humboldt Foundation have been very much encouraged and motivated by the many responses, phone calls and personal visits. Out of 3,000 Humboldtians receiving the initial letter from Dr. Pfeiffer, more than 1,200 have responded, many of them personally, almost all of them willing to help with a check of addresses or the organization of local meetings.

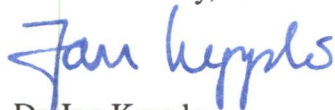

Besides serving as an liaison office between German and American scientific and academic institutions, a major task of our office is the establishment and intensification of contacts between former American Humboldtians. The next step in this direction will be the compilation of a "Humboldt-address book for the USA" which will not only contain all the alumni, but also the names and addresses of personalities who have helped the AvH over the years with encouragement and advice.

The address book should serve as a valuable source for colleagues and contacts. Those contained therein will be scientists of certified standing with a common interest in Germany and international scientific cooperation. As a next step, we are currently planning the organization of a series of local or regional meetings of Humboldtians. This will also, hopefully, give me the chance to meet you in person.

If you requested any information sheets, you will find them enclosed with this letter. I hope that these programs correspond to your expectations and needs. Of course, comments are not only always welcome, but herewith explicitly solicited.

Again thank you very much for your response and on-going interest in the Alexander von Humboldt Foundation.

Yours sincerely,

Dr. Jan Keppler
Director

Encl.

Dear Dr. Bromley,

Just a short note to advise you that I have accepted an invitation to be Visiting Professor of Public Administration at Carleton University on executive interchange for the academic year 1992-93. I will teach in the School of Public Administration and the Department of Political Science at the graduate level.

I look forward to the new challenges and the opportunity to interact with outstanding students and faculty, as well as the freedom to concentrate, for a time, on scholarly issues.

Although I have left my position as Assistant Deputy Minister (Science & Technology), I can be reached at my present telephone number (613) 993-0037 until further notice.

I enjoyed my contacts with you and hope to have the occasion of working with you in the future.

Best wishes,

Roberto Gualtieri

Dear Al,

The attached letter, as you can see, reflects the grinding of the wheels of a formal search process, (and if you can take a minute to respond by the ~~Q~~ requested April 2 date, it would help me with the records of the search).

Nothing would please me more of course than to have you giving real consideration to coming to MSU. In that circumstance I'm sure the University would quickly find a permanent chair and something in the 2×10^5 territory for salary. So if you do think of leaving the government keep MSU in mind!

With all best greetings,

Henry

Dr. Allan Bromley
Science Advisor to the President
Exec. Office of the President
Office of Science & Technology Policy
Old Executive Office Building
Room 360, 17th and Pennsylvania Ave.
Washington, DC 20506

Dear Dr. Bromley:

The National Superconducting Cyclotron Laboratory of Michigan State University is in the midst of a Search and Selection process for selection of a Director for the 3 year period, September 1992 thru August 1995. You have been suggested as an excellent person to consider for this position by Dr. Warner of Oberlin. I then write to inquire as to your interest in being considered as an official candidate for this position.

I attach a copy of the official posting describing the appointment conditions and the duties of the position. The position is at the level of Dean in the MSU structure and is certainly a very attractive professional opportunity; it would include an excellent salary and fringe benefits, and is clearly a very prestigious appointment relative to other nuclear science positions in the world. The position is a term appointment for the period indicated above, financial pressures on the University precluding the possibility of making additional "continuing" appointments in the laboratory at this time. You will then note that the Position Posting advises candidates not already on a continuing appointment at MSU to come on leave of absence from any permanent appointment which they may presently hold. (The possibility that a permanent MSU appointment would open up in the three year period is not unlikely, or that a reappointment would occur, but these cannot be assured at this time.)

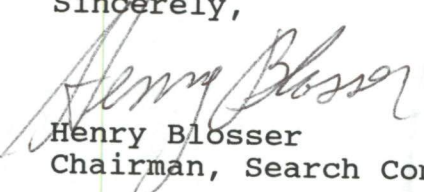

Unfortunately, owing to the late time at which your name was suggested, if you agree to being considered as a candidate, I will quickly need to receive a Curriculum Vitae from you (hopefully not later than April 1). I will also need the names of two persons to contact as professional references (and since the search is already so advanced I would make the contact by telephone). An

initial review of candidates will be made by the Search Committee after which a final group of candidates will be invited to visit the Campus and make presentations to the staff and respond to questions from both the committee and from the staff of the Laboratory; this would include a meeting with the Provost and with other persons he may designate, in accord with normal procedures for positions at the level of Dean.

I greatly appreciate Dr. Warner bringing your name forward as a possible candidate and will be extremely pleased if you decide to proceed with the step of becoming a candidate. I would be glad to answer any questions which you might have by either telephone or in writing. If you decide not to be a candidate it would also be helpful to know of that by April 1. Thank you for your consideration of this matter which is for us an issue of great importance.

With all best wishes,

Sincerely,

Henry Blosser
Chairman, Search Committee

POSITION DESCRIPTION POSTING

Attachment A

Nominations and Applications are Invited for the Position of Director,
National Superconducting Cyclotron Laboratory
Michigan State University

Michigan State University invites nominations and applications for the position of Director, National Superconducting Cyclotron Laboratory. An individual is sought who can provide leadership, vision, and direction for the research and related instructional and public service programs of the laboratory while serving as an effective representative of the Laboratory in interactions with the National Science Foundation, other government agencies and foundations and with the international nuclear science community. At Michigan State University the position of Director, National Superconducting Cyclotron Laboratory has equivalent status to that of a dean of a college; as such, the Director is the chief executive officer of the Laboratory and is responsible to the Provost and the President for its general administration. The Director is also a member of the Council of Deans, and as such contributes to the overall mission of the University.

Applicants must have appropriate educational qualifications and experience (usually an earned doctorate), an outstanding record of scholarship in nuclear science, and evidence of dynamic leadership. The position of Director has a term of three years, with possible reappointment. Any individual currently appointed at Michigan State University in a continuing appointment position is eligible to be a candidate. In addition, individuals employed by other universities, laboratories, or other relevant institutions are eligible as candidates if their home institutions are prepared to agree to a three-year leave without pay for the purpose of assuming the Directorship. The expected starting date is September 1, 1992.

Applications and nominations received by March 31, 1992 are assured of full consideration. However, applications will be accepted until the position is filled. Applications should be sent to:

Professor Henry Blosser, Chairperson
Director Search and Rating Committee
National Superconducting Cyclotron Laboratory
Michigan State University
East Lansing, Michigan 48824-1321

Mr. D. Allan Bromley
Assistant to the President
for Science and Technology
The White House
Washington, D.C. 20500

Dear Mr. Bromley:

It is a pleasure to inform you that Dr. Robert M. White has been selected as co-recipient of the 1992 Tyler Prize for Environmental Achievement. The Tyler Prize Executive Committee is very grateful for your articulate letter supporting Dr. White's candidacy for this honor.

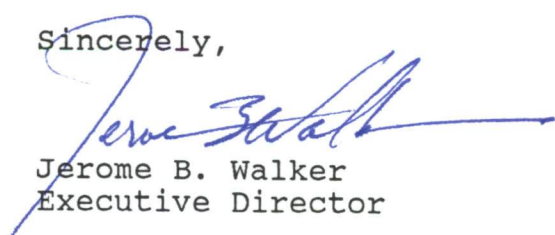

In preparation for the awards ceremony, which is scheduled for May 1, we will publish a commemorative booklet similar to the one enclosed for your information. We would be very grateful if you would write a one-page congratulatory letter addressed to Dr. White which could be printed in this year's commemorative booklet. The booklet will be distributed to the NAS and NAE in the U.S. and mailed around the world to the heads of national academies of engineering and other scientific and environmental organizations. We would appreciate receiving your letter by April 1, or a few days thereafter, printed on White House stationery.

An invitation to the award ceremony and dinner in Los Angeles will be mailed to you soon under separate cover; and we would enjoy your company for this happy occasion, if your calendar permits.

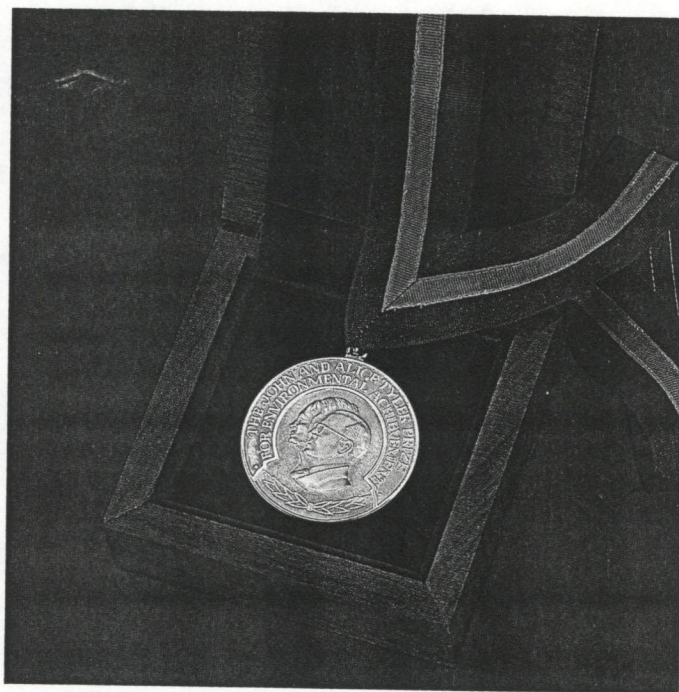

Public announcements of this year's Tyler Prize Laureates will be embargoed until May 1, but please feel free to discuss the good news with Dr. White and his friends and associates.

Many thanks for your generous assistance to the Tyler Prize Executive Committee.

Sincerely,

Jerome B. Walker
Executive Director

The Honorable Dr. Allan
Assistant to the President
for Science and Technology
The White House
Washington, D.C. 20500

Dear Sir:

We thought you would like to know that a boy in our troop has recently attained the rank of Eagle Scout -- scouting's highest achievement. The Scout is Jeffrey A. Cecil, of Alexandria, Virginia. I am sure Jeff would treasure a letter of congratulations from you which could be presented to him on the occasion of his Court of Honor which is scheduled for May 3, 1992 at St. Louis Catholic Church in Alexandria. If you have the time to send such a letter please address it to me and I will see to it that our Scoutmaster, Mr. Lang Fields, presents the letter to Jeff as part of his Eagle ceremony.

Very truly yours,

David R. Legg
Committee Chairman
Troop 680, BSA
