THE WHITE HOUSE
WASHINGTON

January 4, 1991

Dear Dick:

I am responding to your letter of December 19 in which you invite me to meet some 30 of the senior executives from the electronics industry during your annual Capital Caucus event scheduled for May 7 here in Washington.

I should be happy to plan to follow through and accept this invitation subject to the usual qualification that if the President decides that I should be elsewhere on May 7 I will simply have to cancel out.

With all best wishes for the New Year,

Sincerely yours,

D. Allan Bromley
Assistant to the President
for
Science and Technology

Mr. J. Richard Iverson
President and Chief Executive Officer
American Electronics Association
1225 Eye Street, Northwest
Suite 950
Washington, D.C. 20005

December 19, 1990

The Honorable D. Allan Bromley
Assistant to the President
for Science and Technology
Old Executive Office Building
17th Street, & Pennsylvania Avenue, N.W.
Washington, D.C. 20506

Dear Mr. Bromley:

It was a pleasure spending time with you at the high technology conference in Hawaii last month. You have an impressive list of accomplishments from your first year as the President's Science Advisor. The American Electronics Association is especially pleased with OSTP's ground-breaking "U.S. Technology Policy" statement and the "Federal High Performance Computing Program."

You may have heard that last year AEA established a broad-based coalition of businesses, universities, and trade associations to actively support the implementation of the "Federal High Performance Computing Program." Attached is a list of participants and a recent Coalition letter to Mr. Darman.

In addition, AEA has formed a Science and Technology Committee comprised of chief scientists and technologists from key electronics industry product areas and markets. The Committee will recommend industry and government policies and activities to strengthen the U.S. technology infrastructure.

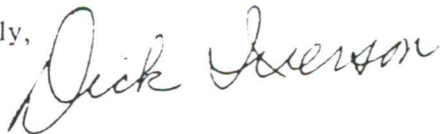

On behalf of the Science and Technology Committee, I would like to invite you to meet with approximately 30 senior executives from the electronics industry during our annual "Capital Caucus" event in Washington, D.C. on May 7.

These executives would like to discuss the Administration's science and technology agenda and exchange ideas on how government and industry can work together to improve our industrial base. Specifically, the group would like to talk with you about such issues as implementation of the high performance computing plan, support for critical and emerging civilian technologies, and expansion and formalization of the "U.S. Technology Policy" statement.

The group would like to meet with you for approximately 30 minutes at 10:00 a.m. on May 7 and then meet with the appropriate OSTP staff from 10:30 to noon. Please have your staff contact Denise Michel at 202-682-9110 to make the necessary arrangements.

We look forward to seeing you on May 7.

Sincerely,

J. Richard Iverson
President and CEO
