Clinical Departments

This roster has limited distribution. It has been prepared for our students, residents, faculty, alumni, and for practicing physicians.

Baylor College of Medicine

Letter from the Executive Vice President and Dean of Medicine

Dear Physician,

Baylor College of Medicine's clinical departments are dedicated to excellence in patient care and determined to be at the forefront in the diagnosis, treatment, and prevention of disease.

We have prepared this roster to provide you with the most current information about the qualifications and specialty interests of our full-time faculty. You will find information about our specialty clinics and diagnostic services as well as telephone numbers for inquiring about treatment, discussing cases, or making appointments. If you require further assistance, please call Baylor Physician Referral Service, 798-6119.

The faculty members in the clinical departments of Baylor College of Medicine are committed to providing the highest quality care to all patients. We invite your inquiries, and hope that you will find this roster helpful as a first step in obtaining the assistance you may need.

Sincerely,
Bobby R. Alford, M.D.
Executive Vice President and
Dean of Medicine

Department of Internal Medicine

The interests of clinical faculty members of the Department of Internal Medicine represent the broad and diversified research and educational activities of the department. Subspecialty interests of individual physicians include lipid metabolism, myocardial biology, immunology, clinical pharmacology, arteriosclerosis, coronary artery disease, hypertension, diabetes mellitus, chronic lung disorders, and illnesses which cause the loss of renal function. Extensive continuing education programs are presented both at Baylor and at its affiliated hospitals to update knowledge as well as to impart information gleaned from the many clinically-oriented research projects, which investigate common clinical disorders.

Department of Surgery

The interests of the clinical faculty members of the Department of Surgery are broad and diverse. In addition to general surgery, cardiothoracic surgery, and peripheral vascular surgery, members of the department are well-known for their contributions to complex gastrointestinal problems, and the Ben Taub General Hospital is recognized as one of the top trauma centers in the United States.

Department of Neurology

The interests of the clinical faculty members of the Department of Neurology reflect the recent explosion of knowledge in biochemical, physiological, pharmacological, and molecular approaches to the nervous system. Among the faculty members' diversified interests are the diagnosis of human neurological disease, the treatment of previously untreatable diseases, and employing new insights in the effective control of stroke, dementia, epilepsy, parkinsonism, stuttering, and neuromuscular diseases.
