**TALKING POINTS ON THE FSX AGREEMENT**

- o On May 1, President Bush sent notification to Congress of his support for the FSX agreement, with clarifications of the original Memorandum of Understanding which was signed in November of 1988. These clarifications related to workshare and the transfer of technology.
  
- o The final agreement was reached after thorough and intense interagency review, and the President is satisfied that the agreement in every respect meets our requirements and will serve the national interest. It will contribute significantly to strengthening our mutual defense posture in East Asia.

**THE AGREEMENT ITSELF:**

- o Under the FSX agreement, Japan will fund the entire project; no U.S. taxpayer money will be spent. American companies will share approximately 40 percent of the development work, estimated to be approximately \$480 million, and a similar share of the production phase, estimated to be approximately \$2 billion.
  
- The total of \$2.5 billion for the entire program is approximately the same as General Dynamics would have received if Japan had bought the F-16 aircraft directly.

- The agreement is intended to result in an estimated 22,700 man-years of jobs for American workers.

**TECHNOLOGY TRANSFER:**

- o Sensitive U.S. technology is fully protected under the FSX agreement. It cannot be diverted to other uses without express U.S. consent. Moreover, the technology is not being given away:
  - Japan will pay an R&D recoupment charge for the baseline F-16 technology, thereby lowering the investment costs of our own F-16 program.
  - Japan will also pay a royalty charge for every FSX produced.
- o The U.S. will have access to all technology related to the FSX -- at no charge for technology derived from American-origin technology, and a guaranteed right to purchase all technology which Japan brings to the project or which is derived from such technology.
- o Certain state-of-the-art technologies from the most recent models of the F-16 will not be transferred.

**CONCLUSION:**

- o FSX is a new concept. It was conceived to assure that the future development of Japanese military aircraft will be carried out in cooperation with the United States and that American industry will participate fully.

MEMORANDUM FOR CHRISS WINSTON

FROM: STEPHEN G. RADEMAKER *SR*  
ASSOCIATE COUNSEL TO THE PRESIDENT

SUBJECT: Talking Points on the FSX Agreement

At the request of James W. Cicconi, Counsel's Office has reviewed the above-referenced matter. There appears to be an error in the final paragraph of the first page. If development of the FSX will result in revenues of \$480 billion for U.S. companies, the President deserves more credit for this agreement than he has received to date. We suspect that the correct figure is \$480 million.

Apart from this correction, Counsel's Office has no legal objection to the talking points as drafted.

### TALKING POINTS ON THE FSX AGREEMENT

- o On May 1, President Bush sent notification to Congress of his support for the FSX agreement, with clarifications of the original Memorandum of Understanding which was signed in November of 1988. These clarifications related to workshare and the transfer of technology.
  
- o The final agreement was reached after thorough and intense interagency review, and the President is satisfied that the agreement in every respect meets our requirements and will serve the national interest. It will contribute significantly to strengthening our mutual defense posture in East Asia.

#### THE AGREEMENT ITSELF:

- o Under the FSX agreement, Japan will fund the entire project; no U.S. taxpayer money will be spent. American companies will receive a 40% share of the development, estimated to be approximately \$480 billion, and an equivalent share of the production phase, estimated to be approximately \$2 billion.
  
- The total of \$2.5 billion for the entire program is approximately the same as General Dynamics would have received if Japan had bought the F-16 aircraft directly.

-- The agreement results in an estimated 22,700 man-years of jobs for American workers.

**TECHNOLOGY TRANSFER:**

- o Sensitive U.S. technology is fully protected under the FSX agreement. It cannot be diverted to other uses without express U.S. consent. Moreover, the technology is not being given away:
  - Japan will pay an R&D recoupment charge for the baseline F-16 technology, thereby lowering the investment costs of our own F-16 program.
  - Japan will also pay a royalty charge for every FSX produced.
- o The U.S. will have access to all technology related to the FSX -- at no charge for technology derived from American-origin technology, and a guaranteed right to purchase all technology which Japan brings to the project or which is derived from such technology.

**CONCLUSION:**

- o FSX is a new concept. It was conceived to assure that the future development of Japanese military aircraft will be carried out in cooperation with the United States and that American industry will participate fully.

This  
seems  
like alot  
I think  
it should  
be "million"

- The agreement results in an estimated 22,700 man-years of jobs for American workers.

**TECHNOLOGY TRANSFER:**

- o Sensitive U.S. technology is fully protected under the FSX agreement. It cannot be diverted to other uses without express U.S. consent. Moreover, the technology is not being given away:
  - Japan will pay an R&D recoupment charge for the baseline F-16 technology, thereby lowering the investment costs of our own F-16 program.
  - Japan will also pay a royalty charge for every FSX produced.
- o The U.S. will have access to all technology related to the FSX -- at no charge for technology derived from American-origin technology, and a guaranteed right to purchase all technology which Japan brings to the project or which is derived from such technology.

**CONCLUSION:**

- o FSX is a new concept. It was conceived to assure that the future development of Japanese military aircraft will be carried out in cooperation with the United States and that American industry will participate fully.
