SPECIAL SESSIONS

The special sessions deal with the topics which may develop into major research fields in a near future. Submission of papers to these sessions is strongly encouraged.

SP1 : OPTICAL COMPUTING & DISPLAY

Possibilities of optical computing for massive and large throughput data processing, including applications of spatial light modulators and other display technologies, will be discussed.

SP2 : IMAGE REPRESENTATION & DISPLAY

The topic of the session is the image representation techniques for HDTV, 3D computer graphics, and artificial reality to yield emotional perception or realistic feeling.

SP3 : FUTURE DEVICE TECHNOLOGY OF HUMAN INTERFACE

User-friendliness is an essential attribute of interface devices used by pilots, drivers and handicapped persons under a stressful environment. This session will focus on hardware technology based on vision-optics research.
