INFORMATION

MEMORANDUM TO THE PRESIDENT

THROUGH: CHRISS WINSTON *W*
FROM: MARY KATE GRANT *MKG*
SUBJECT: LEADERS MAGAZINE ARTICLE

I. SUMMARY

Attached for your review is a proposed article for Leaders Magazine, on the importance of family values in solving such social problems as crime, drug abuse and homelessness. This will reach a global audience of government and business leaders. As in the American Society of Association Executives speech, we have included a call to action for service to others.

I believe the magazine's photographers have been scheduled for a photo-op for this edition tomorrow, Friday, March 30, at 10 a.m.

II. DISCUSSION

Leaders is published quarterly and is circulated to distinguished leaders of the world. Circulation is strictly limited and is approximately 35,000. To receive the magazine one must be the leader of a Nation, an international company, a world religion, or an international labor organization; a chief information or financial officer, a Nobel laureate or a leader in science or the arts.

Several former Presidents have written articles for Leaders, including several by President Reagan.

PRESIDENTIAL ARTICLE: LEADERS MAGAZINE
TO BE TITLED

We are a world made up of families, with no two families alike. And yet there are dreams that we, as members of families, all share. The hopes that any one of us has had as a parent are the hopes of parents around the world: that our children grow up in a safe environment with a good education and that they be given the same opportunities as anyone else's children. That they lead a life of values -- a life in which they can take pride.

We are also a world made up of communities, thousands upon thousands of religious, ethnic, social, business, labor and neighborhood organizations, all of them vital to our future together.

With God's help, each of us must chart a course for our own lives and the lives of our children. By working through our families and communities, we can change things for the better -- and in the process, change our nations and our world for the better.

There is no problem in the world that is not being solved somewhere. Around the globe, citizens are facing the challenges that threaten their societies and the world community: drug use, hunger, homelessness, illiteracy, disease, and the breakdown of the family.

There's a role -- an important role -- for government in finding solutions. But we all know that government isn't the only institution with the power to make a difference. Every reader of this magazine is in a position to help. The resources, the expertise, and the potential energy you command through your organizations and governments are tremendous. You can be a powerful force for making this a better world for our children.

But no matter who we are or what we do for a living, each of us as individuals can make a difference. Isn't that why we're here -- to live a life of meaning? Each of us must defend and affirm the values, the fundamental moral principles, important to all of us -- principles like tolerance and decency, responsibility and faith.

Meeting with some community-minded association executives not too long ago, I talked about a story that the Reverend Martin Luther King once told about serving others. He began with the famous Biblical story of the Good Samaritan, who stopped to help a stranger whom two other travelers had passed by. Dr. King asked himself: Why hadn't the others stopped to help? Perhaps they didn't stop because they were too busy. Maybe they had important work waiting for them in Jerusalem. So on they went.

Then one day, on his first trip to the Holy Land, Dr. King and his wife travelled that road from Jericho to Jerusalem -- and he understood. He walked the twisting road, full of blind curves, each a perfect ambush point for robbers. And he realized that perhaps the men had not stopped because they were afraid.

The way Dr. King imagined it, the passerby asked themselves, "If I stop to help this man, what will happen to me?" And they went on their way.

But then the Good Samaritan came along, and asked himself, "If I don't stop to help this man -- what will happen to him?" That's when he found the courage to stop and help -- and the courage to serve.

Which question do we ask ourselves when we see a homeless man huddled on a steam grate? Or when we see a teenage runaway, living a desperate existence on drugs and alcohol? What will happen to them if we do not stop and help?

But unlike the Good Samaritan, we aren't alone. We have the power of collective action as a force for good.

But it takes courage to go to your organizations and ask that they place community service at the center of their agenda. Sometimes, it may be difficult to insist that community service has a place in every person's life. And it will take tenacity to make each one believe that from now on, any definition of a successful life must include serving others. But that's exactly what we must do.

This is the challenge before you: Find out what's working in your industry, your profession, or your nation. Spotlight community service programs that are effective, and challenge others to make those programs the blueprints for their own efforts. Put the power of your resources behind the kind of

individual who gives 200% to help people in need. Channel your collective energies into community service.

It all begins with the kind of moral principles -- values we consider important and these begin with the family -- the family living under your roof, but also the family of nations, the family of man. Living one's values is the essence of a meaningful life, a successful life. If we live by our principles and teach them to our children we will find our nations and our world changing for the better.

With God's help, each of us must chart a course for our own lives and the lives of our children. But working through our own families and communities, we can change things for the better -- and in the process, change our nations and our world for the better.

There is no problem in the world that is not being solved somewhere. Around the globe, citizens are facing the challenges that threaten their societies and the world community: drug abuse, hunger, homelessness, illiteracy, disease, and the breakdown of the family.

There's a role -- an important role -- for government in finding solutions. But we all know the government isn't the only organized entity with the power to make a difference. Every reader of this magazine is in a position to help. The resources, the expertise, and the potential energy you command through your organizations and governments are tremendous. You can be a powerful force for making this a better world for our children.

But no matter who we are or what we do for a living, each of us as individuals can make a difference. For isn't that why we're here -- to live a life of meaning? Each of us must stand up for the values important to all of us -- values like tolerance and decency, responsibility and faith.

Meeting with some community-minded association executives not too long ago, I talked about a story that Martin Luther King told once about serving others. He began with the famous story of the Good Samaritan, who stopped to help the stranger whom two other Samaritans had passed by. Dr. King asked himself: Why didn't the others stop to help? He came up with some good reasons. Perhaps they didn't stop because they were too busy. Maybe they had more important work waiting for them in Jerusalem. So on they went.

Then one day, on his first trip to the Holy Land, Dr. King and his wife travelled that road from Jerusalem to Jericho -- and he understood. He walked the twisting road, full of blind curves, each a perfect ambush point for robbers. And he realized this: the men hadn't stopped because they were afraid.

The way Dr. King imagined it, one asked himself, "If I stop to help this man, what will happen to me?" And he went on his way.

But then the Good Samaritan came along, and he asked himself, "If I don't stop to help this man -- what will happen to him?" That's when he found the bravery to stop and help -- to serve.

Which question do we ask ourselves when we see a homeless man huddled on a steam grate? Or when we see a teenager who's run away from home, living a desperate existence of drugs and alcohol? What will happen to them if we do not stop and help?

But unlike the Good Samaritan, we aren't alone. We have the power of collective action as a force for good.

But it'll take courage to go to your organizations and suggest that they place community service at the center of their agenda. It may be difficult to insist that community service has a place in every person's life. And it will take some tenacity to make each one believe that from now on, any definition of a successful life must include serving others. But that's exactly what we must do.

This is the challenge before you: Find out what's working in your industry, your profession, or your nation. Spotlight those community service programs which are most effective, and dare others to make those programs the blueprints for their efforts. Put the power of your resources behind those

individuals who give 200% to help people in need. Channel your collective energy into community service.

It all begins with values, which begin with the family -- the family of nations, the family of man. Living one's values is the essence of a meaningful life, a successful life. And teaching those values to our children is the way to change our nations and our world for the better.

PRESIDENTIAL ARTICLE: LEADERS MAGAZINE
ON THE IMPORTANCE OF FAMILY VALUES

We are a world made up of families, with no two families alike. And yet there are dreams that we, as members of families, all share. The hopes that any one of us has had as a parent are the hopes of parents around the world: that our children grow up in a safe environment with a good education and that they be given the same opportunities as any else's children. That they lead a life of values -- a life in which they can take pride.

We are also a world made up of communities, thousands upon thousands of religious, ethnic, social, business, labor and neighborhood organizations, all of them vital to our future together.

With God's help, each of us must chart a course for our own lives and the lives of our children. But working through our own families and communities, we can change things for the better -- and in the process, change our nations and our world for the better.

There is no problem in the world that is not being solved somewhere. Around the globe, citizens are facing the challenges that threaten their societies and the world community: drug abuse, hunger, homelessness, illiteracy, disease, and the breakdown of the family.
