SUBJECT: Clearances with Coordinator for Eastern Europe

As announced December 6, Deputy Secretary of State Lawrence S. Eagleburger has been designated as the President's Coordinator for U.S. assistance to Eastern Europe. In that capacity, he will oversee and coordinate the programs and activities authorized by the Support for East European Democracy (SEED) Act of 1989, assure effective follow-up to the Presidential Mission to Poland in cooperation with the Mission's leaders, and coordinate any additional U.S. assistance or initiatives in support of democratic reform in Eastern Europe.

In order for this coordination to be carried out effectively, all agencies should clear in advance with Deputy Secretary Eagleburger's office any relevant speeches, Congressional testimony, travel, program initiatives and press statements consistent with procedures to be disseminated by the Coordinator's office.

MEMORANDUM FOR RICHARD DARMAN

FROM: BRENT SCOWCROFT 

SUBJECT: National Level Telecommunications Program

The Policy Coordinating Committee on National Security Telecommunications has approved the FY 1991 National Level Program (NLP) as recommended by the Executive Agent for the National Communications System (Defense Department) and the interagency Committee of Principals which was established by Executive Order 12472.

You are requested to issue FY 1991 funding guidance to the departments and agencies as soon as possible to ensure that appropriate funds are budgeted for this important national security program. I understand that this step will formalize agency commitments to the NLP and is in conformance with OMB practice for the last three years.

MEMORANDUM FOR LIEUTENANT GENERAL JOHN T. MYERS
Manager, National Communications System

SUBJECT: Telecommunications Service Priority System

Your June 29 status report on the implementation of the Telecommunications Service Priority (TSP) system is appreciated. It is important that we achieve initial operating capability date as close as possible to the September 1, 1990 date.

To facilitate timely achievement of IOC, we requested the departments and agencies to report on the status of the actions taken or planned to implement the TSP within their organizations. This request was made in a December 1, 1988 memorandum. A copy is attached (Tab A). Copies of the individual department and agency responses have already been provided to you.

A second set of TSP status reports by the departments and agencies was requested by September 30, 1989. In order to facilitate the development of these reports, you are requested to reiterate the requirement through the National Communications System interagency organizations, the Committee of Representatives and the Committee of Principals.

Robert M. Gates
Deputy Assistant to the President
for National Security Affairs

July 1, 1989

MEMORANDUM FOR EXECUTIVE AGENT
NATIONAL COMMUNICATIONS SYSTEM

SUBJECT: FY 1988 Annual Report

The National Communications System (NCS) annual report for fiscal year 1988 has been reviewed. With respect to the first of the three issues raised in the report, the funding mechanism is being reviewed within the Executive Office of the President. Until such time as a new funding mechanism is approved, continue to use the current mechanism as stated in the August 22, 1988 memo from the Director of the Office of Management and Budget to the NCS member agencies.

The second issue, extension of the National Security Telecommunications Advisory Committee beyond September 30, 1989 will require development of an Executive Order. It is our understanding that a proposed Executive Order is being developed by the NCS. Given the clearance times required for Executive Orders and the possible need to coordinate this with decisions on other advisory committees, the proposal should be submitted as soon as possible.

The third issue involves the need to reconsider and possibly modify the telecommunications planning process. NCS is encouraged to review the process and resolve any associated policy issues through the PCC on National Security Telecommunications.

MEMORANDUM FOR HONORABLE RICHARD B. CHENEY
Executive Agent
National Communications System

SUBJECT: National Level Program Sensitivity Analysis

The December 29, 1989 NSEP National Level Telecommunications Program Assessment responds to the July 25, 1988 request for a "performance sensitivity analysis." Based upon the report, a number of questions have been raised and have been sent to the Manager, NCS, by the Office of Science and Technology Policy. Answers to these questions in these areas will be required to characterize fully the survivability of the network. The questions generally deal with the following factors:

Survivability of communications elements against electromagnetic pulse,

Availability of power/fuel to the system after damage has been sustained,

Sensitivity of call completion probability to level of damage inflicted on the system.

The July memo required a NETS cost reduction study which is still pending. The study must explore options such as the competitive purchase of equipment, the use of low-cost operating concepts, and the reduction of call routing costs. Because of ever-tightening budget constraints, we need to look for ways to reduce costs of the program significantly.

A final decision on a post-FY 1990 NETS program funding will be predicated on the results of the survivability issues and the presentation of options for reducing life cycle system costs, as stated in the July memo and reiterated in the NCS FY 1990 National Level Program Funding Guidance, dated August 22, 1988. Pending those responses, implementation of the National Level Program as recommended by the Interagency Group Committee of Principals and as approved by the Steering Group in its December 1987 guidance should be continued.
