THE WHITE HOUSE
WASHINGTON

February 20, 1990

MEMORANDUM FOR THE PRESIDENT

FROM: D. ALLAN BROMLEY *Alan*
SUBJECT: YOUR ADDRESS TO THE IPCC

Dr. Thomas Malone, in 1984 while Foreign Secretary of the National Academy of Sciences, led the U.S. delegation to the Ottawa Canada General Assembly of the International Council of Scientific Unions (ICSU). I was a member of that delegation.

It was at that meeting that the whole question of the global environment came to center stage and Tom Malone, as Treasurer of ICSU, and as a distinguished atmospheric scientist in his own right, played the leading role. He has continued as a major figure in the international environmental movement most recently as President of Sigma Xi--the national honor society in the sciences.

Although very much recognized as a card carrying environmentalist, I thought that you would appreciate the attached letter that Tom has just sent me.

I, too, thought that it was an excellent address!

2/14/90

Dear Allan:

I have just seen the President's
address to the IPCC. It is superb!!

It is difficult to understand
the criticisms of the speech

As you know from our correspondence
and conversations, the tone and thrust
of that statement coincide closely
with my own views. Are there things
that might be done to improve
the public perception of his position?
If so, let's act.

Have been participating in the review
of the National Acid Precitation Assessment
Program (NAPAP). Many similarities to climate
change.

I have copies of the statement (and
Gorbachev's address) from the Moscow Forum
of last month. Would be glad to send
them to you, if you do not have them.

Regards, Tom Malone

MEMORANDUM FOR JOHN H. SUNUNU

FROM: D. ALLAN BROMLEY *DB*
SUBJECT: THE COUNCIL ON COMPETITIVENESS

John Young, President and CEO of Hewlett-Packard, as you know, chairs the above mentioned Council comprising an outstanding cross section of U.S. industrial and academic leaders. They meet normally here in Washington and usually invite someone from the Administration or the Congress as their luncheon guest at the Madison Hotel. Roger Porter and I, for example, have met with them during recent months.

We in OSTP have been working with the Council in the development of both our own, and their longer range technology plans. John Young recently visited with me to discuss some of this activity.

At that time he asked me to remind you of their invitation to you to join the Council for its luncheon from 11:30 to 2:00 on Thursday, March 8. I think that you will find the members to be a very interesting group and they are very much interested in learning your views on the competitiveness question.

May I also remind you of your agreement to spend some time with Ian Ross and his semiconductor industry colleagues. If you would let me know a few dates that might be possible for you, I will try to get the group together. If you have no objections, might I also suggest that we include Tom Murrin of Commerce in the session.

THE WHITE HOUSE
WASHINGTON

May 4, 1990

Dear Mr. Finger:

I appreciate your kind invitation to address the opening session of the USCEA annual nuclear energy conference on November 12, 1990.

As much as I would like to participate in the conference, I have a long-standing commitment out of the city, so I must decline.

May I, however, extend my best wishes for a successful conference.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "D. Allan Bromley". The signature is stylized with a large, looped "D" and a cursive "Bromley".

D. Allan Bromley
Assistant to the President
for
Science and Technology

Mr. Harry B. Finger
President and Chief Executive Officer

April 17, 1990

The Honorable D. Allan Bromley
Science Advisor to the President
Old Executive Office Building (360)
Washington, DC 20506

Dear Dr. Bromley:

This is to invite you to address the opening session of our annual nuclear energy conference in Washington, D.C. on the morning of November 12, 1990, at the Washington Sheraton Hotel to share with our delegates your views on the role of science in meeting the country's energy needs and in addressing the scientific and educational issues surrounding the use of energy. Obviously, you should feel free in developing the themes you consider significant.

Your address would be a principal focus during the opening combined plenary session of a four day conference period for the 1990 Nuclear Energy Forum and the American Nuclear Society Winter Meeting. These closely coordinated conferences of the nuclear industry and the nuclear professional society are key annual meetings with an expected audience of about 1500 executives, managers, scientists and engineers from electric utilities, manufactures, architect-engineers, service companies, universities, laboratories and the government. All participants are career energy persons with emphasis on nuclear energy. You may recall that we invited you to speak at this meeting last year when it was held in San Francisco. Others we are inviting to participate in the opening session include William K. Reilly and James D. Watkins.

Your presentation would be very important and timely for setting the stage of the two conferences that follow the opening session. Upon your acceptance of this invitation, we will be pleased to provide more extensive information on the meeting and will work with your staff to assist on all details related to the presentation.

We will very much appreciate your participation in our program and look forward to hearing from you.

Sincerely,

Harold B. Finger
President and Chief Executive Officer
U.S. Council for Energy Awareness

Loring E. Mills
General Chairman
1990 Winter Meeting
American Nuclear Society
