Cover design by Janin/Foster Design Communication

AAAS Publication No. 87-13

The information in this Directory was compiled entirely from questionnaires voluntarily submitted by the scientists listed. The American Association for the Advancement of Science assumes the responsibility for the completion of the Directory, but cannot vouch for the qualifications and expertise of the scientists listed because the substance of the entries has not been independently verified by the Association. No endorsement of individual scientists or engineers is implied or intended by their inclusion in this publication. Similarly, no inference should be made regarding omission of an individual from these pages.

The project " A Resource Directory of Scientists and Engineers with Disabilities" and this publication were funded by the National Science Foundation, Grant No. SEE-8652147

Acknowledgements

The development of this Directory has been a continuous process, benefitting from the generosity and patience of many people. Our first acknowledgement must go to the scientists and engineers with disabilities who responded to our request for self-identification, filled out detailed questionnaires for our database, and gave their release for publication. Those scientists and engineers who joined the Resource Group before the publication of the First Edition of the Directory (1978) have completed the process several times, and we appreciate their support of our efforts to keep the database current and accurate. Some individuals have completed questionnaires but prefer not to be listed in the Directory. We are grateful for their willingness to share information for our Resource Information Center.

The Second Edition of the Directory grew on the foundation of the First Edition (1978) and reflects the process and organization developed by the editors and compilers of that volume, Janette Alsford Owens, Martha Redden Ozer, and Janet Welsh Brown. In addition, Mark Ozer advised on the medical classifications. We are indebted to them all, and also to Cricket Levering, who maintained the Resource Information Center and worked on the database during the years between the two editions.

We want to thank the National Science Foundation, especially Mary Kohlerman, Program Director in the Directorate for Science and Engineering Education, for

recognizing the contribution of the scientists and engineers with disabilities, and the need to share this information with federal and private agencies, educational systems, and disabled citizens and their families throughout the country.

Dozens of professional organizations assisted us in identifying new members for the Resource Group and Directory. We appreciate the cooperation of all of them and acknowledge the special contributions of the following groups and individuals: the AAAS Consortium of Scientific and Engineering Societies on Disability Issues; Terrence Russell and the American Chemical Society; Jane Jarrow and the Association on Handicapped Student Service Programs in Post-Secondary Education (AHSSPPE); Rhona Hartman and the National Clearinghouse on Post-Secondary Education for Handicapped Individuals of the American Council on Education (Project HEATH); Kim Readmon of the Alexander Graham Bell Association for the Deaf; Laura Oftedahl and the American Council for the Blind; Robert Menchel of the National Technical Institute for the Deaf; the Foundation for Science and the Handicapped; the Science and the Handicapped Association of the National Science Teachers' Association (NSTA); Georgia Larsen of Recording for the Blind; the National Science Foundation's Committee on Equal Opportunity in Science and Engineering, and its Chairperson, Shirley McBay.

The Directory reflects the combined efforts of many of our colleagues at the American Association for the Advancement of Science, and we are grateful to them for their time and creativity in seeking

solutions for improved communication and production: John Clark and Michele Aldrich of Information Services; Natalia Morgan of Publications; and Joan Wrather of the Office of Communications. The publication of the Directory has been dependent on the teamwork of the entire staff of the AAAS Office of Opportunities in Science, especially the assistance of Judy Kass, Wendy Peal, and Yolanda George.

Virginia W. Stern
Diane E. Lifton
Shirley M. Malcom

Introduction

In 1975, the Office of Opportunities in Science of the American Association for the Advancement of Science began to ask disabled scientists to assist in the identification of barriers faced by disabled people in receiving an education and entering careers in science, mathematics and engineering. As they identified themselves, a Resource Group was formed of those individuals who were willing to share their experiences in overcoming such barriers.

The development of the Resource Group of Scientists and Engineers with Disabilities was the catalyst for the establishment of the Project on Science Technology and Disability *, a continuing program within the AAAS Office of Opportunities in Science. Since its inception, the Project's activities have been guided by the advice and experience of the Resource Group. The Group has expanded over the course of twelve years from a handful of individuals to more than 1000 men and women. Through their efforts, the AAAS Project on Science, Technology and Disability has facilitated communication and interaction among disabled scientists and engineers; science students; disabled youth; their parents, teachers, and counselors; academic scientists; science educators and researchers; federal agencies and policy makers; community leaders and the media.

*Formerly the Project on the Handicapped in Science

The individuals in the Resource Group represent all areas of science, including the natural, physical, social and behavioral sciences, engineering, mathematics, and medicine. To be eligible for membership in the Resource Group, an individual must have or be working on a degree in a scientific, engineering or medical discipline, or work in a scientific field. The people who are included in this group range from Ph.D. holders actively involved in research to some with an affinity for or an interest in science and technology. Some individuals listed have not had formal academic training but nevertheless have demonstrated expertise in science, engineering, or a related field. The editors have erred on the side of inclusion of such individuals, as users of this directory may in fact be interested in persons with a diverse background. Members of the Group collectively represent an impressive pool of experience and often are able to serve as resources to each other as well as to those not in the group.

Research for the roster of disabled scientists, of which the Directory is a part, is a continuing activity of the AAAS Project on Science, Technology and Disability. Since the inception of the Project in 1975, a Resource Information Center on disabled scientists has been developed. The Information Center includes questionnaires, curriculum vitae, publications and photographs as well as an active database, and contains a wealth of detail on barriers and coping strategies, educational and professional experience. The detailed information in the larger system is for research purposes; only the

data in the Resource Directory are published.

As the value of the Resource Group became evident, the National Science Foundation recognized the need to identify disabled individuals working within a broad spectrum of scientific and engineering disciplines who could share their experience and expertise with government agencies, Congress, scientific societies, educational institutions, and organizations of and for disabled persons. The need became more pressing in the mid to late 1970's with the passage of federal regulations which opened up educational options for disabled persons at the pre-college and post-secondary levels. Thus was born the idea of the AAAS Resource Directory of Handicapped Scientists, published in 1978.

In 1986, with additional support from the National Science Foundation, work began to expand and update the 1978 Directory, renamed as the Resource Directory of Scientists and Engineers with Disabilities. An intensive effort to locate new Resource Group members resulted in the welcoming of over 400 new scientists and engineers to the roster. All Resource Group members initially completed a detailed questionnaire. Those individuals choosing to be listed in the Resource Directory of Scientists and Engineers with Disabilities then received copies of their entries for approval; by returning their signed publication releases to the Project they attested to the accuracy of the information and gave permission to publish the data found in this volume.

Addenda to the Directory will be published as new members join the Resource Group and as changes in status or addresses are reported. Periodic updates regarding Resource Group activities as well as publications of the Project on Science, Technology and Disability are sent to the group throughout the year. The Project welcomes the addition of new members to the Resource Group of Scientists and Engineers with Disabilities. Interested persons should write to the AAAS for an application; there are no membership or other fees. The editors appreciate critiques from users of the Directory and would be pleased to hear of interactions readers have with the disabled scientists and engineers listed below.

Proposed Uses of the Directory

The Directory has been designed to assist a broad spectrum of individuals, educational institutions, community-based organizations, government agencies, professional science and engineering societies, research and technology centers, consumer groups, and human resources departments in the public and private sector. Each user should consider the Directory as the first step in identifying and contacting scientists and engineers with disabilities as potential advisors and collaborators. Users themselves must follow up identification with exploration of their own needs, and the experiences and interests of the individuals they contact, until needs, experiences, and interests have been matched appropriately.

The scientists and engineers listed in the Directory are available to consult on a wide range of subjects, including their scientific discipline, personal coping strategies, science curriculum and laboratory adaptations for students with disabilities, architectural and program accessibility, commercially available or adapted technology, job restructuring, and interpretation of legislation regarding the rights of person with disabilities. Persons listed in the Directory are willing to give speeches, answer questions by telephone, TDD, or in person, try out and comment on technology, serve on committees, make presentations at workshops and symposia, or spend time helping individuals and institutions develop solutions to a particular problem. Obviously, not everyone listed is available or able to undertake all these tasks, but almost all

have relevant experience and would be cooperative in one or more of these activities. The editors have also respected the desire of some individuals with no specific consulting interests to be published in this volume.

Organizations and agencies who invite individuals from the Directory to speak outside of their local community should ~~provide travel expenses and also extra~~ expenses the speaker may assume because of his or her disability, such as oral or sign language interpreters, personal care attendants or special transportation. Users within educational systems and universities, and those seeking advice on employment of scientists and engineers with disabilities, who require extensive advice and assistance from those listed in the Directory should be prepared to pay consulting fees, honoraria and expenses as they would for any other kind of expertise they hire.

The major uses of the directory will be:

- o A source of role models for disabled youth, their families, teachers and counselors, to learn detailed educational and career accomplishments of people with disabilities who contribute to the scientific and technological productivity of the country. The individuals listed in the Directory and their impressive array of accomplishments should dispel the stereotypes that some careers are not possible for a person with a disability.

- o A source of role models, technological solutions and specific coping strategies for scientists and engineers disabled mid-career, to learn how to continue in their

careers with new adaptations, or to alter career paths to another specialty within their discipline.

- o A source of qualified peer reviewers, who are themselves disabled, to serve on panels of grant-giving agencies, particularly but not exclusively in the areas of basic and applied research that involves disability. Those listed in the Directory who have indicated their willingness to participate in scientific reviews have agreed to make their professional resumes available to program managers in granting agencies. The vitae are available as part of the Resource Information Center of the AAAS Project on Science, Technology and Disability.

- o A source of experienced consultants for university professors, laboratory directors, and pre-college teachers of science and math, who may be inexperienced in teaching and working with a disabled person. These users can capitalize upon the experience of the scientists and engineers listed in the Directory to assist them in opening up science education and opportunities to students and professionals with disabilities.

- o A source of experienced professionals, who are themselves disabled, to increase the expertise of individuals and groups which contribute to the research, development, dissemination, and utilization of technology for disabled individuals.

- o A source of speakers and advisors to community-based groups involved in educational efforts to increase the numbers

of disabled youth and other underrepresented groups in the pipeline leading to careers in science, mathematics, and engineering.

How to use the Directory

Directory Format and Explanations of Style

The compilers and editors sought to make the Directory useful to persons requiring information on scientific specialty, disability, skills, location, gender, and experience of each individual. An explanation of the terms and categories follows. All classifications within the individual directory entries and in the indices were decided upon by the compilers and editors on advice from outside experts where necessary. Each individual entry was sent to the participating scientist for approval prior to publishing. Editors included only those entries for which publication releases were received.

Alphabetical Listing

The main body of the Directory lists disabled scientists and engineers alphabetically by last name. The individual listings are cross-referenced by state, disability, scientific specialty and gender in the indices.

The following information appears in each individual entry:

Name: Note that "Mac" and "Mc" are alphabetized rather than inserted before "M".

Address and Telephone Number: We followed the preference of the individual in listing the business or home address.

Scientific Discipline: A format using eleven major categories was chosen, a breakdown of which may be found under the explanation for Index C. Individuals were asked to choose from the eleven major categories the one category that best described their professional pursuits. (Sometimes an individual's background was so varied that two or more headings for science categorization were chosen). Each individual is listed in Index C under the chosen main category. In the Alphabetical listings, specific descriptive terms were used to describe an individual's primary discipline(s). In some cases, i.e. when some individuals chose new careers, the educational background had to be weighed against work experience in an entirely different field. Note that occasionally, it had to be decided, for example, where to place someone who teaches science (Education) but who holds major qualifications in the physical sciences (e.g. Chemistry, etc.).

Degrees in Field: Educational degrees are listed with the highest qualification or level of training first (generally the most recent), and previous or additional educational experience following. Where the individual is currently studying science, the term "Cand." (candidate) follows the degree. In some instances, individuals have requested that their most recent position be listed as "Student".

Most Recent Position: This states the individual's current job, or if the individual is unemployed, his/her most recent employment position or if a student, his/her part-time or summer employment (where appropriate). Retired individuals,

i.e. those no longer actively employed in the work force, have listed their previous job followed by "Ret." retired).

Nature of Disability: The editors tried to be consistent in categorizing the many descriptions of disabilities. However, as individuals have disparate ways of defining their physical impairments, we have generally respected their wishes to include specific terminology in addition to general categories.

Age Became Disabled: This states the age at which the individual became disabled. This information will prove useful in distinguishing between those individuals disabled since birth and those who developed disabilities later in life. The age at which a person becomes disabled invariably influences each educational experience and often influences coping strategies developed to insure a meaningful education and a successful professional career.

Expertise and Consulting Interests: The following alphabetical code describes the ways in which the individual expressed interest in consulting on a number of issues and his/her specialized knowledge:

- A Expertise/special skills in architectural accessibility
- B Expertise/special skills in education for disabled students
- C Expertise/special skills in science curriculum development
- D Knowledge of accessible public facilities in local area
- E Knowledge of development of

- F assistive devices and technology useful to disabled people
- F Expertise/special skills in sign language
- G Interest in advising or evaluating science education programs for disabled students
- H Interest in consulting on laboratory accessibility
- I Interest in acting as a peer reviewer on applications for government grants and contracts in scientific fields
- J Interest in acting as role model/advisor to young people
- K Interest in giving talks on professional expertise
- L Interest in giving talks relating to disability
- M Interest in acting as advisor to high school science students
- N Interest in acting as advisor to college science students
- O Interest in acting as advisor to graduate science students
- P Interest in acting as advisor to professional associations
- Q Interest in acting as consultant on scientific expertise
- R Interest in acting as consultant on professional meeting accessibility
- S Interest in acting as consultant on occupational barriers to disabled persons
- T Interest in advising organizations on education
- U Interest in advising organizations on legislation
- V Interest in advising organizations on employment
- W Participate in research projects or other activities sponsored by AAAS

X Other skills or consulting interests

INDICES

The entries in the Directory are cross-referenced in four indices. Each index contains names listed alphabetically with no further biodata. The Directory user may turn to the main alphabetical listing for more detailed information on each entry.

Index A - Geographic Location: All U.S. listings appear alphabetically by state. Each entry is followed by an abbreviation of the state of residence or employment. Individuals from foreign countries are listed first.

Index B - Disability: This index provides general information about the representation of disabled persons in various disciplines and specific information regarding which scientists are best prepared to offer their expertise on disabling conditions.

The assignment of disabilities to the nine categories below was based primarily on etiology. When, however, this approach did not provide adequate information about a disability, classification was based upon the nature of the impairment. Thus cerebral palsy was classified as "Neurological (Cerebral)". Yet blindness, whatever the etiology, was classified with "Blind/Visually Impaired", with additional classification depending on whether or not further information was supplied. In some instances, assignment to more than one

category was made because of multiple impairments. For example, diabetes was classified as "Organic", yet its sequelae, diabetic retinopathy and neuropathy, were listed under "Blind/Visually Impaired" and "Neurological (Cerebral)" respectively. Some classifications may appear arbitrary to the user, but to expand the number of categories further, while perhaps enhancing medical accuracy, would reduce the usefulness of the Directory.

1. AMPUTEE

2. BLIND/VISUALLY IMPAIRED

3. DEAF/HEARING IMPAIRED

4. NEUROLOGICAL (Cerebral)

e.g. Aphasia, Cerebral Palsy, Double Athetosis, Dyslexia, Dystonia Musculorum Deformans, Encephalitis, Epilepsy, Friedreich's Ataxia*, Hemiparesis, Hemiplegia, Learning Disability, Multiple Sclerosis, Neuropathy, Parkinson's Disease, Spastic Paralysis (if from birth), Stroke (CVA)

5. NEUROLOGICAL (Spinal Cord)

e.g. Friedreich's Ataxia*, Guillain-Barre Syndrome, Paraparesis, Paraplegia, Polio-caused paralyzes, Quadriparesis, Quadriplegia, Spina Bifida, Spinal Muscular Atrophy, Tetraplegia, Werndig Hoffman's Disease

6. NEUROMUSCULAR

e.g. Mobius Syndrome, Muscular Dystrophy, Myasthenia Gravis, Myelopathy, Myositis Ossificans Progressiva, Amyotrophic Lateral Sclerosis, Spasmodic Torticollis

7. ORGANIC DISORDERS

e.g. Allergies, Angina, Arteriosclerosis, Asthma, Atherosclerosis, Burns, Cardiac Disorders, Cystic Fibrosis, Diabetes, Leukemia, Polyarteritis Nodosa, Renal Disease, Rhinosinusitis, Wounds

8. ORTHOPEDIC

e.g. Ankylosis, Arthritis, Club Hands/Feet, Contracted Knees, Dwarf, Hemophilia, Osteogenesis Imperfecta, Osteomyelitis, Rheumatoid Arthritis, Rigid Wrists, Scoliosis

9. SPEECH IMPAIRED

e.g. Cleft Palate, Laryngectomy, Stuttering, Voice Disorders

*Friedrich's Ataxia can be classified under either category. In this index, scientists with this disorder have been placed under "Neurological (Cerebral)".

Index C -- Scientific Specialty

The Scientific and Engineering disciplines are arranged under ten separate classifications, adapted from a list compiled by the National Research Council of the National Academy of Science. An additional category "Other" identifies

disciplines which fall outside science as we have defined it. Individuals are listed alphabetically by name under the following major categories:

1. AGRICULTURE/BIOLOGY
2. ASTRONOMY/PHYSICS
3. CHEMISTRY
4. EARTH, ENVIRONMENTAL & MARINE
5. EDUCATION
6. ENGINEERING
7. MATHEMATICS
8. MEDICAL & HEALTH
9. PSYCHOLOGY
10. SOCIAL
11. OTHER

The following list, adapted from the NRC/NAC Specialties list, shows which disciplines are included in each of the major categories.

1. AGRICULTURE/BIOLOGY

Agronomy, Agricultural Economics, Agriculture-general, Animal Husbandry, Animal Science & Animal Nutrition, Fish & Wildlife, Food Science & Technology, Forestry, Horticulture, Phytopathology, Soils & Soil Science; Anatomy, Biochemistry, Biology-general, Biometrics & Biostatistics, Biophysics, Botany, Cytology, Ecology, Embryology, Entomology, Genetics, Hydrobiology, Immunology, Microbiology & Bacteriology, Molecular Biology, Nutrition and/or Dietetics, Physiology (animal), Physiology (plant), Zoology

2. ASTRONOMY/PHYSICS

Astronomy, Astrophysics; Acoustics, Atomic & Molecular, Electromagnetism, Elementary Particles, Fluids, Nuclear Structure, Optics, Physics-general, Plasma, Solid State, Thermal

3. CHEMISTRY

Agricultural & Food, Analytical, Chemistry-general, Inorganic, Nuclear, Organic, Pharmaceutical, Physical, Polymer, Theoretical

4. EARTH, ENVIRONMENTAL & MARINE

Applied Geology/Geol. Engr. & Econ. Geol., Atmospheric Dynamics, Atmospheric Physics and Chemistry, Atmospheric Sciences (other) Earth Sciences-general, Environmental; Science-general, Fuel Tech. & Petrol. Eng., Geochemistry, Geodosy, Geomorph. & Glacial Geology, Geophysics, Hydrology, Oceanography, Paleontology, Petrology/Mineralogy, Stratigraphy/Sedimentation, Structural Geology

5. EDUCATION

Adult Educ. & Extension Educ., Audio-Visual Media, Educ. Admin. & Superv., Educ. Meas. & Stat., Educational Psychology, Elementary Education-general, Special Education (gifted, disabled, etc.). Teaching Fields: Agriculture Educ., Industrial Arts Educ., Mathematics Educ., Science Educ., Social Science Educ., Speech Education (speech pathology)., Vocational Education

6. ENGINEERING

Aeronautical & Astronautical, Agricultural,

Biomedical, Ceramic, Chemical, Civil, Computer, Electrical Electronics, Engineering-general, Engineering Mechanics, Engineering Physics, Fuel Tech. & Petrol Engr., Industrial, Materials Science, Mechanical, Metallurgy & Phys. Met. Engr., Mining, Operations Research, Sanitary & Environmental, Systems Design & Systems Science.

7. MATHEMATICS

Algebra, Analysis & Functional Analysis, Applied Mathematics, Computing Theory & Practice, Geometry, Logic, Mathematics-general, Number Theory, Operations Research, Probability & Mathematical Statistics, Topology

8. MEDICAL & HEALTH

Dentistry, Environmental Health, Hospital Administration, Medical Sciences-general, Medical Technology, Nursing, Parasitology, Pathology, Pharmacology, Pharmacy, Psychiatry, Public Health & Epidemiology, Veterinary Medicine

9. PSYCHOLOGY

Clinical, Comparative, Counseling & Guidance, Developmental & Gerontological, Educational, Experimental, Industrial & Personnel, Personality, Physiological, Psychology-general, Psychometrics, School Psychology, Social

10. SOCIAL

Anthropology, Area Studies, Communications, Econometrics, Economics, Geography, History of Science, International Relations,

Political Science, Public Administration,
Social Sciences-general, Sociology,
Statistics, Urban & Reg. Planning

11. OTHER

Accounting, Architecture, Business
Administration, Journalism, Law &
Jurisprudence, Library & Archival Science,
Technical Writing

INDEX D - WOMEN

This index was developed for those
individuals interested in a listing of
women scientists and engineers. The
entries are arranged alphabetically by last
name.

AAAS Office of Opportunities in Science

In 1973, the AAAS established the Committee on Opportunities in Science (COOS) and Office of Opportunities in Science (OOS) to enhance the status and accelerate the advancement of women and minorities in all science and engineering professions. In 1975, the scope of the Office was expanded to include individuals with physical disabilities.

Activities of OOS include organizing meetings, workshops, seminars and symposia on equity issues in science, engineering and biomedicine; conducting surveys to assess the educational and professional status of underutilized groups in science and engineering; developing publication for teachers, parents, students, policymakers, and funders; providing technical assistance to schools, universities, professional organizations, state and federal agencies, foundations and corporations; serving on various advisory bodies and thereby directly influencing policies and practices of other groups; and developing and distributing career materials through traveling exhibitions.

The following are examples of the many accomplishments of the Office of Opportunities in Science:

- worked with AAAS Meetings Office to make professional meetings and programs accessible to people with disabilities
- developed a AAAS-based consortium of

scientific and engineering societies addressing science and technology for disabled people and established a Resource Group of more than 1,000 scientists and engineers with disabilities

- convened workshops on the use of technology for disabled citizens, involving designers/inventors and consumers

- instituted the publishing of a quarterly bulletin on science, technology and disabled people

- conducted a project to identify and encourage disabled students to participate in out-of-school programs offered by museums, nature centers, scouting and camping organizations, and to assist those who run such program in accomodating the needs of people with disabilities

- conducted congressional seminars on access and professional issues, for example, "Reclaiming Human Talent: Enlarging the Pipeline In Mathematics and Science".

A.A.A.S. RESOURCE DIRECTORY OF SCIENTISTS AND ENGINEERS WITH DISABILITIES 2nd EDITION

1st Addendum
June 1987

NAME	ADDRESS TELEPHONE NO.	SCIENTIFIC DISCIPLINE DEGREES IN FIELD	MOST RECENT POSITION	NATURE OF DISABILITY AGE BECAME DISABLED	EXPERTISE/ CONSULTING INTERESTS
ADLER, Henry J.	86-16 Pinto St. Holliswood, NY 11423 (718) 468-9086	Biology & Marine Ecology BA, Biology	Research Technician	Deaf/Hearing Impaired Birth	BCFJMNW
CUNNINGHAM, Buddy	6180 Majors Lane Columbia, MD 21045 (301) 992-3058	Electrical Engineering MS, Electrical Eng BS, Electrical Eng	Electrical Engineer	Deaf/Hearing Impaired 1 year	DJW
DENAPLES, Karen M.	44 Sandalwood Avenue Hamilton, NJ 08690 (609) 586-7135	Chemistry Education MSEd, Sci Ed Spec BS, Biology	Coordinator Library Services for the Hearing Impaired	Deaf/Hearing Impaired Birth	FJLMNOPT
EMO, Jim J.	Whirlpool Corp 6400 S. Jenny Lind Ft. Smith, AR 72901 (501) 648-2621	Chemistry AS, Marine Science	Process Audit & Test Technician	Organic (Leg Wounds, Vascular) Age 19	JKLMNTVW
JONES, Robin M.	817 Renderer Drive St. Louis, MO 63122 (314) 822-7264	Biology & History BA, Biology/History	Peer Writing Tutor for Colorado College Writing Center	Deaf/Hearing Impaired Birth	BGLMNWX
KRAUS, George W.	27 Napa Valley Rd. Gaithersburg, MD 20878 (301) 926-4749	Chemistry BS, Chemistry	Consumer Safety Officer	Deaf/ Hearing Impaired Birth	AEKMNOQX

NAME	ADDRESS TELEPHONE NO.	SCIENTIFIC DISCIPLINE DEGREES IN FIELD	MOST RECENT POSITION	NATURE OF DISABILITY AGE BECAME DISABLED	EXPERTISE/ CONSULTING INTERESTS
MCCANDLESS, Tom E.	Dept of Geochemistry University of Cape Town Private Bag Rondebosch 7700 REP OF SOUTH AFRICA (27-21) 650-2912	Geology MS, Geology BS, Geology	Geochemist	Neurological (Spinal Cord) Age 23	DGHJKLQRSW
NEWMARK, Marjorie Z.	Department of Biochemistry University of Kansas Lawrence, KS 66045 (913) 864-4230 (TDD)	Biochemistry & Chemistry PhD, Biochemistry AB, Chemistry	Associate Professor of Biochemistry	Deaf/Hearing Impaired Age 30	NOR
ROWE, Mary B.	Univ. of Fla. Coll. of Educ. Subj. Spec. Teacher Educ. 258 Norman Hall Gainesville FL 32611 904-392-0761	Science Education Teacher Education PhD, Science Educ. MA, Zoology BA, Bio./Physics	Professor, Science Education (Working Jointly w/ Engr. and Medicine)	Blind/Visually Impaired Age 1	CG
SHARP, Jeanette P.	150 Melrose Avenue Albany, NY 12203 (518) 438-7539	Clinical Psychology Psychology PhD, Clin. Psych. BA, Psychology	Assoc Psychologist Capital District Psychiatric Center, Albany Med Center	Blind/Visually Impaired Age 20	EW
SMEE, Patricia G.	c/o Fuller 32 Bradley Bryant, AR 72022-2820	Clinical Psychology Psychology PhD, Clin. Psych. MA, Psych. AB, Lang. & Lit.	Clinic Coordinator DeQueen Clinic, Ark-Tex Center for Human Services	Other Age 44	
WILLIAMS, Roger B.	Paleontological Institute 121 Lindley University of Kansas Lawrence KS 66045 (913) 864-3338	Law & Geology JD, Law MS, Geology AB, Geology	Assistant Editor	Neuromuscular Age 25	DMNRSV
