Dear Mr. Bush,

I commend you very highly on your talk to the teenagers in America on drugs, use, laws. I never seen a president before so sincere to get on TV an talk to our kids on this important subject. Its killing our youth, an ruining our streets, an cities, schools. I am one of the lucky parents so far. I have a 20yr old an seven yr old. My 20yr. old has never been on drugs or alcohol. I have managed to keep up with where abouts, friends. Telling them about drugs, just like sex starts at home, or it should. already, my seven yr old is leaving about drugs at school, they teach them that they bad for you. I have known people yrs ago that was on drugs an seen what it does to there personalities, an there lives. I also knew a young man or a friend of mine who was dealing an got that in the head. He was dealing cause of easy money, an now drugs are so easy to get, kids ask other kids at school batrooms, if theyd like some dose. It is RITE bad,

But, now maybe with the new laws,
maybe a few will stop before its too late.
I'm glad someone really cares about our
kids. Thanks so much for caring
enough to try. I never remember ever
seeing a president do this. I am 44 yrs.
old. I hope with all my heart that this
message will help. God Bless you and
your whole family.
