THE WHITE HOUSE

WASHINGTON

March 7, 1990

Clayton
Dear Secretary Yeutter:

As you know from having talked with Michael Boskin, Chairman of the Council of Economic Advisers, President Bush has appointed him, Michael Deland (Chairman of the Council on Environmental Quality) and me as co-chairmen of the White House Conference on Science and Economics Research Related to Global Change.

The task he has given us is to structure a multinational conference that will be a further step in a joint international approach to the problems and opportunities with which our global environment confronts us.

The Conference, scheduled for April 17-18, 1990 at the J. W. Marriott Hotel in Washington, D.C., will convene ministerial level officials from 17 invited nations, the European Community and the OECD. It will bring together the essential disciplines of science, economics and the environment. I have asked Dr. Robert Corell of the National Science Foundation to act as Conference Director, and Dr. Franmarie Keel to act as Conference Coordinator. They have identified key requirements, and I would ask your help in meeting these specific needs.

It is requested that each participating agency contribute \$100,000 to defray the cost of the Conference. Because of the compressed timeframe, the Council on Environmental Quality and the Department of Defense (Corps of Engineers) have agreed to administratively and contractually support the Conference. In this regard I would ask that your Comptroller's representative contact as soon as possible Bill Flickinger of the Corps of Engineers at 272-8536 to administratively coordinate the transfer of funds.

Thank you for your support of this important Presidential initiative.

Yours sincerely,

D. Allan Bromley
Assistant to the President
for
Science and Technology

The Honorable Clayton Yeutter
The Secretary of Agriculture
Washington, D.C. 20250

THE WHITE HOUSE
WASHINGTON

DRAFT

March 7, 1990

Dear Secretary Baker:

In order to prepare for the upcoming White House Conference on Science and Economics Research Relating to Global Change which will be held in Washington, D.C., April 17-18, 1990, it has been decided that five teams be assembled to make information-gathering visits to all the countries invited to send a delegation to the Conference (see attachment). The people chosen to make these visits have been carefully selected by the three Conference co-chairmen, Council of Economic Advisors Chairman Michael Boskin, Council on Environmental Quality Chairman Michael Deland, and myself.

Immediate notification of the U.S. embassies in each of these countries is required in order to have the appropriate embassy personnel set the appointments during the time period necessary. As the attachment shows, the invited countries have been separated into five areas, and the proposed dates for these information-gathering visits is between March 12 and March 25, 1990.

The contact point should your people need further information for this request is Dr. Franmarie Keel, the Conference Coordinator, at 653-5980.

Thank you for your assistance in this matter. I look forward to your participation in this important endeavor and look forward to your opening remarks at the Conference on April 17th.

Sincerely,

D. Allan Bromley
Director
Office of Science and
Technology Policy

ATTACHMENT C

THE WHITE HOUSE
WASHINGTON, D.C.

Office of the White House Conference
on
Science and Economics Research Relating to Global Change

PRE-CONFERENCE INFORMATION GATHERING TEAMS

(List of Countries)

It is proposed that five teams be assembled to make information-gathering visits to all the countries that have been invited to send a delegation to the Conference. It is proposed that the teams consist of one individual for each of the five teams who is involved with and knowledgeable about the Conference (For the Offices of the Co-Chairmen, or members of the DPC Working Group or one of the alternates) and a couple of members of the U.S. Embassy staff in the country being visited. It is anticipated that the trips will be accomplished in the period March 12-25, with each trip taking 7-10 days. The teams proposed were developed around ease of travel and geographical proximity. The teams proposed are:

Team 1 - North and South America - Richard Schmalensee

Brazil, Canada, and Mexico

Team 2 - Africa and Southern Europe - David Struhs

Italy, Nigeria, and Zaire

Team 3 - Europe (Part I, this team would require two WHC people) -
Jack Fellows/Lou Brown

European Community, France, Germany (FRG), Netherlands, OECD,
and the United Kingdom.

Team 4 - Europe (Part II) - John Elkind

Norway, Poland, and USSR

Team 5 - Far East - Mike Hall

Australia, India, Indonesia, and Japan.

The timetable for the proposed information gathering program is:

1. Set up interviews during the week of March 5;
2. Briefing session for the team leaders on Friday, March 9;
3. Teams on travel March 12-25;
4. Teams debrief and start the integration process for developing the necessary Conference documents that are to be sent to all delegates, March 26;
5. Integration of materials developed out of the visits and final copy of materials that will be sent to delegates, completed by Friday, March 30;
6. Prepare all materials that will be mailed to delegates and mail by Federal Express or equivalent by Friday, April 6;
7. Delegates receive packets on Monday, April 9, and have one week to review;
8. Delegates travel to Conference on Monday, April 16;
9. Conference begins the evening of April 16.

THE WHITE HOUSE

WASHINGTON

March 8, 1990

Dear Secretary Baker:

In order to prepare for the upcoming White House Conference on Science and Economics Research Related to Global Change which will be held in Washington, D.C., April 17-18, 1990, it has been decided to send five representatives to make information-gathering visits to all the countries invited to send a delegation to the Conference (see attachment). The people chosen to make these visits have been carefully selected by the three Conference co-chairmen, Council of Economic Advisors, Chairman Michael J. Boskin, Council on Environmental Quality, Chairman Michael R. Deland, and myself.

Immediate notification of the U.S. embassies in each of these countries is required in order to have the appropriate embassy personnel contact subject country offices concerning their participation in the Conference and to schedule appointments for each of the three areas of Conference interests, i.e., science, economics and the environment. As the attachment shows, the invited countries have been separated into five areas, and the proposed dates for these information-gathering visits is between March 12 and March 25, 1990.

The contact point should your people need further information for this request is Dr. Franmarie Keel, the Conference Coordinator, at 653-5980.

Thank you for your assistance in this matter. I look forward to your participation in this important endeavor and to your opening remarks at the Conference on April 17th.

Yours sincerely,

D. Allan Bromley
Assistant to the President

8. Delegates travel to Conference on Monday, April 16;
9. Conference begins the evening of April 16.

THE WHITE HOUSE

WASHINGTON

March 12, 1990

Dear Dr. Bolin:

On behalf of the 1990 White House Conference on Science and Economics Research Related to Global Change, President Bush and we as co-chairmen are pleased to invite you to be the plenary speaker on the morning of Wednesday, April 18, 1990.

The Conference, which will be held April 17-18 at the J.W. Marriott Hotel in Washington, D.C., will convene ministerial level officials from 17 invited nations, the European Community and the OECD. It will bring together the essential disciplines of science, economics and the environment in an effort to enhance international understanding and cooperation in these vital areas and contribute to the success of the IPCC process.

The Conference is conceived as an integral part of the on-going international process of formulating policy that depends increasingly on improved understanding of the changes in the global environment. The need to reduce substantially the uncertainties in our understanding of the basic sciences and economics of global change has been noted by virtually all world leaders. This Conference will focus on such scientific and economic research issues as a complementary effort to the on-going Intergovernmental Panel on Climate Change (IPCC) and other international meetings. The President strongly supports the IPCC efforts and expects that the results of the Conference will contribute to the on-going international debate and action on these issues.

It is our hope that you will report on the progress of the IPCC, the expected results of the IPCC process in the months ahead, and the relationship of this Conference to the entire IPCC process. It would be helpful if you also could show the linkages between this Conference, the IPCC, and the other meetings and activities related to global change, e.g., The Second World Climate Conference. It is an active year in the international arena of science, economics, and environmental policy related to global change, particularly climate change.

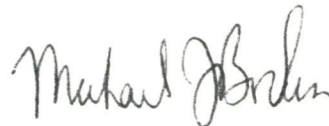

Dr. Bert Bolin
March 12, 1990
Page Two

It would be a great honor, Dr. Bolin, if you would agree to participate in this unprecedented joint effort to address the problems and opportunities with which our global environment confronts us.

Yours sincerely,

D. Allan Bromley

March 13, 1990

MEMORANDUM FOR ALLAN BROMLEY

FROM: BARRY MCBEE *BM*

SUBJECT: Presidential Participation in White House Science
and Economics Research Conference

Although there have been discussions of the President's participation in the April White House science and economics research conference (and time tentatively set aside on his calendar), it is my understanding that no formal proposal has yet been submitted. Attached are two proposals that could be submitted by you, Mike Deland and Michael Boskin. They request the President's participation on the first day of the event for remarks and visits to the working group meetings and his attendance at a session on the second day of the conference at the White House to receive a report on the meeting. The latter concept was an idea first floated by Steve Hart to give the event a true White House character and fulfill the concept inherent in its title.

If these are acceptable, they can simply be signed and submitted. If changes are necessary (and they may be as I may not be aware of recent modifications in the proposed agenda for the event), let me know, or the proposals can be revised in your office.

If you have any questions please call me.

THE WHITE HOUSE

WASHINGTON

SCHEDULE PROPOSAL

March 16, 1990

TO:

JOSEPH W. HAGIN, II
DEPUTY ASSISTANT TO THE PRESIDENT FOR
APPOINTMENTS AND SCHEDULING

FROM:

D. ALLAN BROMLEY *su*
ASSISTANT TO THE PRESIDENT FOR SCIENCE
AND TECHNOLOGY AND DIRECTOR OF THE OFFICE
OF SCIENCE AND TECHNOLOGY POLICY

MICHAEL J. BOSKIN *mb*
CHAIRMAN, COUNCIL OF ECONOMIC ADVISERS

MICHAEL R. DELAND *MD*
CHAIRMAN, COUNCIL ON ENVIRONMENTAL QUALITY

REQUEST:

That the President (1) give a brief welcome to the delegates to The White House Conference on Science and Economics Research Related to Global Change; and (2) deliver brief closing remarks and thank the Conference participants for their efforts

BACKGROUND:

In his meeting with President Gorbachev in December, the President announced that he would host a Conference in the spring of 1990 to address the importance of science and economics research in dealing with global environmental issues, principally global change. During his remarks to the Intergovernmental Panel on Climate Change on February 5, he reiterated his intention to host such a Conference. On February 26, the announcement was made that the President had issued invitations to the Conference, to be held in Washington April 17-18. The heads of state or leaders of 19 nations and international organizations have been invited to send ministerial-level leaders representing the fields of science, economics and the environment to the Conference.

The President should give brief welcoming remarks to the delegates and wish them well in their undertaking. He should return the following afternoon to thank the participants and close the Conference.

TIME AND DATE: (1) 9:00 a.m. Tuesday, April 17, 1990;
and (2) 2:45 p.m., Wednesday, April 18, 1990

DURATION: Each trip 45 minutes portal-to-portal

LOCATION: J.W. Marriott Hotel
14th Street and Pennsylvania Avenue, N.W.
Washington, D.C.

PARTICIPANTS: The President
Director Bromley
Chairman Boskin
Chairman Deland
Delegations from invited nations and
organizations (approximately 200 persons)

OUTLINE OF EVENT: Agenda attached

MEDIA COVERAGE: Open

REMARKS: Yes; to be provided by speechwriters

PROJECT OFFICER: Nancy Maynard x6202

EXECUTIVE OFFICE OF THE PRESIDENT
COUNCIL ON ENVIRONMENTAL QUALITY

The Honorable Nicholas F. Brady
Secretary
Department of the Treasury
1500 Pennsylvania Avenue, N.W.
Room 3330
Washington, DC 20220

Dear Secretary Brady:

On behalf of the Conference Co-Chairmen, Michael Boskin and Allan Bromley, I am delighted to ask you to join us and Admiral Watkins and Bill Reilly as a member of the U.S. Delegation to "the President's White House Conference on Science and Economics Research Related to Global Change." The Conference will be held at the J. W. Marriott Hotel in Washington on April 17-18, 1990.

We also feel it would be most fitting if you delivered the "Welcome and Opening Remarks" from 8:30 - 8:45 a.m. on April 17th. Attached is a "working draft" of an annotated agenda which, as I trust you appreciate, must be closely held.

As I have discussed with Hollis McLoughlin, we need to finalize the U.S. delegation so that the participating countries may choose theirs. I, therefore, would greatly appreciate if you could let me know today whether you can participate as a member of the delegation. We also will need a response regarding the opening remarks as soon as possible.

Many thanks and best regards.

Sincerely,

Michael R. Deland

MEMORANDUM

TO : Bob Corral
FROM : Kay Bruce

According to the February, 1990, "Order of Precedence", the U. S. Delegation members to the Global Change Conference rank in the following order:

Secretary of the Treasury
Secretary of Energy
Chairman, Council of Economic Advisors
Administrator, Environmental Protection Agency
Director, Office of Science Technology Policy
Chairman, Council on Environmental Quality

Although ranked in the same category, The Chairman of the Council of Economic Advisors immediately precedes the Administrator of the Environmental Protection Agency.

WASHINGTON

March 14, 1990

Dear Mr. Vice President:

On behalf of the 1990 White House Conference on Science and Economics Research Related to Global Change, the President and I are pleased to invite you to act as host on the evening of Tuesday, April 17, when a formal dinner will be held in the Diplomatic Suite of the Department of State.

We would be honored to have you deliver the opening remarks at 8:00 p.m. to the assembled guests, who will include ministerial-level leaders from 21 participating countries, key individuals from the executive offices of the President, the Congress and government agencies, leading scientists, economists, and environmental, business and industry leaders. Following dinner there will be a major address by an outstanding figure in the field of economics who will integrate the science and economic issues with the policy framework.

Mr. Vice President, your active participation as host of the first evening of this important Conference would emphasize the President's commitment to sound national and international environmental policy. I strongly urge your involvement and look forward to a favorable reply.

MEMORANDUM FOR C. BOYDEN GRAY

FROM: D. ALLAN BROMLEY *Alan*
SUBJECT: USE OF THE PRESIDENTIAL SEAL

As you know, the President has appointed Michael Boskin, Chairman of the Council of Economic Advisers, Michael Deland, Chairman of the Council on Environmental Quality, and me as co-chairmen of the White House Conference on Science and Economics Research Related to Global Change.

The task he has given us is to structure a multinational Conference that will be a further step in a joint international approach to the problems and opportunities with which our global environment confronts us.

The Conference, scheduled for April 17-18, 1990 at the J. W. Marriott Hotel in Washington, D. C., will convene ministerial level officials from 17 invited nations, the European Community and the OECD. It will bring together the essential disciplines of science, economics and the environment.

In light of the fact that this is a Presidential initiative, we are seeking permission to use the Presidential Seal on (1) official Conference materials, i.e., invitations, correspondence, briefing materials; and (2) a memento such as a medallion, a paperweight, or small globe for the delegates, which has yet to be selected finally. The memento will be used strictly as a gift to the Conference delegates and will under no circumstances be used for any commercial or exploitive purpose.

I would appreciate receiving your opinion as soon as possible. Thank you for your assistance.

March 15, 1990

Dear Martin:

On behalf of the 1990 White House Conference on Science and Economics Research Related to Global Change, I would like to formally request that you co-host with Mr. Robert Mosbacher, the Secretary of Commerce, a reception in the National Air and Space Museum on Monday, April 16, from 7:00 to 9:00 p.m., for approximately 400 guests.

These guests will include "ministerial" level leaders from 20 participating countries, key individuals from the executive offices of the President, the Congress and government agencies, leading scientists, economists, and environmental, business and industry leaders.

Your staff has suggested that the normal fees will be waived for this event and I would be most appreciative of this assistance.

FROM: D. ALLAN BROMLEY 
Chairman

SUBJECT: Materials Distributed Today to Foreign Embassies
of Countries Invited to Send Delegates to the White
House Conference on Science and Economics Research Related
to Global Change

We held a Briefing Session today for representatives from foreign embassies of countries that received invitations to send a delegation to the White House Conference on Science and Economics Research Related to Global Change. The Briefing was designed to provide the embassy representatives with a thorough review of the background and overall objectives for the Conference and to answer any questions. Further, we provided them with a Briefing Booklet, a copy of which is attached. Also, I have enclosed for you a listing of the U.S. Delegation to the Conference.

As we discussed at a recent Working Group meeting, we will have the Conference staff brief you on Conference progress at an upcoming DPC Working Group meeting.

- Conference Content Questionnaire

INTRODUCTION

President Bush's White House Conference on Science and Economics Research Related to Global Change, April 17-18, 1990, in Washington, D.C., will convene ministerial-level officials from seventeen nations, EC, OECD, and the United States, and bring together the essential disciplines of science, economics, and the environment.

The Conference is designed to enhance international cooperation and to build the basis for future joint efforts in addressing changes to these vital areas.

This package is designed to provide each delegation with pre-conference planning information and to solicit your country's responses to the Delegate Information Survey and Conference Content Questionnaire. Your role as a representative of your country's delegation, in the communication and dissemination of these materials to your government counterparts at home, is critical to the success of this international conference.

Enclosed is general background information available on the White House Conference.

We need your input on the Conference Content Questionnaire and information on your delegation NO LATER THAN 29 March 1990.

THE WHITE HOUSE
WASHINGTON

February 23, 1990

Dear :

On April 17 and 18, 1990, the United States will host a White House Conference on Science and Economics Research Related to Global Change. I take pleasure in inviting you to send an official delegation to this conference.

The meeting will be devoted to advancing the understanding of scientific and economic issues related to global change. Its primary goal is to improve both the state of knowledge in these fields and the analytic tools required to develop potential policy responses. It is my hope that the expertise, experience, and data available in our respective countries can be brought together in a more integrated and coherent fashion. By working together, our nations can enhance international cooperation in these vital areas and contribute to the success of the ongoing IPCC process.

For the conference to be of greatest benefit to all of us, it would be highly desirable if your senior scientific, environmental, and economic officials could attend. The Director of the Office of Science and Technology Policy, the Chairman of the Council of Economic Advisers, and the Chairman of the Council on Environmental Quality will serve as co-chairmen for this meeting.

I look forward to participating personally in and learning from this conference. I hope it will serve as a useful and important step in our joint efforts to address changes in the global environment.

Sincerely,

April 17-18, 1990
Washington, D.C.

- On February 5, 1990, the President invited the Heads of State from seventeen countries, the European Community (EC), and the Organization for Economic Cooperation and Development (OECD) to send ministerial-level delegates to a White House Conference on Science and Economics Research Related to Global Change.
- The Conference will be held in Washington, D.C. on April 17-18, 1990.
- The President first indicated his intention to host such a Conference on this subject during his Summit meetings with President Gorbachev, on December 4, 1989, and later on Monday, February 5, 1990, during his speech to the United Nations Intergovernmental Panel on Climate Change.
- The Conference will be devoted to science and economics research issues relevant to policy on global change, including climate. The Conference is designed to address important next steps that substantially enhance and broaden international understanding of science and economics research issues that relate to global change. Further, the Conference seeks to frame the initial steps towards a strategy for implementing joint international science and economics research efforts. It also seeks to integrate and link scientific and economic research results to both the domestic and international policy process and because it seeks for the first time to join research issues central to both the science and the economics related to global change.
- The Conference focuses on "Global Change," a scope of research interest that has evolved out of the science that concerns itself with understanding the fundamental processes that govern the way the global Earth functions. Thus, the research agenda not only includes scientific and economics research issues related to global climate change, but also includes other important global processes.

- The Conference is conceived as an integral part of the ongoing international process of trying to understand changes in the global environment. The need for substantially improved understanding of both the science and economics of global change has been noted by virtually all world leaders. This Conference will focus on scientific and economic research issues as a complementary effort to the on-going Intergovernmental Panel on Climate Change (IPCC) and other upcoming international meetings that seek to address the serious policy issues that evolve out of the concerns for the changes in the global environment, particularly climate change. The President strongly supports the IPCC efforts and expects that the results of the Conference will contribute to the on-going international debate on these issues. For example, the leadership of the Intergovernmental Panel on Climate Change has been invited to take an active role in the Conference.
- The Conference will convene a delegation of three ministerial-level officials from a representative group of nations, each representing one of three disciplines: science, economics, and the environment. The Conference was conceived with the idea that a small representative group of countries would be invited to participate; their selection is based on the simple criteria that the meeting should include countries or representatives of country interests that have substantial populations, large land masses, industrialized economies or heavy future energy needs, substantial research infrastructures, or have provided international leadership on issues related to climate and global change. A representative group of countries has been selected. The President has asked the Heads of State of the following countries and organizations to send a delegation:
 1. Australia
 2. Brazil
 3. Canada
 4. Federal Republic of Germany
 5. France
 6. India
 7. Indonesia
 8. Italy
 9. Japan
 10. Mexico
 11. Netherlands
 12. Nigeria
 13. Norway
 14. Poland
 15. Soviet Union
 16. United Kingdom
 17. Zaire
 18. European Community (EC)
 19. Organization for Economic Cooperation and Development (OECD)

It is expected that each country or organization will send a ministerial-level official to represent each of their agencies of science, economics, and the environment, together with no more than two staff associates per official. It is suggested that one delegate in each of the three areas will be an individual who is currently active in scientific or economics research. It is recognized that the delegations are likely to have one "at-large" member. Thus, the total delegation size should not exceed ten per country. Once the delegations are determined, it is planned to consult with these countries on agenda details.

- The U.S. Delegation (total of ten) will be:

- ☐ Secretary of the Treasury - Nicholas F. Brady
- ☐ Secretary of Agriculture - Clayton Yeutter
- ☐ Secretary of Commerce - Robert A. Mosbacher
- ☐ Secretary of Energy - Admiral James D. Watkins (Ret)
- ☐ Administrator, Environmental Protection Agency - William K. Reilly
- ☐ Administrator, National Aeronautics and Space Administration - Richard H. Truly
- ☐ Under Secretary of Commerce for Oceans and Atmosphere; and Director, National Oceanic and Atmospheric Administration - John A. Knauss

Conference Co-Chairmen:

- ☐ Chairman, Council of Economic Advisers - Michael J. Boskin
- ☐ Assistant to the President for Science and Technology - Dr. D. Allan Bromley
- ☐ Chairman, Council on Environmental Quality - Michael R. Deland

- The Conference is designed to be a forum to bring a number of ministerial-level leaders together to enhance international cooperation and to build the basis for joint efforts in these vital areas. It is hoped that the delegates, working together, will agree upon those areas of opportunity for cooperative action in the areas of scientific and economics research. The goal would be to address three major themes:
 - Uncertain Change: The Scientific and Economics Research Challenge
 - Integrating Scientific and Economics Research in the Policy Process; and
 - Building Partnerships for Scientific and Economics Research.

The Conference provides a forum for international leaders to consider and discuss research questions that are critical to the policy process, such as:

- ◆ How well can we predict temperature trends in the decades ahead?
 - ◆ How "good" are our global-scale models, such as models to predict temperature changes?
 - ◆ How well can we predict the interconnections between global environment change and the resulting social and economic impacts?
 - ◆ What are the economic costs of adapting to or mitigating global change?
 - ◆ How "good" are the economic models used to compute these costs?
- (See attached Conference Content Questionnaire)

By addressing such questions, it is hoped that the nations might pledge to support joint international research efforts related to global change that focus on rapid improvement of both scientific and economic knowledge and developing the necessary infrastructure, including:

- Establishing a more formal international mechanism to improve the coordination of global change science and economic research programs, and
 - Participating in cooperative research efforts, such as the World Ocean Circulation Experiment and cooperative economic projects of the OECD.
- The Conference is a White House Conference, initiated by the President. Hence, the President has appointed three members of the Executive Office of the President in the relevant areas, to be the co-chairmen of the Conference. The three co-chairmen are: the Chairman of the President's Council of Economic Advisers, Dr. Michael J. Boskin; the President's Science Advisor and Director of the Office of Science and Technology Policy, Dr. D. Allan Bromley; and the Chairman of the President's Council on Environmental Quality, Mr. Michael R. Deland.
 - The President stated, "this conference is a vital next step in a joint international approach to address changes in the global environment."

PRELIMINARY AGENDA

**PRELIMINARY AGENDA
FOR
THE WHITE HOUSE CONFERENCE
ON
SCIENCE AND ECONOMICS RESEARCH
RELATED TO GLOBAL CHANGE**

April 17-18, 1990
Washington, D.C.

Monday, April 16, 1990

4:00 PM Registration, Information, and Hosting Desk Opens
7:00 PM Reception for all Delegates at the Air & Space Museum
 (Hosts: Robert A. Mosbacher, Secretary of Commerce & Martin Harwit,
 Director, National Air & Space Museum)

Tuesday, April 17, 1990

7:30 AM Registration, Information, and Hosting Desk Opens
 (Continental Breakfast)

Plenary Session I:

Scientific and Economic Uncertainties: Research Challenges

Chairman: Dr. D. Allan Bromley

8:30 AM Opening Remarks - Nicholas F. Brady, Secretary of the Treasury

8:45 AM Goals and Expectations for the Conference - Conference Co-chairman

Followed by a Welcome by President George Bush

9:15 AM Theme I Presentation:
 "Uncertain Change: The Scientific and Economics Research Challenge"
 - Dr. D. Allan Bromley

9:45 **Adjourn to Working Sessions**

Working Group Session I:

Theme 1: Uncertain Change: The Scientific and Economics Research Challenge

10:00 AM Three Working Groups will address a series of questions that relate to this theme, with each group composed of about seven science, seven environmental, and seven economics ministers. (Each group will be chaired by a member of a visiting delegation.)

1:00 PM Lunch - Speaker: William K. Reilly, Administrator, Environmental Protection Agency

Plenary Session II:

Integrating Scientific and Economics Research in the Policy Process

Chairman: Michael J. Boskin

2:15 PM Theme II Presentation:
Integrating Scientific and Economics Research in the Policy Process
Michael J. Boskin

2:45PM Adjourn to Working Session

Working Group Session II:

Theme II: Integrating Scientific and Economics Research in the Policy Process

3:00 PM Three Working Groups, as in Session I, will address a series of questions that relate to this theme

5:30 PM Working Sessions Adjourn

Evening - Reception and State Dinner

6:15 PM Shuttle Buses take Delegates to NAS/NAE

6:30 PM Reception, hosted by the National Academies of Science and Engineering, for all delegates and other invited guests

8:00 PM Formal Dinner (Black Tie) - Diplomatic Suite of the Department of State

10:00 PM End of the Day - Shuttle Buses take delegates to hotel

Wednesday, April 18, 1990

7:30 AM Continental Breakfast

9:00 AM An Address by Bert Bolin, Chairman of the IPCC

Plenary Session III:

Building Partnerships for Scientific and Economics Research

Chairman: Michael R. Deland

9:30 AM Theme III Presentation:
"Building Partnerships for Scientific and Economics Research"
Michael R. Deland

10:00AM Adjourn to Working Sessions

Working Group Session III:

Theme III: Building a Partnership for Scientific Research

10:15 AM Three Working Groups, as in Session II, will address a series of questions that relate to this theme

12:30 PM Lunch

Speaker: Admiral James D. Watkins (Ret), Secretary, Department of Energy

Plenary Session IV:

Summary Reports and Closing Remarks

2:00 PM Summary Reports - presented by each Working Group

2:15 PM Summary Remarks - Conference Co-Chairmen

Followed by Closing Remarks by President George Bush

3:00 PM Conference Ends

3:30 PM Closing Reception

**DELEGATE

James D. Watkins
Secretary
Department of Energy

James David Watkins was nominated by the President to be the sixth Secretary of Energy on January 20, 1989. Admiral Watkins was confirmed by the United States Senate and sworn into office on March 1, 1989.

Admiral Watkins was born in California on March 7, 1927, and claims the city of Pasadena as his home. A 1949 graduate of the U.S. Naval Academy, his tours as flag officer included Chief of Naval Personnel; Commander of the Sixth Fleet; Vice Chief of Naval Operations; and, Commander-in-Chief of the Pacific Fleet. Admiral Watkins was selected by President Reagan to become the 22nd Chief of Naval Operations on June 30, 1982. His military decorations include several Distinguished Service and Legion of Merit medals, the Bronze Star with combat "V" and other medals, campaign and service ribbons, and decorations from many foreign nations.

Following his retirement on June 30, 1986, Admiral Watkins devoted his time to issues regarding America's youth, and worked with a number of philanthropic organizations to establish a national program for personal excellence. He also served as a member of advisory boards in both the education and energy fields and has received several honorary doctorates and public service awards.

In October 1987, Admiral Watkins was appointed Chairman of the Presidential Commission on the Human Immunodeficiency Virus (AIDS) Epidemic, submitting the Commission's final report to the President on June 24, 1988.

Admiral Watkins received his master's degree in mechanical engineering in 1958, and is a graduate of the reactor engineering course at the Oak Ridge National Laboratory. He was selected by Admiral Hyman G. Rickover to enter the Navy's nuclear-powered submarine program in 1959, and was qualified as an Engineering Officer of the Watch at one of the Navy's land-based reactor plants. He served for three years in the Atomic Energy Commission as Admiral Rickover's assistant for Naval Nuclear Propulsion and later, in a variety of assignments associated with the management of the nuclear navy. These assignments included Commanding Officer of a nuclear-powered submarine and Executive Officer of the world's first nuclear-powered cruiser.

Admiral Watkins married Sheila Jo McKinney of San Diego, California, in 1950. They have six children: Katherine Watkins Coopersmith, Laura Jo Watkins Kauffmann, Susan, Charles, James Jr., and Edward. Admiral and Mrs. Watkins have eight grandchildren.

SAMPLE

**CONFERENCE CONTENT
QUESTIONNAIRE**

CONFERENCE CONTENT QUESTIONNAIRE

This conference is being designed to promote the sharing of ideas and information. Your answers to this questionnaire will be a vital component of these exchanges and will help to create a successful conference and a better understanding of the global challenges we share. By completing this questionnaire, **in English**, and returning it to us by March 29, 1990, you will assure that your answers are shared among all delegates and that a solid foundation for the conference is established.

Theme I: UNCERTAIN CHANGE: THE SCIENTIFIC AND ECONOMICS RESEARCH CHALLENGE

The following questions seek to get a sense of your country's interest and involvement in scientific and economics research related to global change. The term "scientific and economics research related to global change" encompasses all research relevant to global change, including analysis that may originally have been motivated by other concerns. For example, analysis of the impact of consumption in the composition and level of energy uses on economic growth and investment levels should be included in your inventory.

What scientific research related to global change is being conducted or is now planned in your country? Provide a breakdown of this work into the following categories:

- ▼ global/regional forecasts of human activities leading to possible global change;

- ▼ global/regional models of geophysical global change processes;

- ▼ social and economic impact of possible global change, either with or without adaptive responses; and

- ▼ social and economic consequences of specific actions that might be taken to arrest possible global change.

What potential conflicts, if any, between your interest in continued economic progress and your interest in arresting possible undesirable global change have been identified by your existing research? What scientific and economics research is most critical to improving our understanding of relevant tradeoffs and possibly improving the tradeoff themselves?

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

What is your government's current and projected budget for scientific and economics research relevant to global change issues? How are your research efforts coordinated across agencies and departments within your government?

This image shows a single sheet of white paper with horizontal blue ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

What is the institutional structure for conducting scientific and economics research relevant to global change in your country?

▼ Government agencies and laboratories

▼ Universities

▼ Industry

What studies have been conducted in your country on methods (and possible social and economic consequences) of limiting greenhouse gas emissions?

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

What studies have been conducted in your country regarding the social and economic consequences of global warming that may occur? How sensitive are these estimates to the assumed rate of warming and to the application of adaptation measures?

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There are approximately 20 lines visible. The paper appears to be a standard notebook page or a sheet of stationery. There is no handwriting or other markings on the page.

What are the present sources, by percentage, of electrical energy in your country? What are the projected sources, and overall usage levels, in 2000, 2010, and 2020? What technologies are currently under consideration or being planned to increase energy efficiency in generation and utilization in your country?

This image shows a blank sheet of white paper with horizontal blue ruling lines. A single vertical red margin line runs down the left side of the page. The paper appears to be from a notebook or a standard writing template. There are no markings, text, or drawings on the page.

Theme II: INTEGRATING SCIENTIFIC AND ECONOMICS RESEARCH IN THE POLICY PROCESS

The need for substantially improved understanding of both the science and economics of global change issues has been noted by virtually all world leaders. The following questions seek to identify how your country integrates such research into its policy decisions.

What mechanisms exist in your country for providing economic and scientific information concerning global change issues to decision makers?

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. A vertical green margin line runs down the left side of the page. The paper appears to be from a notebook or a standard ruled sheet of paper. There are no markings, text, or drawings on the page.

How is scientific and economics information concerning global change used by decision makers in your country to address the environmental ramifications of economic policies and the economic consequences of environmental policies?

[illegible]

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There is no handwriting or other markings on the paper.

Theme III: BUILDING PARTNERSHIPS FOR SCIENTIFIC AND ECONOMICS RESEARCH

The conference will be designed to enhance and broaden international understanding of science and economics research issues related to global change. The following questions seek to determine your government's interest in framing the initial steps towards a strategy for implementing joint international research efforts.

What lessons can be learned from your country's experience in integrating scientific and economic energy-related research over the past two decades?

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Forecasts of technology advances, their costs, and market penetration necessarily involve both scientific and economic considerations. How can scientific and economic research be integrated to provide the most accurate and closely-bounded technology forecasts possible? How can this research contribute to technology development?

This image shows a single sheet of white paper with horizontal blue ruling lines. The lines are evenly spaced and run across the width of the page. There are approximately 20 lines visible. The paper has a slightly textured appearance and some minor discoloration or faint smudges, particularly near the top edge. The overall tone is light blue-grey.

What are your government's current forecasts of future technologies relevant to mitigation of or adaptation to global change?

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There is no handwriting or other markings on the paper.

What international mechanisms would be most effective to carry out economic and scientific research on global change?

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There is no handwriting or other markings on the paper.

Do you anticipate that new entities will be required to carry out joint research efforts? If existing organizations can fill the need, which ones should be used? What changes will be needed in these organizations to produce integrated research?

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

What are the major barriers to carrying out integrated economic and scientific research on global change?

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

This image shows a blank sheet of white paper with horizontal blue ruling lines. A single vertical red margin line runs down the left side of the page. The paper appears slightly aged or off-white. There are no markings, text, or drawings on the page.

Bill
Dear Mr. Reilly:

On behalf of the 1990 White House Conference on Science and Economics Research Related to Global Change, President Bush and we as co-chairmen are pleased to invite you to be the luncheon speaker at 1:00 p.m. on Tuesday, April 17, 1990.

The Conference will be held April 17-18 at the J.W. Marriott Hotel in Washington, D.C. and will convene ministerial level officials from 17 invited nations, the European Community and the OECD. It will bring together the essential disciplines of science, economics and the environment in an effort to enhance international understanding and cooperation in addressing the problems and opportunities of our global environment.

It would be a great honor if you would agree to address the assembly. Dr. Franmarie Keel, the Conference Director, can be reached at 653-5980 should you require any additional information.

Yours sincerely,

D. Allan Bromley

MEMORANDUM FOR THE DPC WORKING GROUP ON GLOBAL CHANGE

FROM: D. ALLAN BROMLEY 
SUBJECT: Task Force on Economic Costs Report

Enclosed herewith is the preliminary draft of the above mentioned task force report.

I have already expressed to Richard Schmalensee and his group my appreciation of the excellent work that this report reflects. I know that he, and they, will welcome any comments or suggestions that you may have concerning it and would encourage you to communicate them directly to Dr. Schmalensee.

We will have an opportunity to discuss this report in a Working Group meeting in the near future.

Please do not copy or otherwise distribute this preliminary draft.

COUNCIL OF ECONOMIC ADVISERS
EXECUTIVE OFFICE OF THE PRESIDENT
WASHINGTON

MEMBER OF THE COUNCIL

March 5, 1990

MEMORANDUM FOR THE HONORABLE D. ALLAN BROMLEY
ASSISTANT TO THE PRESIDENT FOR
SCIENCE AND TECHNOLOGY AND DIRECTOR
OFFICE OF SCIENCE AND TECHNOLOGY POLICY

FROM: RICHARD SCHMALENSEE 

SUBJECT: Enclosed report

I hereby submit to you and thus to the DPC Global Change Working Group the enclosed report of the Task Force on Economic Cost. (I have also sent copies to all Task Force members, including Nancy Maynard, and to a few interested individuals in the complex.) The "Preliminary Draft" header is intended as leak protection; no further work is planned.

CEA is mainly responsible for the lateness of this report; we were slowed by the Economic Report of the President and by severe secretarial and word processing problems. All other agency representatives on the Task Force discharged their responsibilities well and quickly and deserve the Working Group's thanks. I strongly believe that this consensus document is a better report than any single agency could have produced and that it describes well what we know and don't know. I would be happy to sketch its findings to the DPC Working Group if you think it appropriate, though it may be more efficient simply to direct Working Group members to the Executive Summary.

I await your decision regarding the distribution and/or presentation of this document.

Dear Frank:

On behalf of the 1990 White House Conference on Science and Economics Research Related to Global Change, I would like to formally request that you co-host with Dr. Robert M. White, President of the National Academy of Engineering, a reception at the National Academies of Sciences and Engineering on Tuesday, April 17, from 6:30 to 8:00 p.m., for approximately 350 guests.

These guests will include "ministerial" level leaders from 20 participating countries, key individuals from the executive offices of the President, the Congress and government agencies, leading scientists, economists, and environmental, business and industry leaders.

It was my understanding that the normal fees will be waived for this event and I am most appreciative of this assistance.

Yours sincerely,

THE WHITE HOUSE

WASHINGTON

March 21, 1990

Dear Erich:

On behalf of the 1990 White House Conference on Science and Economics Research Related to Global Change, President Bush and I are honored that you have agreed to serve as a United States delegate to the Conference.

As you know, the Conference will be held April 17-18, 1990 at the J.W. Marriott Hotel in Washington, D.C. and will convene ministerial-level officials from 17 invited nations, the European Community and the OECD. It will bring together the essential disciplines of science, economics and the environment in an effort to enhance international understanding and cooperation in these vital areas. As a U.S. delegate, you are welcome to bring two staff members to assist you throughout the two-day Conference.

Enclosed for your information is a briefing book which has been provided to the embassies of participating countries for their delegates. We look forward to your participation in this unprecedented joint effort to address the problems and opportunities with which our global environment confronts us.

Yours sincerely,

D. Allan Bromley

THE WHITE HOUSE

WASHINGTON

March 26, 1990

Dear Secretary Baker:

As you know, the White House Conference on Science and Economics Research Related to Global Change will take place April 17-18, 1990 in Washington, D.C. and will bring together ministerial-level officials from 17 invited nations, the European Community and OECD.

My February 16 letter to you on that topic asked that the State Department provide translation and transcription support, clerical and computer assistance, transportation resources and a protocol officer. Since that time our requirements and the means to satisfy them have changed. In lieu of the previously requested services, we ask that the State Department, along with other participating agencies, contribute \$100,000 to defray the cost of the Conference. You have generously agreed to our use of the State Department's Diplomatic Suite for a formal dinner for 250 delegates on Tuesday, April 17. Accordingly, we ask that you allot a portion of the \$100,000 to cover the cost of that dinner.

The Council on Environmental Quality and the Department of Defense (Corps of Engineers) have agreed to support the Conference administratively and contractually. In this regard, I ask that your Comptroller's representative contact as soon as possible Donna Connell of the Council on Environmental Quality at 395-5771 to coordinate the transfer of the balance of the State Department's \$100,000 contribution.

Thank you for your cooperation.

Yours sincerely,

D. Allan Bromley

/12

'90 APR 12 PM 1:41

April 12, 1990

Dear Mr. Bromley:

This is in response to your letter of March 26, which has just come to my attention. I regret to inform you that the Department of State will not be able to contribute financial support to the White House Conference on Science and Economics Research Related to Global Change, as you request. As you note in your letter, the Department of State has agreed to permit the use of the diplomatic suite for a formal dinner on Tuesday, April 17; we are, however, in no financial position to pay for the costs of that dinner. When the Department agreed to act as host for the dinner, we did so on the assumption, as is usually the case, that the costs of the dinner would be met by the requesting agency.

I regret our inability to cooperate in this matter, but as you may know the State Department is at the moment struggling to persuade the Congress to restore \$363 million in budget authority which was authorized and appropriated but has not been forthcoming due to complicated Congressional problems. Under these circumstances the State Department is, regrettably, in no position to meet your request for \$100,000 in contributions to the Conference.

I have discussed this matter with Secretary Baker, who is in agreement with the aforementioned position.

Sincerely,

Lawrence S. Eagleburger

The Honorable

D. Allan Bromley,

Assistant to the President

for Science and Technology

THE WHITE HOUSE

WASHINGTON

March 26, 1990

THE WHITE HOUSE

WASHINGTON

March 26, 1990

Dear Mr. Secretary:

As you know, the White House Conference on Science and Economics Research Related to Global Change will take place April 17-18, 1990 in Washington, D.C. and will bring together ministerial-level officials from 17 invited nations, the European Community and OECD.

In response to my February 16 letter to you on that topic, you have generously provided the services of LTC Tom Harvey, whose experience and organizational expertise have been of tremendous assistance to our effort. Additionally, the Department has made available vehicles and operators. Since that time, however, we have been requested to pay for travel arrangements for delegates from lesser developed countries, increasing our budget requirements. Accordingly, we ask that the Department of Defense, along with the other participating agencies, contribute \$150,000 to defray the cost of the Conference.

The Council on Environmental Quality and the Department of Defense (Corps of Engineers) have agreed to support the Conference administratively and contractually. In this regard, I ask that your Comptroller's representative contact as soon as possible Bill Flickinger at 272-8536 to coordinate the transfer of funds.

Thank you for your cooperation.

Country Coordinator Meeting: Executive Summary (28 March 1990)

I. Objectives: (What follows is a capsulation of major C/C meeting outcomes. A more detailed report is being prepared).

- A. Determine the percentage of countries completed
- B. Identify problems areas being encountered
- C. Solutions or actions to resolve

II. Country Attitudes to-date:

A. *Favorable* (Cooperative Total: 10)

- 1. Australia
- 2. Canada
- 3. EC
- 4. FRG
- 5. India
- 6. Mexico
- 7. Netherlands
- 8. Norway
- 9. OECD
- 10. U.K.

B. *Neutral* (Confused **Total: 2**)

1. Japan
2. Poland

C. *Unfavorable* (Various Reasons **Total: 6**)

1. Brazil
2. France
3. Indonesia
4. Italy
5. Nigeria
6. USSR
7. ~~Egypt~~

III. **Delegates Selected to-date:**

A. See attached

B. New addition: Brazil has selected two prominent delegates:

1. Jose Lutzenberger (Envir. Secy--equivalent to Secy. Reilly)
2. Jose Goldemberg (Science Secretary)

C. USA **delegation** selections, profiles, and pictures have been received

IV. Major C/C Concerns:

A. Consensus:

1. What is the overall purpose/goals of the meetings?
2. Who will draft the final summary and what will be the actual outcomes (products)?
3. What are the USA responses to the 3 major themes?
4. Who are the other delegates from the other countries?

V. C/C's Attitudes and Concerns:

A. Beginning:

1. Confused
2. Concern over expectations exceeding countries attitudes and capabilities to respond

B. Dr. Corell's Overview Brief:

1. Global Stewardship
2. Agreement in Principle to support Scientific/Economic international research activities
3. Covered "hard" and "soft" outcomes (products)
 - a) Theme I: Uncertainty and decisions needed to deal with this issue
 - b) Theme II: Linkages between scientific and economic communities to create joint policies
 - c) Theme III: Better Partnership

C. End:

1. Ahmed Meer emphasized critical points that were well received
2. R. Popovich sampled 5 C/C's: reaction very positive; supportive; and recharged
3. Now perceive tangible outcomes along with information to satisfy their needs

4. Agenda served well to integrate and gain greater participation
5. **Results:** C/C's greater understanding of intent; outcomes; and their role better clarified. In addition, their specific concerns were addressed to a significant degree of satisfaction.

VI. Delegate Information:

- A. *Bio-Data:* Ahmed drafting Cable/Fax being sent directly to US Embassy liaison for them to gather.
Logic: This will maintain chain of command, and more importantly, they have (a) existing rapport/trust (b) direct access (c) avoids time zone delays and accessibility. In addition, will copy in C/C's.
- B. *Content Data:* Actively being worked, but many countries perceive these questions to be challenging; sensitive; and ultimately, require time to complete. However, they are being worked and we should start to receive inputs shortly i.e., next few days.

VII. Next Steps:

- A. Actively working and collecting delegate selection and related data
- B. Developing internal flow chart for C/C Delegate Management Team

DELEGATE ALTERNATES PARTICIPATION POLICY

Delegate Alternates - Their Participation in Conference

It is recognized that some U.S. Delegates, from time to time during the conference, will have to absent the conference. Delegates may designate alternates who would attend the conference to provide the Delegate with continuity of participation. Such alternates would "sit" in the U.S. Delegation.

Process for Completion and Review of the
U.S. Answers to the Conference Content Questionnaire

of

THE PRESIDENT'S WHITE HOUSE CONFERENCE

on

SCIENCE AND ECONOMICS RESEARCH RELATED TO GLOBAL CHANGE

April 17-18, 1990

Washington, D.C.

The purpose of this paper is to describe the process through which the U.S. response to the conference content questionnaire is to be completed and reviewed.

BACKGROUND AND GOAL

The United States has been preparing answers to the same questionnaire that was sent to all of the overseas delegations invited to attend the conference. The United States has committed itself to publishing and disseminating to all of the other delegations in advance of the conference a copy of the U.S. response to the questionnaire.

To be of significant use to the non-U.S. delegations, the U.S. response needs to be transmitted to them NLT Thursday, April 5, 1990.

COMPLETION OF THE U.S. RESPONSE

The initial U.S. response will be completed by the mid-afternoon of Friday, March 30. Eileen Shea of NOAA and Barbara Claffey of CEA have been the lead drafters, working closely with Robert Corell and assisted by appropriate agencies.

INITIAL REVIEW

Copies of the draft U.S. response will be prepared and presented by COB on March 30 to the following persons for review over the weekend:

Andrew Card, Robert Grady, Robert Corell, Franmarie Keel, Nancy Maynard, Howard Gruenspecht, David Struhs, William Harris, Rick Davis, and Ahmed Meer

INTERAGENCY REVIEW

All comments and recommended changes will be due to the conference coordination center NLT 7:30 a.m., Monday, April 2. At that time, at a minimum all of the above mentioned persons -- except Andrew Card and Robert Grady unless they or their representatives desire to attend -- will meet at the conference coordination center to determine what work is necessary to finalize the U.S. response.

The "review" draft will be circulated by fax and/or telemail by noon, Monday, April 2 to the Domestic Policy Council Working Group on Global Change for interagency review and "sign-off."

The Interagency Review and Agency "sign-off" will be due to the conference coordination office by COB, Tuesday, April 3.

APPROVAL AND DISSEMINATION

After making any revisions, on Wednesday, April 4, Robert Corell will obtain all necessary approvals and arrange for the final U.S. response to the conference content questionnaire to be transmitted to all of the non-U.S. delegations NLT COB, Thursday, April 5.

7th meeting of the Global Change Working Group
Friday, March 30, 1990

Dear Colleague:

On behalf of President Bush, we are honored that you will be coming to the United States April 16-18 to serve as a delegate to the White House Conference on Science and Economics Research Related to Global Change.

By contributing your country's expertise in identifying the critical needs in the fields of science and economics research, you will advance international cooperation and understanding in dealing with the uncertainties of global change.

The United States welcomes a free and open discussion of the science and economic research issues related to global change. As co-chairmen of the Conference, we look forward to joining you in that effort.

Yours sincerely,

Michael J. Boskin
Chairman
Council of Economic Advisers

D. Allan Bromley
Assistant to the President
for Science and Technology

Michael R. Deland
Chairman
Council on Environmental
Quality
