**PRESIDENT BUSH'S ACTION TO PROTECT THE ENVIRONMENT
TALKING POINTS**

- o President Bush, a longtime environmentalist, has already taken strong action to protect the environment in a number of areas. He began by appointing William Reilly to lead the EPA, the first time the head of a major environmental organization has been chosen for the post. During the short time he has held office, the President's actions include:

Working for Cleaner Air:

- o The President will propose reauthorization of the Clean Air Act, including provisions for control of acid rain.
- o The President has made a call for the global phaseout of CFCs by the year 2000. He is urging the nations of the world to use the available options under the Montreal Protocol to significantly tighten the agreement to a full phase-out.
- o The EPA has already issued regulations on fuel volatility standards, an important step toward controlling smog.

Enhancing Water Quality:

- o Our water -- especially our groundwater -- must be protected. The FY 1990 program funding will address critical needs in water quality assessment, research and public education.

Speeding Hazardous Waste Cleanup:

- o On March 10, the President announced he will be seeking new legislation that will give the United States government authority to ban all exports of hazardous waste except where an agreement exists with the receiving country providing for the safe handling and management of those wastes.
- o The President will reinvigorate the Superfund hazardous waste program by directing EPA to take a number of actions, including stricter enforcement of pollution penalties, stepped-up cost recovery cases, and increased emergency cleanup authority.
- o President Bush has instructed Administrator Reilly to begin a comprehensive internal management review of Superfund. That review will be completed June 1.

Preserving our Wetlands and Coastal Areas:

- o The President pledged to develop a policy of no net loss of American wetlands.

- o The EPA has initiated a tracking system for medical wastes, a key step in a comprehensive program of cleaning up our beaches. An interagency task force is now working on the New York - New Jersey area, to control solid waste on coastal waters.

- o The President has instructed Administrator Reilly to develop new initiatives on coastal zone management.

Fostering International Cooperation on the Environment:

- o Secretary of State Baker, in the first address of his tenure as Secretary, called for multilateral action on the problem of global warming.

- o The EPA, under President Bush's leadership, has developed the first options ever for consideration by the countries of the world if they are to reach a pact to slow down global warming.

- o The President will convene an international conference on the environment and will direct the Treasury Department to promote environmental considerations as a factor in lending decisions of multilateral development banks.

Cleaning up the Alaskan oil spill:

- o A joint federal-state resource recovery team has convened, with the Coast Guard leading the coordination of the Federal Government's role in the cleanup, and the National Transportation Safety Board investigating the accident itself. Exxon has accepted the responsibility of paying for the cleanup.

- o [Insert to be added on the results of Transportation Secretary Skinner, EPA Administrator Reilly and Coast Guard Commandant Admiral Yost's assessment of the situation.]

- o The EPA has initiated a tracking system for medical wastes, a key step in a comprehensive program of cleaning up our beaches. An interagency task force is now working on the New York - New Jersey area, to control solid waste on coastal waters.

- o The President has instructed Administrator Reilly to ~~develop new initiatives on coastal zone management.~~

Greenberg ✓ vigorously implement legislation to end ocean dumping and will seek stronger legislation to enforce against ocean pollution.

Gibbons X 4.582

Fostering International Cooperation on the Environment:

- o Secretary of State Baker, in the first address of his tenure as Secretary, called for multilateral action on the problem of global warming.

- ~~o The EPA, under President Bush's leadership, has developed the first options ever for consideration by the countries of the world if they are to reach a pact to slow down global warming.~~

Gibbons R4586

- o The President will convene an international conference on the environment and will direct the Treasury Department to promote environmental considerations as a factor in lending decisions of multilateral development banks.

Cleaning up the Alaskan oil spill:

- o A joint federal-state resource recovery team has convened, with the Coast Guard leading the coordination of the Federal Government's role in the cleanup, and the National Transportation Safety Board investigating the accident itself. Exxon has accepted the responsibility of paying for the cleanup.

- o [Insert to be added on the results of Transportation Secretary Skinner, EPA Administrator Reilly and Coast Guard Commandant Admiral Yost's assessment of the situation.]

- INSERT A -

#

○ The Administration will urge Congress to move quickly to enact comprehensive oil spill legislation that will include adoption of two International Protocols. These Protocols would standardize liability limitations for which shipowners ^{others} would be responsible in the event of an oil spill ~~and~~ would ensure a sufficient level of compensation to cover damage and clean-up costs. In addition, the treaties would provide for an internationally guaranteed system of shipowner financial responsibility higher than existing federal and state statutes, automatic jurisdiction in U.S. courts over state statutes, automatic jurisdiction in U.S. courts over the ship owner and his insurer and automatic enforcement of U.S. judgments in other countries' courts.

**PRESIDENT BUSH'S ACTION TO PROTECT THE ENVIRONMENT
TALKING POINTS**

- o President Bush, a longtime environmentalist, has **already taken strong action** to protect the environment ~~in a number of areas~~. He began by appointing ^{a strong Cabinet committed to protect the environment: Lujan; Interior; Watt; Energy etc.} William Reilly to lead the EPA, the first time the head of a major environmental organization has been chosen for the post. During the short time he has held office, the President's actions include:

Working for Cleaner Air:

- o The President ^{Committed his Administration to Submitting a new} ~~will propose reauthorization of the Clean Air Act~~, including provisions for control of acid rain.
- o The President has ~~made a call~~ ^{made a call} for the ~~global phaseout~~ ^{phase out of} of CFCs by the year 2000. ^{the development of environmental} ~~He is urging the nations of~~ ^{Safe} ~~the world to use the available options under the~~ ^{Substitut} Montreal Protocol to ~~significantly tighten the~~ agreement to a full phase-out.
- o The EPA ~~has already~~ ^{long-awaited} issued regulations on fuel volatility standards, an important step toward controlling smog.

a greenhouse gas that contributes to global warming

Enhancing Water Quality:

- o Our water -- especially our groundwater -- must be protected. The FY 1990 ~~program funding~~^{budget} will address critical needs in water quality assessment, research and public education.

Speeding Hazardous Waste Cleanup:

- o On March 10, the President announced he will be seeking new legislation ~~that will~~^{to} give the United States government authority to ban all exports of hazardous waste except where an agreement exists with the receiving country ~~providing for~~^{to assure} the safe handling and management of those wastes.
- o The President ~~will~~^{is} reinvigorate^{ing} the Superfund hazardous waste^{clean-up} program by directing EPA to take a number of actions, including stricter enforcement of pollution penalties, stepped-up cost recovery cases, and increased emergency cleanup authority. EPA Administrator Reilly has launched a 90 day management review to look for ways to speed clean-ups.
- o President Bush has instructed Administrator Reilly to ~~begin~~^{undertake} a comprehensive internal management review of Superfund^{which is scheduled to} ~~That review will~~ be completed June 1.

Preserving our Wetlands and Coastal Areas:

- o The President pledged to develop a policy of no net loss of American wetlands, and has instructed an interagency task force to develop initiatives to implement this commitment.

- o The EPA has ^{started.} ~~initiated~~ a tracking system for medical wastes, a ^{first} ~~key~~ step in a comprehensive program ^{to} ~~of~~ ~~cleaning up~~ ^{keep} our beaches ^{clean.} An interagency task force is now working on the New York - New Jersey area, to control solid waste on coastal waters.
- o The President has instructed Administrator Reilly to develop new initiatives ^{to carry forward his pledge} ~~on coastal zone management.~~ for a new era of coastal awareness.

Fostering International Cooperation on the Environment:

- o Secretary of State Baker, in the first address of his tenure as Secretary, called for multilateral action on the problem of global warming. ~~expected effects of global warming are:~~
- o The EPA, under President Bush's leadership, ~~has~~ is ^{prepared a comp} developed ~~by the first~~ options ~~ever~~ for consideration by the countries of the world if ^{we} they are to reach a pact ^{assist in slowing} to ~~slow down~~ global warming trends.

- o ~~The President will convene an international conference on the environment and will direct the Treasury Department to promote environmental considerations as a factor in lending decisions of multilateral development banks.~~

The President has directed

I do not believe we should call attention to this until we have progressed further in its development... unless you can find a compelling reason to keep it in.
Ken Yale.

Cleaning up the Alaskan oil spill:

- o A joint federal-state resource recovery team ^{was} ~~has~~ convened, with the Coast Guard leading the coordination of the Federal Government's role in the cleanup, and the National Transportation Safety Board investigating the accident itself. Exxon has accepted ~~the~~ responsibility ^{for} ~~of~~ paying for the cleanup.

- o [Insert to be added on the results of Transportation Secretary Skinner, EPA Administrator Reilly and Coast Guard Commandant Admiral Yost's assessment of the situation.]

RESPONSE:

In addition to mentioning the ban on ocean dumping by the end of 1991, we may wish to note the President's proposal in his budget for \$200 million to be used for new recreation lands through the Land + Water Conservation Fund.

James W. Cicconi
 Assistant to the President
 and Deputy to the Chief of Staff

**PRESIDENT BUSH'S ACTION TO PROTECT THE ENVIRONMENT
TALKING POINTS**

- o President Bush, a longtime environmentalist, has already taken strong action to protect the environment in a number of areas. He began by appointing William Reilly to lead the EPA, the first time the head of a major environmental organization has been chosen for the post. During the short time he has held office, the President's actions include:

Working for Cleaner Air:

- o The President will propose reauthorization of the Clean Air Act, including provisions for control of acid rain.
- o The President has made a call for the global phaseout of CFCs by the year 2000. He is urging the nations of the world to use the available options under the Montreal Protocol to significantly tighten the agreement to a full phase-out.
- o The EPA has already issued regulations on fuel volatility standards, an important step toward controlling smog.

Enhancing Water Quality:

- o Our water -- especially our groundwater -- must be protected. The FY 1990 program funding will address critical needs in water quality assessment, research and public education.

Speeding Hazardous Waste Cleanup:

- o On March 10, the President announced he will be seeking new legislation that will give the United States government authority to ban all exports of hazardous waste except where an agreement exists with the receiving country providing for the safe handling and management of those wastes.
- o The President will reinvigorate the Superfund hazardous waste program by directing EPA to take a number of actions, including stricter enforcement of pollution penalties, stepped-up cost recovery cases, and increased emergency cleanup authority.
- o President Bush has instructed Administrator Reilly to begin a comprehensive internal management review of Superfund. That review will be completed June 1.

Preserving our Wetlands and Coastal Areas:

- o The President pledged to develop a policy of no net loss of American wetlands.

- Greenberg*
- o The EPA has initiated a tracking system for medical wastes, a key step in a comprehensive program of cleaning up our beaches. An interagency task force is now working on the New York - New Jersey area, to control solid waste on coastal waters.

The President has instructed Administrator Reilly to develop new initiatives on coastal zone management.

Fostering International Cooperation on the Environment:

- The President is committed to end ocean dumping by the end of 1991, and the EPA will issue no new permits for ocean dumping of sludge or industrial waste.*
- o Secretary of State Baker, in the first address of his tenure as Secretary, called for multilateral action on the problem of global warming.
 - o The EPA, under President Bush's leadership, has developed the first options ever for consideration by the countries of the world if they are to reach a pact to slow down global warming.
 - o The President will convene an international conference on the environment and will direct the Treasury Department to promote environmental considerations as a factor in lending decisions of multilateral development banks.

Cleaning up the Alaskan oil spill:

- o A joint federal-state resource recovery team has convened, with the Coast Guard leading the coordination of the Federal Government's role in the cleanup, and the National Transportation Safety Board investigating the accident itself. Exxon has accepted the responsibility of paying for the cleanup.

- o [Insert to be added on the results of Transportation Secretary Skinner, EPA Administrator Reilly and Coast Guard Commandant Admiral Yost's assessment of the situation.]
