Please fax this form to Michaela Meehan at 202/219-5613 at your earliest convenience, or call Ms. Meehan on 202/546-4066 until August 21 or on 202/219-6373 x167 after that date.

August 14, 1998

Mr. Lex Frieden
Senior Vice President
Institute for Rehabilitation and Research
1333 Moursund
Houston, TX 77030

Dear Mr. Frieden:

On behalf of the U.S. Secretary of Labor, Alexis M. Herman, and Tony Coehlo, Chairman of the President's Committee on the Employment of People with Disabilities, we are pleased to invite you to a conference on the employment of people with disabilities in the information and technology age to be held on October 26 and 27, 1998, in Madrid, Spain.

This conference is a cooperative effort with the European Union and the Spanish *ONCE Foundation* under the New Transatlantic Agenda (NTA) signed in Madrid, Spain, in December 1995 by President Clinton and the Presidents of the European Council and the European Commission. One result of the NTA, which serves as the foundation for the EU/US relationship for the 21st century, was the creation of a working group on labor and employment issues. This working group has identified the employment of people with disabilities as a key area of activity.

On May 20, 1997, members of the working group met with U.S. government officials responsible for employment policies affecting the disabled. It was agreed at that time that we should examine our respective policies and facilitate the exchange of information between us with a goal of increasing the rate of participation in the labor force by individuals with disabilities on both sides of the Atlantic.

Our first joint forum, on the implications of information technology for the employment of people with disabilities, should offer ample opportunity for discussion and debate. It will provide a valuable opportunity for experienced people from labor, business, and government, and disability advocates involved in both disability and employment issues and policy from the United States and Europe. We have organized the conference around three key areas relating to the overall theme. These areas are: employability of people with disabilities; adaptation of the workplace; and stimulating jobs markets for people with disabilities. Within each of these areas, we will focus on two examples from the U.S. experience and two from the European side. A conference agenda will be forwarded to you under separate cover in the near future.

Information related to conference logistics is enclosed. Please note that two nights' stay in one of the hotels listed on the enclosed hotel reservation form will be paid for by the organizers of the conference. If you plan to attend, please complete the reservation form, then either fax it to the attention of Mr. Palos at 011-34-91-314-76-55, or send it to him via mail using the enclosed,

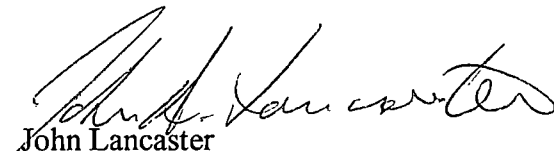

addressed envelope. Further information on hotels in Madrid, as well as the conference generally, can be accessed via the Internet at www.conf-us-ue-disability.org.

We look forward to your participation, or that of your representative, in this important event. Please communicate your interest in attending by faxing the attached RSVP form to Michaela Meehan on (202) 219-5613 at your earliest convenience. Or you may call Ms. Meehan on 202/546-4066 until August 21 or on 202/219-6373 x167 after that date.

Sincerely,

>
>I have completed Rolla and Ann Arbor. I have Salinas and Milwaukee
>scheduled. I would like to add one more.
>Auburn has gotten "gung ho" on getting some of their MS candidates who
>lack only their thesis, to graduate. In that light the department has
>stepped in and is giving us some assistance on our thesis. It was
>strongly suggested that I needed a more formal evaluation of my training
>than my home-designed critique. Our department head, Dr. Philip
>Browning, has developed an instrument that is just right.
>I could retroactively send it to Ann Arbor, whcih I will do, BUT, I
>would like to have 3 "purer" examples of the critique instrument.
>
>To that end, I ask permission to add another site. Bob had strongly
>suggested Grand Junction, CO. Rolla was my "small, small town center."
>It was polluted by the presence of other orgs. Grand Junction is
>interested and I have the time. The only potential problem I know of if
>my travel budget and any reasons y'all may have.
>
>What do you think?
>
>Incidentally, I sent a report to Ann Arbor. It was three parts: #1 an
>analysis of their assesment relative to hte MBTI, #2 a general rept of
>my impresseions of their reactions/statements in the straight talk and
>internal customer modules, and #3 a personal to the ED about how I saw
>his management style relative to the needs of his staff.
>
>I plan on giving you all but the last along with a final report. Do you
>>want stuff like that now?
>
>I leave for Salinas soon and am looking forward to working with Bob. He
>has a good reputation around the centers.

Disability Rights Section

Accessible Stadiums

The Americans with Disabilities Act (ADA) requires new stadiums to be accessible to people with disabilities so they, their families, and friends can enjoy equal access to entertainment, recreation, and leisure.

This document highlights key accessibility requirements of the ADA that apply to new stadiums. Other accessibility requirements, such as those for parking lots, entrances, and rest rooms, also apply but these are the same as for other buildings. Compliance with all the accessibility requirements is essential to provide a basic level of access for people with disabilities.

To obtain a copy of the requirements for new stadiums and other facilities, contact the Department of Justice ADA Information Line at (800) 514-0301 voice or (800) 514-0383 TDD.

Key Features of Accessible Stadiums

Seating

- Wheelchair accessible seating is required. At least one percent of the seating must be wheelchair seating locations. Each wheelchair seating location is an open, level space that accommodates one person using a wheelchair and has a smooth, stable, and slip-resistant surface.
- Accessible seating must be an integral part of the seating plan so that people using wheelchairs are not isolated from other spectators or their friends or family.
- A companion seat must be provided next to each wheelchair seating location. The companion seat is a conventional seat that accommodates a friend or companion.
- Wheelchair seating locations must be provided in all areas including sky boxes and specialty areas.
- Removable or folding seats can be provided in wheelchair seating locations for use by persons who do not use wheelchairs so the facility does not lose revenue when not all wheelchair seating locations are ticketed to persons who use wheelchairs.
- Whenever more than 300 seats are provided, wheelchair seating locations must be

provided in more than one location. This is known as dispersed seating. Wheelchair seating locations must be dispersed throughout all seating areas and provide a choice of admission prices and views comparable to those for the general public.

- Wheelchair seating locations must be on an accessible route that provides access from parking and transportation areas and that connects to all public areas, including concessions, restaurants, rest rooms, public telephones, and exits.
- Wheelchair seating locations must provide lines of sight comparable to those provided to other spectators. In stadiums where spectators can be expected to stand during the show or event (for example, football, baseball, basketball games, or rock concerts), all or substantially all of the wheelchair seating locations must provide a line of sight over standing spectators. A comparable line of sight, as illustrated in the figure below, allows a person using a wheelchair to see the playing surface between the heads and over the shoulders of the persons standing in the row immediately in front and over the heads of the persons standing two rows in front.

Line drawing showing a side view of people seated in assembly-type seating and a person using a wheelchair seated in a wheelchair seating location behind the spectators. A dashed line illustrates that line of sight for the spectator using the wheelchair and other lines show the line of sight for seated and standing spectators. All spectators can see between the heads of the person in the row directly in front of them and over the heads of the people two rows in front.

Figure Showing Comparable Line of Sight for Wheelchair Seating Location

fixed seats in all
folding
mobility
location.

- In addition to wheelchair seating locations, at least one percent of all seating areas must be aisle seats with no armrest, or with a removable or armrest, on the aisle side. These seats accommodate people who have a disability but who wish to use a seat that is not a wheelchair seating location.

- An accessible route must connect the wheelchair seating locations with the stage(s), performing areas, arena or stadium floor, dressing or locker rooms, and other spaces used by performers.

Concessions

- All concessions, including food service areas, restaurants, and souvenir stands, must be

accessible. For example, lowered counters must be provided where goods are provided and where cash registers are located. Condiments and self-serve food items must be provided within reach of a person using a wheelchair.

Access to playing fields, lockers, and spaces used by players and performers

- An accessible route must provide access to all public and common use areas including the playing field, locker rooms, dugouts, stages, swimming pools, and warm-up areas. The accessible route provides access for the public, employees, and athletes using the facility.

Assistive Listening Systems

When audible communications are integral to the use of a stadium, assistive listening systems are required for people who are hard of hearing. These systems amplify sound and deliver it to a special receiver that is worn by the spectator, or to the spectator's hearing aid, depending on the type of system that is used.

- The stadium must provide receivers for the assistive listening system. The number of available receivers must equal four percent of the total number of seats.
- Signs must be provided to notify spectators of the availability of receivers for the assistive listening system.

Other Accessible Features

Accessible Parking Spaces

- When parking spaces are provided, accessible parking spaces for cars and accessible parking spaces for vans are required. Accessible parking spaces must be the closest parking spaces to the accessible entrances and must be on an accessible route to the entrances.

Accessible Drop-Off and Pick-Up Areas

- If passenger drop-off areas are provided, they must be accessible and an accessible route must connect each accessible drop-off area with the accessible entrance(s). Curb ramps must be provided if the drop-off area is next to a curb.

Accessible Entrances

- At least fifty percent of the entrances must be accessible. Those that are not accessible must have signs that direct the public to the nearest accessible entrance.
- Accessible entrances that have turnstiles must provide an accessible gate or door.

Rest Rooms

- Each public and common use (including employee) rest room must be accessible. This includes rest rooms in work areas and rest rooms located in sky boxes and suites.

Public Telephones

- Each bank of public telephones must have one or more wheelchair accessible telephones and these and other public telephones must have the ability to amplify the

volume at the handset. A sign must identify telephones equipped with amplification.

- At least one public TDD (telecommunications device for persons who are deaf or who have speech impairments) must be provided. Signs must identify the location of the TDD and provide direction from other telephone banks.
- For each bank of public telephones with three or more units, at least one telephone must be equipped with a shelf and electrical outlet to permit a person to use a portable TDD.

Water Coolers or Drinking Fountains

- Drinking fountains must accommodate people who use wheelchairs and people who stand but have difficulty bending or stooping. Half of the units must be wheelchair accessible and the others must accommodate standing users.

Visual Alarms

- Where audible fire alarms or emergency notification is provided, flashing lights are required in public and common use areas, including toilet and bath rooms, locker rooms, and along public corridors.

Signs

- Signs that identify permanent rooms and spaces, such as those identifying rest rooms, exits or room numbers, must have Braille and raised letters or numbers so that they may be read visually or tactually (by feeling the characters with one's fingers). They must also meet specific requirements for mounting location, color contrast, and non-glare surface. Signs that provide direction to, or information, about functional spaces must only comply with requirements for character proportion, character height, and finish and contrast between the characters and background.

ADA Information Line

For more information about the ADA's design and construction requirements, contact the Department of Justice's toll-free ADA Information Line at 800-514-0301 (Voice) and 800- 514-0383 (TDD). Detailed requirements can be found in the ADA Standards for Accessible Design. The ADA Standards and other useful technical assistance documents are available from the ADA Information Line.

Dear Mr Frieden

How are you?

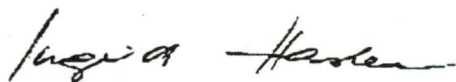

When I came back from my holidays I found a note from Daniel Stirnimann together with a copy of your fax from march 27, addressed to him.

I see that you are planning to come back to Switzerland in the summer time and that you want to know my address.

Unfortunately we are not in Switzerland during the month of July but otherwise if you come later it would certainly be nice, to meet you again.

I'm sure I'll be hearing from you once your plans are more concrete.

With warm regards

Ingrid Hasler-Hasler

>Grant Program - The UNUM Foundation
>
>
>
>SPONSOR: The UNUM Foundation
>PURPOSE: Grants are awarded to address six issues: disability, AIDS,
>economic development and the arts, aging, education and family issues
>DEADLINE: March 1, June 1, September 1, December 1
>SUMMARY: In short, we look for organizations with good leadership, sound
>management and a commitment to creating lasting change. By working
>together with our communities, we can help those organizations fulfill
>their vision for the future while supporting our own vision of
>worldwide leadership in disability and special risk insurance.
>
>The six issues we address:
>
>Disability
>Disabilities should not keep people from achieving their full
>potential. Each year, the UNUM Foundation offers grants for disability
>prevention, education and rehabilitation. Our ultimate goal: helping
>more people with disabilities live and work independently.
>
>AIDS
>In 1995, it was estimated that 2,000 Maine residents carried the HIV
>virus that causes Acquired Immune Deficiency Syndrome (AIDS). The UNUM
>Foundation believes that prevention is the best defense against HIV. We
>also know that people already infected with HIV need affordable, quality
>care in all parts of the state. The UNUM Foundation targets funding to
>expand Maine's capacity to deliver such care to those people.
>
>Economic Development and the Arts
>The arts support more than the cultural growth of a community, they can
>also help turn around its economic prospects. There is added
>satisfaction in supporting performing and fine arts when that funding
>helps make the local economy stronger. That is why UNUM Foundation links
>economic development to the arts.

- >
- >Aging
 - >The UNUM Foundation counts independence and individualized long term
 - >care among the key measures of quality of life for elderly people -- a
 - >growing population in Maine. The Foundation wants to do its part to
 - >help older residents maintain mobility, decent housing and access to
 - >appropriate social and medical services without compromising quality or
 - >affordability.
- >
- >Education
 - >The UNUM Foundation believes public education must change fundamentally
 - >to serve all children. The process starts with investing in the
 - >education workforce. It means giving teachers and parents the
 - >authority, responsibility and resources to create effective schools.
 - >And it requires bringing together public and private resources to give
 - >every child a chance for success. The UNUM Foundation is willing to
 - >make those investments because we see future parents, community
 - >leaders, employees and customers in schools today.
- >
- >Family Issues
 - >On any given day, some families will experience hardship or disaster.
 - >They need emergency shelter, a hot meal or counseling to help them
 - >through a crisis. Fortunately in nearly every community there is a
 - >network of caring people and nonprofit organizations that offer a bed,
 - >something to eat or a sympathetic ear. That's why the UNUM Foundation
 - >supports the United Way in communities where our employees live and
 - >work.
- >
- >At UNUM, we make a simple, direct connection between business and
- >community. We rely on the community for the people who make our business
- >a success. Working to make a better community will make us a better
- >business.
- >
- >Grants are awarded to address six issues: disability, AIDS, economic
- >development and the arts, aging, education and family issues. By
- >focusing on these issues, we can make the best use of our resources and
- >support positive change.
- >
- >Before we make a grant, we ask four fundamental questions:
 - >
 - >Investment:
 - >Does this program go to the core of a problem and build sustainable
 - >solutions?
 - >
 - >Participation:
 - >Do the people affected by a problem have a role in its solution?
 - >
 - >Communication:
 - >Does this request have clear objectives that match our Vision and
 - >Values?
 - >
 - >Accountability:
 - >How will we measure the success of this investment?
